Mr. LODGE. I appreciate the Senator's courtesy. I wish to speak for just 1 minute.

Mr. President, I should like to have the attention of the Senator from Wisconsin [Mr. WILEY] and the Senator from Nebraska [Mr. WHERRY]. I wish to say that in the last hour or so I have been talking to a number of the Members of the Senate who have expressed a great deal of consternation at the thought that the pending matter would go over to the 20th or 25th of February. The thought was expressed to me in no uncertain terms that, if that were done, we would have to look to the country for considerable opposition and objection to such unnecessary delay of the business of the Senate. So I express the view that we should reach a vote this week.

Mr. TYDINGS. Mr. President, what I shall have to say in regard to the St. Lawrence seaway project divides itself roughly into three parts, but the part to which I shall speak at greater length than the other two parts is the manner in which the proposition comes to this body, to wit, by executive agreement rather than by treaty.

The first part of what I shall have to say is more or less a summary of what has already been better said and in greater detail by the Senator from Massachusetts [Mr. LODGE], who, addressing the Senate last Wednesday on the St. Lawrence seaway project, made one of the best and most comprehensive expositions of a great subject that I have heard in the Senate for many, many years. Likewise the Senator from Louisiana [Mr. OVERTON] contributed mightily toward information which should lead us in passing on this important question.

The building of the St. Lawrence seaway at this time is unwise, unsound, and unconstitutional.

It is unwise because it will mean a further substantial drain on the finances of the United States, already carrying a $257,000,000,000 debt. It will tend to keep up the present already high tax rate. With such a huge expenditure as is called for by the Marshall plan, it is not wise now to add upward of a billion-dollar commitment to it, which the seaway is likely to entail eventually.

By consuming money that would otherwise be available, it will postpone important river, harbor, flood-control, and other projects, upon which little work has been done since the beginning of the war, and which it is wise now to rehabilitate, improve, and bring up to date.

The project is unsound because it has not been proved that the revenues to be derived from the tolls imposed on the St. Lawrence seaway will be sufficient to carry the project.

It is estimated that from thirty to thirty-seven and one-half million tons of iron from Canada and points in South America will be carried up the seaway to the steel mills of the Middle West. The iron deposits in Canada have not been uncovered sufficiently to estimate their volume; and even when that is done, there is no railway to transport the ore. A railroad would have to be constructed as a condition precedent to transporting such iron ore from the mines in Canada to the St. Lawrence seaway.

In regard to the estimated six and one-half to eleven and one-half million tons of grain to be carried on the seaway, no thought has been given to the effect on the remainder of the country of diverting such a large tonnage from the routes and places and installations which now are handling it. The same observation is true as to the 4,000,000 tons of coal which it is estimated the seaway will carry.

But finally, Mr. President, the proposition is unconstitutional because it attempts to do, by executive agreement supported by an act of Congress, what can be done only by a treaty ratified by the United States Senate. Executive agreements between governments are proper vehicles which have for their objective the disposition of matters of temporary interest, such as covering the movement of armed forces, the adjustment of claims, protocols, tariff agreements, postal agreements, the making of armistices in time of war, and the like.

The St. Lawrence seaway, on the other hand, is a project of very exceptional magnitude. It will take 4 years to build it. It will impose obligation upon our Government for many years in the future. It gives partial control to our Government over the territory of another country. It may involve executory and administrative action lasting for a century. Therefore, this matter should be dealt with through the medium of a treaty, if at all, and not through the medium of an executive agreement supported solely by an act of Congress. Any succeeding Congress can repeal the legislation which supports an executive agreement. No Member of the Senate will deny that. A treaty is not in this status. It is morally and legally binding on the Government, and cannot be revoked except within the terms which the treaty itself provides.

If an executive agreement between the United States and Canada, supported by an act of Congress is valid to deal with the St. Lawrence seaway project, then there is no conceivable international agreement, no matter for how long a time or no matter what the tremendous sweep of its import embraces, that hereafter cannot likewise be effected through executive agreement, rather than by treaty.

Mr. President, I shall be glad to yield for interruptions, as I now come to the part of my remarks which deals with the manner in which this matter comes before the Senate, as the principal reason why it should be rejected. So if I make a statement to which any Senator takes issue, I shall welcome interruption.

If the St. Lawrence seaway project can be handled by executive agreement between the United States and Canada rather than by treaty between the two countries, the treaty-making provisions of the Constitution of the United States are practically nullified, to all intents and purposes.

Let us keep in mind that the Executive agreement between President Roosevelt, on behalf of the United States, and His Majesty, the King of Great Britain, Ireland, and the British dominions beyond the seas, et cetera, providing for the construction of the Great Lakes-St. Lawrence seaway, dated March 9, 1941, embraces a gigantic engineering undertaking, which will cost upward of a billion dollars, largely to be paid for by the United States, to take 3 or 4 years to build, and to be maintained thereafter for centuries, and contemplates a permanent, exceptional, and far-reaching and primary relationship without the limitation of time between our own and another great country in any way, shape, or form.

If such an arrangement between two great countries, one of which is the United States, can be effected by executive agreement, supported only by congressional statute, then any other conceivable arrangement between our country and any other nation can be effected by similar processes.

I should like to have every Senator's attention to what I am saying, and I should like to have a denial of its accuracy if it is not a true statement of fact. The St. Lawrence agreement comes to the Senate in the form of an executive agreement rather than as a treaty, and if such an arrangement can be made between two great countries supported only by congressional statute, any other conceivable arrangement between our country and any other nation can be effected by similar processes.

This logic leads us to conclude that if President Wilson, in negotiating the treaty of Versailles and the League of Nations Covenant, instead of reducing the conclusions of the heads of the governments present to the form of a treaty, had done the very same thing through the medium of executive agreement, then a mere statute passed by the Congress supporting it would have been sufficient to give it complete validity.

Is there any lawyer in this body who advocates the St. Lawrence seaway through the medium presented who takes exception to what I have just said? I say that if President Wilson had by executive agreement submitted to this body the same proposition that was contained in the Treaty of Versailles, and it had been approved by a mere statute of the Congress, the agreement of Versailles, with the League of Nations Covenant, would have been the supreme law of the land. If there is any Senator who takes issue with that, I wish he would rise, because I do not think anyone can take issue with it who says that an executive agreement in the instant case is different from the Treaty of Versailles.

Both the Treaty of Versailles and the Great Lakes-St. Lawrence seaway project involve long-time agreements and undertakings between nations. If the St. Lawrence compact can be ratified in the fashion proposed, so could have the Treaty of Versailles, with the League of Nations Covenant included.

The able Senator from Wisconsin says, in effect, in supporting the process of

executive agreement, supported by congressional statute, for the St. Lawrence project, now pending, that had President Wilson, in the fateful years following World War I, submitted the Treaty of Versailles to Congress in the form of an executive agreement instead of a treaty, so far as the legality and propriety of the matter were concerned there would have been nothing wrong in ratifying by a majority vote of the Congress the Treaty of Versailles, or the "executive agreement" of Versailles, and that it would have had all the standing and the durability the Treaty of Versailles would have had, had it been ratified by a two-thirds vote of the Senate.

The able Senator from Wisconsin directly tells this body that treaties made between our Government and other nations never again need be ratified by a two-thirds vote of the Senate. He says, in effect, "Strike out the word 'Treaty' and substitute therefor 'executive agreement,' but otherwise let the document remain intact, and no action of the Senate to ratify as provided in the Constitution is necessary; a bare majority of the votes of the two Houses is all that is required."

I am begging for interruptions, but no one seems to desire to take issue with the points I have expressed. Therefore I assume that they are accepted at their face value.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. TYDINGS. I yield.

Mr. WILEY. I cannot agree, first, with the legal conclusion the Senator has stated, nor do I agree with what he has stated as a fact: that I made a certain statement. I made no such statement as that he quoted, and when he stated, in effect, that I concluded such and such, I am sure he was mistaken. If the Senator will yield for just a few moments, I shall be very happy to reply to him on the subject of the distinction between executive agreements and treaties.

In 1909 the United States entered into a treaty with Canada, and, as was so ably stated by the representative from the State Department, as well as the representative from the law department of this Government, the particular joint resolution now pending would authorize the making of the agreement which implements the treaty. Second, for 50 years there have been on the Canadian border instances in which we have built bridges and tunnels, and other obstructions, as we might call them, in relation to the St. Lawrence, which have been effectuated by executive agreements, as they have been called, or by agreements known as legislative agreements, when the Parliament of Canada and the Congress of the United States have passed resolutions. Of course, since that time we have entered into great international agreements, like the Bretton Woods agreement, and we have gone into the United Nations, and none of those commitments have been by treaty.

Different from that, however, we have had a basic treaty with Canada which we are attempting to implement by the agreement now before us.

I wish to say again as I said on a previous occasion, that silence does not lend consent. What I am trying to do is to be very fair in this matter. I have always enjoyed the very clear thinking of the Senator from Maryland, though I think many times his premises are wrong and his conclusions erroneous, and they are in this case.

Mr. DONNELL. Mr. President, will the Senator from Maryland yield?

Mr. TYDINGS. I shall yield in a moment. I merely wish to say I think the case I have made is even stronger after the Senator from Wisconsin has spoken than it would have been if he had remained silent. I yield to the Senator from Missouri.

Mr. DONNELL. Mr. President, I wish to make one or two observations at this point very briefly. One is that I have been very greatly interested in the argument being presented by the distinguished Senator from Maryland, in whose judgment and learning I have great confidence, and for whom I have great admiration.

I wish to say, in the second place, however, that I do not consider that merely because a Senator shall not instantaneously rise and present arguments in opposition to those of the Senator he is thereby estopped from later presenting his views if they happen to differ from those so eloquently and skillfully presented by the Senator from Maryland.

I wish to say, in the third place, that I have been considering the constitutional question involved, and have been much disturbed in regard to the arguments pro and con on the question of the constitutionality of the proposed action. While I think I have arrived at a conclusion, my mind is at least reasonably well disposed to hearing argument on both sides.

I wish to present a thought for the consideration of the Senator from Maryland, and ask him for his judgment with respect to it.

It has been said by an author, Mr. James W. Garner, in 29 American Journal of International Law, that—

> There is no inconsistency between the authority of the President and the Senate to regulate foreign relations through agreements in the form of treaties, and the power of the Fresident and Congress to deal with matters of foreign policy through legislative action. Which of the two procedures shall be employed in a given case is a matter of practical convenience or political expediency rather than of constitutional or international law.

I am not certain as to the answer to the question. I am looking for information and for light upon it. I suggest to the Senator from Maryland this inquiry. Suppose it be true that a given subject matter as, for illustration, that which is now before us, does legitimately come within the sphere of the regulation of interstate or foreign commerce, or both. Suppose we start with that as an assumption. Suppose we take the further assumption that it would be entirely proper to proceed through the method of treaty in the bringing about of the final decisions or agreements upon the particular topic under consideration. If Congress is willing to legislate upon that particular subject matter, and the subject does fall within the power of Congress, namely, in the sphere of interstate and foreign commerce, may it not still be true that it may be perfectly legitimate, perfectly constitutional, for Congress and the President, through the method of executive agreement approved by Congress, to enter into the foreign undertaking, even though it would likewise be perfectly permissible, and perhaps wiser, from the standpoint of practical convenience or good judgment, to follow the other course?

Mr. President, I do not know whether I have made my position clear, but the point to which I direct the attention of the Senator is that we are dealing here today with the St. Lawrence seaway, a subject matter, we will say, within the scope of the subjects over which Congress may legislate, namely, interstate or foreign commerce. Even though it might better accord with the Senator's and my own ideas of the proprieties to use the treaty method, without action by both Houses of Congress upon an executive agreement, would not the method now proposed be an exercise of political expediency or of practical convenience, which would leave the ultimate agreement perfectly valid, even though the Senator and I might disagree as to the propriety of the method pursued?

Do I make my point clear to the Senator?

Mr. TYDINGS. The Senator makes his point clear. I will attempt to answer him first by drawing two illustrations which came to mind as the Senator asked the question, which form the premise for my ultimate reply to him, so that he will know what my line of thinking is in line with the supposition he is presenting.

The Constitution provides that all bills for raising revenue shall originate in the House of Representatives. Let us suppose that a bill for raising revenue originated in the United States Senate. Let us suppose it went to the House, and the House did not stand on its constitutional ground. The bill originated in the Senate contrary to the Constitution, but it went through the House, and the House, we will say, waived its right of initiation of a revenue bill, and the bill passed both Houses and was signed by the President. In order that I may answer the Senator more clearly, I should like to ask him, would or would not that be a constitutional procedure?

Mr. DONNELL. My personal judgment is, Mr. President, that neither House of Congress can waive the positive provisions of the Constitution. Therefore, in a case of the type suggested, I should say that, if tested properly in the courts, unless there were involved some political question of which the courts would take no cognizance, the act would fail, because there had been a violation of the Constitution. That is purely an off-hand opinion, and I might change it upon further reflection. My answer may well illustrate the fact that it is hardly proper to say or to take the view that Senators are estopped from taking a position because we do not instantaneously rise and contradict the Senator as he speaks after

the careful thought he has given to the subject.

Mr. TYDINGS. Mr. President, I should like to say first, that the Senator from Maryland baited his hook before he answered that question, because he thought the best way to get the issue discussed from all sides was to challenge those who disagree, so that the conflict of opinion would shed light upon the subject, and show what was right and what was wrong. In the case I presented, the Senator said the action would be a clear violation of the Constitution. Now I ask the Senator to show me in the Constitution any provision dealing with executive agreements or with agreements between this country and another country, outside of treaties.

Mr. DONNELL. Mr. President, I do not know offhand of any provision in the Constitution which mentions executive agreements. The word "agreement," I think, is used here and there in the Constitution. But that does not at all establish that there are not legitimate constitutional executive agreements. The Senator has himself, I think, indicated, at least intimated, that there may be executive agreements upon matters of merely temporary concern—I think I may use the Latin expression "modus vivendi"—matters in wartime, matters of movements of troops, matters of a temporary nature. Even if there is nothing in the Constitution which authorizes such executive agreements, I take it that it has been generally considered that the executive department may validly enter into such agreements.

But as I see it, Mr. President, that is not the question here at issue. I have not come to a final conclusion, though I think I have arrived at a tentative conclusion, at least. To my mind the question here is: When Congress has jurisdiction over a particular subject matter, as, for illustration, interstate and foreign commerce, does the mere fact that it would be appropriate or perhaps wiser to use the treaty method make unconstitutional the legislative method, namely, the passage of a statute by Congress, supported ultimately by the signature of the President? As I see it, that is the question which is primarily involved here.

Mr. TYDINGS. Mr. President, the Senator has asked a very pertinent question. Of course, I am sure he already knows, as I know, that we are both in agreement that the first thing we have to do, as the French say, is to define the subject matter about which we are talking in order that there may flow from that definition a discussion which leads to a logical conclusion. I should like to know what is an executive agreement and what is a treaty, and if there is any difference between them.

Mr. DONNELL. I am not prepared at this time to give an extended answer to that question. I have in my file here, for instance, a Senate document, No. 244, Seventy-eighth Congress, second session, issued by Mr. Henry S. Fraser, formerly assistant counsel, Special Committee Investigating Petroleum Resources, addressed to Hon. TOM CONNALLY, chairman of the Foreign Relations Committee, under date of August 14, 1944, in which over a period of some 30 pages Mr. Fraser discusses, under the heading "Treaties and executive agreements," an analysis prepared on that subject.

I think an executive agreement may be of one of two types. On this question, Mr. President, I am proceeding, not as the result of a carefully thought-out address, such as the distinguished Senator from Maryland has been delighting us with here this afternoon. There are two types of executive agreements. One is an agreement made by the President himself, not supported at all by legislation, as, for illustration, something that is of a temporary nature, something in the course of an uncompleted transaction, which the President may do, validly, which he may enter into without legislative approval at all. That may be one type of executive agreement.

I am inclined to think, Mr. President, that that type should be very much limited, and I doubt very much whether the Executive in past years has remained within the limits in which he should remain. On the other hand, I think there may be a second type of executive agreement, and that is the one, as I see it, which is before us here—an agreement entered into by the executive department, subject, however, to confirmation and approval by legislative enactment, causing the agreement to be binding finally. There I think we have perhaps an entirely different legal situation than applies in the case of the executive agreement entered into solely by the Executive, without legislative confirmation or approval.

Mr. TYDINGS. Mr. President, will the Senator permit me to interrupt right there?

Mr. DONNELL. Certainly.

Mr. TYDINGS. I think that my own thoughts go pretty closely along with those of the Senator. I wish to make a statement, and I am not making it offhand, just by way of chance remark. I look upon the Senator from Missouri as one of the best informed men on fundamental law in this body. I am very glad to have his opinion. Now I am going to give him just a small distinction between a legislative agreement on the one hand and a treaty on the other. Let us assume that we consider the matter before us to be an executive agreement.

Mr. DONNELL. If I may interrupt the Senator for just a moment, before I overlook one point I have in mind. I am a little fearful that my remark about being estopped by reason of sitting silent and not interrupting might be an indication that I took an unpleasant attitude.

Mr. TYDINGS. Oh, no, no, Mr. President.

Mr. DONNELL. I think it is only fair to have it understood that merely because any of us sat here without raising our voices on this question, the Senator would not, I am sure, want to estop us from a later presentation after we may have made an appropriate investigation.

Mr. TYDINGS. I should like to make a suggestion to the Senator. Let us assume that this is an executive agreement. Let us assume that it passes the Senate. Let us assume that it passes the House. Let us assume that the money is appropriated and that the canal is built. Six months after the canal is built, let us assume that the Congress wishes to repeal the law. I ask the Senator whether that would be any violation of any agreement with Canada?

Mr. DONNELL. My answer to that question offhand, is that I think it is within the power of Congress to repeal a statute. Six months or a year after we enacted a statute the Congress could repeal it. However, I think that opens up another question which is quite independent of the one which the Senator has put to me, that is, whether, under international law, there might not still be a liability on the part of this country toward the other contracting party, even though the statute had been repealed.

If the Senator will indulge me for a moment longer, I think it is likewise true that if a treaty is negotiated by the President and approved by the Senate with the constitutional two-thirds majority of Senators present, a statute may repeal the treaty. In that connection I quote from 63 Corpus Juris, 842—and I may interpolate to say that the writer is referring to the Constitution of the United States:

> Treaties and acts of Congress are placed on the same footing and are of like obligation, so that, neither having any inherent superiority over the other, either may supersede the other; and in case of conflict the one which is later in date will control, provided, in the case of a treaty subsequent in time, it is self-executing.

I quote from 52 American Jurisprudence, 817, the following:

> The latest expression is the prevailing one. A treaty may supersede a prior act of Congress, and an act of Congress may supersede a prior treaty.

So my answer to the Senator would be that, even though it be true, both in the case of treaties and in the case of statutes, that the Congress may be able, by subsequent statute, to set aside a previously enacted statute or a treaty which has been previously approved, there may nevertheless be a liability created in both instances, under the rule of international law, from which the United States Government cannot escape.

Mr. TYDINGS. I thank the Senator, but I think he has missed the point. If we have a treaty and its duration is set out, and the Senate ratifies it, we cannot abrogate it unless the other party breaks the treaty. A treaty is more or less a contract between two countries, and runs for its life. The supposition is, when it is entered into, that it will not be violated by either of the contracting parties.

But our Constitution and mode of government are wide open. So, if we enact a mere statute to supplement international action, whoever deals with us must deal at arm's length. He knows, at the time we ratify through the medium of statutory action, that the next month, the next year, or 5 years from that time, we can repeal it, because that is inherent in the contract. I do not think that is in the same category with a treaty, the limitations of which are defined in the instrument itself.

Mr. DONNELL. Mr. President, will the Senator yield for a further brief observation?

Mr. TYDINGS. Does the Senator see my distinction?

Mr. DONNELL. I see the Senator's distinction, but to my mind the distinction is not sound. It seems to me that the same rules apply as to the right of Congress to repeal by legislative act, on the one hand a statute, and on the other hand, a treaty.

I want my statement to be clearly understood. In the first place, I am not at all advocating that Congress should repeal a solemnly enacted statute upon which another party relies—in this case Canada—nor am I advocating that this country violate the terms of any treaty, or by statute set aside such treaty. My point is, however, that just as in the case of a contract, to which the Senator has alluded, it is true that either party has it within its power to break the contract. Nevertheless, the mere fact that he has the power to break the contract does not necessarily relieve him from an obligation to pay damages under the contract. Although it may be true that either the United States or Canada might on the one hand set aside a statute by subsequent legislative enactment, or might, in effect, repeal a treaty through subsequent legislative action, it does not at all follow that either of those nations which might break the solemn undertaking entered into under the authority of the statute, or by confirmation of the statute, or might violate a treaty, would be relieved from an obligation under international law.

Mr. TYDINGS. I thank the Senator; but I do not think he has yet focused his fine mind on the point which I have tried to bring out.

If we adopt and approve this executive agreement through the medium of statutory congressional approval, it is a known fact that such approval is subject to recall at the whim of this or any other Congress. But if we ratify a treaty by a two-thirds vote, that is a binding obligation upon the Congress and the Government of the United States for such length of time as the treaty says it shall be binding, whereas in the case of a statutory act, the other power, whether it be Canada or any other foreign country, knows that our Constitution provides that we can, with no impropriety, no breach of the contract, and no breach of the executive obligation, recall any statute at any time when any future Congress sees fit to do so.

That is the point. One type of agreement has sanctity of duration. The other has indeterminate duration. Both may be for the same duration, assuming that the Congress does not repeal its act. In one case the treaty cannot in good conscience be repealed, revised, rejected, struck down, or revoked. But in the other case, in good conscience any succeeding Congress may repeal ratification of an executive agreement; or this Congress may do so, within 1 hour after it becomes a law. We know, and all the world knows, that no Congress under God's sun can bind a succeeding Congress, whereas, on the other end, in the case of a treaty to last for 50 or 60 years, it is an obligation, and it is outside the sphere of Congress to review and strike down the time limitations defined.

For the purpose of discussion, let us assume that Congress may deal with the subject in one way or the other. However, always in every executive agreement which relies on ratification solely by congressional statutes, there is notice to the other party that within 1 hour after it is ratified a succeeding Congress or the present Congress may repeal it. That is the distinction, as the Senator already knows, I am sure, made by the overwhelming majority of authorities on constitutional law with regard to the treaty-making power of the United States. One set of agreements known as treaties stand with sanctity, with long duration, with the pledged word of the Government. The other, known as executive agreements, which may rely in part upon congressional approval, are good only so long as the Congress which approved them, or a succeeding Congress, determines they shall be good.

Mr. DONNELL. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. THYE in the chair). Does the Senator from Maryland yield to the Senator from Missouri?

Mr. TYDINGS. I yield.

Mr. DONNELL. I think the Senator is in error in his view of the law as to the inviolability of treaties. As I understand the law, it is perfectly true, as he has stated, that when an act of Congress has been passed it may be revoked by a subsequent act of Congress 1 hour or 1 month or 1 year thereafter. His point is that a foreign nation dealing with us and receiving an agreement entered into in compliance with legislative authority, by the passage of a statute, takes such agreement knowing the fact that Congress can set aside the agreement.

Mr. TYDINGS. That is correct.

Mr. DONNELL. But I respectfully invite the attention of the Senator again to the citation which I read from 52 American Jurisprudence, 817, and which I think is supported by the overwhelming weight of authority, if it is not the sole authority:

> A treaty may supersede a prior act of Congress, and an act of Congress may supersede a prior treaty.

As I see it, we have a situation here in which, if Congress passes the pending measure, Congress may, under well-established law, repeal the act. If on the other hand a treaty is entered into, Congress likewise, under the law as I have read it from the Encyclopedia of American Jurisprudence, may repeal such treaty.

Mr. President, I want it to be perfectly clear, first, that I am not advocating any such course of action, either in the case of a statute or a treaty. I want it perfectly clear also that it seems to me that in the case of a treaty there is no different rule than applies in the case of a statute. In either case, even though Congress has the power on the one hand to set aside a prior enacted statute, and on the other hand to set aside a prior approved treaty, nevertheless, under the principles of international law, our country may remain responsible to the other contracting party for the violation of the contract which would be thus violated.

Mr. TYDINGS. I shall take two or three different sides of the Senator's argument, and should like, first, to take a concrete case so that we shall both be discussing the same thing. Let us suppose that the executive agreement now before us is to run for 50 years, and it is so set forth in the agreement. We will suppose that by treaty the same words are used, with the same condition, that the treaty is to be in force for 50 years, and may not be revoked by either government except with the consent of the other. There is the same proposition, whether it be called a treaty or whether it be called an executive agreement. Let us assume that it is ratified by the Senate by a two-thirds vote——

Mr. DONNELL. That is, the treaty?

Mr. TYDINGS. Yes. I now ask the Senator whether Congress would have the moral, the contractual, and the legal right to strike down that treaty.

Mr. DONNELL. My answer is that Congress would have the legal power to do it.

Mr. TYDINGS. I did not say that.

Mr. DONNELL. I know it. I am coming to that. It may well be that it would not have any moral right to do it any more than a person has the right to violate a contract. It may be that it would have no legal right in the sense that it may do so with impunity, without damages, but I would undertake to say that in both the cases which the Senator has set forth Congress has the legal power to set aside a prior enacted statute and a prior ratified treaty; but at the same time in both cases it might be entirely reprehensible or improper. But, whether reprehensible or improper or not, it may well be that our country would be liable in damages to the other contracting party under the terms and principles of international law.

Mr. TYDINGS. I appreciate the Senator's answer, but I do not believe it is an answer. I did not ask if we had the power. We have the power to do anything with Canada we want to do. We could go into Canada with our Army, Navy, and Air Force and take the whole country over. We would not need an executive agreement. What I asked the Senator was whether we had a moral or legal right to strike down a treaty to which we had given our solemn word, and which was binding on this Nation for 50 years, unless Canada consented to its revocation.

Mr. DONNELL. Mr. President, I should say, in the first place, that on the question of moral right of course we would have to be guided by the circumstances of the particular case. There might arise conditions under which we would have a moral right.

Mr. TYDINGS. Let us assume that none arose.

Mr. DONNELL. Very well. I would say that in the absence of other controlling circumstances, we would not have any moral right to do it.

Mr. TYDINGS. How about a legal right? If we were bound by a 50-year treaty, with no violation of its terms, would we have the legal right to strike down that treaty?

Mr. DONNELL. I would like to say, first, that there is no intention on my

part, and, I am confident, on the part of my distinguished friend, to violate the proprieties of debate.

Mr. TYDINGS. I only hope the Chair and the other Senators are enjoying this as much as are the Senator from Missouri and myself.

Mr. DONNELL. I concur in that observation. I will say that the answer to the Senator's question as to whether this country would have any moral or legal right—I have answered as to the moral right, I think—is that in the absence of exceptional and unusual circumstances it would appear to me that this country would not have the moral right either to set aside and disregard an obligation entered into in pursuance of a statute, or an obligation entered into or in pursuance of a treaty. When it comes to the legal right, I think it depends upon the definition which one applies to the word "legal." If it means the power which, under the law, may be exercised, I would say that Congress does have the legal right, both in the case of the statute and the case of the treaty, to set aside and make void the prior action taken by it in each respective case. If, on the other hand, by the use of the term "legal" is meant the right of a nation to seek to avoid liability for damages, I would say we would not have a legal right in that sense. I think the law gives the Congress of the United States the right either to set aside a statute or to set aside a treaty. I do not think that international law would permit the United States to escape liability, under the principles of international law, to the other contracting party, in the event we set aside and annulled either a statute or a treaty.

I hope I have answered the question of the Senator, which is perfectly proper, and most interesting to me.

Mr. TYDINGS. I am glad to have the Senator's answer, but in his answer he used a phrase to which I wish now to direct his specific attention. I cannot quote him verbatim, I may have a word out of place here and there, but he said that the treaty or the executive agreement gives the right. Am I incorrect?

Mr. DONNELL. Yes. At least I did not mean to say that. I say that the law gives us the right, either in the case of the treaty or in the case of the statutory confirmation of the executive agreement, to set aside in the one case the treaty and to set aside in the other case the statute under which the approval of the executive agreement was given.

Mr. TYDINGS. I will ask the Senator to show me a provision of constitutional law or of statutory law which gives Congress the right to revoke a treaty whose duration has not yet run, of which there has been no violation, and to which we have pledged our solemn word for a period of years.

Mr. DONNELL. Mr. President, I am unable to take a particular set of words in the Constitution, as the Senator himself is unable to find anything in the Constitution, which says that Congress cannot set aside a treaty previously enacted. But I think I can cite plenty of decisions. I do not have them at hand, but certainly there are decisions to the effect which I have quoted here this afternoon from encyclopedias of law, namely, as one encyclopedia says, either a treaty or an act of Congress may supersede the other, but in case of conflict, the one which is later in date will control.

Another rule says that a treaty may supersede a prior act of Congress, or an act of Congress may supersede a prior treaty. There is nothing in the Constitution of the United States which says that the Supreme Court of the United States may declare an act of Congress unconstitutional. The Senator cannot find it from one end of the Constitution to the other. But if we go from the time of Marshall down to the present minute we find that the Supreme Court has asserted, and, I think correctly, that the judiciary has the power to declare unconstitutional acts which violate the fundamental law of our country. By analogy—perhaps not a perfect one—it would seem to me that the mere fact that there is no express language in the Constitution which authorizes Congress to set aside a treaty, does not mean that Congress may not have that power.

I will say to the Senator and to the other Members of the Senate that I am not unmindful of the fact that Congress has only such power, at least as to our domestic affairs, as was expressly given to it by necessary implication. Nevertheless, the courts have clearly held that if we make a treaty today, on this Monday afternoon, on Tuesday morning Congress may set aside that treaty; and the mere fact that the treaty may be drawn to run for 50 years does not, it seems to me, preclude Congress from exercising that power as a matter of legal power, or if the term "legal right" be interpreted to be a right which the law contemplates, then as a matter of legal right.

At the risk of some repetition, I again want it perfectly clear on the record that I am not advocating that Congress, in either case, after we have given our solemn word either by statute or by treaty, should revoke and set aside what we have done.

Mr. TYDINGS. I am sure that what the Senator has just said would be of great interest to the people of the Republic of Panama. We spent many millions of dollars in Panama to build the Canal. We built it under treaty. During World War II we found it necessary to have air bases in Panama to protect the Canal. We got those air bases through an executive agreement. Panama did not want the agreement to run any longer. As there is no time limit in the executive agreement, we have no military bases in Panama with which to defend the Panama Canal. If by treaty they had agreed to let us stay there for 20 years, and if we had done nothing to violate the treaty, they would not have the legal right to withhold our presence from the precincts of Panama. The fact that we had an executive agreement puts us out of Panama, and we have not a leg to stand on. That is an illustration, with concrete facts, of a situation with which this Government is now confronted. What does the Senator say to the right of Panama in that case under an executive agreement as differentiated from our right if we had made a treaty for 25, 30, or 50 years?

Mr. DONNELL. In response to the question of the Senator, I am unable at the moment, without thorough study of the Panama situation, to answer his question with any degree of exactness, but I say that upon general principles which are well accepted in the law, if this country had entered into an agreement with Panama by a treaty—and I know of no reason why Panama could not also have done it—this country could have violated the treaty, could have set it aside by legislative act, leaving itself, however, subject to the right under international law which accrued to the other party under the particular obligation which had been entered into. I certainly would not want to comment on the Panama situation on the spur of the moment without carefully considering it and carefully analyzing it, and without undertaking to do that, my answer to the proposition, and it is a fundamental one, is that if an agreement be entered into by this country, either by statute or by treaty, Congress, plus the Executive signing the statutory provision, can set aside and annul the treaty which it entered into, just as a subsequent Congress may set aside and annul a legislative enactment of that Congress. In both cases it may well be, however, that under the terms of international law there would be liability against the United States for violation of the contractual obligation entered into by virtue of either the treaty or the statute, as the case might be.

Mr. TYDINGS. Mr. President, I think the Senator from Missouri and I are discussing, not the form in which this matter should come before the Senate, but the form it is in and the imports which flow from it. I can tell from his argument—of course, I do not mean to steal his thoughts, but I have this feeling as the colloquy develops—that fundamentally he and I are rather in agreement as to the better form in which this matter should be presented to the Senate. However, I shall not go into that field.

Mr. DONNELL. Mr. President, will the Senator yield at this point?

Mr. TYDINGS. If the Senator will permit me to finish stating this thought I shall be glad to yield to him.

I do not want to leave the point as to Panama for the moment, but another matter has just occurred to me. Just to state a hypothetical case, Mr. President, suppose the great powers, when they reach the ultimate disposition of Germany, should agree that each of the four occupying countries should keep for its own territory the part of Germany which its troops now occupy, and suppose that were effected by executive agreements between the heads of Russia, England, France, and the United States, and that that proposition were submitted to the Congress, and suppose a statute were passed approving that action. I ask the Senator whether he thinks that would be a proper and a legal transaction?

Mr. DONNELL. Mr. President, the Senator from Maryland has asked two questions, by incorporating the two terms, "proper" and "legal." I point out that it was as to this matter that I attempted to interrupt the Senator a moment ago, and that I wish to say now

I am not sure there is any great difference between the Senator's mind and mine as to what he or I may think is the appropriate way in which to deal with matters of permanency, matters involving vast sums of money, and so forth. I may tell the Senator that I had the privilege, over a year ago, I should say, of reading the minority report made by the senior Senator from Maine on the very subject matter of the St. Lawrence seaway. I was greatly impressed both by his legal argument and by the implications which came from it.

I am strongly impressed by the point that the appropriate and proper way, and perhaps the better way, would have been to handle the matter by treaty, although there may have been some reason why it was not taken up by treaty, some reason to which the Senator from Maryland and I would not lend our personal approval, perhaps. But I take it that what we are now engaged in is a discussion of the Senator's point that if we follow the method presently proposed—that is to say, the statute method—we shall be taking an unconstitutional action. I understood the Senator from Maryland to use the term "unconstitutional" this afternoon.

Mr. TYDINGS. That is correct.

Mr. DONNELL. I take it that although we may later discuss the propriety of handling this matter by statute, the Senator is now going far beyond that point, to the question whether such a statute, if passed by Congress and signed by the President, would be a valid and constitutional action. I understand that is the point the Senator from Maryland is now discussing.

Mr. TYDINGS. Mr. President, let me say now, because I do not wish to hold tenaciously to a point that in my opinion would not be sustained—that I think—and I hope I do so with some modesty, let me say—that the opinion I have expressed would not be upheld by the Supreme Court of the United States. I think that if this matter comes up in 4 or 5 years, the action which it is proposed that we take, namely, approving the executive agreement on the part of the St. Lawrence seaway, will not be upheld by the Supreme Court of the United States. Likewise, I believe that if a matter of this magnitude had come up previously—I do not say how many years ago—perhaps the opposite would have been true.

But I wish to say right now that I do not think the Supreme Court never made a mistake in its life. We have to accept what it says, and I shall accept what it says, and I shall live under its rulings, because that is inherent in our system of government; but there is no man-made institution beneath the stars that I know of whose whole life has been one devoid of mistakes; and one of the most serious mistakes that could be made at this juncture of international affairs would be for the Senate of the United States to condone the substitution of executive agreements, which for approval require but a bare majority of the Congress, for treaties, which require a two-thirds vote of the Senate of the United States.

I wish to be fair, Mr. President, and so it is that I say I think my own argument that it is not constitutional would not be upheld by the present Supreme Court, with all due respect to the learned judges who sit there. But that does not in any way dull my own belief that when the Constitution of the United States remains silent as to executive agreements, except as they relate to the States, and so forth—and I shall not go into that matter; the Senator from Missouri knows what I mean—and when the Constitution mentions only treaties, as it does in paragraph 2 of section 2, article II, it means that all long-time, extensive, binding arrangements to last over a period of time, and to have durability, must fall within the category of a treaty. If the founding fathers, who drafted the Constitution, did not mean that; if we can do by executive agreements the same things that we are supposed to do by treaties, then I wonder why they included in the Constitution the provision that all treaties must be ratified by a two-thirds vote of the Senate of the United States; if, forsooth, we can simply call a treaty an executive agreement, and can strike out the word "treaty" all the way through it, but otherwise leave it exactly the way a treaty would be, and then say it is not necessary to have the Senate ratify it by two-thirds vote, but that it is sufficient to have a statute as to such executive agreement enacted by a simple act of Congress, with action thus taken by 26 percent of the Members of the House of Representatives and 26 percent of the Members of the Senate—in other words, with the other 74 percent absent—and, if that be done, say it is equivalent to a treaty.

Mr. President, if that is the case, why in the world did the founding fathers ever refer to treaties in the Constitution?

Let me say that I think the fact is, as has been said by Professor Borchard and Mr. Justice Sutherland, Mr. Justice Hughes, and other great members of the Supreme Court, namely, that this matter is not in the hands of the courts at all, but is in the hands of the United States Senate, and that the Senate can whittle away its right of ratification until it will no longer be valid, for want of use. That is what we are doing now, Mr. President. Those are the words of several of our great justices on the Supreme Court of the United States. They point out that the great responsibility to see that the Constitution is interpreted as it is written rests right here in the Senate. We cannot exculpate ourselves for our failure to act in accordance with our own belief in that great document simply by stating that we act as we do now because of what we think a particular court will do at a particular time. The document speaks for itself.

Now I yield to the Senator from Missouri.

Mr. DONNELL. Mr. President, the Senator from Maryland has spoken of what might be done by executive agreement in settling the situation in Europe at this time. As I recall, his question was that if an agreement were entered into by the four great war powers, and if that agreement were brought back to the Congress of the United States, would a statute passed in approving it be valid? Was that the question? If so, my judgment is that it would be. I see nothing at all in the Constitution to prevent Congress from adopting that particular method of approving a treaty.

Mr. President, the Senator from Maryland has addressed himself eloquently and powerfully, and with much logic, I think, to the question of the propriety of the particular type of legislation now proposed. On that point I wish to say that I am not at all decided as yet. I may be slow in coming to an opinion on this seaway matter. When I do decide, I shall vote as I think is right. But I am not decided as to whether what I consider to be a lack of propriety, if it be such, should prevent me from voting for the particular measure before us.

But as I view the Senator's argument that we should not be able to exculpate ourselves from blame for following an improper type of approach or procedure, I think his argument is addressed, not to the constitutionality of the procedure, but as to whether it is the appropriate, the right, the proper, and the moral method.

The Senator from Maryland has indicated the tremendous, I hardly know the word to apply to it, sanctity, I may say, which attaches to treaties, as opposed to statutes. Of course, I realize the profound respect we have for treaties. I think we should have respect for any type of agreement that our country enters into. I am free to say that my impression is that our country has probably gone much too far in the executive agreements which have previously been entered into.

But when we come down to any particular sanctity that is set forth in the Constitution in favor of treaties, as against statutes, I fail to find anything to that effect in the Constitution.

I call to the attention of the Senator the fact that although there is the power given to the Executive, in section 2 of article II, "by and with the advice and consent of the Senate, to make treaties," nevertheless, likewise by section 8 of article I, "The Congress shall have power * * * to regulate commerce with foreign nations, and among the several States, and with the Indian tribes." Then I call the Senator's attention to the language, with which he is so familiar, in the sixth article of the Constitution of the United States:

> This Constitution, and the laws of the United States which shall be made in pursuance thereof; and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land; and the judges in every State shall be bound thereby, any thing in the Constitution or laws of any State to the contrary notwithstanding.

The point to which I direct the distinguished Senator's attention is that article VI, when it makes mention of the supreme law of the land, includes the laws of the United States along with the treaties, and neither one of them has any special sanctity over the other. If the

Senator will permit me to repeat the language I have previously quoted this afternoon from 63 Corpus Juris 842:

> Treaties and acts of Congress are placed on the same footing and are of like obligation, so that, neither having any inherent superiority over the other, either may supersede the other; and in case of conflict the one which is later in date will control, provided, in the case of a treaty subsequent in time, it is self-executing.

I hope I have answered the Senator's question to his satisfaction.

Mr. GEORGE. Mr. President, will the Senator yield?

Mr. TYDINGS. I yield.

Mr. GEORGE. With great respect for the Senator from Missouri, it seems to me he is confusing two fundamental things. A treaty is an agreement between two countries. A simple act of the Congress is the decision of the majority of the Congress at a particular time, with, of course, the President's approval; or, if he disapproves, with an overriding by the two Houses. When a solemn agreement is entered into by the President with Country X, the agreement becomes binding only when ratified by the Senate; in other words, when the Senate gives a solemn pledge and obligation that the United States will live up to the letter of the agreement. So it is our agreement; it is not merely the President's agreement. True, it is the agreement negotiated by the executive branch of the Government, but the Constitution arises then and there with the bold declaration that he can make it only by and with the consent of two-thirds of the Members of the Senate. By construction, that means by two-thirds of the Members present and voting upon the question. So, in the case of a treaty, it is a contract of the highest dignity and solemnity, negotiated in the first instance by the President, ratified by the Senate.

The Senator is entirely correct in saying that the Congress may abrogate a treaty, just as anybody may breach a contract. But the Congress has no power in the first instance to make a contract with any nation on the face of the globe, except under the Constitution. It may ratify an agreement negotiated by the President. The Congress itself cannot make an agreement with Country X. In the case of an Executive agreement which the President sees fit to ask the Congress to approve, if it approves, it does so as the legislative branch of the Government, by a majority of those sitting here at the moment, a majority that may not sit here tomorrow, or the next day. And so I say, with great respect, that the Senator seems to be confused between the power of Congress to make an agreement with a foreign country by mere ratification of an Executive agreement, and the authority to the President in advance to make an Executive agreement. It can be done either way; I grant that. In the making of a real agreement with a foreign country, the Senate of the United States is a necessary and a vital part, so that a treaty, in any proper consideration at all of the subject, attains the solemnity and dignity of a contract which the Senate itself makes with a foreign country. That is not so in the case of the mere passage of a law. The Congress may today say that it regards a pension of a certain amount as a proper pension to be paid to a former employee of the Government. Tomorrow it may say that it does not regard that pension as properly having been provided by a previous Congress, or by itself at a previous session. May I submit in all candor, because I may want to discuss this question later, it is simply loose thinking to talk about the Congress making an agreement with a foreign country. It has no authority or power to do it. It has no instrumentality through which it can act, except the President alone. If the Congress becomes a party to an agreement, it can do so only under the Constitution, by ratifying the contract and thereby becoming a party to it.

The Senator also seems to be a bit confused, I submit, in assuming that there may be some liability on the part of our Government, because the Congress, having made an agreement, thereafter abrogates it; that is, because the Congress, having passed a law, thereafter passes a contrary law. That cannot be so. Upon the highest ground of public policy, no Congress can bind this country, if a subsequent Congress in its wisdom thinks the decision made by it was wrong. So there can be no liability to Panama, if the decision be reversed, and there can be no liability on our part to Canada, if all we do is merely pass a law, if hereafter the Congress, speaking for this country as a whole, shall say that that decision was wrong, and that it is going to pass another law. There could be no liability, there could be no responsibility. There could be only the responsibility of the Congress sitting at the moment to act up to the full level of its moral perception and conception. But when the Senate of the United States becomes a joint partner, aye, more than that, when it gives life and validity to an agreement itself with a foreign nation, any man who would suggest that we could depart from that course within the life of that agreement would be callous to all the high political morality which always has characterized us as a nation. I know that the Senator is conscientious, and I think the Senator is confused a bit in his own thinking by starting with the premise that the Congress may abrogate a treaty. Surely it can under ordinary conditions. But certain it is that the Congress of the United States has not, except in rare instances, when all the morality was on its side, dared to abrogate a treaty except by the ratification of another treaty or by the passage of an act which under the circumstances had complete moral justification. I am perfectly certain that the Congress of the United States can make no agreement with any foreign country, for that would fly in the face of the whole theory of our government. It would abrogate the power of the executive branch. Congress cannot do it. Congress can do only one thing; it can come along and say legislatively "What you have done, Mr. President, is all right with us." But, tomorrow, another Congress can, without any breach of moral faith, to say nothing of any transgression of its legal power and of its constitutional obligation, come along and say "What the President and the Congress did last year is not all right with us, at all." But not so if there is an agreement which rises to the high dignity of a treaty, to which we have become a party, the important party, because we alone breathed life into the treaty, not the President, not the State Department—we alone breathed life into the treaty by ratifying it by a two-thirds vote, and it is our contract. We could abrogate it, yes, just as we could do any other political or moral wrong, but surely we would not do so unless there were the strongest moral ground impelling us to do so.

The truth is, if I may suggest to the Senator, that in the Department of State in these recent years the loosest possible thinking has grown up. There are men in that department, and such men have pretty well permeated the whole government, who think that the President can do anything if only the Congress will come along thereafter and expressly or impliedly approve it. It may be quite possible for him to do many things with our express or implied approval, but such action does not partake of the dignity of a contract to which we have set our hand and seal. It does not partake of the high solemnity of an obligation which the makers of the Constitution believed that its successors would exercise through all the subsequent years.

Mr. DONNELL. Mr. President, will the Senator from Maryland yield?

Mr. TYDINGS. I yield.

Mr. DONNELL. I am sure that we have all been very greatly moved and instructed by the very fine remarks which have been made by the Senator from Georgia. It is with some degree of reluctance that I say anything further upon this question, but I think I should reply briefly.

In the first place, I concur with the Senator thoroughly that it would be immoral and improper for this Nation to violate a treaty once it had been entered into.

Mr. President, while it is true that Congress has the power next year, or the next year, to set aside a statute, I can well see in my mind that if a contract shall have been entered into, pursuant to the approval of Congress by the enactment of a statute, and the other contracting party shall have relied upon that contract, at least some moral obliquity would rest upon the Congress in setting aside the agreement upon which reliance had been had. True it is that we have the power to set aside a statute 1 hour after it has been enacted. True it is likewise, Mr. President, that we have the power to set aside a treaty 1 hour after it has been approved and ratified. And true it is, it seems to me, as has been stated previously this afternoon, that a treaty or an act of Congress are placed on the same basis, and are of like obligation and footing, so that neither has an inherent superiority over the other.

Mr. President, in the case we have at hand, there is no talk here of Congress itself entering into any contract. I do not know whether the Senator from

Georgia was present at the outset of the colloquy or not. I want to say to him, if he was not, that I have not yet formed a final opinion about the pending joint resolution. But I do say that what we are called upon to do is to approve an agreement which has already been signed, and which has been entered into subject to the approval by the Congress of the United States of America and the Parliament of Canada. When I stated those words, I was referring to article 11 of the Contract of 1941.

Mr. President, the Senator from Georgia said something to the effect that in the case of treaties the Senate breathes into those treaties the spirit which causes the treaties to spring into life. That is true, of course, in the sense that a treaty cannot have validity or force until the Senate shall have passed upon the treaty. Nevertheless, the Constitution says this with respect to treaties, and I quote section 2 of article 2:

He—

That is, the President—

shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur.

In the case of treaties, Mr. President, just as in the case of contracts which are entered into subject to approval by the Congress, it is true in each instance that the actual making of the agreements has been by the executive department. It is true that the President, or, at any rate, that representatives of the State Department, have entered into this agreement with Canada. But it is likewise true that that agreement entered into in 1941 has no force, no validity, no effect, until and unless the Congress of the United States, as is stated in the Constitution, shall have approved the contract so entered into.

So, Mr. President, we have in both cases—both in the case of the treaty and in the case of the statute—an instrument before us which does not become final or binding or effective until the breath of life shall have been breathed into it, in the one case by the Senate, in the other case by the Congress of the United States.

I should like to touch for a moment on the question of liability for violations of statutes by subsequent repeal.

I may be in error with respect to liability for the violation of treaties. I distinctly recall, however, that in what I regard as an exceedingly able and comprehensive opinion which was introduced into the RECORD a few days ago by the Senator from Wisconsin [Mr. WILEY], the State Department representative, Mr. Acheson, indicated I think quite clearly his thought that although there exists the power of Congress to pass upon a matter of this kind, there may be a liability in the case of the breach of such a contract. That is my recollection of his position. Now, he may be wrong. I may be wrong. I do not regard that opinion as at all decisive of the question which the Senator from Maryland and I have been discussing, namely, the constitutionality of the joint resolution which purports to approve an agreement which was expressly made subject to approval by the Congress of the United States.

I understand the Senator from Maryland to state that in his judgment the Supreme Court of the United States, as presently constituted, would sustain the constitutionality of the joint resolution. Mr. President, I appreciate the fact that there has been a development and change in certain of the decisions of the Supreme Court. I may say, in that connection, that I have no quarrel with any Member of the Senate in regretting some of the changes that have been evidenced in some of the decisions. Though I have not comprehensively studied the matter, I doubt if there can be any decision of the Supreme Court of the United States which would hold in the slightest that a statute such as we have before us here would not have been sustained at any time in the history of our country.

The Senator from Georgia [Mr. GEORGE] has given us the benefit of his great wisdom. I want to say, by the way, in passing, that I have the greatest respect for him. I have heard him move the Senate on more than one occasion with the majesty of his diction, the clarity of his thought, the fine character that stems forth and is evident upon his countenance. This afternoon I realize that in taking a position at some points, at any rate, in variance with that which he has submitted, I may be wrong and he may be right. I am glad to have the benefit of his learning.

I do want to call attention to a remark which he himself made, and which appears in the CONGRESSIONAL RECORD, reported in volume 78 of the RECORD, part 9, page 10072, Seventy-third Congress, second session. He was referring then, as I recall, to the tariff act. Was that the subject the Senator was discussing some years ago?

Mr. GEORGE. The reciprocal trade agreements, I think.

Mr DONNELL. I think that was the subject. The language which the Senator used I think is of importance at this time. He said:

The distinction between treaties and Executive agreements rests on more than a technical difference. It rests upon a fundamental theory of government. The Constitution places a check upon the President's power to enter into treaties by imposing the requirement that the advice and consent of the Senate by a two-thirds vote must be obtained. But no such extraordinary requirement exists with respect to commitments with foreign governments when such commitments give effect to the will of the people as expressed by previous acts of Congress. The only question which can arise is the validity of the particular act.

And then comes this important sentence:

The two-thirds rule obviously is designed as a check, not on the power of Congress, but on the power of the President.

A commitment to a foreign government can be effective as domestic law without approval by a two-thirds vote of the Senate. From the beginning of our national history down to the present day, the Executive, acting in conformity with previous acts of Congress, has entered into Executive agreements with foreign nations without obtaining the approval of the Senate by a two-thirds vote, and such agreements have been recognized and held valid by the courts.

Mr. President, the particular point to which I invite attention is the fact so wisely and properly brought out by the distinguished Senator from Georgia [Mr. GEORGE] that—

The two-thirds vote obviously is designed not as a check on the power of Congress, but on the power of the President.

So it seems to me that as applied to the case which we have before us this afternoon, it may well be pointed out that the provision with respect to treaties and the necessity of ratification by two-thirds vote of the Senate is designed not at all as a check on the power of Congress to legislate upon the subject matter—which might well have also been acted upon by treaty—but as a check on the power of the President.

If I may say one or two sentences further, I think the statement of the Senator from Georgia that "A commitment to a foreign government can be effective as domestic law without approval by a two-thirds vote of the Senate," might well leave the inference—though perhaps it was not so intended—that the commitment to a foreign government can be effective as local law by an act of Congress, even though as a matter of international law a violation of an agreement which is supported by statute might lead to liability. I wanted the Senator from Georgia to be present while this quotation was read. I appreciate, of course, the fact that he was talking about a temporary type of statute, quite different from this. But it seems to me that the philosophy evidenced in what he said, namely, that the two-thirds vote "obviously designed as a check not on the power of Congress, but on the power of the President," is applicable to the case which we are arguing this afternoon.

Mr. TYDINGS. Mr. President, I should like to ask the Senator from Missouri a question. I should like to place before him a case, because it is plain all through his remarks that so far as concerns the question of propriety, wisdom, and even constitutional inducement, the argument is all on the side of the contention that a treaty would be a better way than an executive agreement to handle this subject. That philosophy is woven all the way through the remarks of the Senator from Missouri and the Senator from Georgia, and I hope my own remarks as well.

The question which I should like to put is this: Let us suppose that 10 years ago our Government had entered into an agreement with the Republic of Panama, by way of treaty to run for 25 years, permitting us to have certain bases on the soil of the Republic of Panama. Suppose that treaty provided that it should last for 25 years, and could not be revoked by either party, except with the consent of the other party.

Now let us suppose that when that treaty was formulated 10 years ago it had come to the Senate and had been approved by a two-thirds vote of the Senate. Let us further suppose that, word for word, 10 years ago the same thing had come before us under the caption of an executive agreement, but that in every other respect—as to date, time,

circumstances, and limitation—the executive agreement and the treaty were identical. There might or might not have been a provision in the executive agreement as to the length of time it should run. I ask the Senator, if he will, to draw the distinction with respect to damages, as between the breach of a treaty on the one hand by the Panamanian Government, and on the other hand a repeal of the act of Congress approving the executive agreement.

Mr. DONNELL. Mr. President, I have not come here this afternoon prepared for an exhaustive discussion. This colloquy was brought about by reason of the fact that I rose and pointed out that neither I nor any other Senator should be considered to be estopped by not answering instantaneously the able, forceful, and convincing argument of the Senator from Maryland. I believe that what I may say should be qualified by saying that it is extemporaneous, with the exception of the quotations which I happen to have in my hand.

Mr. TYDINGS. Mr. President, will the Senator permit me to interrupt?

Mr. DONNELL. Yes.

Mr. TYDINGS. Of course it would be only fair to suppose, on a question upon which so much research and time could be expended, that anything the Senator and I say by way of diverging from the narrow issue, we might wish to revise on further study. This is a profound subject, and I do not wish to be placed in the position of trying to make it appear that whatever the Senator says is taken by me to be his last word on the subject.

Mr. DONNELL. I appreciate the Senator's generous comment, and I am sure that that is the way he feels.

It seems to me that in both instances to which he has referred, namely, the creation of a 25-year irrevocable treaty with Panama on the one hand, ond on the other hand a 25-year agreement with Panama supported by statute, there is no difference as to liability. His question is, What is the difference with respect to liability for damages in the event of a breach by this country or on the part of the other country?

My present judgment is that there is no difference with respect to the right to damages. However, the World Court, for example, which might pass upon the question of international law, might take into consideration the very solemnity, in the case of a treaty, to which the Senator from Georgia has invited attention.

However, my judgment is that if there is liability at all, it exists in both cases, There may be no liability. It may be, as the Senator from Georgia has indicated, that any country which deals with us when we enter into an agreement under a statute may be entitled only to our limited commitment, and may be successfully confronted with the argument that when we signed everyone knew that we could turn around in the next 10 minutes and back out of it. But I find no escape from the proposition that we could do likewise in the case of a treaty.

Mr. TYDINGS. I think the Senator will be fair enough to admit that there is a very fundamental difference between the two propositions, which he has not mentioned, and which perchance has escaped his thoughts in this more or less extemporaneous discussion.

If on the one hand we repeal—I prefer the word "recall"—the approval of an executive agreement by subsequent statutory action, we have acted within our rights. However, if on the other hand we have agreed in a treaty that we will not do that very thing, then we have not acted within our rights. There is a distinction between a subsequent act which flows from an executive agreement under which such an act is permitted, and a subsequent act which flows from a treaty, under which we are not permitted to do the act. In the one case we are acting within our rights, and comply with all the proprieties by passing an act of Congress recalling the act of some other Congress. But when we invade the sacred precincts of our pledged word in a treaty, we have neither the right nor the power to do so except in violation of our pledged word, whereas in the second case there is no violation of the pledged word.

Mr. DONNELL. Of course that goes to the question at issue here. It seems to me, from the observations which I have read here this afternoon that the courts hold that it is within the legal power of the contracting party to violate either type of agreement. Again let me say that I am not advocating either the violation of a treaty or of an agreement entered into by statute. However, as I have read several times—

A treaty may supersede a prior act of Congress, and an act of Congress may supersede a prior treaty.

Mr. TYDINGS. Mr. President, I do not wish to shorten the time of the Senator on the floor, but I am sure he feels that I would like to contribute a few thoughts, somewhat in agreement and somewhat in disagreement with some of the observations which he had made.

Mr. DONNELL. I thank the Senator for his generosity in yielding to me from time to time, and I appreciate the opportunity to engage in this discussion with him.

Mr. TYDINGS. There is no one to whom the Senator from Maryland would rather yield on such a question as is involved here than the Senator from Missouri, for whom I have a very high regard, and for whose legal ability I have profound respect.

Mr. DONNELL. Let me ask the Senator from Maryland whether he proposes to discuss the question whether the agreement of 1941 is a mere implementation of the treaty of 1909. Does he intend to discuss that question?

Mr. TYDINGS. Only remotely.

Mr. DONNELL. I think it is of some importance.

Mr. TYDINGS. I shall not have time to do so. However, if the Senator from Wisconsin [Mr. WILEY] will remain and listen, I shall be glad to discuss the question. Would he like to have me take an hour or two to discuss that subject? He is smiling. Let him not think that I am running away from a battle. I am perfectly willing to stay here if he would like to have me discuss the question. However, I have not even completed the first point as yet.

Mr. GEORGE. Mr. President, will the Senator yield?

Mr. TYDINGS. Let me finish this statement, and then I shall be glad to yield to my friend from Georgia. In the meantime my friends who gave me the "ha-ha" can be meditating on whether the answer to my question is "yes" or "no."

Mr. WILEY. Mr. President, will the Senator yield?

Mr. TYDINGS. I should like to invite the attention of the Senator from Missouri to this actual circumstance:

During the war, as I related, by executive agreement we obtained certain bases in Panama for our Army and Air Forces, so that we could guard our property, the Panama Canal, which we could not do completely with bases within the Canal Zone itself. After the war was over Panama said: "We do not want you to stay on these bases which we let you have during the war. Get off them. This is an executive agreement, and we will end it when we see fit."

If we had built those bases under a treaty with the Republic of Panama, presumably Panama would not have the right at this hour to cancel our right to occupy the bases.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. TYDINGS. Please let me finish. We would have been proceding with an assurance that no executive agreement supported by statutory action could ever give to an international agreement.

To take that case and transpose it with the St. Lawrence seaway, let us suppose that after we build the St. Lawrence seaway, having put up the money for it, the legislature of Canada should see fit to say, "We have had enough of this. We do not want to go on any further with this executive agreement. We want to repeal the action that permitted Canada to acquiesce in this whole arrangement." Can Canada legally do that?

Mr. DONNELL. Is the Senator asking me that question?

Mr. TYDINGS. Yes.

Mr. DONNELL. I think, Mr. President, it would depend entirely upon Canadian law as to the power of the Canadian Parliament. I am not able to answer the question without a study of it. I would say that if our country, after Canada had put up its share of the money, should desire to have the agreement set aside, Congress would have the power to do so. However improper it may be—and I say again that in my judgment it would be improper—there is a legal power to do it. I would say, also, that there would be a legal power under the terms of a treaty.

Mr. TYDINGS. The Senator's answer is to the point, and, in my opinion, is unassailable. Assuming that we want to strike down our part of the transaction, we can do so by act of Congress. Presumably—and I say this only for the purpose of discussion—the same power rests with the Canadian Parliament, and it can strike down Canada's part of it without the violation of any legalities at all inherent in the situation.

Mr. DONNELL. I do not follow the Senator at that latter point, because it may be that both the Parliament of Can-

ada and the Congress of the United States have the power to set aside, annul, and rescind the agreement. I say this with the qualification that it would require careful study to be certain of it. It may be that the Permanent Court of International Justice would hold that there would be a violation of international law arising from that act, particularly after the Government had acted upon it and had expended money.

Mr. TYDINGS. I want to say to the Senator that if next year the United States of America should repeal the statute which is now before us, there is no tribunal under God's heaven, including the Canadian Government, which could appeal for damages against the United States. Why? Because we would have acted within our full rights, known to the other party, Canada, and at the very time the executive agreement was being entered into the Congress which ratified it could not bind succeeding Congresses. Either party could repeal the act. That is the feature in which it is different from a treaty. If a treaty provided that it should run a certain number of years, we would be clearly violating our pledged word, whereas in the case of congressional repeal we would not.

Mr. GEORGE. Mr. President, will the Senator yield?

Mr. TYDINGS. I yield.

Mr. GEORGE. The Senator from Missouri has quoted a declaration made by me in the discussion of the Reciprocal Trade Agreements Act. I am prepared to repeat what I then said, which I think was correct, especially that the two-thirds provision in the Constitution is a check on the Executive power. I am glad to say to the Senator, who I know is open-minded and is always in search of the truth, that when Congress by legislative act changes some prior legislative position, it has back of it the soundest considerations of public policy. In other words, if the Congress should be of the opinion that a mere legislative act passed was wrong, then the soundest consideration of public policy would require its change. For that there can be no liability. No one can be held responsible for what he says here or for a vote taken here. Certainly no Congress can be held responsible for whatever it says with respect to any agreement which our President may have made with any other country.

But it is quite a different thing when a treaty is involved. When we enter into a solemn agreement which rises to the dignity of a treaty, both in its subject matter and in the method of its negotiation, we enter into the realm of international law. Any international tribunal, now exisiting or hereafter set up, if it carries with it the authority to review the question, could properly consider whether we were right in breaching our treaty. But no international court, no tribunal, and no domestic court or tribunal can ever question a decision made by the Congress itself with respect to its own decision, or with respect to any legislative approval or disapproval of any measure or of any agreement which the Chief Executive may have made, because in the one instance the highest consideration of public policy is in favor of a change if there should be one, whereas in the instance of the treaty the highest consideration of international morality and public policy is against any breaching upon our part of any treaty stipulation or agreement. I quite agree with the Senator that there may be instances and situations which fall within the borderline of matters which might be handled by executive agreement and others which must necessarily be handled by treaty, but I submit that any casual consideration of the obligation which we are now asked to approve rises to such dignity, such solemnity, and such tremendous importance to our country and to Canada as to require a treaty executed by both countries as provided in the organic laws of the two countries.

I am not discussing, and I do not want the Senator to think I am discussing, those cases more or less of temporary duration, those matters which are more or less temporary in character, and those matters which might necessarily be dealt with by means of an executive agreement. The primary reason why we say an executive agreement deals with something essentially temporary in character I think is due to the one fact that since the Congress itself may always, upon the ground of the highest morality, reconsider its legislative acts—actions taken in its legislative capacity—therefore an executive agreement deals purely with a temporary situation for a limited or necessarily short period of time, one which we might with propriety authorize the Executive to make upon our part.

I say to the Senator that if I have occasion to discuss this matter subsequently I shall not depart from anything said in the discussion of the Trade Agreement Act, because I do not think anything I then said is contrary to what I now think. I do want to say again to the Senator that I am quite sure that he has not taken any firm, positive, and final position in this important matter, because in the field of domestic law and domestic legislation we cannot be held responsible anywhere, but in the international field, when we enter into a solemn agreement or contract with another nation, we may be held responsible, and properly so, in any tribunal having jurisdiction of the matter.

Mr. DONNELL. Mr. President, will the Senator from Maryland yield?

Mr. TYDINGS. I yield to the Senator so that he may reply, but I would ask him to confine his reply to 2 minutes.

Mr. DONNELL. I shall use every possible effort to comply with the request of the Senator. In the first place, even though the Senator from Georgia may be correct on the proposition which he so clearly set forth, yet it does not affect the question now under discussion, namely, the question of the constitutionality of entering into this agreement by statutory authority.

In the second place, I submit that when he dwells upon the great importance of the matter of permanency, and so forth, his argument, as I see it, goes rather to the point of propriety than to the point of constitutionality.

Finally, if I am still within the 2 minutes, I may say that the distinguished Senator from Maryland has himself twice this afternoon, I think, very clearly and frankly indicated that in his judgment the Supreme Court of the United States, as he says, as presently constituted, would today sustain the constitutionality of the proposed legislation.

Mr. TYDINGS. I think I said "might," but I think I might well say "would."

Mr. BARKLEY. Mr. President——

Mr. TYDINGS. I should like to complete my sentence; but if the Senator wishes to ask a question, I shall yield to him.

Mr. BARKLEY. I am glad to have the Senator finish his sentence.

Mr. TYDINGS. Well, Mr. President, I have quite a little more to say on this subject, so I am glad to yield now to the Senator.

Mr. BARKLEY. I thank the Senator.

Mr. President, I merely wish to take advantage of this opportunity to say that I am somewhat in the situation of the Senator from Missouri. Earlier in the debate the Senator from Maryland challenged any Senator sitting on the floor of the Senate to arise and dispute his assertion that the proposed statute will be unconstitutional.

Mr. TYDINGS. I beg the Senator's pardon. I read a series of things that could be done under the guise of executive agreements, and I challenged any Member of the Senate to take issue with me on that point. At the same time I said that I had no doubt that such an executive agreement as is now proposed would be held to be constitutional by the present Court, but that, in my judgment, without any reflection on the members of the Court, because they are more learned and wise in the ways of the law than I profess to be, I still think the proposed method is unconstitutional, and I believe that if this question had gone to such a court some years prior to the present, perhaps the Court—composed then of Mr. Justice Sutherland and other distinguished and eminent members of the Court who, in bygone days, rendered important decisions—might have held otherwise in a matter of this magnitude.

Mr. BARKLEY. Mr. President, so far as the Court is concerned, I think it can be shown that long before the present members of the Court were appointed, the Supreme Court held in a number of cases that there could be such agreements.

Mr. TYDINGS. I agree as to that.

Mr. BARKLEY. So there is no use in casting reflection on the members of the present Court.

Mr. TYDINGS. I am not doing that.

Mr. BARKLEY. Because even before that, I think the Court held that such an act and such an agreement was constitutional.

I merely wish to be assured that I am not estopped because I did not rise and say I did not agree with the Senator from Maryland, at the moment when he issued his challenge. I am going to discuss the matter at a later date. I shall not do so now.

But because I do not wish to be regarded by those who read the RECORD as failing to respond to the challenge issued by the Senator from Maryland, I desire to excuse myself at this time.

Mr. TYDINGS. Mr. President, I said that if the Treaty of Versailles had come before the Senate in the form of an executive agreement, instead of in the form of a treaty, the Senator from Wisconsin [Mr. WILEY] would have seen no impropriety in that arrangement.

Mr. BARKLEY. Mr. President, I think the Senator's reference to the Treaty of Versailles occurred subsequent to the reference to which I have referred.

Mr. TYDINGS. No. I have all my remarks set forth in outline form, and it is very short.

Mr. BARKLEY. Of course there is a great difference between the Treaty of Versailles and an arrangement between two nations disposing of rights to the use of water that runs between them.

Mr. TYDINGS. Oh, no; there is no difference, because the water involved in this matter will run much longer than the Treaty of Versailles ran. So from the standpoint of permanence, durability, and propriety, it would have been much better to have stated the matter in the form of a treaty.

Mr. President, the Senator from Kentucky is a great advocate of the Treaty of Versailles and the League of Nations.

Mr. BARKLEY. Yes.

Mr. TYDINGS. Just think, Mr. President, President Wilson could have submitted it to the Congress in the form of an executive agreement, and it would have been adopted.

Mr. BARKLEY. But the waters of the St. Lawrence are no more in the United States than are the waters of the Colorado or the Rio Grande.

Mr. TYDINGS. Yes; because in the case of the Colorado all the waters happen to be in the United States.

Mr. BARKLEY. No; not until we dammed them up.

Mr. TYDINGS. But it was well within our jurisdiction to legislate on the waters of the Colorado in the United States without any agreement with Mexico.

Mr. BARKLEY. But we did not do that.

Mr. TYDINGS. My good friend the Senator from Arizona [Mr. MCFARLAND], who is sitting near me, says it was done by treaty, and I think he is better informed on that point than either the Senator from Kentucky or I. So I think the premise of the Senator from Kentucky is totally unsound.

Mr. BARKLEY. But there was a treaty between the United States and Canada.

Mr. TYDINGS. A moment ago the Senator from Kentucky referred to Mexico.

Mr. BARKLEY. I know; but now I am talking about a treaty.

Mr. TYDINGS. Was the Senator from Kentucky wrong before, when he said it was done by executive agreement?

Mr. BARKLEY. If I was wrong, I confess I was.

Mr. TYDINGS. Very well.

Mr. BARKLEY. But in 1909 a treaty was entered into between the United States and Canada, and by reason of it we are now bringing this agreement to the Senate of the United States.

Mr. TYDINGS. Mr. President, perhaps I may conclude by referring to three or four other instances of the possibility of substituting an executive agreement supported by congressional action, in lieu of a treaty supported by ratification by two-thirds vote of the Senate.

The able Senator from Wisconsin and those who support his view now say that if the President of the United States by executive agreement enters into a mutual military assistance pact with Soviet Russia or any other country, it is not necessary to submit such agreement to the Senate, for ratification under the Constitution. If that were done, Mr. President, a mere statute, enacted by a bare majority of the Members of each House of Congress, a quorum of each House being present, would give such a transcendental matter all the durability, prestige, and legality that its handling by treaty would have given it. Am I wrong in such a supposition, Mr. President? I am saying it would be valid if done in that way.

Mr. WILEY. Mr. President, as a war measure it would not be done in that way at all, for——

Mr. TYDINGS. The Senator from Wisconsin is begging the question.

Mr. WILEY. Mr. President, I hope the Senator will be courteous to me. Certainly I have been courteous to him.

Mr. TYDINGS. Of course I shall be.

Mr. WILEY. First, Mr. President, I take exception to the Senator's statement that I have given him the ha-ha. I have been waiting all afternoon, as a matter of fact. I want that point straightened out.

Mr. TYDINGS. I thank the Senator for that. However, he did give me the ha-ha, and I heard him.

Mr. WILEY. Well, Mr. President, if the Senator from Maryland is so sensitive——

Mr. TYDINGS. I am not sensitive, Mr. President, but I am giving the facts.

Mr. WILEY. I am sure the Senator from Maryland will admit that although he requested 40 minutes, he has taken all afternoon.

Mr. TYDINGS. I have not had 30 minutes as yet; I have been yielding to my colleagues.

Mr. WILEY. Well, it was a battle royal, and a good battle, anyway.

Second, Mr. President, in relation to Panama, I wish to say that if at that time those who were conducting the military affairs of this country had entered into an agreement in relation to their fields, for a term of years, it would have been binding. As it was, their fields were to go out of United States control when the war ended. That is why Panama has said that now we had better get out, and of course we carried out our agreement.

In relation to the other proposition, I wish to say that any agreement made by the President of the United States and the Congress of the United States depends upon conditions. If we are in war, of course the war powers of the President are ample, as they were when we did enter into an arrangement with Russia and we fought by her side. That happened. There is no question that if in a war emergency it became necessary for us to make an alliance, the war powers would be adequate in that connection.

Mr. President, something of the character of an alliance running down through the years, something such as we have had in years past, and which Washington said we had better keep out of, undoubtedly rises to the dignity of requiring a treaty, in the opinion of the Senate, of course.

But I wish to call attention to the situation the world is in today. What are we doing and what will we do in a month or so by resolution when we appropriate, for the benefit of 16 nations, $6,000,000,000 or $7,000,000,000? Is any alliance involved? Back of that proposal is there any purpose to see to it that we preserve our own? Let us consider the testimony. General Marshall has said emphatically that is the purpose. If we talk to others—those in the Navy Department and elsewhere—they say it is significant. So in that case we shall be doing by resolution what the distinguished Senator from Maryland apparently says cannot be done.

Mr. TYDINGS. Mr. President, the Senator from Wisconsin has misunderstood my question.

Mr. WILEY. I do not think I have.

Mr. TYDINGS. I did not refer to any alliance made in the past. I said that the able Senator from Wisconsin and those who support his view now say that if the President of the United States by executive agreement enters into a mutual assistance military pact with Russia or any other country, it is not necessary to submit such an agreement to the Senate for ratification under the Constitution. Am I wrong?

Mr. WILEY. Yes.

Mr. TYDINGS. Does the Senator say that would have to be done by treaty?

Mr. WILEY. Yes.

Mr. TYDINGS. Then when does a matter stop having to be done by executive agreement, and start having to be done by treaty?

Mr. WILEY. I tried to tell the Senator, but he says I have not answered. This is my answer: First, if the world situation were such that Russia became an ally of ours, as she has done in the past, it would not require any agreement on behalf of the Congress of the United States. The war powers would come into existence as they did before. When Hitler went into Russia, what happened? We became an ally of Russia. We gave her $12,000,000,000 without an agreement confirmed either by the Congress or by the Senate. In ordinary times the world was quiet, things looked peaceful; there was no need of emergency action. There came a question of joining in a defensive arrangement. It could be done by treaty, ratified by the Senate of the United States, or if in the judgment of the Senate and the House it came within some provision of the Constitution, such as the commerce clause, it could be done by agreement.

Mr. TYDINGS. I do not think it would be necessary for them to derive the power under the commerce clause. The Congress has the power to raise and maintain armies and provide for the common defense, so there would be plenty of constitutional ground for taking action. But the point I make is, the Senator is on different ground from that

taken either by the eminent Senator from Missouri, the Senator from Georgia [Mr. GEORGE], or myself, in a general way, for the question asked by all three of us was, if it were possible to do a thing by statute, could the same thing be done by executive agreement? It was rather generally argued here this afternoon, and I thought very well decided, that, aside from the proprieties of the thing, the present Supreme Court, in view of the way we are heading, would find no distinction between an executive agreement supported by statutory action, and a treaty supported by action of the Senate.

Mr. DONNELL. Mr. President will the Senator yield?

Mr. TYDINGS. I yield.

Mr. DONNELL. I do not want to put myself in concurrence with the Senator in any view that the present personnel of the Supreme Court is responsible for that state of the law. I think the law has been, right along, that even though the matter could be accomplished by treaty, yet if it relates to a subject matter within the jurisdiction of Congress, as, for illustration, the power over interstate and foreign commerce, the same thing might be done by executive agreement, if Congress and the President were to select that vehicle for carrying it into effect. I do not at all want to be understood as saying that merely the present personnel of the Supreme Court are responsible for what the Senator from Maryland conceives, in his judgment, will be the decision of the Supreme Court as to the validity of the instrument now before us.

Mr. TYDINGS. I want to say that my remarks were not intended to reflect on the Supreme Court, but just to pass my opinion based on previous decisions, as to how they would differ perhaps from the courts of yesteryear. But the point is that the Senator from Missouri holds the same view I hold, namely, that the President of the United States could now make a military alliance with Soviet Russia, and, assuming that Congress approved it by a statute, that would have the same effect, as long as the statute remained unrepealed, as if it were done by treaty. Am I wrong?

Mr. DONNELL. Mr. President, I do not think it devolves upon me at this moment to decide a question of that tremendous international magnitude. There may be some distinction between it and the case now before the Senate. I do say this, however, that as a general proposition, when Congress has power over a given subject matter, as, for example, commerce between the States or with foreign nations, Congress, as I presently understand the law to be, may, with the concurrence of the President, adopt the legislative method of entering into commitments with foreign governments in that field, even though it would be perfectly permissible and perhaps vastly more appropriate for the entry to be made by treaty. In saying that, Mr. President, I may say that I do not want to leave the implication that I have arrived at a definite conclusion as to the relative propriety of the two modes in the case now before us. I started in this afternoon extemporaneously, except as to a few notes of some citations I have read, to discuss with the Senator the question of constitutionality rather than of propriety.

Mr. TYDINGS. I thought the Senator made his point very clear, that as to the propriety of having a treaty as against an executive agreement, he thought, for major matters, the proprieties were on the side of the treaty, and for minor matters of short duration they were on the side of the executive agreement. I thought the purport of his whole argument was that notwithstanding what should be the proprieties of the question, if the President made an agreement with Soviet Russia in the nature of a military alliance for 20 years, and Congress passed a statute supporting it, it would have the same binding effect as would a treaty ratified by the United States Senate. Am I in error?

Mr. DONNELL. I cannot answer that by "Yes" or "No," but I must make a brief statement.

I think I said this afternoon that I was in general concurrence with the view of the Senator that there should be no deviation from the rule that executive agreements should be confined, generally speaking, to matters not of a permanent nature. I take that view, and my present thought is that it may well be that this St. Lawrence compact should have been entered into by treaty. As a matter of fact, it impresses me that way. It is my personal thought that that should have been done.

On the other hand, Mr. President, from what study I have made of the record and from what I have heard of the argument, I am not prepared to say conclusively, and I am not saying conclusively at this time, that I concede the matter should have been handled in some other manner, because it seems to me that there may be many, many things that will enter into a determination of which of the proposed methods should be followed.

Mr. TYDINGS. But the point is, I did not want to misquote the Senator. He argued with tremendous persuasion and, I thought, with a good deal of conviction, almost putting himself in a position that I could not attack, when he, by his forcefulness and the illustrations that he conjured up, finally reached the conclusion, which I am sure was repeated several times in his remarks, that the same thing can be accomplished by executive agreement supported by statute as can be accomplished by treaty, ratified by the Senate. Am I wrong on that?

Mr. DONNELL. Mr. President, I think there may be extreme cases, which we do not have before us now, in which it cannot be done. I do not think of one, but it is entirely possible that something, upon which the very life of the Republic would rest, would require a treaty rather than an executive agreement. Generally speaking, as I now understand the law, when Congress has power over a particular subject matter, as for illustration commerce, I think, as Mr. Garner states, the question of "which of the two procedures shall be employed in a given case is a matter of practical convenience or political expediency," or perhaps of some other considerations, I interpolate—"rather than of constitutional law or international law." I think there is an opportunity for the exercise of an option as between those two methods.

My present thought is that if I had been conducting the negotiations I believe I would have agreed with the Senator from Maryland that a treaty would be advisable instead of an executive agreement, but in saying that, I do not want to preclude myself from voting for the pending measure. All things considered, in the wisdom of the State Department and of the President, and in the wisdom of Congress, if it decides to approve the pending measure, it may be that the legislative method is preferable.

Mr. TYDINGS. If the Senator will allow me, I am not trying to get into a debate with him, because the fact is I want to get out of the debate and conclude. I do not want to misrepresent his position, but I think the Senator did say that as far as the constitutionality or the legality of the matter was concerned—not the propriety but the legality of the matter—the executive agreement supported by congressional statute was just as good or just as legal as was the treaty supported by Senate ratification.

Mr. DONNELL. If I may answer the Senator, I think that is substantially what I said, and of course I am applying it to the case we have before us. There may be other cases I do not think of at the moment. There may be other cases, as I have said, involving the very existence of the Republic, in which a treaty would be the only legal way to proceed. That is entirely possible. But the case here before us, it seems to me, is an illustration of a situation in which Congress has it within its power to deal with commerce; therefore, there is an option as to whether the matter should be concluded by treaty or by statute.

If I may add but one sentence further, I think the question as to whether this particular statute, if it be passed, is a matter of implementing the treaty of 1909, is a matter of very great importance, and should not be left undiscussed in the course of the argument as it shall proceed.

Mr. BREWSTER rose.

Mr. TYDINGS. I will yield in a minute, but I will continue, because I want to repeat what I said a while ago. Those who hold that executive agreements supported by a mere act of Congress are valid, constitutional, and legal, as compared with treaties ratified by the Senate, must hold with the able Senator from Wisconsin and those who support his view. I am not arguing the proprieties of the proposal before us, I am arguing the constitutionality of it, because the Senator and I pinned each other down on that, and he wrung from my reluctant lips an admission that the present Supreme Court would hold such agreements constitutional, just as they would treaties. We were speaking generally. We were not speaking of the particular agreement before us; we were speaking generally. So I have come over, and I am now arguing from the place on the floor where the Senator stood that if the President of the United States, by executive agreement, enters into a mutual military assistance pact

with Russia in the future it is not necessary to submit such agreement to the Senate for ratification under the Constitution. A mere statute, with a bare majority of the Members of each House, a quorum in each House being present, will give such a transcendent matter all the validity, prestige, and durability which the ratification of a treaty would have given.

Now if we are going to say that the Supreme Court will find that the St. Lawrence seaway can be dealt with either by treaty or by executive agreement, even though the question of propriety does not enter, then we must concede that the treaty-making power of the Senate of the United States is as dead as Hector's goat, but only because we have let it die through lack of usage.

Mr. BREWSTER. Mr. President, will the Senator yield?

Mr. TYDINGS. I should like to complete my statement. However, I will yield.

Mr. BREWSTER. What I wish to say is addressed to the matter now under discussion. I wonder whether or not in the discussions there have been references to the very ingenious theory advanced by the Solicitor for the State Department before the Committee on Commerce when the committee was considering this matter some time ago, that the President of the United States could make any agreement he desired with any foreign country, and that cognizance need not even be taken of the Constitution of the United States or the ratifying power of the Senate. Has that been referred to at all?

Mr. TYDINGS. Indirectly it has, because, I may say to the Senator from Maine, the precedents which we have gradually built up from the beginning of the history of the Republic down to this good hour, are briefly these. In the early days the only executive agreements that the President entered into had primarily to do with war, or with simple acts of what might be called administration, as differentiated from policy. Gradually there has been a whittling away of that policy over the years, and with tremendous Niagara Falls rapidity in recent years, so that such an eminent authority as Professor Borchard predicts that if this trend continues our position will be directly contrary to that taken by the Founding Fathers. I do not think there is anybody who can speak on the treaty-making power of the Congress and the President with greater authority than the eminent Yale professor, who has written many books on the subject, who has taken part in numerous arbitrations, who has been a lecturer in several universities, who has been an adviser to our own Government. Certainly if there is any more eminent authority than Professor Borchard I do not know who he is. He is supported in large part by utterances by Mr. Justice Sutherland.

All of them say what the Senator from Maine has just put his finger on, that if the Senate continues to neglect to use the treaty-making arm, the requirement of a two-thirds majority to flex its great power, and will only flex it partially, by using a mere 26 percent of its membership, a bare quorum being present, the great muscles which were created to serve a certain purpose will become dormant and die, and we will have adopted a contrary philosophy on the matter of international relations to that which the fathers had in mind, in my judgment, because it is shown in the debates of the Constitutional Convention over and over again that executive agreements were contemplated as things that would have to be entered into by the President, but it was argued it was not necessary to provide for them in the Constitution because they would be acts that would flow after legislation, or after the signing of treaties, or in carrying out the great exigencies of a war.

No one conceived that executive agreements would invade the wide field of international relations, and I think the debates in the Constitutional Convention will prove the accuracy of my statement.

There is the great Swiss author, de Vattel, who has written on the treaty-making power of the Congress of the United States. I meant to quote from his book. He had much to say respecting the point of view of the members of the Constitutional Convention. De Vattel portrayed all the nuances between treaty-making on the one hand and executive agreements on the other. He showed that treaties, for which a two-thirds vote of the Senate of the United States were required, were given a dignity commensurate with international dealing as differentiated from mere administrative acts which it was contemplated the executive agreements would be.

Where are we going? We have already driven the nail and now we are beginning to rivet the nail, that is, that congressional approval of international agreements is all that will be necessary in the future.

Mr. BREWSTER. Mr. President, will the Senator yield?

Mr. TYDINGS. I yield.

Mr. BREWSTER. I think the suggestion I made——

Mr. TYDINGS. Goes further than that.

Mr. BREWSTER. Goes much beyond anything which the Senator from Maryland has suggested. When a responsible legal official of the State Department, the Solicitor, before a senatorial committee considering this matter advances the proposition that an agreement entered into by the President, without congressional action of any character, binds the United States in international law, we certainly have reached the limit of the evolution of this series of precedents, and yet that was what he calmly testified to before the very amazed Committee on Commerce, then presided over by the late lamented Senator Josiah Bailey, who certainly was a profound constitutional lawyer, and heard this theory with amazement and profound disturbance. And yet it shows how far this tendency will go if it is continued unchecked.

Mr. TYDINGS. That is correct.

I should like to conclude. What I may say may be controversial, and I think I ought to say to my good friend the Senator from Wisconsin [Mr. WILEY] that I will permit him to interrupt me, although I make reference to him in no disparaging sense. I have a high regard for him in every way, but I refer to him to illustrate a point of view. I hope he will not feel called upon to interrupt, because I want to turn over the floor, which I hold by his courtesy, which I deeply appreciate.

The able Senator from Wisconsin and those who support his view now say in effect, mark you, that if a President of the United States enters into an executive agreement with Britain and France, providing that each country shall annex that part of Germany which its military forces now occupy, and thus wipe western Germany off the map as a Nation, that only a mere statute of Congress is necessary to make that action legal. A two-thirds vote on ratification by the Senate for such a far-reaching event will not be necessary in the future.

The able Senator from Wisconsin and those who support him now say that if the United States and Russia, lately allies in conquering Japan, decide through executive agreement to divide Japan in half and to award one part of divided Japan to the United States and the other part to Russia, that a mere act of Congress, supported by a bare majority in each House, with a quorum present, will give that executive agreement all the majesty, so far as practical purposes are concerned, as if it had been done through the medium of a treaty between Russia and the United States, looking to the same purpose and which would have had to be ratified by a two-thirds vote of the Senate.

The able Senator from Missouri [Mr. DONNELL] and I discussed on the floor of the Senate this afternoon the constitutionality of such action. I think the Senator from Missouri is one of the great lawyers of this body, and he has assured me that it is his view that an executive agreement, if the statutory procedure follows, is just as good as a treaty with ratification.

Additional illustrations could be offered ad absurdum. The point is that notwithstanding the congressional statute of so-called validation to such supposed executive agreements they could be repealed a month or a year or 10 years thereafter, whereas a treaty would run in all its honorable and unassailable majesty for its duration and could not, either in morals or law, be repealed. The Senator from Wisconsin seems to see no distinction between these two processes. The Senator and those who support his position that executive agreements supported by congressional statute are proper vehicles for international dealings say they are willing to commit the United States to an expenditure of upward of a billion dollars on the soil of a foreign country in times of peace, even though a succeeding Congress may strike down all our right and connection therewith when all of the expenditures are made and when all of the work is completed. By this process he would expose the American taxpayer to a loss of upward of a billion dollars out of our own Treasury through the medium of

executive agreements supported by congressional action, when by treaty ratified by the Senate this risk of upward of a billion dollars could be avoided.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. TYDINGS. I yield.

Mr. WILEY. The Senator has one fact decidedly wrong. The canal system is not on the soil of another country. The canal system is entirely within the boundaries of the United States.

Mr. TYDINGS. None of it at all is in Canada?

Mr. WILEY. That is correct. It is all within the boundaries of the United States.

Mr. TYDINGS. And it will not be necessary to use the bank of the river, which is in Canada?

Mr. WILEY. Yes; that is true. I will show the situation to the Senator on the map which hangs on the wall.

Mr. TYDINGS. So no part of Canadian soil will be touched by this operation?

Mr. WILEY. That is correct. The point I indicate on the map is where the power operation is to be located. That is split 50–50. But the canal system is at the other point which I now indicate.

Mr. TYDINGS. Well, it is all a part of the St. Lawrence seaway. That is my point. I am speaking not only about the canal. I am talking about the whole project. We are committing our country to the expenditure of a huge sum of money to be spent on foreign soil. That is what I said. That is what is true.

Mr. WILEY. That is just one-seventh of what Senators are going to vote for in a month or so from now.

Mr. TYDINGS. That may be so.

The able Senator from Wisconsin and those who support his views say that if at any time in the future the President of the United States shall make an agreement to take over the finances, the customs, the courts, or the legislative body of any other country through the medium of executive agreements with the then head of such country, that so far as the legality of the situation is concerned, if Congress by a simple statute ratifies that act, it has no legal imperfections.

I am referring to the Santo Domingo case, which the Senator from Wisconsin will recall. President Theodore Roosevelt operated the customs of Santo Domingo without the approval of the Santo Domingan people, and for 3 years without the approval of the Senate or the Congress of the United States. He said that there was an executive agreement, and that he was going to employ it so long as he was in office.

The able Senator from Wisconsin and those who support his view hereby pledge themselves now to make not the slightest legal objection to any final disposition of conquered Germany among the victorious Allies provided the President, by executive agreement with the heads of the other Allied Powers, agrees thereto and that a mere majority of Congress will support his position.

The able Senator from Wisconsin and those who support his view today say to President Truman: "It is not necessary hereafter for you and your State Department to make treaties with foreign governments affecting the welfare of our own people and the world."

They say: "Mr. President, you make such agreements with them as you see fit to make on any subject, no matter how far reaching, no matter how involved, no matter how pregnant it may be with forebodings to our country. If after you have made such agreements, a mere majority of the Congress representing 26 percent of the membership of each House—if but 51 percent of the membership of each House happened to be present—supports your view, we are willing to have the future of this country committed through such mechanics as are here outlined."

These are but a few of the hostages to fortune that could be given under the procedure which the able Senator from Wisconsin and those of like view could impose on the Nation, if the ratification processes he espouses today become the custom of the Congress.

Here the advocates of this measure stand, ready to commit the United States in time of peace to an expenditure of upwards of a billion dollars, for a project to be built on foreign soil, through a mere executive agreement between the heads of the two governments affected, even though they must admit that on the instant the project flowers into completion all of this money, by a mere repeal of the Congressional Act, could be thrown to the four winds so far as the people of our nation are concerned.

And this from the spokesman of a great party which is advocating tax reduction, economy in government, and curtailed expenditures in the foreign field, which expenditures are directly related to the successful winning and termination of a bloody world war.

The second paragraph of section 2 of article II of the Constitution of the United States reads as follows:

> He (the President) shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur.

What the able Senator from Wisconsin and those who support his point of view are attempting to do in this process is to amend the Constitution of the United States.

Instead of it reading as I have quoted it, the able Senator from Wisconsin and those who support his point of view say it should read as follows:

> He (the President) shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur, or he (the President) shall have power, with the approval of a majority of each House of the Congress provided a quorum of each House be present, to make treaties.

It takes no student of the Constitution to see at once the fallacy of the position of the Senator from Wisconsin. If the Constitution was intended to give validity to international agreements by a simple statute, then why does the Constitution provide in express terms that such international agreements are binding only if they are ratified by a two-thirds vote of the Senate?

If ever "little boys who swim on bladders these many summers in a sea of glory, but far beyond (their) depth" went further than the distinguished sponsor of this bill is now going, Mr. Shakespeare fails to give us the words in his great writings to portray it.

Mr. DONNELL. Mr. President, I should like to read into the RECORD at this point the following paragraphs from an article entitled "Acts and Joint Resolutions of Congress as Substitutes for Treaties," written by James W. Garner and published in volume 29 of the American Journal of International Law, at page 487:

> The conclusion of the whole matter would seem to be that if it is within the constitutional competence of Congress by means of acts or joint resolutions passed by a simple majority vote of both Houses and approved by the President, to make the United States a member of such institutions as the International Labor Organization, to annex foreign territory to the United States, terminate war with foreign countries, to authorize commissions to conclude foreign debt funding agreements, to authorize the Postmaster General to conclude postal conventions and to empower the President to enter into trade and tariff agreements with foreign countries, it could certainly by either of these processes make the United States a member of the Permanent Court of International Justice and possibly also a member of the League of Nations. Indeed, it is believed that Congress might with the approval of the President create a relationship or undertake an engagement on behalf of the United States with a foreign state or states, in respect to any matter which is a proper subject of international regulation, or it might authorize the President to do so, provided it were within the constitutional competence of the Congress to deal with such matter at all. The delegation by the Constitution to the President and the Senate of the power to make treaties does not exhaust the power of the United States over international relations. The will of the nation in this domain may be expressed through other acts than treaties and such acts do not necessarily need to be ratified by the President by and with the advice and consent of the Senate in order to be valid and binding, unless they so expressly provide by their own terms. In short, the power of the President and the Senate to regulate foreign relations is not an exclusive power. It is only when an agreement takes the form of a treaty, as that term is used in the Constitution, that this power belongs exclusively to them. There is no inconsistency between the authority of the President and the Senate to regulate foreign relations through agreements in the form of treaties and the power of the President and Congress to deal with matters of foreign policy through legislative action. Which of the two procedures shall be employed in a given case is a matter of practical convenience or political expediency rather than of constitutional or international law. If the procedure of treaty regulation proves ineffective in a particular case because of the constitutional impediment relative to ratification, there is no reason of constitutional or international law why recourse to the easier alternative of legislative action cannot be had, if the President and a majority of the two Houses of Congress so desire, as has been done with success on various occasions in the past.

Mr. LODGE. Mr. President, I have canvassed as many Senators as I could who are opposed to this project, and I will say to the Senate that I believe that all of them, in the aggregate, will not

consume more than 2 hours in speaking. Therefore I renew my hope that it will be possible to obtain an agreement to vote the joint resolution at a fairly early date.

Mr. WILEY. Mr. President, I heard what the distinguished Senator from Massachusetts said. I thought that earlier in the day we had agreed in substance between us—not a binding agreement—that because of the absenteeism which is too evident today, and will be greater tomorrow and the next day, we would postpone a vote until the 25th. I have already mentioned the fact that the Senator from Iowa [Mr. HICKENLOOPER] has left and several other Senators have left and cannot be present. Those facts are known to all Senators.

I feel that the country is entitled to have as near a 100-percent vote as possible on this question, so necessarily this matter will go over. As I understand, the distinguished Senator from Massachusetts will lead the opposition tomorrow, and I trust the courtesy shown today to one of his speakers, the Senator from Maryland [Mr. TYDINGS], will be shown us tomorrow, so that the Senator from Kentucky [Mr. BARKLEY] may speak, because he is leaving the next day. Under those circumstances I feel that we shall have to carry on and see if we cannot talk things through tomorrow and get somewhere.

I wish to express sincere appreciation to both the distinguished Senator from Missouri [Mr. DONNELL] and the Senator from Maryland [Mr. TYDINGS] for having given us a very interesting and learned debate on the Constitution. I am happy to see that the Senator from Missouri was not taken into camp by anything that was said by the distinguished Senator from Maryland. The discussion was as fine a piece of Senatorial debate as can be found anywhere in the books. However, it related distinctly to the question which has been discussed for 75 or 100 years, as to the power of the President and the Congress in relation to executive agreements, or whether there should be treaties.

The statement just read by the distinguished Senator from Missouri is as fine an outline of the whole subject as can be found anywhere. But, Mr. President, there is one other field involved, which was stressed by the distinguished Senator from Missouri and left alone by the distinguished Senator from Maryland, and that is a field about which there is no dispute, namely, that when there is a treaty there is no way to carry out the provisions of it except to implement it by administrative acts of the two governments, and then they pass the same agreements. At least one Senator, who does not agree that the Senator from Maryland [Mr. TYDINGS] can put words into his mouth, as he attempted to in his 15 minutes of concluding remarks, is thoroughly convinced that when this Government in 1909 entered into an agreement in relation to the St. Lawrence seaway it had the right down through the years to make that agreement effective and valid. That is what the President of the United States did in 1941.

All we are asked to do now is to approve the President's act by implementing the Treaty of 1909.

Mr. WHERRY obtained the floor.

Mr. LODGE. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. LODGE. I would like to say that tomorrow the senior Senator from Arkansas [Mr. MCCLELLAN] and the junior Senator from Texas [Mr. O'DANIEL] desire to speak very briefly on the St. Lawrence seaway matter; that on Wednesday, the junior Senator from New York [Mr. IVES] desires to speak, and that on Thursday the senior Senator from Massachusetts [Mr. SALTONSTALL] desires to speak. So far as I have been advised, that will complete the speaking on the joint resolution on our side. As near as I can calculate it now, it will amount in the aggregate to not more than 2 hours.

I am sorry that the Senator from Wisconsin [Mr. WILEY] is unwilling that a vote be had this week. If we postpone voting to the twenty-fifth, I believe the country will feel that we are dawdling and not paying attention to business. That will make almost a full month which will have elapsed since we first began consideration of the project on the floor. I believe it will seem to a great many Americans that with all the many problems which are pending today a full month of debate on this matter will be excessive. Of course, if the twenty-fifth is the earliest date on which the Senator can see fit to agree, under the procedure we have in the Senate I have no choice but to agree to it.

Mr. WILEY. Mr. President, will the Senator from Nebraska yield?

Mr. WHERRY. I yield.

Mr. WILEY. I am sure the Senator from Massachusetts understands that I personally will be here. My own personal accommodation is not involved. I am trying to protect the rights of Members of the Senate, and I want to see that the people of this country have full and complete knowledge of the sentiments of the Senate.

Mr. LODGE. There is no one more assiduous than is the Senator from Wisconsin. I know he would be here every day and every night if it were necessary. In the remarks I was making I was in no way reflecting on the Senator from Wisconsin, who is most diligent in the discharge of his duty. I agree that the people want a complete exposition of the matter, but I think 30 days is a longer time than is necessary.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. WILEY. There was no thought of debating for 30 days. The statement was made that there would not be a sufficient number of Members of the Senate present next week to vote. I was willing to agree to the 18th, but I think the Senator from New York [Mr. IVES] or some other Senator thought that would be inconvenient. Then it was decided to put it over to the 25th. If we can agree tomorrow on some other date, I shall be glad to do so. I do not want the impression to go out that we expect to require 30 days of debate on the St. Lawrence seaway. I understood from the majority leader that he was already contemplating taking up other matters. If the suggested arrangement does not take place, someone will have to talk. If it takes place, they will not have to talk, and other matters can be disposed of.

Mr. LODGE. I did not mean that any Senator would hold the floor for 30 days. We began consideration of the matter on the 26th of January, and if we do not vote until the 25th of February the Senator can see that that would amount to 32 days in which the Senate would have had the subject under consideration. I believe that will be interpreted by the country as putting too much time on the proposition, and that we ought to be able to make up our minds and vote it up or down.

Mr. WHERRY. In order that there may be no misunderstanding so far as the membership of the Senate is concerned, let me say that a unanimous-consent agreement has not yet been entered into. There is always a big doubt as to whether one can be reached in the Senate. So, keeping that in mind, in order that no Member of the Senate may be under any misapprehension, the program will be as it has been announced. There will be daily sessions on Tuesday, Wednesday, and Thursday, at least, when the debate will continue upon the St. Lawrence seaway. On Thursday afternoon, or before that time if an agreement can be entered into, I can make an announcement regarding a voting date under the agreement, but until such an arrangement shall be entered into—and I reiterate that the place to make such an arrangement is not on the floor of the Senate—I shall insist that we conclude the debate, if possible, on Thursday; but if the Senate desires to enter into a unanimous-consent agreement either before that time or by that time, an announcement will be made as to when a vote will be taken.

I hope the Senator from Wisconsin and the Senator from Massachusetts will continue to try to work it out.

Mr. LODGE. Many Senators want to make their plans for the week end.

Mr. WHERRY. Certainly.

Mr. LODGE. It seems to me it would be a very convenient thing and a very considerate thing not to wait until Thursday before the agreement is made, but to try to make it tomorrow.

Mr. WHERRY. I said that if a unanimous-consent agreement is entered into prior to Thursday, we shall make the announcement; but that if we have not arrived at such an agreement before Thursday, then on Thursday, at the conclusion of the session, we shall announce the program for the next week.

I may say also that in the following week the Senate will be in session on Monday and will recess until Thursday, and then again recess until the following Monday. That is to carry out the precedent relative to Lincoln's Birthday. The Senate will have to reconvene on Thursday and go over to the following Monday. I think I have the assurance of the minority leader, for whom we all

have the highest regard, that he will cooperate in that plan.

In the following week, in order to accommodate those who will have Jackson Day engagements, we will agree on the days to assemble. I want to assure the minority leader at this time that I shall cooperate with him in the matter.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. BARKLEY. In regard to the so-called dawdling to which the Senator from Massachusetts has referred, if we do not vote on the bill until the 23d of the month, I think it appropriate to say that a week or two ago the Senator from Nebraska [Mr. WHERRY] and the Senator from Ohio [Mr. TAFT] spoke to me about the possibility of having sort of a gentleman's agreement that during the week of the 12th of February there would be no legislation that would interfere with Members on the other side of the aisle making their annual pilgrimage to the various celebrations carried on in the name of Lincoln, but having in mind the next election.

The Democratic Members are not limited to any one day. We are celebrating both Jackson and Jefferson this year. We have so much more to say than have the Members on the other side of the aisle that it takes longer to say it. We are not limited by any particular rule as to time. It was not contemplated, I think it is fair to say, in our conversations with Members of the Senate, that they should begin leaving today, the 2d day of February, in order to make speeches on the 12th day of February. I have no control over them, and neither has the Senate. But, in view of the situation, I do not think that an agreement to vote on the 24th or the 25th, within which time we seek respectively to enlighten the people for and against the things of which we speak here, would be regarded as dawdling. I do not think it would be dawdling to agree to vote toward the end of the month. It does sound like a long time off, and I agree with the Senator from Massachusetts that on the surface it is an unhappy situation. But I doubt very much whether anyone will accuse us of dawdling, especially if we do not lose any time in the sum total of legislation that will be before Congress at this session.

Mr. LODGE. Mr. President, if the Senator will yield to me for a moment, let me say I quite agree that it will be violating a great many long-standing agreements and traditions if we start voting in the middle of the week of Lincoln's birthday or the middle of the week of Jackson's birthday. I was thinking that we might vote before this week end, and that our reluctance to vote by or before the coming Thursday would be misconstrued. Of course, I do not wish to violate the agreement whereby Senators will be away next week.

Mr. BARKLEY. I would be happy to vote this week, but as has been stated, Senators have already begun to leave the city, for reasons which they feel justify them in doing so. So I think it would be unwise for us to vote at a time when numerous Senators will unavoidably be absent. In the long run, I do not think any time will be lost by delaying the final vote.

Mr. WHERRY. Mr. President, I wish to thank everyone for the helpful suggestions. [Laughter.]

Mr. BARKLEY. The Senator is welcome, so far as I am concerned.

Mr. WHERRY. However, Mr. President, I cannot quite understand why it takes so long for the Democrats to answer, on Jackson Day, the things the Republicans say on Lincoln's birthday.

Mr. BARKLEY. Well, Mr. President, we have more good birthdays; I will say that.

Mr. WHERRY. I thought perhaps it was because the Democrats talked longer.

Mr. President, I wish to say that it will be the purpose of the acting majority leader to keep the pending measure before the Senate until at least the end of the session on Thursday afternoon; and in the absence of a unanimous-consent agreement, I shall drive to get a vote at that time. I think that is the only way to legislate. Certainly I agree with the distinguished Senator from Massachusetts: I think it is unreasonable to bring up here, for discussion, a question of this kind, and then put it aside and take up other legislation because of the absence of some Senators. Certainly Senators should protect themselves. Certainly Senators should make it their business to be in the Senate Chamber at least during this week. The announcement has been made, and certainly the program will be to continue during Monday, Tuesday, Wednesday, and Thursday, in the hope that a vote can be had.

Of course, if a unanimous-consent agreement is entered into, it will be perfectly agreeable to the acting majority leader, and at that time an announcement will be made. But I say that in the absence of an agreement, we ask the Members of the Senate to be here, and this matter will be the order of business; and certainly I will do my level best to drive for a vote on the proposed legislation.

CIVIL RIGHTS—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 516)

The PRESIDING OFFICER (Mr. WILLIAMS in the chair) laid before the Senate a message from the President of the United States, which was read and referred to the Committee on the Judiciary.

(For President's message, see today's proceedings of the House of Representatives on p. 927.)

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDING OFFICER laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

RECESS

Mr. WHERRY. Mr. President, if we have concluded the work of the Senate for the afternoon, I now move that the Senate take a recess until tomorrow, Tuesday, at noon.

The motion was agreed to; and (at 5 o'clock and 51 minutes p. m.) the Senate took a recess until tomorrow, Tuesday, February 3, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 2, 1948:

UNITED STATES COURT OF APPEALS FOR THE DISTRICT OF COLUMBIA

Hon. Harold M. Stephens, of Utah, to be chief justice of the United States Court of Appeals for the District of Columbia, vice Hon. D. Lawrence Groner, retired.

Hon. James M. Proctor, of the District of Columbia, to be an associate justice of the United States Court of Appeals for the District of Columbia, vice Hon. Harold M. Stephens, elevated.

UNITED STATES PUBLIC HEALTH SERVICE

The following-named candidates for appointment and promotion in the Regular Corps of the Public Health Service:

To be senior surgeon (equivalent to the Army rank of lieutenant colonel), effective date of acceptance:

Percival E. Faed

To be surgeon (equivalent to the Army rank of major, effective date of acceptance:

Walter P. Griffey

Senior assistant surgeons to be surgeons (equivalent to the Army rank of major):

Charles F. Blankenship
Curtis R. Chaffin
Erwin C. Drescher
Henry A. Holle
John B. Hozier
James G. Telfer
Hugh L. C. Wilkerson

Senior surgeon to be temporary medical director (equivalent to the Army rank of colonel):

Percival E. Faed

Sanitary engineer to be temporary sanitary engineer director (equivalent to the Army rank of colonel):

Harry G. Hanson

Surgeons to be temporary senior surgeons (equivalent to the Army rank of lieutenant colonel):

Walter P. Griffey
James G. Telfer

Assistant surgeons to be temporary senior assistant surgeons (equivalent to the Army rank of captain):

Gleb A. Nedzel
Kirkland C. Brace
Lewis Francis
Frederick G. Germuth, Jr.
Vincent E. Price
Hans R. Huessy

The following-named candidates for promotion in the Regular Corps of the Public Health Service:

Senior assistant surgeons to be surgeons (equivalent to the Army rank of major):

Paul T. Erickson
Eugene W. Green
Frederick J. Krueger
Marion B. Noyes

Assistant nurse officers to be senior assistant nurse officers (equivalent to the Army rank of captain):

Gladys M. Ray
Emijean Snedegar
Edith M. Hettema
Jeannette E. Westlake
Rose G. Ernsberger
Amy L. Cawley
Ina L. Ridlehoover
Philomene E. Lenz
Loretta M. Schroll
Gladys C. Guydes
Mary Raprich

Senior assistant scientist to be temporary scientist (equivalent to the Army rank of major):

Don E. Eyles

HOUSE OF REPRESENTATIVES

MONDAY, FEBRUARY 2, 1948

The House met at 11 o'clock a. m.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Lord God of hosts, who has committed unto us the solemn trust of free government, we pray Thee to renew within us the gift of wonder and the freshness of discovery, whereby new paths are made plain. Speak to us in the secret chamber of our hearts, that we may cast out of our thoughts all unworthy motives and seek the robust stature of Christian character as exemplified by our Galilean Teacher.

In this hour of her tragedy, our Father, we beseech Thy blessings upon India; grant that out of her sorrow she may have the assurance that, though the workman dies, the work goes on forever.

We commend unto Thee our President, our Speaker, and all Members of the Congress, that at all times and places we may revere the sanctity of our personal honor and obligation, by which we may attain unto a larger and better and more useful life. Hear our humble prayer as we pray in the name of Jesus Christ our Lord. Amen.

The Journal of the proceedings of Friday, January 30, 1948, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Miller, one of his secretaries, who also informed the House that on the following date the President approved and signed a bill of the House of the following title:

On January 31, 1948:

H. R. 3645. An act relating to the exchange of certain private and Federal properties within Gettysburg National Military Park, Pa., and for other purposes.

EXTENSION OF REMARKS

Mr. SUNDSTROM asked and was given permission to extend his remarks in the RECORD.

Mr. DONDERO asked and was given permission to extend his remarks in the RECORD and include a short editorial.

Mr. MASON asked and was given permission to extend his remarks in the RECORD and include a statement.

Mr. RICH asked and was given permission to extend his remarks in the RECORD and include an editorial from the Bristol Courier entitled "Bipartisan European Aid."

Mr. REED of New York asked and was given permission to extend his remarks in the RECORD in two instances and to include in each extraneous matter.

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD and include a short statement, and also to include extraneous matter in the speech he expects to make today in the Committee of the Whole.

Mr. COLE of Missouri asked and was given permission to extend his remarks in the RECORD and include an editorial by Frank C. Waldrop entitled "Let's Face It."

Mr. POTTS asked and was given permission to extend his remarks in the RECORD and include a statement of the Thoughts at Seventy, by Dr. Frank S. Hackett, headmaster of Riverdale School, on the value of education in settling the problems of a troubled world.

Mr. POULSON asked and was given permission to extend his remarks in two instances and include two articles.

Mr. HARRISON asked and was given permission to extend his remarks in the RECORD and include an address delivered by the junior Senator from Virginia, Senator ROBERTSON.

Mr. LANE asked and was given permission to extend his remarks in the RECORD in two instances and include in one an article on observance of Boy Scout Week and in the other an article that appeared in the Boston Herald entitled "The United Nations on Trial."

Mr. HUBER asked and was given permission to extend his remarks in the RECORD.

SPECIAL ORDER GRANTED

Mr. LANE. Mr. Speaker, I ask unanimous consent that today, following any special orders heretofore entered, I may be permitted to address the House for 20 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

EXTENSION OF REMARKS

Mr. CELLER asked and was given permission to extend his remarks in two instances in the RECORD.

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent to extend my own remarks in the Appendix of the RECORD on the subject of our greatest need today, a first-class air force, and include therewith a news item.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. REEVES asked and was given permission to extend his remarks in the RECORD and include a statement and an editorial in the remarks which he expects to make today in Committee of the Whole.

THE LATE HONORABLE T. WEBBER WILSON

The SPEAKER. The Chair recognizes the gentleman from Mississippi [Mr. RANKIN].

Mr. RANKIN. Mr. Speaker, may I ask that the gentleman from Mississippi [Mr. COLMER] be recognized at this time?

The SPEAKER. The Chair recognizes the gentleman from Mississippi [Mr. COLMER].

Mr. COLMER. Mr. Speaker, it becomes my sad duty to announce to this House the death of one of its former most distinguished Members. On last Friday, at his home in Coldwater, Miss., the Honorable T. Webber Wilson, lawyer, statesman, administrator, and orator, and one of Mississippi's most beloved and honored citizens, passed into the Great Beyond from which no man returneth.

Thomas Webber Wilson, affectionately known to his friends as T. Webber, was born at Coldwater, Miss., on January 24, 1893. He was the son of Lucy Yancey and Dr. Joseph James Wilson. As a boy, Webber was educated in the public schools of Coldwater and the University of Mississippi at Oxford. He was graduated from the latter institution in 1913. He was a member of the Presbyterian Church, the Kappa Alpha Fraternity, the Masons—being a Knight Templar and a thirty-second degree Scottish Rite—Elks, Odd Fellows, and Woodmen of the World. He was admitted to the bar and began the practice of law in Laurel, Miss., in September of 1913; he was elected prosecuting attorney of Jones County, the twelfth judicial district of Mississippi, over two opponents in the first primary in 1919; he was nominated to the Sixty-eighth Congress in the Democratic primary in August of 1922. He represented the Sixth Congressional District of Mississippi, which I have the honor to represent, with great ability and distinction for a period of 6 years.

Those who are still Members of this body, and who served with him during his term of office here, will bear witness to the fact that nature had endowed Webber Wilson with many of her choicest virtues and attributes. He was as handsome as a Grecian god, as eloquent as a Demosthenes, and as faithful a friend as a Damon. During his service in this House he was easily one of its most popular Members. Born and reared as he was in a land of natural orators, Webber Wilson had few equals, and it is doubtful that he had any superiors as an orator either in his native State of Mississippi or in this body in which he served so ably for 6 years.

Retiring from the House in 1928, Congressman Wilson made the race for the United States Senate against the incumbent, the late and lamented Hubert Stevens. In the spirited race that ensued, he was defeated by the narrow margin of approximately 5,000 votes. Subsequently, in 1933, President Roosevelt appointed Mr. Wilson as a Federal judge in the Virgin Islands. A lover of his fellow man, and of justice and fair play, Judge Wilson soon differed with the then Governor of these islands over differences arising from his administration of that office. Rather than become a party to what he conceived to be an injustice to the Negro inhabitants of those islands, Judge Wilson resigned and returned to his native State of Mississippi. Thereafter, President Roosevelt appointed him as a member of the Federal Parole Board in 1935. He served ably and capably, and with a great humanitarian heart, as a member and subsequently as chairman of that Board until he resigned that commission September 1, 1947. He then returned to his native Mississippi, as he told me in the last conversation I had with him, to enjoy the remaining days of his life in the hills of his native State which he loved with a devotion beyond expression.

Mr. Speaker, Webber Wilson was a man among men. He was a leader and a man of courage and deep convictions. He was a man's man. And, yet, with it all, his disposition was gentle and he always was considerate of the rights of his fellow man. The State and the Na-

tion has truly lost a valuable and honored son.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield.

Mr. RANKIN. Mr. Speaker, I have seldom received a more profound shock than I did when the news came of the passing of Webber Wilson, one of the best friends I ever had.

I have often said that the two most eloquent men with whom I ever served in this House were the Honorable James M. Beck, of Pennsylvania, and the Honorable T. Webber Wilson, of Mississippi.

He died at a time when he would have been of most value to his country. He was only 55, right at the zenith of his usefulness. He was a man of courage, integrity, and ability. His passing is a great loss to the Nation, and a most profound loss to the State of Mississippi.

He was a great Mississippian as well as a great American.

His life was gentle and the elements so mixed in him that Nature might stand up and say to all the world, "This was a man."

Mr. WILLIAMS. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield.

Mr. WILLIAMS. Mr. Speaker, it was not my privilege to know Mr. Wilson personally, but as a Mississippian, I am familiar with the accomplishments of Mr. Wilson during his distinguished career. He was a great statesman and a great man. In these troubled times, Mr. Speaker, this Nation can ill afford to lose the services of a man of his caliber.

Mr. KNUTSON. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield.

Mr. KNUTSON. Mr. Speaker, unlike the preceding speaker, I knew Mr. Wilson well. All who knew him loved him for his many fine qualities. He was never so happy as when he was rendering assistance to those less fortunately situated. I happen to know of one particular case involving a veteran of the late war who had gotten into difficulty. Mr. Wilson interested himself in the young man's case. He came up to my office and talked to me about it. He was as much concerned over that young man who, by the way, did not live in his own State, as though he had been his own son. No one but a gentleman of the finest qualities and the noblest instincts could have done more for that young man than did T. Webber Wilson.

I join with his colleagues, and with the great State of Mississippi, in mourning his untimely passing.

Mr. COLMER. Mr. Speaker, I ask unanimous consent that any other Members so desiring may extend their remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. ABERNETHY. Mr. Speaker, I join with my colleagues in mourning the passing of a great American, a great Mississippian, T. Webber Wilson.

The lives of few men have been more successful or eventful than that of our departed former colleague. As a self-made man his ambitions early in life were fired with an urgent desire to serve his fellow man. In the field of public service he contributed bountifully to the good of his State and country. He was a lawyer of marked ability. For 6 years he served as a faithful and diligent Member of this body. He was a fair-minded Federal judge and a scrupulous member of the Federal Board of Paroles. A few months ago he tendered his resignation as a member of this Board and returned to Mississippi with the hope of recovering in health and of performing many more years of service among the people he loved so well and who so loved, honored, and respected him. But the hand of the unerring One intervened and called this great man to his reward.

Webber Wilson was a convincing public speaker. Frequently he swung sentiment to his side with well-chosen words, a resonant voice, and sound reasoning. As an individual he was one of the most lovable men I have ever known. He was accommodating, kind, courteous, considerate, and possessed a most pleasing personality. I well recall that shortly after I had been first sworn in as a Member of this body he paid me a personal call and made himself and his counsel at my command. To be of service to others wherever and whenever he could was characteristic of him.

We appreciate his Christian life and his great contributions to humanity in private as well as public life. Our departed friend has brought honor to the great State of Mississippi whose people are proud to claim him as their own.

The last chapter has been enrolled on a life and public career which we would do well to emulate.

Mr. WHITTINGTON. Mr. Speaker, T. Webber Wilson was born January 24, 1893, and died at the ancestral home in Tate County, Miss., on January 31, 1948.

His parents were among the most prominent citizens of north Mississippi. After completing high school, he was graduated from the law department of the university and began the practice of law at Laurel, Miss., as soon as he became 21 years of age. Shortly after his admission to the bar he was elected county attorney and after 4 years was elected prosecuting attorney of the judicial district in which he resided. He rose rapidly in his profession and in political preferment. Without opposition he was elected to the Sixty-eighth Congress for the term beginning March 4, 1923, and he was reelected to the Sixty-ninth and Seventieth Congresses. He was not a candidate for reelection to the Seventy-first Congress, but was a candidate for United States Senator to succeed Senator Hubert D. Stephens, who defeated him by a very narrow margin.

After his retirement from Congress Representative Wilson was appointed United States District Judge in the Virgin Islands. Service in the islands did not appeal to him. He was appointed a member of the Board of Parole on July 25, 1935, and he served continuously on the Board until September 1, 1947, when he resigned. He was chairman from April 12, 1946, until his retirement.

For about a year prior to his resignation from the Board his health had not been good. He resigned from the Board to return to his plantation home in Tate County and to engage in the practice of law at Senatobia, Miss. His health continued to decline and, while some of his friends knew that he was suffering from an incurable malady, his death was unexpected to his many friends.

Judge Wilson had been in the House of Representatives 2 years when I became a Member. I had known him in Mississippi and my relations with him both during his congressional service and while he was a member of the Parole Board were most cordial. I join with my colleagues in paying tribute to his memory. When elected to the House he was one of the most popular men in Mississippi. He had a pleasing personality. He was a handsome man and always attracted attention.

While a college student he became an accomplished speaker. Following his admission to the bar he was always in demand as a speaker. He was familiar with literature and with history. His diction was unique and his delivery always pleasing. Judge Wilson at the bar or in Congress will best be remembered as an eloquent advocate and as an accomplished speaker.

T. Webber Wilson loved people. He was always sympathetic with the unfortunate. He took peculiar pride, as a member of the Board of Parole, in carefully examining all applications for parole. He believed that Federal prisoners should be given another chance and he practiced what he believed.

With ill health he looked forward to relief from the duties of public office and to retirement in the ancestral home and to the practice of law as he might choose in his native county.

Few men have ever served in the House of Representatives who had more devoted admirers than our late lamented colleague, T. Webber Wilson of Mississippi.

Mr. WHITTEN. Mr. Speaker, I join with my colleagues from Mississippi in expressing deep regret in the untimely passing of the Honorable T. Webber Wilson, formerly a Member of the House of Representatives from Mississippi.

Judge Wilson was only 55 at the time of his death and only a short time ago retired from public life to return to his native county of Tate, where he had planned to practice law and operate his farm in that area. I shall always treasure my last visit with him during October of last year shortly after his return to Mississippi. He was so very proud to be back home and free of the cares of public office.

Webber Wilson was one of Mississippi's outstanding sons. He was a splendid man in appearance, possessed of an excellent character and pleasing personality. Without question he was one of the greatest orators and public speakers our State has ever produced, and in every way a splendid public servant.

Born and reared at Coldwater, Miss., he lived for many years at Laurel, Miss., from which district he was elected to the Congress of the United States. He had an excellent record here, retiring to run for the United States Senate. After his

distinguished service in Congress, Judge Wilson was appointed Federal judge to the Virgin Islands. As Federal judge, he was able and fair to all and later he became a member of the United States Parole Board, rising to the chairmanship. Here he served many years and built a reputation for his attention to the conscientious discharge of the duties of the office.

Judge Wilson was a member of a very distinguished family of my district. He was a true friend, and in his untimely passing we all have lost a good friend and the State and Nation have lost an outstanding citizen. To his loved ones we express our deepest sympathy.

Mr. WINSTEAD. Mr. Speaker, the untimely passing of Hon. T. Webber Wilson brought great sadness and sorrow to Mississippians and all Americans who knew him.

Judge Wilson, a former Member of this House, served with honor, credit, and dignity in every position of high honor to which he was entrusted. In addition to his service in the United States Congress, he served as Federal Judge of the Virgin Islands and was a member of the United States Parole Board.

Judge Wilson was among the first men I met when I first came to Washington. He offered every assistance and was indeed very helpful to me in many ways.

Few Members of this body ever possessed the unusual personality, outstanding ability, strong character, and high sense of devotion to public service as was true in the case of this distinguished Mississippian.

EXTENSION OF REMARKS

Mr. MILLER of Nebraska asked and was given permission to extend his remarks in the RECORD and include a short report by the Committee on Health Education on book building citizenship.

Mr. CUNNINGHAM asked and was given permission to extend his remarks in the RECORD and include a letter from a constituent.

Mr. FISHER asked and was given permission to extend his remarks in the RECORD and include a letter from Hon. Dillard B. Lasseter, Administrator of the Farmers Home Administration, and an excerpt from the Budget of the United States, 1949.

SPECIAL ORDER GRANTED

Mr. HESELTON. Mr. Speaker, I ask unanimous consent that at the conclusion of all business on the Speaker's table and any other special orders heretofore entered, I may address the House for 15 minutes today.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection

CALL OF THE HOUSE

Mr. RICH. Mr. Speaker, I make a point of order that there is no quorum present.

The SPEAKER. Obviously a quorum is not present.

Mr. ALLEN of Illinois. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 7]

Bennett, Mo.	Hart	Murray, Wis.
Bloom	Hartley	O'Toole
Boggs, La.	Javits	Poage
Bulwinkle	Jonkman	Powell
Burke	Judd	Reed, Ill.
Cannon	Kee	Short
Chiperfield	Keefe	Smathers
Coudert	Kefauver	Smith, Me.
Cox	Kilburn	Somers
Dawson, Ill.	Lanham	Spence
Dirksen	Lichtenwalter	Stockman
Domengeaux	Meade, Ky.	Thomas, N. J.
Fernandez	Monroney	Trimble
Hand	Morgan	West
Harless, Ariz.	Morrison	

The SPEAKER. On this roll call 384 Members have answered to their names; a quorum is present.

By unanimous consent, further proceedings under the call were dispensed with.

SESSIONS OF THE COMMITTEES ON ARMED SERVICES AND EDUCATION AND LABOR

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that a special committee of the Committee on Armed Services may be permitted to sit during the 2 hours of general debate today.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. HOFFMAN. Mr. Speaker, I make the same request with reference to a subcommittee of the Committee on Education and Labor.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

EXTENSION OF REMARKS

Mr. AUCHINCLOSS asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. STEVENSON asked and was given permission to extend his remarks in the RECORD and include a report from the American Automobile Association.

Mr. LODGE asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. COLE of New York asked and was given permission to extend his own remarks in the RECORD and include an address by the Chairman of the Atomic Energy Committee.

Mr. EDWIN ARTHUR HALL asked and was given permission to extend his remarks in the RECORD and include a radio address.

Mr. KERSTEN of Wisconsin asked and was granted permission to extend his remarks in the RECORD and include two articles.

Mr. WOODRUFF asked and was given permission to extend his remarks in the RECORD and include an article by Samuel Pettengill, former distinguished Member of the House.

Mr. WEICHEL asked and was given permissio to extend his remarks in the RECORD in two instances.

Mr. PHILBIN asked and was given permission to extend his remarks in the RECORD and include comments on two matters.

Mr. SADOWSKI asked and was granted permission to extend his remarks in the RECORD and include an article by Mr. Chester Bowles.

Mr. PASSMAN asked and was granted permission to extend his remarks in the RECORD in two instances and include a letter from a constituent and a statement which he made before a committee.

Mr. HARRIS asked and was granted permission to extend his remarks in the RECORD and include an editorial.

Mr. GATHINGS asked and was granted permission to extend his remarks in the RECORD and include an editorial on oleomargarine.

Mrs. DOUGLAS asked and was granted permission to extend her remarks in the RECORD in three instances and to include extraneous matter.

Mr. KELLEY asked and was granted permission to extend his remarks in the RECORD.

Mr. McCORMACK asked and was granted permission to extend his remarks in the RECORD and include an article written by Frank S. Davis.

A YEAR OF GROWTH IN CLEVELAND

Mrs. BOLTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD relative to the happy situation in which Cleveland finds itself.

The SPEAKER. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Mrs. BOLTON. Mr. Speaker, in these days, when there is so much uncertainty and discouragement, it is sometimes wise to look back over accomplishments of the immediate past. We in Greater Cleveland, Ohio, enjoyed a year of growth in 1947. One hundred and twenty-six new manufacturing concerns were established in our community and more than $7,000,000 was spent by 506 of the established concerns for expansion and new equipment. This growth represented an addition of 4,700,000 square feet of manufacturing facilities.

During the year employment continued at a high level with the trend upward and the end of the year found planning on expansion and added employment.

Great Lakes shipping, essentially a Cleveland industry, since Cleveland offices operate 88 percent of the total tonnage, had one of its bigger years. Nearly 78,000,000 tons of iron ore came down the Lakes from the northern ranges; over 58,000,000 tons of coal were shipped, most of it up the Lakes; 418,000,000 bushels, or 11,500,000 tons of grain were moved.

The total net tons shipped on the Great Lakes was over 176,000,000 as compared with 148,000,000 in 1946 and 184,000,000 in the biggest war year—1944.

Nineteen hundred and forty-seven also saw Cleveland become the eleventh city to establish television stations when the Cleveland Press started operation of WEWS.

Many developments of importance industry-wise took place in Cleveland during last year. Among them was a new mercury lamp developed by the Nela

Park laboratory of General Electric Co., a lamp which can be used for "black light" in theaters and on streets. The Midland Steel Products Co. installed the largest mechanical press ever built. It can, in one stroke, form a complete side rail for the steel frames for the largest busses, trucks, and trailers now in production. I could cite many more instances, not the least of which is the NACA Flight Propulsion Research Laboratory, where one of its outstanding engineers, Mr. Lewis A. Rodert, received the Nation's highest aviation award, the Robert J. Collier Trophy. The award was based upon the development leading to the use of heat for reducing the hazard of ice formation on planes in flight.

I could not help but take a minute or two to remind you that progress is being made and that my own city of Cleveland is contributing its full share.

BURIAL OF ORVILLE WRIGHT

Mr. JENKINS of Ohio. Mr. Speaker, I ask unanimous consent to extend a 1-minute speech at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. JENKINS of Ohio. Mr. Speaker, at 2:30 this afternoon at Dayton, Ohio, will be buried Orville Wright, a man who probably did as much for the comforts and general welfare of the people of the world as any man in American history. He will rank with Edison and other great scientists and inventors. The Wright brothers will be remembered as long as time runs and as long as history is written.

High up in the dome of the United States Capitol building is a frieze, most of which was painted more than 50 years ago. These pictures in the frieze represent a number of the most important epochs in our history. There is a vacant section which should be filled. Since aviation is distinctively an American achievement and since it has played such an important part in the advancement of our country and the world, I feel that in that space should be painted a picture depicting the invention of the airplane and the great progress resulting therefrom.

In the Seventy-sixth Congress I introduced a bill providing for the utilization of a part of the unfinished portion of the historical frieze to portray the story of aviation by using as the theme, the all important achievements of Wilbur and Orville Wright. That bill passed the House by unanimous consent in 1941 but as the war clouds were then threatening I did not want to incur additional expenditure and did not press it in the Senate. To keep the matter alive, I have reintroduced that bill in each succeeding Congress and House Joint Resolution 37 is now pending in the Eightieth Congress. In due course I shall ask the committee to which it has been referred to give it consideration. I hope that both branches of the Congress will agree that this is an appropriate way to give recognition to these great Americans. In so doing they will also rightfully claim recognition for the United States as having been the country which gave to the world this great method of transportation.

EXTENSION OF REMARKS

Mr. GWINN of New York asked and was given permission to extend his remarks in the Appendix of the RECORD and include a speech from the Small Business Men's Organization.

Mr. HAGEN asked and was given permission to extend his remarks in the RECORD in two different instances and in each to include extraneous matter.

Mr. ENGEL of Michigan asked and was given permission to extend his remarks in the RECORD and include certain statements, excerpts, and tables.

WHAT SHOULD OUR FEDERAL BUDGET BE FOR THE FISCAL YEAR 1949?

Mr. NORRELL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. NORRELL. This is the most important question confronting the American people today. We have just gone through an expensive and horrible war that cost us about $450,000,000,000. Of this total, $180,000,000,000 was collected in taxes, and $27,000,000,000 was borrowed from the people of the United States.

From a government costing $734,000,000 for the fiscal year 1916, we have gone to one estimated to cost approximately $40,000,000,000 in 1949. We never spent as much as $1,000,000,000 in any 1 year, from the year we acquired our liberty in 1776 to the year 1917. We became a billion-dollar government in the fiscal year 1917, which was at the beginning of the First World War. As late at 1939, which was at the peak of the spending for national recovery, we only spent $9,270,000,000. At that time our national income was $5,165,000,000.

We now have a public debt of about $257,000,000,000. It is estimated that the interest on the public debt during the fiscal year 1949 will amount to about $5,200,000,000, which amount equals the total tax receipts of the Federal Government in 1939—just 10 years ago.

What should our Federal budget be for the fiscal year 1949? The President says that the budget should be $39,700,000,000. The Republican leadership of the House Ways and Means Committee says it ought to be about $35,500,000,000. Senator BYRD's Economy Committee of the Senate says the budget should be about $32,000,000,000. The National Association of Manufacturers says it should be approximately $30,979,000,000. Nearly all organizations and individuals have an opinion as to what the Federal budget should be in 1949. The question is presently undergoing very careful consideration by the Congress here in the debate in the House on the tax-reduction bill.

The national debt today is the largest that has ever been carried by any nation in the world's history. If divided among the families of the United States, each family would owe about $7,000; if divided among the individuals of the Nation, each individual would owe approximately $1,900. It is so large that I fear sometimes we are unable to understand just how serious it can become to the national economy.

We have the highest national income in the history of the country. It is estimated that the income for the fiscal year 1949 will be not less than $209,000,000,000; and there are persons who believe that the income may exceed this and possibly reach the staggering figure of $225,000,000,000. I do not know what the income may be, but I do know that we are now enjoying a high degree of prosperity. It is time to cut appropriation bills to the core and, I think, to apply all of the surplus in the Federal Treasury toward retirement of this public debt.

If all of the surplus were to be applied toward retirement of the public debt, of course there would be no reduction in taxes. I am also afraid that Congress will not cut appropriation bills as they should be cut, so long as there are surplus funds in the Treasury of the United States. I have observed through my long years of experience in both the Arkansas State Legislature and in the Congress of the United States that the legislative body has a way of appropriating the available funds. If Congress first enacts all appropriation bills and then permits the surplus, if any, to be applied on the public debt, I fear there would be no surplus to be applied on the debt.

That being true, I think the people of the United States should be given some tax reduction. The bill presently pending in the Congress, in my judgment, cuts taxes too much. However, I am strongly in favor of the passage of the provision with reference to the community-property law. All States should enjoy the same treatment so far as Federal taxes are concerned. However, the bill probably reduces other taxes too much. There are some items in the Federal budget that cannot be reduced very much, such as: national defense, presently estimated to cost about eleven billion twenty-five million; veterans' affairs, about six billion one hundred and two million; interest on the public debt, five billion two hundred and fifty million; tax refund, about one billion nine hundred and ninety million. I believe that the total of these items which cannot be reduced, at least in this session of the Congress, is $24,367,000,000.

The President has submitted a total budget of $39,700,000,000. Consequently, if you take these items that cannot be cut by the Congress from the total budget you have $15,323,000,000 to cover the other expenditures of the Federal Government. These other expenditures necessarily will have to cover such items as international finance, social welfare, health and security, housing, community facilities, education, general research, agriculture, agricultural resources, natural resources not primarily agricultural, transportation and communication, finance, commerce, industry, labor, general government, and other contingencies. These items necessarily should be kept at a minimum.

Our estimated receipts for the fiscal year 1949 are about $45,000,000,000, according to the best estimates obtainable. Consequently, if we make the appropriations as suggested by the President, we will have but $5,300,000,000 surplus in the Treasury. Of course, the President has included such big items as international affairs, or the Marshall plan, in his budget. If we pay any part of the principal on the public debt, it will have to come out of the surplus fund.

I would like to see the entire surplus, I repeat, applied toward the retirement of the public debt. I know that this cannot be done, or will not be done—and I also know that if we make our annual appropriations first, with the idea of paying whatever remains of surplus funds on the public debt, there will be no surplus for this purpose.

I fear that the Knutson bill now pending makes too drastic cuts for us to continue to live within our national income, or without creating future deficits. I understand there may be offered a motion to recommit, with instructions to substitute another bill for the pending Knutson bill. I am not in favor of all of the provisions of the substitute bill. However, since I am in favor of some form of tax reduction, such as the adoption of the community-property provision, an increase in exemptions, and other provisions, it may be that I shall vote for the motion to recommit, realizing that that motion shall be defeated; and then vote for the Knutson bill on final passage, on the theory that what we do in the House will constitute a basis for consideration by the Senate, and that the Senate may—and I hope will—eliminate the objectionable features of the present proposal to reduce taxes, pass a fair and just reduction in taxes so that all of our citizens shall be treated equitably, and submit a possibly passed bill that the President will approve. And I hope that I shall be able to support the Senate amendments when the bill is returned to the House for further consideration.

EXTENSION OF REMARKS

Mr. LUDLOW asked and was given permission to extend his remarks.

THE TAX-REDUCTION BILL

Mr. KNUTSON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H. R. 4790) to reduce individual income-tax payments, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H. R. 4790, with Mr. HOEVEN in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Under order of the House entered on Friday last, debate on the pending bill was extended 2 hours for today, the time to be equally divided between the gentleman from Minnesota [Mr. KNUTSON] and the gentleman from North Carolina [Mr. DOUGHTON].

Mr. DOUGHTON. Mr. Chairman, I yield 10 minutes to the gentleman from Arkansas [Mr. MILLS].

Mr. MILLS. Mr. Chairman, I trust that in the closing hours of this debate all of us may reach a correct conclusion as to what we should do regarding H. R. 4790. It is my own personal view that on the basis of figures that have been submitted to us during the course of the debate by both our Republican and Democratic colleagues, we cannot reach the conclusion, in good conscience, that the receipts of Government during the next fiscal year can be reduced $7,000,000,000 and still make an adequate and substantial payment on the public debt, or even with any degree of certainty remain on a balanced budget.

Had we taken the word of those who sponsored H. R. 1 as it was originally considered on the floor of the House in 1947 as to what the results would have been had that bill become law, we would have ended the fiscal year on June 30, 1947, with a deficit of $570,000,000 instead of a surplus of $753,000,000 as we did without its passage.

Do any of you know as a matter of certainty, based on what you have heard so far, that a similar result will not be reached at the end of the fiscal year 1949 if you pass this bill now before the House? In view of the uncertainties that must exist in your mind in regard to the figures that have been mentioned on the floor of the House, do you not think it is wise, therefore, that we take some other action than that called for by H. R. 4790?

Mr. Chairman, if there is any doubt in the mind of any Member that the fiscal affairs of our Government will not permit a reduction of $7,000,000,000 for the next fiscal year, I do not understand how in good conscience he can support that type of reduction. If there is no concern or doubt in your mind, if you know that we can remain on a balanced budget and pay a substantial amount on the public debt and at the same time support this bill, then you know more than any of us on the committee have been able to determine with any degree of certainty.

What is the alternative? There is an alternative that you can support in all good conscience and with the utmost degree of certainty that its passage will not result in the unbalancing of the budget for the fiscal year 1949, and that there will be a substantial payment made upon the public debt, and also provide needed relief for individuals. That is the motion to recommit which today will be offered, as I understand, by the distinguished minority leader, the gentleman from Texas [Mr. RAYBURN]. That motion to recommit will provide, as you have been informed through the press and radio, an increase in personal exemptions of $200 per capita, from $500 to $700, at a loss in revenue of $3,250,000,000. It will provide further for the splitting of income on the principle of the community-property States. In other words, the motion to recommit removes the inequity that we have referred to since 1913 as existing in income-tax laws as between community- and non-community-property States.

There is another and third item in the motion and, Mr. Chairman, I feel that because of its inclusion in this motion to recommit there may be some cause for concern on the part of some of the Members of the House. The third item of the motion is the one perhaps on which there now rests some degree of controversy. I feel certain that everyone on the floor of the House who desires any degree of reduction in individual income tax levies can support the first two propositions. It is the third about which there is some concern.

Let us consider it. The excess-profits tax contained in the motion to recommit is not the same excess-profits tax that we had in time of war. It differs in three primary respects. First of all, the normal profit under this motion is increased from 100 percent of prewar normal profit to 135 percent. How does that affect corporations? Even those corporations that figure normal profits on the basis of invested capital would be permitted under this proposition, for the purpose of this tax, to consider 11 percent as normal earnings, 11 percent, Mr. Chairman, on the first $5,000,000 of invested capital. In addition to that, there is an excess-profits tax exemption of $50,000 contained in the motion to recommit. A corporation that was permitted to make $100,000 in time of war as normal profits under this proposition would be permitted to make $185,000 as normal profits and before the excess-profits tax would apply. The rate of tax is different under the motion excess profits, as determined, would be taxed at a rate of 75 percent, not 85 percent. It is not, therefore, the same old excess-profits tax; it is entirely different.

How can we justify repealing it in 1945 and reimposing it now? That is a question that may be bothering you. Congress did repeal the excess-profits tax, the old wartime tax, in the fall of 1945. But do any of you doubt that now the circumstances, the economic conditions, are entirely different than they were in the fall of 1945. Business, Government, all said that by April of 1946 there might be unemployment of six to eight million people. We could not afford to leave in the law anything that we were told by business or Government might serve to defeat production during the year 1946. Just because the results were not those predicted does not minimize the fact that the Congress may have been wise then in repealing the tax. Yes, it gave us some degree of insurance. But we are now under entirely different circumstances. We are under circumstances where corporations during the year 1947 have made greater profits after taxes than in all of their peacetime history and perhaps even in wartime history. You must make up your minds in the spirit of fairness whether some corporations now making these great profits are in a position to better make more substantial payments on the national debt than are some of those in the first and second brackets of our individual income tax. Are they in better position to make this payment?

For all my life I have heard it said, that this great party in opposition to us, the great Republican Party, is the party of big business. We have heard it, and the party is so charged. This is the one opportunity you have had since I have been a Member of this body to remove yourselves from that characteriza-

tion and finally and utterly convince the people during this year 1948 that you are not the party of big business, that you are a party that believes in a sound fiscal policy, that you are a party that believes in splitting and dividing the costs of Government on the basis of ability to pay.

If the corporations have a greater ability to pay than the individuals in the lower brackets, what answer will you give these individuals if you vote against the motion to recommit? That is the big question involved. They must know your bill, H. R. 4790, will not pass, that they will not get relief through it. Can you bring yourselves to the conclusion that we can justify, in equity and fairness, the reimposition of a greater tax on these corporations, 22,000 of them out of a total of 360,000 taxable corporations so that individuals may have a saving in their yearly tax bills? "Yes," is the only answer you ran reach.

Since over-all revenue losses must be held to a minimum if substantial payment on the public debt in fiscal 1949 is to be made and since we do desire relief for individual taxpayers, I know of no other way to obtain both goals than the motion to recommit. This motion should prevail.

Mr. KNUTSON. Mr. Chairman, I yield such time as he may desire to the gentleman from California [Mr. GEARHART].

Mr. GEARHART. Mr. Chairman, it is said that life is but a succession of disillusionments. Fallacies which we have taken unto our hearts and embraced with fervor, must so often be yielded in the light of immutable truth. Someone is always breaking our dolls; and from iconoclastic rudeness I, too, have suffered at times.

In the days of my high-school debating, I was easily convinced that the income tax was the fairest, the most just, and the most equal of all methods for revenue raising. Years of observation of the impact of income taxes upon the economic structure of the country, of years of experience gained both as a Member of Congress and as a member of the tax levying Committee on Ways and Means, has brought me my disillusionment. Instead of the income tax appearing to me now as the fairest, the most just, and the most equal of all taxes, it is to me the most unfair, the most unjust, and the most unequal tax ever devised by man.

It is my considered opinion that the time has arrived when it should be exposed to the American people for what it really is, an instrument of discrimination, a destroyer of incentive, a penalty upon the talented, a sapper of our national economic strength, a rattler of the chains of communistic slavery in a country that asks nought but the right to remain free.

Great changes have come over the tax structure of the United States, the economic system under which our country has achieved its present greatness, in these last several years. Because of those great changes that have occurred in our system of taxation, changes of the greatest significance, it is now incumbent upon us to reinvestigate the tax structure, to restudy the influence of the income tax upon our economic system, and to arrive at a determination as to whether we can go on with it as we have in the past without endangering the very things which we hold nearest and dearest, among them, the American way of life, that indefinable thing of which the poets sing and bards recite.

A glance at the record discloses that, in 1939, the over-all of the national budget was only $9,000,000,000. By 1948 it had crept up to the stupendous figure of $39,600,000,000, to four and one-half times what it was in 1939, the last peace year.

Reference to these same statistics discloses that, in 1939, we had 4,000,000 taxpayers but, by 1947, the number had grown to 52,000,000—to 13 times as many as we imposed the income tax upon during that year next preceding the commencement of war.

Then we notice, to our astonishment that in 1939 we raised but $1,000,000,000 in individual income taxes but that by 1947 the collections had jumped more than 17 times, to the stupendous figure of $17,600,000,000.

Then, as we scrutinize the entire revenue system, we notice to our still greater amazement that we are now taking over 80 percent of our total national revenues by the income-tax method; and last year we found that that levy only reached 40 percent of the national income, this by reason of exemptions, exclusions, and deductions. In fiscal 1947, $105,000,000,000 of the national income escaped the income tax completely. Have we not too many of our golden eggs in one basket?

These are startling facts, amazing figures. The time has arrived when this Congress should give very, very serious consideration as to what we are going to do about it. We cannot go on much longer as we are. We must make up our minds in respect to where we are going, and chart our course accordingly. Disaster stalks us.

Can we justify a system of income taxation which places 52,000,000 taxpayers on the rolls and expects but 52,000 revenue bureau employees to collect the full amount which is due the Government? Is it not manifestly impossible for 52,000 revenuers to properly police 52,000,000 taxpayers? If it were possible, it would mean that each one of them would have to check a thousand income-tax returns, not only check them with a red pencil but to ascertain from them and by independent investigation whether or not the returns reflect the true tax situation of the individuals who filed them.

In this situation of sheer helplessness in which the Internal Revenue Bureau finds itself is the invitation to fraud which all the power of government is unable to stem.

Let us look into the history of the income tax. Where does it come from? What are its antecedents? Who were its first apologists? How did it come to be fastened upon the country? I have listened to many income-tax speeches but I have never heard anybody devote much time to the history and philosophy of this system under which the American people have grown so restive.

It is interesting to note that income tax was first written upon the statute books in England in 1799, under the Pitt government. It was laid upon the British people because the English were in great need of funds with which to win its war with France, a war in which much was involved and the outcome was most uncertain. The war came to an end in 1802 with the signing of the Treaty of Amiens. In accordance with the demands of the people, its first venture into income taxing was quickly repealed, to the rejoicing of the entire nation. Bonfires were lighted all over England as the people celebrated the elimination of a tax system which they abhorred. Later, under bills introduced in Parliament, all records of taxes collected under this inquisitorial system, so hateful to a free people, were to be burned and destroyed. Every name, every figure, every record having to do with it was to be blotted from the papers of the King's Remembrancer. As a result of this agitation, only a bare statistical outline of the war income tax remained in the musty files of that ancient day.

The Treaty of Amiens failed along in the middle of the next decade and the British and the French were again at war. With the resumption of hostilities, the income tax was reimposed upon the English people to make certain that the fruits of the victory over France would remain England's. This time it remained on the statute books for a few years more, only to be again repealed, in 1816, in response to the insistent demands of an aroused people grown restive under the inquisition which is so inseparably a part of that hated program. And, again, there were bonfires and rejoicing among the people everywhere as the traditional British right of privacy in their books and papers and business transactions was restored unto them by the Parliament that had taken it away.

Then there was a long period in which there was no income tax in England.

It was not until 1846, at a time when the repeal of the corn laws had so reduced the customs revenues of England as to have created a crises in British finance, that the then government of Prime Minister Robert Peel, over the violent objection of the tax-paying public, but in response to the demands of the demagogues of that day, the "soak the richers" and the "spread the wealthers," reimposed a third income-tax law upon the people.

At that time, who were the outstanding advocates of the graduated income tax? During the course of my remarks I will mention some whose names will be familiar to you, but, first let me digress to point cut that this is a very important year in the estimation of a lot of people, far too many for the good of our country. If you do not know it, permit me to remind you that this year is the one hundredth anniversary of the Communist manifesto of Karl Marx.

Karl Marx is the real father, the first real proponent of the income tax as we now know it. In his manifesto he listed the graduated income tax as the second of his 10 most important steps to be taken in the communistic drive to destroy the capitalistic system of free enterprise in

all countries, this as a means to the nationalization of private industry. And as we evaluate the force of his recommendation, let us not forget that it was Marx who said:

The theory of communism may be summed up in one sentence: Abolish all private property.

His partner in communism, Frederich Engels, also a prolific writer of subversive literature in those days, placed the graduated income tax, the progressive income tax, as he referred to it in his Grundsätze des Kommunismus, as point No. 1 in his list of steps to be taken as a means of accomplishing the destruction of private enterprise everywhere.

Why did they advocate it? Why did they so earnestly desire the graduated income tax? What magic is there in it as a means of getting rid of the private enterprise system, the system under the influence of which England, Germany, and the United States have become, each in its turn, the greatest and most powerful nation the world has ever known? The answer should not be difficult to fathom. Capitalism must be constantly fed with new capital and new capital can only come from savings, from the accumulations of the people. The source of new capital must be destroyed. That is why Karl Marx constantly admonished his followers to advocate graduated income taxes in whatever country they might reside.

Both Marx and Engels counseled their disciples not to be concerned over how light the levies might be in the beginning. As they and others pointed out, the graduated income tax is essentially a politicians' tax, so much so that one need not worry about what would happen to it in the future. Just get it on the statute books, they counseled. Place this incomparable money raising potential in the hands of the politicians and bother not as to how they will use it, for as a certainty, every time a budget gets out of balance, every time there is a pet extravagance to finance, the politicians will raise it a point or two, and keep on raising it a point or two at a time, until they break the back of their camel with their last straw.

To Marx and his crew it was as certain as night followed the day that it would not be long before the politicians and their blessed income tax would be taking all of the earnings of the people over and above that which they need for a day-to-day living. When this point is reached, the capacity of the people to save and accumulate capital will have been effectively destroyed and the saving groups, upon whom private enterprise depends for the new capital which is indispensable to its continued existence, will have been liquidated. With this drying up of new capital accomplished, there will be no way for private enterprise to turn save to socialism, or to what is worse, to that collectivism in which England flounders today.

Coming on down into this modern era, we hear the Honorable Cordell Hull, then a Representative from Tennessee, talking about this politician's tax. He said—smacking his lips, no doubt:

With the income tax a permanent part of our fiscal system, Congress can readily prevent a deficit or reduce a surplus in the Treasury without disturbing business by the simple lowering or raising of the income-tax rates.

Scoffing at the predictions of the Honorable Elihu Root, a great Secretary of State in his day, and, in debate, a worthy antagonist of the best of them, that the keeping of income-tax records would, in time, become a burden to the people, and that the rates would be gradually raised until they would become confiscatory, this same Representative Hull, in 1913, reassured the country in these honeyed words:

Every good citizen * * * should be willing to devote a brief time during some day of the year when necessary to the making up a list of his income for taxes (and to contribute) * * * not the Scriptural tithe, but a small percentage of his net profits.

Despite these comforting assurances from our distinguished Secretary of State-to-be, it is interesting to note that, within less than 5 years, this ingenious legislator, then a high-ranking member of the Committee on Ways and Means, reported a revenue bill to the House of Representatives in which the normal income-tax rate was fixed at 12 percent and the surtax rate at a top of 65 percent.

What happened to the genial Tennessean's "Scriptural tithe" is too sad a tale to dilate upon at this moment. Nor is there profit to be gained in commenting upon his soothing assurance that but "a brief time during some—1—day of the year" would be "when necessary" sufficient to make out an income-tax return. The harried businessman, all but driven to distraction by his income-tax calculations, will have his own ideas on that.

So let us return to merry old England and weigh carefully the words of her greatest statesmen, Gladstone and Disraeli, often at dagger's points, but on the issue of the income tax as one.

As a means of achieving the socialization of private enterprise in all countries, it was not only Karl Marx and Frederich Engels who saw in the graduated income tax the instrument for which they were searching. Other great minds of the day, and they were indeed great minds, those of Prime Minister Gladstone and Prime Minister Disraeli, saw in the graduated income tax the same evil potential. Each of them—and many others—opposed the income tax for the selfsame reason that Karl Marx and Frederich Engels and their subversive followers favored it.

Mr. Gladstone said in public debate upon the floor of the Parliament:

Of all the taxes on the statute books, the income tax is the one tax through which it is possible that socialism or communism or anything like them can, in the nature of things, find an entrance into our system. It cannot be done by indirect taxation.

The debate rushes on, down through England's eventful history. Gladstone, indeed an authority whom we must respect, again and again cries out against the inequities of the income tax. We hear him declaiming:

I believe it (an income tax) does more than any other tax to demoralize and corrupt the people.

Later he said, when apologizing to his countrymen for not bringing about the repeal of this hated system of taxation:

I think some happier chancelor of the exchequer may achieve this great accomplishment and that some future poet may be able to sing of him: "He took the (income) tax away, and built himself an everlasting name."

Disraeli, whose name will ever live in history as the builder of the British Empire, said:

The odious feature of this tax (the income tax) cannot by any means be removed or modified.

Then, when the income-tax debate shifts to the United States in later years, we hear the prophetic voice of Representative Sereno Elisha Payne, not one of the lesser but one of the greatest chairmen of the Committee on Ways and Means, as he rises to his feet in this House one day—in 1909—to thunder his denunciation upon those who would impose this soul-destroying tax upon the American people. Harken to his words:

As to the general policy of an income tax, I am utterly opposed to it. I believe with Gladstone that it tends to make a nation of liars; I believe it is the most easily concealed of any tax that can be laid, the most difficult of enforcement; and the hardest to collect; that it is, in a word, a tax upon the income of the honest men and an exemption, to a greater or lesser extent, of the income of the rascals; so I am opposed to any income tax whatever in time of peace.

At this point I want to pause to make a comment. Until we added two amendments to the Constitution of the United States there was indeed a recognized constitutional right of privacy, in this freedom-loving country of ours. But when we got the sixteenth amendment, the income tax, and the eighteenth amendment, prohibition, that constitutional right to privacy was dealt a staggering blow. That mythical figure, Uncle Sam, had been a beloved member of everyone's family. Until then, he was held in the highest esteem and warmest affection. He led us in all of our parades and celebrations and presided at all of our ceremonials. As a symbol of liberty, he was large in the hearts of the American people. But, when the sixteenth amendment and the eighteenth amendment were written into our Constitution, that beloved figure almost overnight became a symbol of inquisition, of something hateful in our way of life, something to be despised rather than loved—and respect for him visibly waned. To those who revere law and ever plead for order, this was tragedy.

Under the influence of these two amendments, twin instruments of disaster, Uncle Sam's eye went to everybody's key hole. His long nose was soon in everybody's books. He went about sniffing everybody's breath and making himself generally obnoxious. His surveillance was such that everyone was soon under the sense of oppression which results from being watched. With it all, he became an American inquisitor, and with him crafty men matched wits.

Mr. Chairman, we struck one blow for freedom and rid the Constitution of the eighteenth amendment. And the statute books of the Volstead Act.

Mr. Chairman and friends, is the time not here when the American people must rise up once again and strike another blow for freedom, this time against the sixteenth amendment and all of its incentive-destroying intendments?

To further illustrate the un-American character of the sixteenth amendment, I want to read something which I have culled from a decision of the Supreme Court of the United States, a paragraph from the decision rendered in the case of *Boyd* v. *United States* (116 U. S., p. 631):

> Any compulsory discovery, by extorting the party's oath or compelling the production of his private books and papers to convict him of a crime or to forfeit his property, is contrary to the principles of a free government. It is abhorrent to the instincts of an Englishman. It is abhorrent to the instincts of an American. It may suit the purposes of a despotic power, but it cannot abide the pure atmosphere of political liberty and personal freedom.

To revert again to Gladstone, let me read these words as I pass from this subject:

> The public feeling of its (the income tax) inequity is a fact most important in itself. The inquisition it entails is a most serious disadvantage. And the frauds to which it leads are an evil which it is not possible to characterize in terms too great.

Karl Marx was for it as a means of achieving a nationalization of industry. He predicted that any nation that adopted the graduated income tax would in time be compelled to turn toward socialism. He was for it for that reason—which he deemed desirable. Just how accurate was he in his predictions? In England has come the very thing for which Marx and Engels struggled and against which Gladstone and Disraeli warned.

The gradual raising of the income-tax rates to the point of confiscation, as Marx advocated and Gladstone predicted, has completely liquidated England's saving groups. The source of new capital, so essential to the preservation of the private-enterprise system, has been effectively destroyed. The people could no longer supply the capital which industry needed; and, because they could not, English industry fell into obsolescence. Their productivity per man-hour fell lower and lower with the passing of time.

Finally the time arrived when English industry could no longer finance its own modernization, could no longer reequip itself with new tools and machines, could no longer avail itself of new inventions or make use of the newest methods. Such was the natural consequence which was the prophecy of Karl Marx. It left England with no way to turn but into the morass of socialism in which it now flounders.

All this is as easily traceable in the statistical records of that country as is the evolutionary development of the world in the rocks of antiquity.

Prior to World War I, the British people were saving from 13 to 15 percent of their national income. As income taxes rose to higher and higher levels under the influence of the doctrines of the Lloyd George government, the saving capacity of the English people fell, by 1919, to but 7 percent of their national income. In 1924 it was down to but 5 percent of the national income. Continuing in its downward course, it hit bottom in 1938, leveling off at 3.84 percent. It was then too late to save England from socialism. Today she is just where Karl Marx said she would be 100 years ago.

Many eminent economists say that the United States is but 10 years behind England in this process. The dark picture which they paint does, indeed, find color of correctness in the statistical records of the Department of Commerce. We note that in 1944 the American people were saving 24.4 percent of their disposable income. In 1945 they were saving but 19.3 percent. In 1946 it fell to 9.3 percent. In 1947 it was down to 6.4 percent.

What do these figures portend? Is the same immutable process at work in America today that, 10 years ago, foretold England's destruction? Is this another deadly parallel?

Let me say to the greater glory of both the Republican and Democratic Parties that neither of these truly American political agencies ever urged the imposition of a graduated income tax upon the American people. It remained for the Communist Party, the Greenback Party, the Union Labor Party, the People's Party, the Farmers' Alliance, the Industrial Union, and the Socialist Party to advocate the adoption in America of the graduated income tax; as the 1912 platform of the Socialist Party recites: to raise funds, the proceeds of which "to be employed in the socialization of industry."

What is the sum total of it all, and what is the warning that I bring to you now? The saving groups in America are liquidated as they were in England a decade ago. The saving groups in the United States are no longer able to supply the capital necessary to the maintenance and the modernization of private industry in America. All the great financial magazines in this country are proclaiming over and over again the utter unavailability of new capital, of which industry is in such desperate need.

According to the economists, we are going to need $105,000,000,000 to modernize American industry, which is now largely in obsolescence, in the next 5 years. That means we must raise $21,000,000,000 every year for 5 years. Private industry can provide two-thirds of that, or $14,000,000,000, by internal savings, but the remaining portion must be supplied from the savings of the people, and the people cannot provide those savings under the confiscatory income-tax levies now the vogue.

In the light of this discouraging trend, no wonder the National City Bank in their report of November 1947 cry out in these words:

> In the present structure, the supply of new savings out of current incomes of individuals is seriously deficient in relationship to the demands of capital. For example, the individual investor has come close to disappearing as the source of new capital for private business. Estimates of the Securities and Exchange Commission indicates that individuals in all of 1946 added nothing net to their holdings of corporate stocks and bonds. The same is true for the first half of 1947. A major cause is income tax levels so high as to force continuous dissaving in the higher income brackets and shut down new supplies of savings further down the line—

And so on for page after page.

So I come to the end of my discussion, not because I have cited anything like the full amount of authority I have in my folder here, but because I know that I am intruding upon the time of others who themselves have a right to express their views upon this great question.

I am for the Knutson bill earnestly and sincerely, not because I consider it complete in its levies, or because I think it is a perfect bit of legislation, but because it points in the right direction. It makes levies which will bring our income-tax levies down—true, not far enough, but far enough, indeed, to revive a very necessary saving group which is so essential to the welfare of our country and its future. It is this group which must supply the savings out of which will come the capital which will modernize industry, provide it with the necessary new machinery and tools, making it possible for industry to avail itself of the most modern methods, the only thing which will preserve America as the kind of a country that we all want it to be.

And the workingman must be reminded that in the restoration of this saving group lies his salvation. He must not forget that it takes from $8,000 to $10,000 of newly invested capital to create one new job. If industry is to be deprived of the new capital it needs for its modernization, to reequip its plants with the newest tools and machinery, to avail itself of the newest methods, this deprivation will be reflected in obsolescence—and that spells out, in plain English, less production, fewer jobs, and lower wages, all to be reflected in a lower standard of living for everyone.

May God forbid it!

Mr. KNUTSON. Mr. Chairman, I yield such time as he may desire to the gentleman from Illinois [Mr. OWENS].

Mr. OWENS. Mr. Chairman, the individual income taxpayers of the Nation are still paying the same high percentage of taxes that they were paying during the war years. This is unjust, especially when we have the history of the past to guide our actions. After the First World War ended, the taxes were lowered immediately. The result was that business and the national income expanded, and it was possible to reduce the national debt. Taxes were lowered further and further, with the same favorable result, so that within a period of 10 years the income-tax burden upon the people was insignificant, and in the same period of time the national debt was reduced almost 40 percent.

It clearly appears that the present bureaucratic administration feels that it is dangerous to allow money to remain in the hands of the people. The guiding geniuses at the helm know how to spend the money better than those who work so long and hard to earn their weekly wages. But what have these geniuses been doing with the vast sums which have been collected each year? They

are continuing to retain on the pay rolls of the Government many persons who might better be out in the industrial world helping to increase production which is so greatly needed. At the same time, the necessary Federal employees cannot be paid the wage to which they are entitled, and which they desperately need to meet the advancing living costs. The administrative leaders are continuing to maintain bureaus, departments, and commissions which could well be discontinued now that the war is ended. In the effort to maintain such a status quo, they have conjured emergencies here and abroad, and have as a result thereof, entered into competition with private business in order that many commodities might be exported to foreign countries. This has caused shortages, and our prices have increased. Then they have asked the people to desist from consuming certain food products such as poultry and eggs and then, in fear that the prices might drop on those items, they have gone into the open market to compete for them in order to maintain the price thereof. Does that make sense?

The same persons who are opposing H. R. 4790, the Republican sponsored income-tax reduction bill, and predicting dire consequences if the same should be passed, are hardly in position to act as prophets of the future, if we are to judge from the past. They, and this includes the Secretary of the Treasury, estimated a budget for 1947 which was $11,700,000,000 under the final figure. In other words, they missed by approximately 37 percent. And at the end of the war they stated that within 6 months there would be 8,000,000 persons unemployed, and they took definite inflationary action to offset such possibility. They were 80 percent wrong in their estimate. Therefore, how are we to judge their present prognostications?

They well know that the President's proposal, which has been introduced as H. R. 4968, would be very costly to both the people and the Government. While it would give a $40 credit which would have the effect of causing approximately 10,000,000 persons to pay no tax, such persons would have to file returns, and deductions would have to be made from their weekly pay, both of which operations would be very expensive to business and to the Government, although it would thereby continue many persons in tax administrative work for the Government who could otherwise be in private industry. While H. R. 4790 would cause approximately 7,000,000 persons to have no tax to pay, they would be completely removed from the tax rolls, and there would be no expense incident thereto.

The President's proposal will undoubtedly be ignored by the Members of his party in Congress, as it should be, but from remarks which have been made it is apparent that an effort will continue to be made to seemingly give tax relief to the most numerous of the taxpayers, who are in the lower tax brackets, but retaining practically the same amount of revenue by increasing the taxes of certain corporations. They well know that those corporations have the power to pass such tax on to the consumer by increased prices all along the line of distribution, so that, in the final analysis, the millions who were supposed to be removed from the tax rolls, as well as 19,000,000 others who have not been receiving enough wages to pay taxes, and also every person who continues to pay taxes, will have to respond by payment of high prices which in turn will constitute a further argument in support of the administration's effort to secure price control.

The people of this Nation want relief. If the money is returned to the States, then the people can use it for living costs, education, municipal improvements, charity, to purchase housing which is greatly needed, and also for a few luxuries which they crave. They know how to spend the money as well as the Federal Government and will waste much less. They should have the opportunity for a change.

Mr. KNUTSON. Mr. Chairman, I yield such time as he may desire to the gentleman from Tennessee [Mr. PHILLIPS].

Mr. PHILLIPS of Tennessee. Mr. Chairman, the Eightieth Congress should not delay tax reduction. The American people are looking to this Congress for tax relief. It is the constitutional duty of the Congress to enact tax legislation. The Members of Congress are familiar with the history of the present Knutson tax bill, H. R. 4790. I supported this bill before the first session of the Eightieth Congress, when it was first introduced as H. R. 1. I thought it was a good bill then, and I am now more convinced than ever that it is sound and constructive tax legislation. The present Knutson tax bill was not thought up overnight. It represents the study of thousands of man-hours of careful research by the finest tax experts available. The bill before us is based upon lengthy hearings and testimony from many able witnesses. The Ways and Means Committee has reported a good bill.

Tax rates are so high they have arrived at the point of diminishing returns. Taxes should not continue to be the highest in our history. Under a proper tax reduction new business and new taxpayers would come into existence. The present high level of taxation has considerable influence upon the present high cost of living. It is alarming to realize that it costs the average American more money to pay his taxes than it does to eat. The present high rate of taxes has crippled business and has eaten into the buying power of the Nation, and is in many cases depriving those in need of food and clothing. Under the present rate of taxation the big item in the cost of living in these times of inflation is not the expense of food, shelter, and clothing, but the amount of the American dollar which the Government takes in the form of taxes. The steadily increasing prices of essential commodities since the war is greatly aided by both direct and indirect taxes. When the average American spends money for clothing, food, shelter, and luxuries there is a choice, and the decision in many cases is an individual matter. However, the estimated 31 cents taken out of every dollar for your taxes, together with a multitude of hidden taxes, is a burden over which the average citizen has no voice. The only legislative body that can give actual relief is the Congress.

It is estimated that the present tax bill will give back to the American people, or leave with them, $6,500,000,000, That amount of money placed into the channels of trade and business development will greatly strengthen the purchasing power of America and will stimulate business.

The American people have historically opposed unjust and suppressive taxation. Our forefathers fought to unshackle themselves from taxation without representation. The American Colonies fought against unjust taxation by the British Government. It has been truthfully said that the power to tax may be the power to destroy. The taxing power can be, and is now being, used as a weapon to deprive millions of people of that which belongs to them.

We are passing through a period of readjustment similar to the aftermath of the First World War. As far back as 1918 many people opposed tax reduction. The Congress after the First World War wisely lowered taxes, both personal income and corporate taxes. History shows that this action was in the interest of our national economy. Many people today advocate that there should be no tax reduction, but that any surplus which may accumulate should be applied to the payment of the national debt. Debt reduction is essential, but we cannot justify burdening our citizens throughout this land with a heavy wartime tax. We now have oppressive wartime taxation in this country. America should take the lead in convincing the world that our Republic is founded and maintained upon the principle that all of our citizens shall receive just treatment at the hands of the Federal Government. Canada, to the north of us, since the recent World War has given its people three substantial tax reductions. England has given heavy tax reduction to its people since the close of World War II, and has taken from its personal income-tax rolls millions of its people by raising the personal exemptions. The British Government has received large amounts of money from our Treasury through gifts and loans since the war closed. Yet, they have given tax reduction to their people. It is difficult to sustain a position of opposition to tax relief, and at the same time offer to vote billions of dollars to foreign countries for the relief and rehabilitation of nations all over the world.

The British loan, which amounts to a gift of some $3,750,000,000, is difficult to explain in the light of the heavy tax reduction by the British Government for the people of Britain. The continuation of voting billions of Federal dollars for foreign aid by this country will weaken the spirit and desire for self-help on the part of foreign countries. Our economic stability and the safety of our productive power will depend upon the protection of our standard of living by encouraging individuals as well as business by fair tax reduction. It is now time that we give more attention to our own people. In the hour of desperate trouble, and when this Republic is in danger, we must rely upon the resources, the tax dollars, and

the energy of the people of the United States to defend our Nation. We cannot look to other people throughout the world to help us. History proves that we must pay the bill, and that we must likewise contribute not only materials but men on the fields of battle. The best guaranty to national security is a strong nation of united people, who are 100 percent in support of their Government, because they think it is fair, just, and honest with them, and willing to cut unnecessary expenses, reduce taxes, and maintain its financial solvency. The hue and cry is now going up all over America that we must be mindful of our own people, and stop the present trend of tax, spend, and tax for millions of people all over the world at the expense of Americans, who are being bled white by excessive taxation.

Reduction in taxes is essential to improve the American standard of living. Millions of workers throughout this land are paying such high rates of taxes that their fixed salary and wages under the high cost of living makes it difficult for them to pay their bills. The tax relief in this H. R. 4790 will amount to the equivalent of a wage increase throughout this country, and will thereby increase the purchasing power of our people. The reduction in taxes will boost the pay envelope of millions of people in this country, but at the same time the unit cost of production in industry will not be increased. Tax reduction will, therefore, help solve the problem of inflation and at the same time will not require the producers to add the added cost to the price of commodities sold on the market. For the average family, and especially the poorly paid worker with a large family of little ones to support, this necessary tax reduction will increase the purchasing power.

The farmer who is struggling to make both ends meet is in need of tax reduction, and the present bill will aid him. Many of our farmers are feeling the heavy hand of Federal taxation. It is a wise policy on the part of this great Congresss to lift the oppressive yoke of taxation from that great group of farmers, in order that they might continue to produce and defend the liberty and freedom of this country as they have in the past. The people of this country are today seeking freedom from the shackles of taxation, and waste of public funds, with as much zeal as they used in the fight of other great battles in the history of this glorious Republic.

Under the present high cost of living the present bill will give relief to more than 6,000,000 taxpayers, who will be taken from the tax rolls when the personal and dependency exemptions are increased from $500 per capita to $600 per capita. Tax reductions ranging from 30 percent to 10 percent, according to the size of the income, will be provided for all taxpayers. It is estimated that approximately 25,000,000 taxpayers will receive a 30-percent reduction under the provisions of this bill. Persons with net incomes of $1,000 or less after exemptions receive a 30-percent reduction; persons with net incomes of $1,000 to $1,400 after exemptions receive a reduction of 30 to 20 percent; persons with net incomes of from $1,400 to $4,000 after exemptions receive a reduction of 20 percent; and persons with net incomes in excess of $4,000 after exemptions receive a reduction of 20 percent on the tax imposed on their first $4,000 net income after exemptions, and 10 percent on the tax imposed on any remaining net income after exemptions.

Under the provisions of H. R. 4790, the inequality of the tax burden in common-law and community-property States is corrected so as to permit husbands and wives to split their income for tax return purposes. Under this theory the husband and wife may receive considerable tax relief because they may not be subject to the high percentage increase of the income tax paid under the progressive plan of taxation. As I understand it the husband or wife under the existing law in common-law States may be subject to the high-bracket income-tax percentage where the income for the whole family is earned by either the husband or wife, but the present bill under consideration corrects that situation, and permits the husband and wife to file two separate income-tax returns, and thereby places each one of them in a lower tax-income bracket, which gives considerable tax relief. The bill, therefore, corrects the Federal income-tax differences existing between common-law and community-property tax law States.

When we talk about tax reduction, it is well to take into consideration that great group of Americans who have attained the age of 65 or over, many of whom are unable to engage in active earning pursuits. Under the provisions of this bill an additional exemption of $600 is granted if the taxpayer is 65 or over by the end of the year. It is estimated that this provision will benefit 3,700,000 taxpayers, and will remove 1,400,000 persons from the tax rolls. The above provision is a very worthy provision, because persons in this age group are handicapped in economic opportunity, as well as in physical strength. This group of individuals for the most part are not acceptable for full-time jobs at prevailing wages, and therefore, are in need of this extra exemption and consideration in view of the present high cost of living. It is commendable that the committee has reported a bill providing a special exemption of $600 for blind persons. Blind persons who are 65 or over may claim this special exemption in addition to that based on age.

I come from a small town, and throughout the congressional district which I represent, there are many small business enterprises, small shops, retail stores, dairy businesses, tobacco establishments, farming interests, and business establishments of every kind, all of which taken together constitute the economic strength of that congressional district. These people have indicated that they desire tax reduction. It is my opinion that increased production will strengthen our national economy. To accomplish this goal business managers and agricultural producers must be stimulated, and profits after taxes must be of sufficient size to attract investors into risk-taking enterprise. The present high wartime tax rate is one of the chief obstructions to the achievement of a high level of production. The availability of risk capital to meet the needs of business is greatly reduced by the present high wartime taxes.

The bill under consideration will leave an estimated surplus of at least $2,500,000,000 to $3,000,000,000 which can be applied on debt reduction. Therefore, the Knutson tax bill will help solve the high cost of living, increase the production in industry, equalize the inequality of the tax burdens in common-law and community-property States, give relief to millions of low-income taxpayers by removing them from the tax pay rolls, increase the amount of take-home pay for millions of people, will give millions of veterans who have worn the uniform with honor and returned to their homes the extra necessary amount of money to pay for a home, rather than pay money into the Government under the high rate of taxes, give relief and hope to deserving old people who have reached the age of 65; will place venture capital into circulation, and will aid agriculture by placing more purchasing power in the hands of millions of Americans in the white-collar group, middle classes, and men and women in all walks of life.

When the Eightieth Congress enacts the present tax bill into law, we will have kept faith with the American people, and will have given a ray of hope to a tax-ridden and sorely burdened American people. For the reasons heretofore stated, I am pleased to have the privilege to vote for tax reduction.

Mr. KNUTSON. Mr. Chairman, I yield such time as he may desire to the gentleman from Massachusetts [Mr. GOODWIN], a member of the Committee on Ways and Means.

Mr. GOODWIN. Mr. Chairman, as the newest member of the Committee on Ways and Means I have not had the benefit of previous studies and experience with tax legislation enjoyed by other members of the committee but during that limited period of service I have endeavored to be diligent in study and research, and I enthusiastically support the Knutson bill, H. R. 4790.

The passage of this bill today will be hailed with great rejoicing. The people are confidently looking to this Congress to grant them relief from the excessive burden of individual income taxes.

It is a fair bill. It affords the greatest measure of relief, something well in excess of 72 percent to those with incomes less than $5,000. At the same time it reduces the rate in the middle and higher brackets and will thereby have the effect of giving some encouragement to those taxpayers from whose earnings our industrial economy so largely relies for venture capital.

Nothing will contribute so much to bringing prices down to a lower level as production and more production. We must have risk capital to insure the expansion of business enterprises and the promotion of new ones. Business expansion means more and better jobs for more people and more goods to satisfy the wants of ready buyers. We have

been stifling venture capital by keeping income taxes high, thus impeding production and continuing the inflationary spiral.

Even some of the soundest of American business enterprises are having difficulty today in financing needed expansion through the sale of stock. More money is continually needed to build and equip new plants, expand and modernize existing ones, and replace obsolete, outmoded, and worn-out equipment. Without fresh venture capital business expansion suffers, without business expansion production suffers, and without more and fuller production of wanted goods we continue to postpone the day when supply and demand will again be brought into balance, and prices, through the normal and natural working of economic laws, brought down to a reasonable level.

I have had many letters urging a uniform rule embodying the advantage heretofore enjoyed by taxpayers in the community-property States. Thus I know that the provision in H. R. 4790 permitting married couples to split their income for tax purposes will meet with great favor. In addition to being highly desirable because it has an equalizing effect by removing an unfair discrimination which has been a source of justifiable complaint in the common-law States, I regard this feature as definitely anti-inflationary. By allowing uniform treatment for husbands and wives, no matter in what State they live and permitting them to split their income for income-tax purposes, there will be such a substantial cut in the middle and upper brackets that a large amount of savings in the hands of the taxpayers affected should become available for investment. So we are encouraging saving rather than spending, and that is certainly a salutary policy in a period of high prices.

It is estimated that the number of married persons in the United States who will receive additional benefits by the provision for split incomes under the Knutson bill will be approximately 12,000,000.

It is understood that a recommittal bill will be suggested as a substitute for the Knutson bill, containing a proposal to reenact the excess-profits tax. Whatever other unwise features it may contain, that one alone is enough to condemn the substitute and make it entirely unacceptable.

The reason alleged for increasing corporate taxes must be to produce additional revenue to offset that which will be lost in granting tax cuts to individuals. If the argument is that individual taxpayers, including in particular those in the lower income group, are going to get the benefit of a tax cut and not suffer a corresponding detriment through an increased tax on corporations, it ought not to be difficult to show that the argument is fallacious.

It seems to me absurd to believe that bringing back the excess-profits tax will not work to the disadvantage of those who most need relief from taxes and high living costs. An increase in corporate taxes is certain to be reflected in the price to the consumer of goods produced. What is the use of giving the taxpayer a cut in his income tax and at the same time threaten to take the saving away from him in higher prices for the things he will buy? Contrast with this the incentive features of the Knutson bill which should bring about lower prices while granting a tax cut which will be really effective and beneficial as money saved.

And let us not make the mistake of thinking that none of the great rank and file of taxpayers in the lower brackets would be adversely affected if bringing back the excess-profits tax should result in the cutting of dividends. The holding of stock in corporations is by no means limited to the ranks of the wealthy. Stockholders, the real owners of the corporations, are found widely represented in every community in the country, and in many cases are those for whom the cost of living is a very real problem, and in countless cases where such holding constitutes all or a major part of the income.

I hope we will pass the Knutson bill by a vote so overwhelming that the people may know the House is determined to give them the relief they are enttiled to by taking from their shoulders a portion of the tax burden which they have been bearing too long.

Mr. KNUTSON. Mr. Chairman, I yield 12 minutes to the gentleman from Missouri [Mr. REEVES].

Mr. REEVES. Mr. Chairman, we are well into the third year since the close of hostilities in World War II. Excessive income taxes are still overburdening our people and smothering our economy. Tax reductions are long overdue for the people of the United States, and I shall support H. R. 4790 because it makes a start in that direction. This country is actually lagging behind other nations in the matter of postwar tax reductions. Australia has reduced income taxes; England—to whom we are asked to give more than $5,000,000,000 in relief under the Marshall plan—has reduced personal income taxes twice; Canada, which sent more aid per capita abroad during the war than we did, is about to reduce income taxes again for the fourth time in 4 years—last year she reduced taxes an average of 29 percent in all income brackets; even the Benelux countries, Belgium, the Netherlands, and Luxemburg—to which we are asked to give more than three and one-half billions in aid under the Marshall plan—have reduced taxes and are prospering. The able members of the Ways and Means Committee have established beyond question the availability of surplus funds sufficient to permit the reductions proposed by this bill and provide funds for debt reduction as well. The American taxpayer is entitled to relief and will get it this year upon the final passage of this bill.

It is gratifying to see support for this bill coming from the Democratic side as well as the Republican side of the aisle. It is a little surprising to see where the opposition to tax reduction comes from.

Mr. Chairman, I have reviewed carefully the 2 days of debate we have already had on this bill. The principal argument made against it is that it provides a measure of tax reduction for middle and upper bracket incomes. It has been pointed out repeatedly that by far the greater part of the tax reduction in these brackets arises out of the fact that the privilege of reporting income on a divided basis, now enjoyed only by married couples in the 11 community-property States, is extended by this bill to husbands and wives in all States.

Married taxpayers in the 37 non-community-property States may pay as much as 40 percent more Federal income taxes than married couples in the community-property States pay on exactly the same income, as shown by the following table:

Comparison of tax liabilities of married couples (with no dependents) in community-property and in non-community-property States

Combined net income before personal exemption	Total tax on married couples		Amount and percent greater tax paid in non-community-property State	
	Non-community-property State (only 1 spouse has income)	Community-property State (income divided equally between spouses)	Amount	Percent
$4,000	$589.00	$570.00	$19.00	3.33
$5,000	798.00	760.00	38.00	5.00
$6,000	1,045.00	969.00	76.00	7.84
$7,000	1,292.00	1,178.00	114.00	9.68
$8,000	1,577.00	1,387.00	190.00	13.70
$9,000	1,862.00	1,596.00	266.00	16.67
$10,000	2,185.00	1,843.00	342.00	18.56
$15,000	4,047.00	3,154.00	893.00	28.31
$25,000	9,082.00	6,460.00	2,622.00	40.59
$50,000	24,795.00	18,724.50	6,070.50	32.42
$100,000	63,127.50	50,274.00	12,853.00	25.57

Who is it who objects so loudly to eliminating this obvious and unfair discrimination against taxpayers in the non-community-property States? Who is it who denounces us for giving married taxpayers in the non-community-property States the same benefits now enjoyed only by taxpayers in the community-property States? Why, Mr. Chairman, eight of the Democratic Members of this House who attacked this tax-reduction bill last Thursday and Friday represent districts in community-property States. Three of them represent districts in States which adopted the community-property system for the express and declared purpose of giving their middle- and upper-bracket taxpayers the very same equalizing reductions which we are giving married taxpayers in all States under the provisions of this bill. It seems to me that their opposition comes with exceedingly bad grace.

The thing that prompted me to request this time was the discovery of an amazing statement made by the gentleman from Michigan [Mr. DINGELL] on this floor during the debate last Thursday afternoon. He said, according to the RECORD, that the present bill—

> Contains two important items of Democratic origin, increasing exemptions and income splitting between husband and wife, which we proposed in the consideration of H. R. 1 and H. R. 3950.

Mr. Chairman, I will not let that statement go unchallenged. During all the years the New Deal Democrats controlled the Congress and increased surtaxes to unprecedented and confiscatory levels, they permitted this vicious and

inequitable discrimination to develop. They did absolutely nothing to correct it, except to make an ineffectual attempt to deny married persons in community-property States the privilege of making separate returns. The idea of permitting all married couples to make tax returns on the divided-income basis never occurred to them; if it did, they neither said nor did anything about it. As a matter of fact it was not proposed by anyone, so far as I have been able to learn, until a tax legislative counsel for the Treasury Department mentioned it late last year as a possibility, but obviously without the sanction of the Department.

Simply to keep the record straight, and to refute the claim made by the gentleman from Michigan [Mr. DINGELL] that he and other Democratic Members of the Ways and Means Committee originated legislation on the subject, I desire to relate the facts.

The first bill introduced either in the House or in the other body to authorize "income splitting" by all married taxpayers was H. R. 1759, which I introduced on February 6, 1947, and discussed under a special order a few days later. That bill set out the principle and formula which have been incorporated into this bill. Ten days after H. R. 1759 was introduced in the House, its entire title and text were borrowed and an identical measure was introduced in the other body. Since that time various other identical or substantially identical measures have been introduced in the other body, including the amendments to the two tax bills which were considered last year.

On March 14, before H. R. 1 was considered in committee, I filed a memorandum with each member of the Ways and Means Committee, including the gentleman from North Carolina [Mr. DOUGHTON] and the gentleman from Michigan [Mr. DINGELL], attaching a copy of H. R. 1759 and urging that committee to incorporate its provisions in H. R. 1.

The Treasury Department filed a report on H. R. 1759 with the chairman of the Ways and Means Committee on April 24, 1947, expressing "sympathy with the desire to equalize the impact of the income tax on family income." But it listed universal income splitting as only one possible approach, and in effect suggested that the whole question be deferred.

On April 28, 1947, almost 3 months after my bill was introduced, the gentleman from North Carolina [Mr. DOUGHTON], the ranking minority Member of the Ways and Means Committee, introduced a bill (H. R. 3228) on the same subject. He gave out a press release on it. It was not merely a similar bill. It was an identical bill. I defy anyone to find a word of difference between the text of his bill and the text of the bill which I had introduced nearly 3 months earlier. It is an exact copy.

During hearings conducted by the Ways and Means Committee, on June 19, 1947, I filed a further statement with the committee reiterating my conviction that there should be reported out and passed a single bill which would combine a graduated percentage reduction in income taxes for the lower-income brackets with the "income splitting" privilege for middle- and upper-income brackets. I incorporate the text of that statement in these remarks, as follows:

STATEMENT OF HON. ALBERT L. REEVES, JR., OF MISSOURI, BEFORE THE HOUSE WAYS AND MEANS COMMITTEE, THURSDAY, JUNE 19, 1947

Mr. Chairman and gentlemen of the committee, the purpose of my appearance before the Ways and Means Committee today is to urge the enactment of appropriate legislation to correct the discriminatory application of the Federal income-tax laws against citizens of the 36 remaining non-community-property States.

That such discrimination exists is not seriously questioned by anyone. The Federal Government recognizes the community-property system and permits husband and wife in the community-property States, of which there are now 12, to divide their income, each reporting and paying the income tax upon one-half of the community income. In this period of extremely high surtaxes the result is that incomes in the community-property States pay substantially less in income taxes than identical incomes in the 36 non-community-property States. The inequalities of this situation are recognized by the Treasury Department. Stanley S. Surrey, tax legislative counsel for the Department, who has favored universal application of the split-income principle, is the source of tables which clearly illustrate the tremendous tax advantages enjoyed by taxpayers in the community-property States. The tables are as follows:

TABLE 1.—*Comparison of tax liabilities of married couples (with no dependents) in community-property and in non-community-property States*

Net income before exemption	Total tax on married couples		Tax saving in community-property States	Tax saving in community-property States as a percentage of tax liability in non-community-property States
	Non-community-property State (only 1 spouse has income)	Community-property State (income divided equally between spouses)		
				Percent
$5,000	$798	$760	$38	4.8
$10,000	2,185	1,843	342	15.7
$15,000	4,047	3,154	893	22.1
$25,000	9,082	6,460	2,622	28.9
$50,000	24,795	18,725	6,070	24.5
$100,000	63,128	50,274	12,854	20.4

TABLE 2.—*Aggregate tax savings of married couples (with no dependents) in community-property States in the income years 1937 through 1946* [1]

Combined net income before exemption	Aggregate amount of tax savings
$5,000	$320
$10,000	2,864
$25,000	20,633
$50,000	53,144
$100,000	132,187

[1] Tax for non-community-property States is computed on the assumption that only 1 spouse has income, and in community-property States that income and exemption are divided equally between the spouses.

Various State legislatures, the American Bar Association, and many other organizations have urged the Congress to enact legislation to rectify this manifest inequity.

Under the existing situation most of the non-community-property States are experiencing a loss of capital, business, and income to the community-property States. It is common for an individual of means to carry on his business or profession in a non-community-property State, where he earns his income, and to maintain his domicile in a community-property State in order to enjoy a more favorable tax status. In self-defense, several States, such as Oklahoma, have very recently adopted the community-property system, although with considerable reluctance because it creates multiple problems affecting estates, domestic relations, and commercial credit. Congress should not, by failing to take action on the matter, compel other States to take so serious a step. Many are contemplating it as a last resort, if the Federal laws are not changed.

Sentiment in the Congress and throughout the country overwhelmingly favors extension of the right to split incomes for Federal tax purposes to all married taxpayers.

Early in this session of Congress I introduced H. R. 1759, which would accomplish this purpose. Under its provisions a husband and wife could elect to file a joint return of all their income. The tax would be computed upon one-half the aggregate income, and then multiplied by two. The result is exactly the same as though each filed a separate return on one-half the income, but the number of returns would be greatly reduced. The bill provides also necessary adjustments in the standard deduction. It seems to be agreed by many that a simple and effective approach to the problem is provided by this method, and a number of identical or similar bills have been subsequently introduced in both Houses of Congress.

But the change should be included in a tax-reduction bill, not in a tax-revision bill as the committee apparently contemplates. I shall endeavor to show why.

Extension of the privilege of splitting income to all married taxpayers is not actually a matter of revision of existing laws. The tax advantages now enjoyed by citizens of the community-property States does not arise from anything inherent in the Internal Revenue Code. It arises out of a situation altogether extraneous to the Federal tax laws—namely, the existence and characteristics of the community-property system in a limited group of States. In this respect it differs from matters which could be reached only by revision—such as the double taxation of dividends. I do not mean to take a position at this time on the question of double taxation of corporation income, but it is an excellent illustration of the kind of situation which inheres in existing law and is subject to revision, in contrast to the extraneous origin of "split income" practice.

Moreover, extension of the "split-income" privilege would not affect all taxpayers in all States. With relatively minor exceptions, it would affect a geographical segment of the population—that is, taxpayers in the 36 non-community-property States only. In addition—and more important—the amounts involved are larger than ought to be included in a revision bill. As examination of table 1, above, will show that the "split-income" privilege would reduce the tax liability of a $25,000 income by 28.9 percent, or by $2,622. Such a reduction cannot properly be regarded as a "revision"; it is a substantial tax cut.

But there is a vastly more important reason for including the "split-income" privilege in a tax-reduction bill, rather than in a revision bill. It is reported that in consequence of the veto of H. R. 1 it is proposed to offer a new tax-reduction bill, providing percentage cuts, early in the next session, and to follow it with a revision bill which among other things would extend the "split-income" privilege to all married taxpayers. I submit that if a straight tax-reduction bill is passed, it will be impossible thereafter to extend the "split-income" privilege to the non-community-property States.

If a new tax-reduction bill were to provide, as did H. R. 1, a 30-percent reduction

in the lowest brackets and a 20-percent reduction in the medium and higher brackets, extension of the "split income" privilege would be effectively foreclosed by the fact that, taken in conjunction with the tax reduction, it would discriminate in favor of the surtax brackets. For example—referring again to table No. 1—the percentage reduction of 20 percent (assumed), coupled with the percentage tax savings realized from the "split-income" privilege, would give total reductions of more than 30 percent at the $10,000-income level, almost 40 percent on a $15,000 income, and 45 percent on a $25,000 income. At the $50,000 level the total tax reduction would be about 40 percent, and at $100,000 and above only slightly less. The result would be extraordinary tax relief in the middle and higher brackets, far exceeding the moderate reductions provided in the lowest-income brackets. For this reason if the Congress first passes a straight tax cut bill it will find itself unable to authorize universal application of the "split income" privilege with its additional advantages to the surtax brackets only. Thus the inevitable effect of a straight tax reduction would be to perpetuate the existing tax discrimination against the 36 non-community-property States, and to enable the community-property States to continue to exploit their advantage by further siphoning off business and wealth from the non-community-property States.

It is therefore my conviction, and my urgent recommendation to the Ways and Means Committee, that a single bill be prepared which would combine a graduated percentage cut in the lower brackets with the "split income" provision, the latter being of benefit only in the surtax brackets. To illustrate: A substantial percentage cut of 30 percent or perhaps more should be provided in the lowest-income brackets. The "split income" privilege should be made of universal application. "Income splitting" alone would provide a reduction of 20 percent or more in all income brackets above about $12,500. In surtax brackets below $12,500 percentage reductions should be made which, in combination with the "split income" feature, would provide an aggregate cut of 20 percent. At the $10,000 income level, for example, the "split income" privilege would produce a reduction of only 15.7 percent. A total tax reduction of 20 percent could be accomplished by a percentage adjustment in the appropriate surtax bracket. The same formula would result in a uniform 20-percent reduction (if that percentage of reduction is agreed upon) in still lower surtax brackets where the benefits of income splitting are less—as at the $5,000 level, where income splitting reduces the tax liability by only 4.8 percent.

Preparation and passage of such a combination bill is still possible in the present session of Congress, even though the time remaining is short. I feel that, in all justice, we should not leave the people of this country without definite assurance of relief from the terrible burden of taxes they are now carrying. Uncertainty as to whether, and when, income-tax reductions will become effective is creating confusion and exerting a sharply depressing effect on business activity.

Strong equities support the kind of a bill I have proposed. It should be made effective January 1, 1948, which is the effective date of the income-splitting bill I have already introduced. I do not think it would encounter veto. If it did, sentiment for adoption of the income-splitting proposal is sufficiently strong in both Houses of Congress to assure that it would be overridden.

This recommendation is not made lightly, or without encouragement from others in the House. I earnestly urge the committee to give immediate consideration to the introduction at this session of a tax-reduction bill, designed to accomplish the objectives I have outlined, and effective January 1, 1948.

We have an obligation to the American taxpayer to clarify the Federal tax situation and to tell him in advance how he may plan his affairs for next year.

Mr. Chairman, the gentleman from Michigan did not get around to originating the income-splitting measure until he embodied it in the tax bill which he introduced last month and which is not before the House. His State, Michigan, adopted the community-property system last year for the express purpose of reducing Federal income taxes for their well-to-do people. It did not give a nickel's worth of tax relief to the little fellow.

"Of Democratic origin"? The Treasury Department is still opposed to authorizing income splitting by married couples in all States. In his testimony before the committee on January 16 of this year the Secretary of the Treasury said, with reference to this proposal:

> I believe, however, that it would be unwise to make this or any other major structural change in the current situation which would result in a substantial revenue loss. As previously indicated, splitting the incomes of husbands and wives would result in a loss of $803,500,000.

So the Secretary was against it as recently as less than 3 weeks ago. His testimony simply means that the present administration is perfectly satisfied to continue the rankest and most unjust discrimination that exists anywhere in our tax laws. Ever since I introduced H. R. 1759 in the House in February last year, there has been a growing and insistent demand that the Internal Revenue Code be amended to eliminate the discrimination, so that the citizens of my State, Missouri, and other non-community-property States would not be obliged to pay more Federal income taxes than the citizens of 11 community-property States pay on identical income.

No, Mr. Chairman, the bill to equalize the Federal income-tax burden through universal income splitting was not an "item of Democratic origin which we proposed in the consideration of H. R. 1," as the gentleman from Michigan so blandly said on Thursday. He knows better. The origin was H. R. 1759, and it was of Republican origin. It was the rank discrimination against citizens of the non-community-property States which was of Democratic origin 15 years ago, and it has taken a Republican bill to point the way to correct it.

In view of the Nation-wide approval of the measure I suppose I should not be surprised at the efforts which have been made by others to purloin it and claim credit for it.

There is this much to be said for the gentleman from Michigan and the gentleman from North Carolina and others who have had more than a passing interest in this measure. They know a good thing when they see it. But the record speaks so clearly for itself that there can be no doubt as to where income-splitting legislation originated, and it was unquestionably not on their side of the aisle.

[From the Kansas City Star of April 30, 1947]

EQUALITY ON INCOME PAYMENTS

Important aid to a needed tax reform has been given by Representative DOUGHTON, of North Carolina, former chairman of the House Ways and Means Committee. He has introduced a bill to apply the community-property tax principle to all the States. This would enable husbands and wives to make an equal division of income for tax reporting, as now is done in nine of the States, with the consequent benefit of lower income-tax payments.

Early in the present session Representative ALBERT L. REEVES, JR., of Kansas City, introduced such a bill. Mr. DOUGHTON might simply have endorsed this bill instead of submitting one of his own. Mr. REEVES pointed out at the time and since has emphasized that the nine States have an unfair advantage over the others, that additional States are looking to adoption of the community-property system, and that as a matter of justice it should be applied uniformly to all.

A measure of this nature could be incorporated in the pending tax-reduction bill, as Mr. DOUGHTON says and as Mr. REEVES previously had advocated. But this phase of tax relief would not become effective until next year, whereas the broader proposal would apply to the current year, beginning either with July or becoming retroactive to January 1, as Congress may decide.

Families would be saved an estimated $1,000,000,000 a year under the community plan. The States now without it desire the plan for their own protection. But, as Mr. REEVES has explained, the trend to State action should be halted because of numerous legal complications in the varying systems adopted. The most effective means of dealing with the problem is a change in the Federal system. A companion bill to the Reeves measure has been introduced in the Senate. Both should have the attention they deserve in order to end an unjust situation and to establish equality under the law.

Mr. DOUGHTON. Mr. Chairman, I yield such time as he may desire to the gentleman from Michigan [Mr. DINGELL].

Mr. DINGELL. Mr. Chairman, I was unaware that the gentleman from Missouri [Mr. REEVES] would question the veracity of my statements with regard to the split-income provision which is included in the Knutson bill, H. R. 4790. I claim this provision as having originated with the Democrats, as did the demand for liberalizing dependency exemptions. I restate most emphatically that the record supports my position. Long before the gentleman from Missouri gained membership in this body, I have examined witnesses and discussed the question and the desirability of splitting incomes for tax purposes only, in order to equalize the tax burdens whether or not the taxpayer resided in a so-called community-property State.

The Committee on Ways and Means pursued this question over a period of many years. In fact, the Committee on Ways and Means in the early part of my 14 years of service on this committee sought to wipe out this inequality. We decided, by direct action, to eliminate the preferential status of the taxpayer residing in the community-property States, but the House did not sustain our position, and it was then that I advanced the idea that we may well arrive at the same result by splitting the income of husband or wife for tax purposes only

and thus eliminate the tax advantage of the community-property States.

I pursued this question over the years. I discussed it with Secretary Morgenthau and with his successors, Secretary Vinson and Secretary Snyder.

Bringing the matter up to date, it will be recalled that the gentleman from North Carolina [Mr. DOUGHTON], the ranking member of the minority, had an understanding in committee that this question would be considered, and if my memory serves me correctly, I believe it was agreed that it would be inserted in the present tax bill. Therefore the Knutson bill, H. R. 4790, contains a provision, the formula of which antedates the service of the gentleman from Missouri [Mr. REEVES] by many years. When the gentleman charges others with having purloined an idea which seemingly he claims as originating with himself he is either in error or seeks to mislead his constituents. Members of this House are not impressed with the claims of originality advanced by the gentleman because it is known that the alternative of the split income was advanced and advocated by those of us who explored the problem involved in the community-property question and who sought to solve it for the benefit of all.

I would not go so far as to claim that the idea of splitting the income to accomplish the purpose is original with me. I would not even say I was the first to advance such an idea. I do, however, claim that I have advanced this argument over a period of years and insisted upon its adoption at the earliest possible date. The gentleman from Missouri, in his enthusiasm, has resorted to some rather unkind and unwarranted references when he charges members with purloining ideas that in his estimation originated in his mind. I am quite certain that members of the Committee on Ways and Means have thought of this and other similar ideas long before the gentleman introduced his bill.

Mr. Chairman, now let me discuss briefly the prospective motion to recommit. I am as anxious as any individual Member of this House to bring the earliest possible cut in taxes and to make it as deep and as widespread as might be justified.

As a member of the Committee on Ways and Means charged with the responsibility of providing a sufficiency of revenues for the Treasury, I have no choice but to fulfill my obligation to all of the people. I must take into consideration first and above all, the needs of Government and then to assess the burden on the basis of ability to pay. Such relief as might be given from time to time must be brought about by periodic adjustment of rates and schedules.

The minority offers today a motion to recommit the Knutson bill for reasons which are obvious and tenable. The motion for a taxpayer's increase of $200 for each individual dependent, which will strike from the tax rolls approximately 10,300,000 income taxpayers, will, however, effect a saving to all taxpayers from the lowest to the highest bracket. The greatest percentage of benefit in volume, however, will go to the great number of overburdened and needy in the lowermost brackets. This $200 exemption figure will be approximately the same amount as the President's flat $40 cost-of-living credit. The total amount in this reduction approximates a loss to the Treasury of $3,200,000,000. Over 70 percent of the relief will go to taxpayers with incomes below $5,000.

Furthermore, the minority motion to recommit provides relief by way of allowing the splitting of incomes, for tax purposes only, between husband and wife and is intended to equalize the tax burden as between community and noncommunity States. This provision will give great benefit to the taxpayer with an income of above $5,000. To be more specific, the split-income provision will give relief to approximately 97 percent of the taxpayers enjoying a taxable income above $5,000. The loss to the Federal Treasury as a result of the adoption of this amendment would amount to approximately $800,000,000 per annum.

In order to offset as far as possible these losses to the Treasury and thereby help maintain the solvency and credit of the Government, the motion provides for the imposition of a limited excess-profits tax to be levied upon 22,000 corporations out of a total of approximately 360,000 income-tax-paying corporations. This provision is taken from the President's recommendations as included in H. R. 4968, which bears my name. This provision would recapture an amount approximating $3,200,000,000, which would offset a like figure occasioned by the tax cut accruing to the benefit of the small income-taxpayers. The net loss, therefore, to the Treasury would amount approximately to $800,000,000, occasioned by the split-income provision. It may be desirable, although not necessary, to briefly restate facts and figures with which most people are familiar as regards the reimposition of the excess-profits tax.

There can be no question of justification under present conditions. First, it must be borne in mind that the move conforms with the practice of periodic tax adjustments, not only in rates but in sources of income. Today when the corporations of America are enjoying the highest rate of net taxable income in the history of the country and at a rate never before anticipated, the volume of profits which have pyramided to over $17,000,000,000 after payment of Federal taxes which top previous figures by successive increases and only the future will tell how much higher they will go, makes mandatory some method of recouping losses resulting from tax relief given in the low and needy brackets. This excess-profits provision is not so stringent and it cannot compare with the wartime excess-profits tax which applied to a far lower amount of income and which skimmed off greater percentages without allowing the latitude which is provided in this motion to recommit. In fact, I should say that this provision is most generous to the corporations in that it would affect only those with the highest average income. It will affect only about 6 percent of such corporations as might be classed as the favored few. It will exclude all small corporations. It provides a $50,000 exemption for the specific purpose of letting out these small corporations.

Taking the 1936–39 base for the calculation of average earnings, this provision would in addition allow 35 percent more in profits to a corporation than was permitted the same corporation on the same amount during wartime. The amount subject to excess profits after allowing an exemption of $50,000 plus a 35 percent above-wartime-earnings credit would be subject to 75 percent as compared with 85½ percent, which was the wartime excess rate, but in no instance would the gross tax exceed 70 percent as compared with the over-all tax of 80 percent in the wartime act. I cannot too strongly emphasize the fact that this tax would not affect the stockholders or the rate of dividends, it would not jeopardize the financial standing of the corporation, or in any manner reduce allowances for obsolescence, or restrict expansion. This excess-profits levy would be imposed on corporations where the amount of profit is so great that it is being held in reserve in amounts far in excess of what is deemed as prudent and necessary. This move could not be passed on to the consumer because the tax would be imposed on the corporation whose products have already brought an unreasonably high price for their products and further increases would be reflected in excess profits and be subject to further levies of the excess-profits tax.

Then, too, there is a powerful element of constriction upon inflation and the ever-present temptation to increase prices to the consumer for all that the traffic will bear.

The amount of revenue going to the Treasury from this imposition will still leave the corporations after taxes, on the basis of present calculation, approximately $14,000,000,000 per annum which will remain as a record unmatched in either peace or wartime. The tax would apply to profits earned during the year 1948.

While it would have been better not to reduce the Treasury receipts at this time, it seems inevitable. If the income taxpayers in the lower brackets are to benefit from tax reduction, it is only fair and logical that taxpayers in the higher brackets must receive a fair share of consideration.

This motion to recommit will in my estimation not jeopardize the Nation's credit and it is hoped it will leave unimpaired our financial solvency. The bonds in the hands of over 85,000,000 American citizens, in the portfolios of insurance companies, in banks, in trust funds, and in possession of corporations will remain intact. More specifically, they will be redeemed as pledged by the Government at 100 percent of their face value. Because this move will permit the greatest possible reduction of our national debt, it will save the taxpayers approximately $2.50 in interest for each dollar of deferred or suspended debt reduction which may be occasioned by unwarranted and premature tax cuts.

However much I dislike to oppose overall tax reduction at this time, I am in

conscience bound to discharge my duty as I see it and thus to protect the people's interest. In this instance the people's interest and the Treasury of the United States are one and inseparable. You cannot underream or jeopardize one without injuring the other.

Mr. DOUGHTON. Mr. Chairman, I yield such time as he may desire to the gentleman from Arizona [Mr. MURDOCK].

Mr. MURDOCK. Mr. Chairman, unless this Knutson tax-reduction bill is amended today by a motion to recommit, I find that I must vote against it on final passage. This determination to vote against the bill is not due to political reasons and it is not due to my not wanting tax reduction of a proper kind. I have heard some of my colleagues on the minority side proposing a substitute which is the only amendment we, of the minority, may offer when a motion to recommit is made. As I understand this substitute to be offered by our minority leader, it is much to be preferred over the bill brought in by the committee.

There are several reasons why I cannot vote for the Knutson bill, but I can only list some of them, although I recognize that the committee bill does have some good features. Without going into the merits of the question of how much aid we shall give to rehabilitate war-torn countries or furnish them immediate and long-range relief which I favor, I believe that it will be impossible to extend such relief if this measure, known as the Knutson tax-reduction bill shall pass and become law in its present form. As I see it, a vote in favor of this bill means a vote against extending any further aid to Europe or to other critical areas because we simply will not have the money to give such relief unless we borrow it.

Again, I cannot bring myself to vote in favor of this bill because it means a return to deficit spending, a thing which we hoped we could get away from soon after ending this most expensive of all wars. The total reduction in our next year's revenues under this measure as law would mean that the Government would have to borrow money to carry on its legitimate functions and commitments. When I consider the situation as it was a year ago and the similarity of the present time, I am convinced that no sufficient reduction in expenditures can be made or will be made that we may have a balanced budget under this reduction of revenue, even though absolutely nothing be paid on the great public debt.

Another reason why I cannot bring myself to vote for this Knutson tax bill is that we must have some regard for the Nation's credit. There are more than 80,000,000 bondholders and others who are creditors of this Government. This bill in seeking to give tax relief to a few taxpayers would thereby jeopardize the credit of the Nation and the savings of a much larger number of those who have the bonds and to whom the great debt is owed. No one can convince me that ignoring payments on the public debt in these prosperous times is sound fiscal policy.

Furthermore, I cannot bring myself to vote for this bill in its present form because I do not regard it as a fair and just measure. It furnishes least relief for those who need it most and most relief for those who need it least. We have had plenty of figures to show that fact. It is not at all surprising that the Republican majority should bring in a revenue bill that heavily favors big business and scantily favors the great multitude of our taxpayers. The Democratic policy, which I think is the correct policy, would exactly reverse the results.

If a bill is offered by the minority leader as a substitute for the committee bill when the motion to recommit is made, I shall support the motion to recommit and offer such substitute. What are the provisions proposed to be substituted? One would increase the personal exemption and raise it from $500 to $700. That would give more relief to more low-salaried taxpayers than would the Knutson bill. I have felt even during the war itself that a $500 personal exemption was too low, and I had hoped before this to see that exemption raised, not merely $100 as in the Knutson bill, but raised $200 or more as in the proposed substitute and thereby release from Federal taxation about twice as many low-income taxpayers as the committee bill would release.

On the question of excess profits it is said that we must not touch the excessive profits of our leading corporations, for they must "plow back" these profits into their capital investment in order to make expansions and increase their facilities. As a member of the Colmer committee I voted to help business, but I cannot see this claim and I know of no economist who advocates so large a reserve for capital investment as the present excess profits permit. While recognizing the truth of the statement that corporate enterprise must have suitable reserves for replacements and expansion, I think that this obvious economic fact is being put up as a front in an effort to make the public believe that these phenomenal profits are not only justified but necessary for business growth. It is often said, that a corporation like an individual should lay by something for a rainy day and that is understandable, but as I see this philosophy used at the present time these corporations are preparing for a cyclone instead of the proverbial rainy day, and well they might prepare for a cyclone like the French Bourbons a century and a half ago who said, "After us, the deluge." This committee bill is an exceedingly dangerous bill.

Mr. DOUGHTON. Mr. Chairman, I yield such time as he may desire to the gentleman from Illinois [Mr. SABATH].

KNUTSON BILL, IF ENACTED, WILL CREATE FURTHER INFLATION

Mr. SABATH. Mr. Chairman, shortly after opening his speech today, the gentleman from Arkansas [Mr. MILLS] made it clear that the Knutson bill will not permit the reduction of our great war debt; that nearly 80 percent of the tax reduction will go to those in the higher income brackets, namely, the rich and the wealthy; and that it will not balance the budget, and is certain to cause a deficit of over $500,000,000. He expressed the opinion that if the bill is enacted into law it will be bound to create still greater and more dangerous inflation and to avoid that he urges the adoption of the motion which will be offered by the gentleman from Texas [Mr. RAYBURN] to recommit the bill with instructions to amend it to give relief to about 10,000,000 taxpayers in the lower income brackets. The motion will nearly follow the recommendations of President Truman by actually relieving those in the lower income brackets of paying any income taxes and, as has been pointed out, may exempt nearly 10,000,000 taxpayers.

EFFORT TO CONFUSE AND MISLEAD THE AMERICAN PEOPLE

For the purpose of offsetting these facts and truths given to the House by the gentleman from Arkansas, nearly 30 Republican Members have obtained permission to extend their remarks in the RECORD in an effort to confuse and mislead the American people as to the iniquities of the Knutson bill. I therefore urge all those who wish to have the real facts as to the effect of the provisions of the bill to read the remarks of the gentleman from Arkansas and I am confident that if they will do so they will come to the conclusion that the Knutson bill is not only unfair, but dishonest. The proof is there that, instead of giving real tax relief to those in the lower income brackets, the bill is mainly in the interest of the well-to-do classes who are afforded greater tax reductions.

Mr. Chairman, it is the claim of a large majority of the Republican membership that business needs relief from high income taxes in order to expand and improve their plants and factories. My answer to that contention is that the people who will mostly be relieved under the Knutson bill are those having incomes above $10,000 and nearly all of them, by raising the prices of their products, have increased their profits far above the income tax they are now paying.

I fully appreciate that the gentleman from Minnesota [Mr. KNUTSON] and many Republicans dislike to hear the truth from me. They have taken exception, and I refer especially to the gentleman from Minnesota, to my designating the rule providing for the consideration of the bill as the most vicious gag rule ever brought to the House and sought to show that I brought in a similar rule on the same kind of bill. The gentleman from Minnesota failed to state that I brought in the rule because of a unanimous agreement on the part of the Democratic and Republican members of the Committee on Ways and Means for that rule. However, the rule was not on a tax-reduction bill but on a complicated revenue measure, which you forced as a compromise on the then divided Democratic membership. Furthermore, it was at the time that the Republicans joined hands with big business in a ballyhoo campaign that large unemployment was imminent and, in the hope of scaring American labor, claimed that we would have from eight to ten million people unemployed. The record will show I insisted that, in-

stead of their being eight or ten million people unemployed after the war, the demand for labor would continue and employment would exceed even the 57,000,000 persons then employed and would possibly reach to 60,000,000 persons. The demand of the Republicans then was that if unemployment was to be averted an adjustment of taxes on business was necessary and the bill to which the gentleman from Minnesota referred in his remarks on January 29, 1947, was forced through.

RELIEF FOR THOSE WHO NEED IT MOST

Throughout the debate on this bill by Members on the other side all we have heard were pleas for tax reductions for business in order to expand, for improvements, and for venture capital. In the face of the high profits of business in 1946 and 1947, I still contend that if the Republicans aimed to do the right thing by the people they would have brought in a bill that would be fair and afford relief to those that need it most instead of relief to those that need it the least.

Mr. DOUGHTON. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts [Mr. McCORMACK].

Mr. McCORMACK. Mr. Chairman, under the program of the Republican Party it will take over 100 years if we have no more depressions or no more wars to discharge the public debt. I wonder if this is going to interest anybody who is living today? Their children, their grandchildren, and their great-grandchildren, and probably generations beyond that—at least to the extent of the great-grandchildren—will be paying off the public debt, $216,000,000,000 of which now existing was necessary to save the independence of our country and the liberties of our people. Every bill through which this $216,000,000,000 debt was incurred was voted for by every Republican Member of the House as well as every Democratic Member of the House during the war. I wonder how our businessmen are going to view that, especially with the security of business and bonds and the deposits in savings banks involved when they know that the Republican Party instead of supporting sound money and sound stabilized economy is taking a journey that is very dangerous. If we hit a depression, a major depression, it will probably be just unfortunate.

The present bill of the Republican Party is bad for two reasons: First, it gives the greatest tax relief to those who need it the least. It means less than $2 a week reduction in taxes for a $3,000 income to an average American family of four. It means $12.50 a week to the average American family of four with a $10,000 income, and it goes up to $2,036 a week for the millionaire. Secondly, the Republican tax bill is bad because the present bill under current income receipts will probably put the country in the red for possibly the year 1949.

Under the proposal made by the Democratic Party, which gives a $200 per capita additional exemption, it will mean 70 percent of the total tax relief would go to people in the low-income-tax brackets, below $5,000 a year income. The proposal would also relieve over 10,000,000 taxpayers from paying any Federal taxes and take them off the Federal income-tax rolls; that in contrast with 300,000 taxpayers under the Republican proposal. On the other hand, the community-property proposal which will be invoked will give the greatest amount of tax benefits to those with a net income of $5,000 or more. To a person with a net income of $100,000 that will mean over $12,000 a year reduction. Ninety-seven and five-tenths percent of the total benefits of that proposal will go to persons who have a net income of over $5,000 a year.

The proposal of the Democratic Party of a $200 exemption will give greater benefit to those in the smaller income brackets. The community property proposal will give a benefit of 97½ percent to those receiving $5,000 a year or more, as I just stated.

Mr. Chairman, this is the third bill that has come from the Republican side. The first bill was a 20-percent across-the-board reduction. What a hypocritical tax bill that was. Then the second bill gave a little bit more relief to those in the lower income group, but was still inequitable. This bill disregards a cardinal rule of taxation that where reductions are made the smaller income group should receive the larger amount.

Last year our Republican friends made permanent certain excise taxes when President Truman had recommended extension for 1 year.

The Republican tax bill is based upon inequality while the Democratic measure is equitable and just.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. KNUTSON. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. SIMPSON].

Mr. SIMPSON of Pennsylvania. Mr. Chairman, it is quite important to remember before we come to a vote that this bill presented by the Republican side of the House is a tax-reduction bill. It is an honest bill. It does not attempt to kid everybody into promising them a tax reduction, on the one hand, and then in the very same proposal levying a new tax.

The American people have gone through the trials and tribulations of war, of high taxes, and all the troubles we have had during the past 15 years, and they are now justified in expecting that the Members of Congress will deal honestly with them. That is what the gentleman from Minnesota [Mr. KNUTSON] is trying to do in the form of this bill. On the contrary, the motion to recommit, we are told, will come from the Democratic side of the House and contains a provision which would pay every taxpayer for himself and his dependents some $40, if he owed that much in taxes. It would then levy a new tax which would take away from the taxpayers the very money that was given them. Our fellow citizen is not going to be kidded in that way. He knows that the motion to recommit is not a tax-reduction bill. If the newspaper information we get is correct, in an effort to sweeten up this proposal so that the people with more money—those who have over $5,000-a-year income and pay an income tax—may get a benefit, it is proposed to give them the community-property provision to equalize the tax burden, whether they live in a community-property State or in a non-community-property State. Those provisions are in the bill now before us offered by the gentleman from Minnesota [Mr. KNUTSON]—the Republican bill.

Mr. Chairman, think what we would do by giving $40 to the low-income group and also to the wealthy; then, by levying a tax on manufacturers, which will be passed on directly to every consumer in this country, you will take the tax refund directly back from the very same people. But the people who will benefit under the community-property provision are those who will get the large tax reduction measured in dollars. They will not have to pay back that which they get under your bill. No, indeed. You are taking it off the little man, for your small taxpayers, numbering fifty-odd million, far outnumber the six or seven million who will benefit under the community-property provision. Oh, it is not a fair proposal to sell to the American people, and I personally think that what I said the other day is true. You would have done far better to recognize that the Republican proposal is honest. It recognizes a progressive method of tax reduction. It carries out the policy that both parties in this Congress in the Committee on Ways and Means have endeavored to make the basis of our income-tax laws for many, many years. So, to see some leaders of your party—which does not include the former chairman of our great committee, the gentleman from North Carolina [Mr. DOUGHTON]—expect that group to persude the public that this is an honest proposal, is more than I think they will accomplish. The American people want and they deserve tax reduction today. They want fair treatment, and, under the Republican bill, they will get it. Under the Democratic proposal, they will not give fair treatment to the low-income group—and I repeat this with emphasis. The whole income-tax-paying group, promised a reduction, are given a new tax. Certainly the great Democratic Party does not want that to stand as a policy when they promised tax reduction.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. KNUTSON. Mr. Chairman, I yield myself 7 minutes.

Mr. Chairman, my good friend from Massachusetts was in error when he said that H. R. 1 provided for a 20-percent cut across the board. I have a copy of H. R. 1 here, if he wishes to look at it. He will find that the cuts were 30 percent, 20 percent, 10 percent, and 5 percent. If the gentleman wishes to inform himself, I will be glad to have him take this copy. There is nothing to be gained by making misstatements.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. KNUTSON. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Was not the original proposal 20 percent across the board?

Mr. KNUTSON. It was not. We were speaking of H. R. 1.

Mr. McCORMACK. Was not the original proposal the gentleman introduced 20 percent across the board?

Mr. KNUTSON. No. H. R. 1 is the original bill.

Mr. McCORMACK. Was there not one introduced before that?

Mr. KNUTSON. No. How could there be, unless you called it H. R. zero?

Mr. McCORMACK. Yes; but the gentleman advocated 20 percent across the board.

Mr. KNUTSON. Well, we may say a lot of things that do not eventuate. It just does not add up. It does not add to either the knowledge of the House or to orderly parliamentary procedure to make misstatements that cannot stand up.

I listened to the remarks made by the gentleman from Arkansas [Mr. MILLS], a valuable member of our committee, and for whom also I have very high regard. He went to some pains to explain to the House that the excess-profits tax, which it is proposed to impose or reimpose in the motion to recommit, is a different excess-profits tax from the one we repealed in 1945 at the request of the President of the United States and the Secretary of the Treasury. The difference, my friends, is between tweedledee and tweedledum. A rose would smell just as sweet by another name. As a matter of cold fact, the motion to recommit will call for the reimposition of the excess-profits tax.

Let us see what some of your great leaders said about the excess-profits tax when the matter of repealing the tax was before Congress in 1945. Secretary Vinson, who was then Secretary of the Treasury, appeared before the Senate committee and made this statement. I wish you would listen. I recommend this particularly to the gentleman from Arkansas [Mr. MILLS]. Mr. Vinson then said, in advocating the repeal of the tax:

> The over-all impact which this tax is likely to have on business planning as well as business profits constitutes a serious threat to our postwar employment objectives. The testimony of businessmen is that they are unable to take the risk of full peacetime business expansion until this tax has been removed. That testimony comes not only from corporations subject to the excess-profits tax; indeed, it comes primarily from businessmen contemplating organization and expansion in competition with established corporations.

That is what Secretary Vinson said.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. KNUTSON. I yield to the gentleman from Tennessee.

Mr. COOPER. I am sure the distinguished gentleman will recall that the bill in 1945 as reported by the Committee on Ways and Means and as passed by the House did not repeal the excess-profits tax. It reduced it but did not repeal it. That was put on in the Senate.

Mr. KNUTSON. That is true. In doing so the Senate at least on that occasion, displayed superior wisdom.

Now we are asked to go back to the good old excess-profits tax. Before we repealed the excess-profit tax the administration sent up a bill asking for $300,000,000 to tide over the 8,000,000 unemployed that they said would be unemployed while we were converting from war to peace. We repealed the tax, there was no unemployment, and there was no need for the $300,000,000, so we did not appropriate it. As a matter of fact, we did not even authorize it. So I would say that Secretary Vinson, now Chief Justice, has been fully vindicated by subsequent events. I cannot conceive of this House committing the folly of reimposing that tax, which will do more to discourage incentive, production, and employment than almost anything the Congress can do.

Mr. EVINS. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. EVINS. Mr. Chairman, I am opposed to the pending bill, H. R. 4790, as presently drawn. The present draft of this measure provides for 33⅓ percent of the tax reduction thereunder to 7 percent of the people of the United States. I cannot find any fairness in this proposed legislation. Those benefited most by this bill (the Knutson bill) are officials of large corporations and persons of the high income groups—those who have already been given tax relief when the excess-profts tax was removed in 1946. I want to vote for tax reductions this year. I want to vote for tax relief where it is most needed—for persons in the low-income groups. The question presented in this legislation is of vital interest and importance to the people of our country. Why do we engage in shadow-boxing activities? Why do Members of Congress try to fool the American people? Why do we not be honest—honest with ourselves and honest with the American people—honest with the people we are privileged and honored to represent—honest with our own Government and its responsibilities?

Last year, Mr. Chairman, the Congress failed to pass a tax-cut bill which would have reduced Federal revenues by $4,500,000,000. There were many Members at that time who wanted to vote for a fair and just and honest tax-reduction measure, but the measure that was offered was not of that type. We were forced to take it or reject it, as that was all that was offered—that was all that we were given a chance to vote on—a measure which was not equitable and which provided disproportionate tax relief. So that measure was twice rejected. It was said, at the time, that by next year we would have had an opportunity to study the tax structure more thoroughly—the revenue needs of the Federal Government—and that a year later we would be in a better position to know just what the needs and commitments of our Government would be, taking into consideration a reasonable sum being set aside for payment on the national debt, and that thereafter a proper tax bill could be considered. This year, when many Members hoped we would be given an opportunity to vote for a fair and honest and just tax bill, a measure is brought forth providing for deficit spending, a bill which if enacted into law would call for a cut in Federal revenue of more than $6,500,000,000. Last year the $4,500,000,000 cut was considered too much and this year—an election year—the Republican leadership supports a bill much more extravagant and unreasonable in amount, a bill which calls for the loss of Federal revenue in an amount in excess of $6,500,000,000, a measure which Members on both sides of the aisle, privately and honestly, admit will never become law; and, yet, it is the only bill we are given a chance to vote on. So, I repeat, Mr. Chairman, why do we engage in shadow-boxing activities? Why are we practicing deception? I know that the statements made on this bill by our distinguished colleague and my fellow Tennessean, Congressman JERE COOPER, a ranking member of the minority on the Committee on Ways and Means, are not misrepresentations of fact, they are not false figures but true facts representing the Federal fiscal situation as it exists today. The Knutson bill, H. R. 4790, has been properly labeled "An act to borrow and reduce taxes," because that would be the effect of the bill if enacted into law. This bill would provide for deficit spending during the next fiscal year. Secretary of the Treasury Snyder and other informed officials of the Government have asserted that if this bill is enacted into law a deficit for 1949 of more than $2,000,000,000 would result and that our national debt would be increased by this amount. Do we want to pass such a bill which would result in our Government having to borrow money to provide tax reduction, especially to those who are least in need of tax reduction?

As a new Member, I come fresh from the people and have faith in their collective will and good judgment and say to you that you cannot and are not and will not fool the people of our country with the deception that is here attempted to be practiced. They know—the people know—that adequate revenues are necessary for the operation of our Government—they know that our defense needs and world commitments are greater than at any peacetime in our history—they know, too, that the only time a debt can be paid is when we have the money to make such a payment. They know that the best time for this is when we are prosperous—the American people want and expect these needs and requirements to be met. They expect honest representation. They also would like tax reduction. It has been clearly demonstrated that a reasonable and fair tax cut can safely be made while at the same time taking into consideration the necessary obligations of our Government. This could be done if we would only cease practicing deception—cease shadow boxing and cooperate to the extent to bring forward a fair and equitable bill to accomplish these purposes.

As a new Member, I greatly esteem the Congress of the United States, but have

been disappointed at the actions of its Members in failing to give and take—in failing to get together and cooperating in working out this most important matter of our fiscal policy. This is primarily the responsibility of the Members of the House of Representatives of the United States—the body in which all legislation providing for Federal revenues and appropriations originates.

There have been three measures proposed and there exist three schools of thought on the question of providing tax reduction at the present time:

First. The Knutson bill, H. R. 4790, the measure under consideration, the bill of Republican leadership, which provides a drastic cut-back of more than $6,500,000,000—some experts estimate in excess of $7,000,000,000. It has been clearly demonstrated that this bill goes much too far and cannot—certainly should not—be enacted into law.

Second. The President's proposal, which would grant tax relief at this time only to persons in the low-income groups by providing a shift or adjustment of the tax load and a reimposition of certain excess corporate taxes, thereby resulting in not losing any revenue for the Treasury of the Federal Government during this period of present prosperity. It is conceded that the composition of the Congress being as it is today, the President's proposal cannot be passed.

A third course of action constitutes a middle-of-the-road or compromise proposal, advocated by Congressman DOUGHTON, Democrat of North Carolina, dean of the House of Representatives and ranking minority member of the Committee on Ways and Means. The measure is desired by many who view this matter from a realistic point of view—from the position of what can reasonably and honestly be accomplished. This proposal would provide for tax relief to all groups by cutting in half the extreme provisions of the present bill under consideration. I should be pleased to support a measure which would remove from the tax rolls some 10,000,000 persons in the low income groups. The membership of the House has not been given an opportunity to vote on such a measure. We have been denied this right—the opportunity to vote for a bill which will provide the necessary revenue for essential operation of our Government and which at the same time will permit of tax reduction on a safe and reasonable basis.

No, Mr. Chairman, the membership of the House is given an opportunity to vote only for the Republican measure, this extreme and dishonest measure, the deficit financing bill, a measure which would attempt to appease some low-income taxpayers with a little reduction while giving enormous tax relief to the rich. We are given a chance to vote only for the Wall Street tax-cut bill—a bill to fill the pockets of those who profited most during the war. A measure which if adopted would weaken the solvency of our Government and deny to us the means of providing for our own national defense and security, which today is so vitally important.

Considering these facts, I ask, Mr. Chairman, is it any wonder why a new Member becomes disappointed at the absence of statesmanship evidenced, at times, by Members of the Congress? It is time that the Congress cease practicing this continued deception. It is time to endeavor to solve the problems of responsibility of our Government and at the same time honestly endeavor to provide a fair and equitable tax-relief program—a measure which will also take into consideration the necessity of endeavoring to balance the Federal budget and substantially reduce our war debt while also providing for the national defense, security, and welfare of the people of America.

Mr. MACKINNON. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. MACKINNON. Mr. Chairman, this bill is exceptionally meritorious in many respects. I refer specifically to:

First. The increase in the exemption for individuals and dependents.

Second. The provision providing for equalization of taxes for those in non-community-property States with those taxpayers who reside in community-property States.

Third. The increased exemptions to the aged—those 65 years of age and over.

Fourth. The increased exemptions to the blind.

In addition to the foregoing, this bill provides for a reduction in rates and in this respect the greatest percentage of benefit is given to those taxpayers whose net incomes are under $5,000. They are the ones who need it most. This group will receive 72 percent of the total cut. In addition it should be pointed out that this bill applies only to individuals and not to corporations.

The bill is thus well balanced. It corrects inequities and provides a small reduction in the unconscionable wartime tax rates. As a tax bill it is good, and so far as the revenue aspects are concerned, I am convinced that if the actions of this House on appropriation bills are upheld in the Senate that we will have sufficient funds remaining to keep the budget balanced and to make a substantial payment on the Federal debt. Of course there is the possibility that the Senate may increase a number of appropriation bills. If they do I am sure they will make their action on the tax bill consistent with their action on appropriations. Their concern for the public welfare is as great as our own, and I feel it is entitled to as much respect. They should be given an opportunity to act on a tax bill. Under the constitutional restriction, the only way that can be done is for us to send them a tax bill. We should do this early so they can give it full consideration. We cannot expect them to rush through a bill hastily at the last of the session. Our own committee has been holding continuous hearings since November. The Senate should have an equal opportunity for full consideration. Only by passing this bill now can that opportunity be afforded to the other body. When they have acted there will be a conference committee, and then the House will again consider the measure.

That is the time to determine if it provides adequate revenue. Our revenue needs will then be clear. I consider it absolutely essential that we keep our budget balanced and provide sufficient funds to make a substantial payment on the national debt. This bill presently conforms to that requirement. I shall support it for that reason and for the other reasons previously given.

Mr. DOUGHTON. Mr. Chairman, I yield myself 30 minutes.

Mr. Chairman, it is with considerable reluctance that I am taking the time of the House to discuss the pending bill, H. R. 4790, entitled "A bill to reduce individual income-tax payments and for other purposes."

I realize that what I say today must be largely repetitious of what has already been said since we opened debate. The bill has been fully explained and ably debated by those favoring and those opposing the legislation. In fact, I have heard so many statistics and figures that I am a bit dazed by figures and am threatened with a bad case of "figuritis."

Before proceeding with discussion of the bill, I would be derelict to my senses of gratitude were I not to express my appreciation to our distinguished chairman, the gentleman from Minnesota [Mr. KNUTSON], for the able, courteous, and impartial manner in which he has presided over the deliberations of our committee since he first assumed the duties of the chairmanship of the Committee on Ways and Means.

The bill has an appealing title. I am sure the 52,000,000 Federal taxpayers of the country are anxious for, and feel they are entitled to, some relief from the burdens of the heavy taxes they have been carrying since the outbreak of World War II.

With respect to this important legislation, I desire that my position be made clear to the Congress and the people of the country. Frankness impels me to state that I believe the time has arrived when we can, and should, lighten the heavy burden of Federal taxes. In doing this, however, there are several important factors that we should take into consideration.

First, we must have a sound fiscal policy. By a sound fiscal policy I mean one that will provide adequate revenue for meeting necessary governmental expenditures—mind, now, I say necessary—and at the same time provide for a substantial payment on our huge public debt. I would not support any bill that I did not think would accomplish these objectives.

In my opinion, the pending bill does not meet the requirements that I have stated. No tax bill is preferable, in my opinion, to an unsound tax bill. Consequently, it is with much regret that I find myself, much as I am in favor of some reasonable reduction of taxes, unable to give the bill my support.

We have often heard the remark "too little and too late," but in my opinion it is equally serious to make the other mistake of "too soon and too much." In the first place, I believe the bill is premature and that we have the plow before the

mule. We should have had revision of taxes first, then reduction of taxes, or if not, we should have had them simultaneously or in the same bill. To have a well-balanced tax bill, there should have been some reduction, or removal, of other taxes, along with reduction of individual income taxes.

Certainly excise taxes are equally, or in fact, more burdensome than individual income taxes, many of which bear no relationship whatever to ability to pay, such as the taxes on communications, transportation, women's handbags, baby powder, automobile tires and tubes, electric light bulbs, and many others.

The bill gives no relief whatever from these burdensome taxes which could only be justified under wartime conditions.

Since the other body is not going to act on tax legislation until they have disposed of the European recovery plan, there would have been plenty of time for tax revision in the House. For these reasons I think this bill is too soon. The decision has been made, however, and we must consider the bill that is now before us.

My principal objection to the pending bill, however, is that it is too much. It threatens a balanced budget and possibly deficit spending for fiscal year 1949. Very probably, under this bill, we would be unable to make a substantial payment on the public debt in 1949.

If this bill were to be enacted in its present form, under the Treasury estimates of receipts of $44,500,000,000, there would be a deficit of $2,100,000,000 for 1949, assuming no cut in the President's budget. Even under the greater estimates of receipts by the staff of the Joint Committee on Internal Revenue Taxation, of $47,300,000,000, there would be only $500,000,000 to apply on the public debt. In my opinion, the $209,000,000,000 level of personal income estimated by the joint committee staff is too high, and the $200,000,000,000 estimate of the Treasury is too low. If we split the difference between the Treasury and the joint committee staff we would have a deficit under H. R. 4790 of $800,000,000. The effect of H. R. 4790 upon the budget for fiscal year 1949 under the foregoing estimates is summarized as follows:

	Treasury	Joint committee staff	Splitting the difference
Estimated receipts under present law	$44.5	$47.3	$45.9
Expenditures, President's budget	39.7	39.7	39.7
Surplus before tax reduction	4.8	7.6	6.2
Tax reduction under H. R. 4790	6.9	7.1	7.0
Surplus (deficit) under H. R. 4790	−2.1	+.5	−.8
Surplus (deficit) if budget cut $2,000,000,000	−.1	+2.5	+1.2

But the majority paint for us beautiful pictures of vast reductions to be made in the President's budget. However, as Saint Matthew reminds us:

By their fruits ye shall know them.

The only fruit of the budget cutting efforts is the record in the First Session of the Eightieth Congress. The 1948 budget, submitted by the President on January 3, 1947, estimated expenditures for fiscal year 1948 at $37,500,000,000. The House of Representatives insisted upon a cut in the President's estimates of $6,000,000,000, and the Senate upon $4,500,000,000. This difference was never resolved. The performance was far short of the promises. Estimated expenditures for fiscal year 1948 now will exceed the original estimate of the President by approximately $200,000,000. So it appears there will be an increase rather than a reduction in the President's budget.

One might think that this experience would be a lesson to men of ordinary prudence in fiscal matters. The majority, however, resolve all doubts in their favor in estimating revenue receipts and budgetary expenditures. They ignore the Biblical admonition:

Which of you intending to build a tower sitteth not down first and counteth the cost, whether he has sufficient to finish it.

So, I say there is an alternative to the two extremes—to the excessive tax reduction proposed by H. R. 4790 on the one hand, and to the insistence by the President on the other that there shall be no loss in revenue at this time. I believe that there is room for a moderate safe, sane tax-reduction law.

The bill contains two good provisions, one for the eliminating the community-property discrimination, and the other an increase in exemptions to help the low-income taxpayer. I would not support any bill that did not contain these two provisions.

If H. R. 4790 is sent to the White House in its present form, it will certainly be vetoed, and the veto, in my opinion, will be sustained unless the picture as to revenue receipts and expenditures changes, and as a result we would have no tax relief whatever.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. DOUGHTON. Yes; I yield to the gentleman.

Mr. KNUTSON. I am sure my good friend has no assurance from the White House that his bill would be signed. Everything indicates that the President does not want tax reduction. In fact, he has said so.

Mr. DOUGHTON. I will leave that for the President and the gentleman from Minnesota to discuss. It would take the faith of an Abraham to believe that this bill, in its present form, or the motion to recommit, which I understand will be made, could possibly become law.

My principal and greatest opposition to the pending bill, however, is largely one of degree rather than of formula. The bill simply loses too much money. If the percentage reductions of 10, 20, 30, as contained in the bill, were reduced to 5, 10, 15, as I proposed in the committee, and were to be combined with income-splitting to solve the community-property discrimination, and an increase in exemptions of $100 per capita, or more, to relieve principally the low-income tax group, thereby removing 5,000,000 taxpayers from the tax rolls and benefiting all individual income taxpayers, we would have a bill that would lose no more than four to four and one-quarter billion dollars. Such a bill, in the absence of any cut in the President's budget, would permit a payment on the debt in fiscal year 1949 of one and one-half billion dollars as a minimum.

In my judgment such a bill would become law with or without the President's sanction. If only a moderate cut of $1,000,000,000 to $2,000,000,000 is made in the President's budget, which I think can reasonably be done, if we will uphold the hand of the distinguished chairman of the Committee on Appropriations, the gentleman from New York [Mr. TABER], to cut expenditures to a reasonable minimum level, it is safe to say that under my proposal we could make a substantial payment on the public debt of from $2,500,000,000 to $3,000,000,000.

That is my opinion. If we send the President a reasonable bill, one under which we can reasonably assume that we will be able to balance the budget and make a reasonable, sizable, substantial payment on the public debt, and if the President should veto that bill, his veto would be overridden and the action of the House sustained, and the public would get tax relief.

And at this point I pay my respects to the able and distinguished gentleman from Pennsylvania [Mr. RICH], who is such an ardent apostle and crusader for economy in Government. I would take off my hat to him if I had one on.

Those favoring this bill and those who believe there should be no reduction in the amount of revenue at the present time represent two extremes. My experience in life has been that safety does not abide in extremes. If we enact a reasonable tax-reduction law, it will have a stimulating effect on business, be an incentive to expansion of industry, have a tendency to increase our revenues, and help remove the temptations to evade taxes.

There is such a thing as having taxes so high as to reach the point of diminishing returns, and many people feel we have reached that point already.

If we do not make a sizable payment on the public debt now—when the national income is at its peak—can we ever expect to begin debt retirement? The Congress must not break faith with the 85,000,000 bondholders, who in the hour of their country's greatest need sacrificed and saved in order to finance the most expensive war in all history.

On the other hand, if we do not give some tax relief now, at the time of greatest prosperity in our history—with revenues at record levels under present taxes producing a surplus—when can the extremely heavily burdened taxpayers hope for any relief? Surely they are now entitled to a little smoother road and a little lighter load.

While we are providing so liberally for so many purposes, both domestic and foreign—for foreign relief and recovery, aid to agriculture, veterans, reclamation, aid to the dependent and the blind, and many other worthy causes, but some possibly not so worthy, why would it not be an act of both wisdom and justice to give the heavily burdened taxpayers a little break and encouragement, for they

are the ones to whom we must look to finance these heavy expenditures.

Mr. Chairman, how much time have I consumed?

The CHAIRMAN. The gentleman from North Carolina has consumed 15 minutes.

Mr. DOUGHTON. Mr. Chairman, I regret very much to find myself in disagreement with a number of my colleagues with respect to the motion to recommit. It is always painful to me to disagree with those with whom I usually labor. However, in my opinion, the motion to recommit is equally as objectionable and unsound as the bill under consideration.

I hold no brief for corporations, but I want corporations to have the same consideration at the hands of our Government as any other taxpayer. They are entitled to that consideration—no less and no more.

In my opinion, a tax revision affecting 140,000,000 people and billions of dollars in revenue should have some consideration by a committee. You can always reduce taxes without giving those affected a hearing, but when you come to increasing taxes, when you impose a new tax upon 22,000 corporations out of some 360,000, I submit that it is unfair, unsafe, and unreasonable to do this without giving them an opportunity to be heard.

An excess-profits tax is a war measure. We had an excess-profits tax during World War II. At the same time, we had price controls. In my judgment, the only way you can successfully have an excess-profits tax is to have price control at the same time. We have a seller's market today, not a buyer's market. It takes no superior judgment to realize that those corporations are not going to pay this increased tax. They could pass the tax on to the consumer in the form of higher prices, or they could pass it back to labor in the form of reduced wages, or they could do both. They are in position to take care of themselves.

Mr. Chairman, there is another thing about this proposed excess-profits tax and that is its lack of uniformity. It is not like the excess-profits tax we had during the war. It picks out 22,000 corporations, and imposes an additional heavy tax. Who are the 22,000 corporations? They are not the old corporations with the large invested capital and the large base period earnings. Not those at all. They are chiefly the new corporations formed during the war and since. This will result in unjust discrimination and in unfair competition. You are taxing one class of business and leaving another free of taxation. As a consequence, Mr. Chairman, the excess-profits tax in time of peace, in my judgment, is not defensible. This position has been the unanimous view of every Secretary of the Treasury but one over the last 25 years, including such eminent men as ex-Senator Carter Glass and former Secretary of the Treasury, now Chief Justice of the United States, Fred M. Vinson.

In 1945 the tax was repealed at the urgent request of the administration and the Secretary of the Treasury. At that time we were advised that repeal of the excess-profits tax would be an incentive to business and a stimulation to the reconversion and expansion of industry.

Now that the war has been over for two and one-half years, with our present revenue laws producing a substantial surplus, there is no justification for saddling a load of $3,250,000,000 on a limited number of taxpayers.

In my judgment the reimposition of the excess-profits tax is a chimerical scheme, and does not represent the views of the Committee on Ways and Means. And so far as I know, is not supported by any reputable economist. It is not a matter that can be safely prepared by six or seven men meeting for a little more than an hour, as in the case of this motion to recommit.

Mr. BARDEN. Mr. Chairman, will the gentleman yield?

Mr. DOUGHTON. I yield to the gentleman from North Carolina.

Mr. BARDEN. I understood the gentleman to say that the proposal with reference to this excess-profits tax was never considered or studied by the committee and that there were never any hearings held, and no one affected ever had an opportunity to come before the committee on this matter.

Mr. DOUGHTON. That certainly is true.

Mr. RAYBURN. Mr. Chairman, will the gentleman yield?

Mr. DOUGHTON. I yield to the gentleman from Texas.

Mr. RAYBURN. The gentleman will agree with me that the so-called Dingell bill was before the committee during the consideration of the Knutson bill, and witnesses were heard on it in committee.

Mr. DOUGHTON. Does the gentleman mean the Dingell bill?

Mr. RAYBURN. Yes.

Mr. DOUGHTON. Why, that is nothing like it at all.

Mr. RAYBURN. I think I can give a demonstration.

Mr. DOUGHTON. The Dingell bill expressed the views of the President, and that made no provision whatever for removing discrimination as between the community and the noncommunity property States. It made no provision for raising exemptions. It made no provision for increasing exemptions for the blind; not at all. I am surprised at my good friend, the distinguished minority leader, that he would say the bills were similar, because I know they are not similar, and I stake my reputation on it that the Dingell bill is not the same as the motion to recommit.

Mr. ROBSION. Mr. Chairman, will the gentleman yield?

Mr. DOUGHTON. I yield to the gentleman from Kentucky.

Mr. ROBSION. What the gentleman has been talking about is the proposed motion to recommit, bringing in for the first time the excess-profits tax on 22,000 corporations. That is what the gentleman is talking about. Those corporations were formed during the war or since the war; is that not correct?

Mr. DOUGHTON. That is correct.

Mr. ROBSION. So this proposition would not include the United States Steel or Standard Oil?

Mr. DOUGHTON. I think not.

Mr. ROBSION. Or any of these great corporations?

Mr. DOUGHTON. That is my understanding.

I know and my good friends know that they never expect this motion to recommit to become law. Neither do I really think that those who bring in the committee bill are very firm in their conviction that it will become a law.

It will not be necessary to vote for this bill in order to get tax-relief legislation, because the tax bill will finally be written in the other body and in conference. It has been stated that the other body is not going to act upon tax legislation until it has disposed of the European-recovery program.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. DOUGHTON. I yield to the gentleman from Minnesota.

Mr. KNUTSON. Of course my good friend from North Carolina recognizes the fact that in order to get this bill to the Senate and to conference it will first have to pass the House.

Mr. DOUGHTON. Certainly.

I want to see some tax reduction. I am not engaged, and I do not charge that anybody else is engaged, in political activity in connection with this matter, but I sincerely want to see this Congress send the President a reasonable and practical tax-reduction bill. Then, should the President veto such bill, which I am inclined to hope he will not, he will do it on his own responsibility. I do not speak for the President. We all know that the responsibility for initiating and imposing tax legislation is reposed by the Constitution in the Congress, not in the Executive. After the Congress has acted, then the President may approve or disapprove the bill. In so doing, he must accept responsibility.

While I am no prophet, I make the prediction for what it is worth that neither the motion to recommit nor anything similar to it, will be contained in the tax bill as finally passed by Congress.

Mr. KNUTSON. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. MASON].

Mr. MASON. Mr. Chairman, in 1945, the Congress passed a tax-reduction bill. It was an excellent, well-balanced tax reduction bill. It gave $6,000,000,000 tax relief. It was well spread and it cut some 10,000,000 people in the low brackets off the tax rolls. It gave to business corporations the major part of the relief, a little over $3,250,000,000. That tax-reduction bill was sponsored by and was tailored by the gentleman from North Carolina [Mr. DOUGHTON], who, in my opinion, is one of the greatest living Americans today. He is the greatest Roman of us all. He has well earned the title "The Grand Old Man of the House."

What did that tax-reduction bill in 1945 do which the Congress passed, and which the President signed in the face of

a $20,000,000,000 deficit from the Treasury? This is what it did. First, it gave a shot in the arm to business. It enabled business to plow back into an expansion program some three to four billion dollars, which meant a tremendous business expansion, almost a boom. Second, it increased the national production index by 15 points. Third, it provided 5,300,000 new jobs in America in this expansion program. That, my friends, meant that we had arrived at the goal that F. D. R. had set for 1950, 2 years before the time set. What else did it do? The fourth thing that it did, and you will hardly believe it, but it is true, is that it increased revenues taken in by the Treasury. In this year there will be $40,000,000 more taken in by the Treasury than was taken in in 1945, the all time peak of Treasury receipts. Next year it is estimated that the Treasury will receive a billion dollars more than it received in 1945 when they received $46,500,000,000, and next year it will be $47,300,000,000. That 1945 tax reduction bill was sound, and the results show it. We repealed the excess-profit taxes at that time and gave industry the necessary shot in the arm to expand. The motion to recommit proposes to reverse that trend and to travel in the opposite direction which will mean a reduction in the number of jobs that will be available. That is exactly what such a reversal in the trend will mean, because it will be a handicap to business in this expansion program. There is no getting out of that. Taxes and jobs are Siamese twins, and they cannot be separated. Whenever you have high taxes you always have a contracting national economy and fewer jobs. When you lower taxes you always have an expanding national economy and more jobs.

I ask my colleagues whether you want to follow the lead of sound taxation, the lead set by the grand old gentleman of your party and of the Nation, or whether you want to reverse the trend that he established in 1945.

The CHAIRMAN. The time of the gentleman from Illinois [Mr. MASON] has expired.

Mr. KNUTSON. Mr. Chairman, I yield such time as he may desire to the gentleman from Michigan [Mr. ENGEL].

Mr. ENGEL of Michigan. Mr. Chairman, the question I want to discuss today is "Can Federal Expenditures Be Reduced?" Do we need and can we have Federal tax reduction? Before I proceed I want first to give the sources of my information.

SOURCES OF INFORMATION

In 1945 I was a member of the Labor-Federal Security Subcommittee of the Appropriations Committee. At that time I offered an amendment in committee to the Labor Department appropriation bill earmarking $586,000 for an up-to-date study of the city worker's family budget. This was a study of what a typical city worker's family budget ought to be and what he could live on in 34 of the largest cities of the United States. The family consisted of a father, mother, a child 13, and a child 8. After 2 years of work the study authorized in 1945 was completed and the United States Department of Labor issued their report in December 1947. On December 22, 1947, the Research Department of the United States Treasury issued another interesting report. This was a study of the low-income group, the tax burden of that group and particularly a study of the personal exemptions of the low-income group in all fields. I am basing my conclusions here today primarily on these two reports, which I consider the finest that have been made for some time in this particular field.

NEED OF TAX RELIEF

Everyone wants tax reduction. The need in my judgment is greatest for the low-income group. It is this group which has suffered most. They have been squeezed between rising tax rates and reduced tax exemptions on the one side and increased living costs on the other.

I use the phrase "low-income group" because it includes all people in this group. The wage earner—organized or unorganized, the farmer, the school teacher, the white-collared worker, in fact every person is included who requires all of his income to make a decent living under our American standards. I take the position that an old couple who are depending for a living upon retirement pay or upon a return on life savings invested in stocks or bonds can be just as hungry if the retirement pay or return on their investment is inadequate to buy decent food, clothing, and housing as though they were standing in a bread line.

I want to discuss first the question of tax exemptions.

TAX EXEMPTIONS

In 1939 a single person had a tax exemption of $1,000. In 1944 this tax exemption was reduced by an act of Congress 50 percent, from $1,000 to $500. According to the reports and study referred to above by the Department of Labor and the United States Treasury research department, there was an increase of 64.8 percent in the cost of living from 1939 to September 1947. Three hundred and three dollars bought the same living in 1939 when a single person's tax exemption was $1,000 that the present exemption of $500 buys today. While the tax exemption was reduced 50 percent, living costs went up 64.8 percent. In 1939 a married couple had a tax exemption of $2,500. In 1944 that tax exemption was reduced by an act of Congress to 40 percent of the 1939 exemption or to $1,000. Again, according to the Labor Department and Treasury studies, $606 bought the same living cost in 1939 when that couple had a tax exemption of $2,500 that the reduced tax exemption of $1,000 bought in 1947. This couple was reduced in exemption from $2,500 to $1,000 or to 40 percent of the exemption they had in 1939, at the same time living costs went up 64.8 percent. While wages are high in terms of dollars, they are low in terms of purchasing power. While the farmer's product is high in terms of dollars, his purchasing power is low in terms of the same dollar. Three-dollar wheat in September 1947 was worth $1.82 in 1939 purchasing power.

The city worker's budget referred to above says it requires approximately $3,000 in addition to taxes and other similar items for a typical family of four to live in the city of Detroit. A $3,000 annual income seems large for a worker. However, when we consider the matter in the light of a 64.8 percent increase in living costs, we find that $1,800 bought the same living costs in 1939 that the $3,000 buys today. These people in the low-income group, whether on the farm, in the city, or wherever they may be, regardless as to where their income is derived from, are squeezed between the increasd taxes and the increased living cost until millions of them find it impossible to make a decent living—all this during the greatest era of so-called prosperity in the history of the world. The decrease in tax exemption plus the increase in living costs virtually wiped out what tax exemption they had. The increased number of dollars they are receiving do not bring increased food, just increased taxes. Let us take a man and wife with an income of $1,200. According to the tax tables they pay $38 in income taxes and are exempt $1,000. Six hundred and six dollars bought the same living cost in 1939 that $1,000 buys today. They could not live on $606 in 1939, and they cannot live on $1,000 or $1,200 today, and the tax money you are taking from them is blood money. We are taking the bread and butter out of their mouths and reducing their living standards to an unprecedented low.

HEAD OF FAMILY EXCEPTIONS

Before the war and ever since the 1920's, we had a tax-exemption policy which gave one exemption to the head of a family and one to the single person. We gave an additional exemption to each dependent. For instance, in 1939 the head of a family was given a $2,500 exemption for the household and a $400 exemption for each dependent. The wife was considered a part of the household and included in the head of a family exemption. If the father died the mother retained the head-of-family exemptions because she had the same household expenditures required by the family. Under the present system, the husband and wife are given $500 exemption each with a separate exemption for each child. Should the father die, the mother loses his exemption despite the fact that she not only must continue the same household expenses, but must both take care of and earn money to support the household. Each New Year's day Washington newspapers publish the name of the first child born after the passing of the old year. They reported that a child was born 1 minute after 12 o'clock New Year's Day. Had that child been born 1 minute before midnight, December 31, 1947, instead of 1 minute after midnight on the morning of January 1, that child, 1 minute old, would have been given the same 1947 tax exemption that the widowed mother would receive whose husband has passed away and left her with the responsibility of supporting the family and the household. That is how

ridiculous the present tax-exemption laws are. This is one of the principle differences between the present Knutson bill and the Engel bill I introduced.

MR. TRUMAN'S TAX POLICY

Mr. Truman in his recent message came out proposing a tax credit of $40 to every taxpayer. Forty dollars of course would help some. He contends that this would make it unnecessary for 10,500,000 people to pay taxes who are now paying taxes. The difference between Mr. Truman's plan and mine and the present Knutson bill is this: I want to increase their exemption; I want to say to these taxpayers, individually and collectively in this low-income group: "You do not have to pay any more taxes; you do not have to make any more returns; we will take you off the tax roll and you can forget all about taxes until your income is greater." I do not want to employ hundreds of Treasury workers to process these 10,500,000 returns and I want to reduce the workers in the Treasury Department by the number required for that purpose. What does Mr. Truman propose? Mr. Truman is going to require these 10,500,000 people to make their regular tax returns and pay some lawyer or someone to help them make out those returns as many of them cannot make them out alone. That tax return will say, "You owe the Government $40." Then Mr. Truman is going to try to make them believe he is giving them $40 by giving them a tax credit. The report will then go down to the Treasury Department, hundreds of Treasury employees will draw their salaries for processing these 10,500,000 returns and for writing these people that after all they do not have to pay any taxes. The Government is not giving the taxpayer anything; the taxpayer is giving to the Government. Let us get that straight. Mr. Truman and the Government are not giving this little taxpayer anything. He should not pay taxes in the first place. Here is a good chance to reduce some of the thousands of employees we have in the Treasury Department.

CAN GOVERNMENT EXPENDITURES BE REDUCED?

Regardless as to whether we have tax reduction, waste and extravagance must be reduced. The more successful we are in reducing governmental expenditures and waste, the greater will be the tax relief we can give to all taxpayers and particularly to the taxpayer in the low-income group.

I believe that Government expenditures can be reduced materially. This is my twelfth year as a member of the War Department Subcommittee of the Appropriation Committee and the second year as its chairman. I want to discuss the question from the War Department expenditure point of view. What applies to the War Department applies to the Navy and other departments in varying degrees.

WAR DEPARTMENT

In order to reduce taxes we have to reduce expenditures. You will recall a year ago when the budget was published the War Department's budget for the present fiscal year of 1948 amounted to approximately seven and one-half billion dollars for all purposes and the Navy Department's budget was $3,541,000,000. The War Department announced that this was the irreducible minimum; that we could not take a dollar off that budget. The Secretary of War and Secretary of the Navy so testified. They brought out the big guns, General Eisenhower, Forrestal, Patterson, and others, and began propagandizing the country. You may recall at that time I made the statement that the War Department would have available for expenditure for the present fiscal year not seven and one-half billion dollars, but $10,038,000,000; that the Navy would have available not three and one-half billion dollars, but $6,600,000,000. That, combined, we would have not $11,000,000,000 available for expenditure on national defense but over $16,000,000,000. You will recall that I made the statement that if Secretary of War Patterson and Chief of Staff Eisenhower could not cut that $10,000,000,000 they had available for expenditure for the War Department by one and one-half billion, they better get out and give somebody else a chance. I stated further that if Secretary of the Navy Forrestal and Chief of Naval Operations Admiral Nimitz could not cut at least three-fourths of a billion from the $6,600,000,000 the Navy had available for expenditure, they ought to get out and let somebody else try.

Now let us see what happened. I am chairman of the War Department Subcommittee of the Appropriation Committee. We handle all War Department appropriation bills. We had four men on the War Department work from February to April 1947. We had some of the best accountants in America who were following our instructions. The War Department admitted that it had $5,700,000,000 in 1946 and prior years' funds that they had not even been able to obligate. $5,700,000,000 is $100,000,000 more than the Knutson tax reduction bill now before the House calls for. The budget office of the War Department testified that the President's Budget Bureau estimated that of the $5,700,000,000, $3,000,000,000 would be obligated. According to this testimony we could rescind and kick back into the Treasury $2,700,000,000. General Richards, budget officer of the War Department, himself estimated that they would obligate $3,700,000,000 in which case we could kick back into the Treasury $2,000,000,000. We were finally able to rescind and turn back into the Treasury $1,100,000,000. While these moneys had not been actually spent, the efforts that were made to keep us from rescinding these old appropriations were the best evidence that they would be spent if not rescinded. Let me give you some idea of what we were up against on that committee.

Each branch of the service in the War Department, that is, the Ordnance, Engineers, Quartermaster and others, has a budget officer. Some of these budget officers are civilians and some are Army officers. Then we have Gen. George Richards in the Army who is over the whole group and whose orders they follow. I had each of these budget officers in my office alone and went over their statements. I did this to get them away from the influence of General Richards. Here is what happened. I had the budget officer of the Ordnance Department of the Army before me. His books showed he had $566,000,000 of 1946 and prior years' funds which were not obligated. At 11 o'clock in the morning he told me he was not going to obligate and that I could rescind that $566,000,000. At 4 o'clock in the afternoon of the same day, after reporting back to General Richards, he called me back and said that he was mistaken, that General Richards had transferred $344,000,000 of these funds. Here we had one Army officer transferring one-third of a billion dollars of taxpayers' money to some other agency for expenditures which had not been justified before any congressional committee and he did not even take the trouble to inform the agency from which it was transferred that he had done so, and then they told us the budget was irreducible.

The taxpayers have not a chance with a budget officer like General Richards. That is why the Army promoted him. Let me give you another instance.

TRANSPORTATION DEPARTMENT

The transportation department of the Army had a $400,000,000 budget. I had them before me. After talking to them for 1½ hours, I couldn't get a thing out of them. They just would not talk. These were Army officers, not civilians. They admitted that every time they took a classified employee off the pay roll under the Byrd law, they put the same man back unclassified outside of the Byrd law, and gave that as a reason why they could not cut under the Byrd law. For instance, they took a chauffeur off who was a classified employee and put the same man back on as a truck driver who was not classified. I finally got disgusted. I told them I knew that their budget could be cut, that to make sure we cut enough I was going to recommend a cut of 25 percent or $100,000,000. That if the cut was too deep they could come back to the Deficiency Subcommittee of which I am also a member and they would have to talk to get it back. I told them the interview was finished and they could leave. They sat there for some time refusing to leave. They wanted to discuss it some more. I finally turned to them and said, "Just what would you say if we cut you 10 percent or $40,000,000?" The ranking officer turned to me and said, "Mr. ENGEL, if you cut us $40,000,000 or 10 percent, you will not hear a squawk out of us; any of them can take a 10 percent cut." Here we had the budget officer of a department admitting that the War Department budget was padded at least 10 percent. The man who was responsible for the padding was Major General Richards, now comptroller of the Army and who will undoubtedly be promoted to the rank of lieutenant general. These officers were acting on instructions of Gen. George Richards.

PERSONNEL

The original so-called irreducible budget was based upon officer personnel far in excess of the number and rank required, and of civilian personnel far in excess of the number required. When

the bill left the House we cut off over 17,000 officers and 74,000 civilian employees. The other body as usual put them all back on again. But when we came out of conference we cut off approximately 15,000 officers and more than 58,000 civilian employees, and yet General Eisenhower, Patterson, Forrestal, and that group came out before the public and said the budget was irreducible.

ARMY OFFICERS

When the justifications came justifying the amount of this so-called irreducible budget, we asked for and received a break-down of the number of officers the Army asked for in each grade. Were General Eisenhower's and Secretary of War Patterson's faces red when they had to admit that this so-called irreducible budget contained money to pay five captains, five majors, three lieutenant colonels, one and one-half colonels for every second lieutenant they had in the Army outside the Air Force. Excluding the Air Corps, which has about 50 percent of the officers, the Army asked for the following:

Four thousand and twenty-three second lieutenants.

Six thousand seven hundred and nineteen first lieutenants.

Twenty-one thousand one hundred and seventy-seven captains.

Twenty thousand seven hundred and six majors.

Twelve thousand six hundred and thirty-seven lieutenant colonels.

Six thousand and two colonels.

They had 16 more major generals than they had brigadier generals. They had so much stardust in the budget that it looked like the Milky Way. They asked for 197 major generals, 181 brigadier generals, 26 lieutenant generals, 6 four-star generals, and 2 five-star generals for less than 600,000 men in the Army, excluding the Air Forces, and yet the Secretary of War and Chief of Staff told the Nation that this was an irreducible budget. During all this time that old couple with a $1,200 annual income was paying $38 a year bread and butter money in taxes which the Army was throwing down a military rat hole.

Of course governmental expenditures can be cut. Of course national defense expenditures can be cut. I want national defense as much as any man in America. I believe, however, that the taxpayers of America have a right to demand a dollar's worth of national defense for every dollar spent. We can have reduction in Government expenditures and in Army expenditures. We can have the resulting tax reduction if we can stop the Army and other agencies from throwing money down a military or bureaucratic rat hole.

1949 NATIONAL DEFENSE BUDGET

I do not know as yet just what can be done in the way of cutting the 1949 budget. The budget figures seem to indicate substantial cuts can be made.

To keep a clear picture before the public on national-defense expenditures, I am making the following statement taken from the 1949 budget:

It will be seen that while the total 1949 appropriation requested for all military functions of national defense is $11,420,383,250, there will actually be $14,544,333,087 available for expenditure for national defense during 1949.

If we add the Army's civil functions budget requests including Government relief in occupied areas and the Panama Canal estimates, there will actually be available for expenditure for all national defense and military purposes during 1949 the enormous sum of $17,485,532,187.

Following is the complete picture in table form:

	Appropriation for 1949	Total estimated expenditures available for 1949
Office of Secretary for National Defense	$6,395,000	$6,565,000
Department of Air Force [1]	1,169,426,000	1,168,926,000
Department of Army, military	4,683,834,000	7,277,440,068
Department of Navy, including supplementals	3,574,427,700	6,091,402,019
Total military	9,434,082,700	14,544,333,087
War civil functions	1,962,115,750	2,906,961,154
Panama Canal	24,184,800	34,237,946
Grand total	11,420,383,250	17,485,532,187

[1] This amount covers only the money that will be appropriated directly to the Department of the Air Force. Pay, clothing, and rations of the Air Corps will be contained as usual in Finance and Quartermaster appropriation of the Army. In 1948 the Air Corps received 56 percent of total Army appropriations.

THE KNUTSON BILL

I have taken the position that the only way the low-income group can get real tax relief is to increase tax exemptions while we are decreasing tax rates; that the tax cut should be a two-way cut, (a) increase of exemptions and (b) decrease in rates. While the present Knutson bill does not go as far as I would like, it does recognize and apply tax reduction by (a) increasing exemption and (b) decreasing rates. I introduced a bill recently which I hoped might be considered. My bill restores a modified "head of family" tax-exemption clause. It does not go as far as I wanted to go. It is in effect a modified Knutson bill which I thought might be a fair compromise. I am including a statement at the conclusion of these remarks showing the difference between the Engel and the Knutson bills. We cannot all have our way in proposed legislation. The present Knutson bill goes much further my way than I expected it would. I shall support it. Bills that die in committee do not give tax relief.

COMPARISON BETWEEN H. R. 4790 (THE KNUTSON BILL) AND H. R. 5172 (THE ENGEL BILL)

While H. R. 5172, the tax bill I introduced, does not represent my views in their entirety, the changes my bill makes in the committee tax bill are not so drastic but what the committee, either in this or the other body, might reasonably accept them. What I want primarily is to get the maximum tax relief for the low-income group that is possible at this time.

The Engel bill is in effect the Knutson bill with the following important changes: First, an increase in the tax exemption of a single person to $750 and of a married couple to $1,500, the exemption for dependents, in general, to remain at $500; second, the insertion of a modified head-of-a-family provision which, after the death of one spouse, would give the remaining spouse a $750 exemption and which would give $750 to the first dependent where the husband or wife passes away leaving the burden of supporting the family on the other spouse. This new head-of-a-family provision is easier to enforce than the head-of-family provision contained in the old prewar law; third, the elimination of the split income and estate tax provision.

With respect to my first suggested amendment, an addition was made to section 25 (b) (1) (A) of the code, as amended by section 201 of H. R. 4790, and a new subsection 25 (b) (D) (ii) was inserted. The former addition would grant a husband an exemption for his spouse where she dies during the year, under certain conditions. The latter addition, with respect to dependents, would grant an exemption of $250, additional to the usual exemption, for the first dependent of an unmarried person. In order to relate the exemption changes which I have outlined to the optional tax table (section 400 of the code) and to the withholding provisions (subchapter D of chapter 9 of the Code), it is contemplated that the tables and the calculations under the sections will involve units of $250. In this way a $500 dependency exemption will entitled a taxpayer to two such units, an additional dependency exemption will entitle him to a third, and the usual individual exemption will entitle him three such units. You will also note that sections 301 (a) and 402 of the draft involve a simple substitute for a recalculation of the tables inasmuch as they could not have been prepared in the time available. This advice has been used on other occasions.

The raising of the exemptions under my second suggested amendment was accomplished by changing the figures in the Knutson bill. I am informed that my bill as drafted will reduce revenues by approximately the same amount as the Knutson bill.

The elimination of the split-income and estate-tax provisions under my third suggested amendment, was primarily accomplished by omitting title III of H. R. 4790, the new Knutson bill, husband and wife, parts 1 and 2. In view of the situation which exists in the community property States, I certainly am not opposed to the Knutson bill split-income-tax provision. I do feel strongly, however, that in view of the tremendous increase in living costs the reduction of taxes in the low-income group should come first before we lighten the tax burden on the higher income individuals. My opposition is merely one of emphasis. I think it is primarily important, in terms of justice and widespread purchasing power to do a fully adequate job of tax relief for the low-income group first. The split-income-tax provision should be secondary and should be included only if and when real relief in terms of dollars, not percentages, is granted the low-income group.

Mr. KNUTSON. Mr. Chairman, I yield such time as he may desire to the gentleman from California [Mr. JOHNSON].

Mr. JOHNSON of California. Mr. Chairman, in considering the present tax legislation—the Knutson bill—several considerations pass through my mind. I intend to support the bill, but with reservations and some misgivings.

This bill makes drastic cuts in income taxes. I believe that there should be some cuts in income taxes. This bill follows the correct principle of giving those with low incomes the biggest proportionate cuts. It also gives cuts to those who will gain and have more capital to invest in new ventures, which is what makes employment and increases production.

But we cannot forget that we have a stupendous national debt. We must start paying it off, or those who fought the war will carry an undue proportion of the financial load due to the war, despite the fact that they are the ones who sacrificed greatly to win the war. When we have big national income, that is the time to tax and get the surplus needed to reduce the debt.

Also, to move in the direction of world peace, we must be involved in relief and rehabilitation in various parts of the world. That is a gamble that I firmly believe we must take to move toward a peaceful world.

For this reason, I was hoping the cuts this year would be smaller. I am hoping that the Senate will modify the bill so my general ideas will be embodied in it. It is a pleasure to vote for less taxes for our people, but we cannot overlook the fact that there may be other benefits of much more importance to our people and their children than cutting taxes. The balance is a situation where we cut but still leave room for the long-range program of bringing peace and keeping a balanced budget.

Mr. KNUTSON. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. REED].

Mr. REED of New York. Mr. Chairman, I have been in this body for a long time. I have had an opportunity to study, to observe the sincerity of that grand old man, the gentleman from North Carolina [Mr. DOUGHTON]. I think today you are all agreed that he is fearless, that he is courageous, that he is able, that he is a patriot when faced with a situation such as we are confronted with here today.

We all want this country to go forward. We do not care what political program we follow, so long as it is the right program and one that will tend to build up this Republic and enable it to meet its obligations, stimulate business, give the present generation of young people an opportunity, if they are willing to accept it. This bill will do just that. I will say, frankly, it does not go quite as far as I would go, but I am delighted to support it as a constructive and sane tax measure.

It is impossible for me to understand the attitude of the President of the United States. In the first place, I cannot conceive of any man who has the capacity to serve as the Executive of this great Nation coming in here with the type of tax bill which he proposed, known as the Dingell bill. Any child in school could see that that bill was purely a political bill and nothing else. It was a plea to buy votes at $40 each. The Democratic side has repudiated it and I congratulate them on the fact that they have repudiated it. They did not even mention it in their minority report. But one point that has been emphasized by the distinguished gentleman from North Carolina [Mr. DOUGHTON] is the fact that his Democratic colleagues in their motion to recommit are trying to turn now and go back; not to create pay rolls, but to destroy pay rolls. There has been some evidence taken. The Senate has caused a very interesting pamphlet to be published. They have gone into this question of excess profits, and they have called in the best experts in this country to elucidate the problem. I want to read what some of those arguments are. Here is one:

"The excess-profits tax is an emergency measure related to war expenditures and war profits, is completely unsound as a permanent feature of the national tax structure, and, in peacetime, would act as a major deterrent to investment of capital in productive enterprise. * * * Elimination of the excess-profits tax would once more make feasible business growth through reasonable accumulation of earnings, particularly in the case of small businesses." (American Institute of Accountants tax plan, pp. 3–4.)

Again it is said:

"The arguments against a peacetime excess-profits tax—in our judgment—far outweigh the reasons advanced in support of the view that this form of taxation should be continued permanently. * * * such a tax would tend to throttle new enterprise and impede investment. It would affect various classes of business unequally. The mature and established firm in a relatively riskless industry that consistently earns profits about equal to the rate at which the tax becomes applicable would be least affected. Such a situation could not be reconciled with the requirements of an expansionist tax policy which favors the small, the growing, and the risky enterprise rather than the large, the mature, and the relatively riskless business." (Kimmel tax plan, p. 11.)

One further point is especially emphasized:

"The leading argument against the excess-profits tax is that monopoly profits cannot be distinguished from the rewards due to superior efficiency and extraordinary risk taking. A tax on the latter type of profits is particularly discouraging to enterprise. The public has the choice between (a) recapturing some monopoly profits while penalizing efficient management and risk taking, and (b) levying no special tax on monopoly profits but neither on efficiency and risk-taking rewards. A further factor to be weighed in the decision is that, in the absence of price controls, we cannot be certain that the monopolist will absorb the excess-profits tax. An excess-profits tax is, in no sense, a regulatory and preventive measure like public-utility rate control or renegotiation of contracts. Moreover, monopoly profits can be taxed to individuals under the personal income tax as well as to companies under a business tax.

"The conclusion is that the excess-profits tax should be repealed at the close of the war, the repeal to become effective when extraordinary war-caused profits have ceased to exist (perhaps a year after the war ends)." (Harold M. Groves, Postwar Federal Taxation, NTA proceedings 1944, p. 201.)

Many other persons and groups have urged repeal. Some of them are cited in the accompanying note below.

(American Institute of Accountants tax plan, pp. 3–4; Association of American Roads tax plan, pp. 13–14; CED tax plan, pp., 20, 24; Colmer committee report, p. 41; Groves tax plan, pp. 50–57; Kimmel tax plan, p. 11; Nelson tax plan, pp. 5, 14; Rumi and Sonne tax plan, p. 10; Twin Cities tax plan, p. 23. See also George E. Barnes, A Plan To Simplify Corporation Taxes and A Solution of Double Taxation of Corporate Earnings, the Exchange, September 1944, p. 2; Alvin H. Hansen and Harvey Perloff, State and Local Finance in the National Economy, p. 256; Eustace Seligman, A Postwar Program for Taxation of Corporations and Stockholders, Commercial and Financial Chronicle, March 2, 1944, p. 908.)

Mr. Chairman, I wish to emphasize the point that it is the natural and commendable instinct of a normal young man to enter into business for himself. He wants to provide for his own future security and that of his family.

What does he face?

He is confronted with a tax law that destroys incentive.

He finds a confiscatory tax bill that prevents savings to build up risk or venture capital.

He meets with a tax law in which rates are so high that he cannot make the hurdle as against well-established monopolistic enterprise.

Income and estate tax rates, at present levels, make it virtually impossible for a young man starting at scratch to accumulate any competency for his old age and that of his family after he is gone.

Because of the character of the taxes imposed during war and continued in peacetime, the young man starting in business faces an almost insurmountable task.

Does any person who is interested in the future of this Republic and its free-enterprise system dispute the fact that there must be a steady flow of new capital, new pay rolls into the blood stream of the Nation?

Why play politics with legislation vital to the future welfare of our people?

The present wartime taxes are striking at the very foundations of individual initiative.

James Madison pointed out the philosophy of our free-enterprise system when he said:

The economic foundation of the American political system is the protection of the differing and unequal capacity of men to acquire and use property.

The war taxes are striking at those men of capacity for developing pay rolls by means of risk capital, who are being discouraged in their effort to acquire and use capital.

Under the proposal of the Truman administration the very men who are capable of creating pay rolls, high wages, and the production necessary to defeat inflation, are prevented from doing these desirable things, but more than that there can be nothing to provide security for them and their families in their old age.

Here is what these men of capacity face. Take these examples:

Here are three married men—each with two children—residing in New York. The first earns $10,000 a year; spends $7,750 for living expenses; pays $1,825 in Federal and State income taxes; and saves $425 per annum. The second receives $15,000 a year; spends $10,200 for

his family's living; pays $3,585 in income taxes; puts aside $1,215 per annum. The third enjoys earnings of $20,000; spends $11,950 for living expenses; pays $5,745 in income taxes; and saves $2,305 per annum. Living costs in each case have been carefully estimated item by item.

If the $10,000 man invests his entire annual savings of $425 regularly every year with compound interest at 2½ percent, it will take him 36 years to accumulate enough to leave his family a net estate of $20,000—after paying modest funeral and legal expenses and the New York estate tax of approximately $200. If the $15,000 man invested all his yearly savings with compound interest at 2½ percent, he would have to work 34 years to provide a net estate of a little over $50,000 for his widow; the $20,000 man, 37 years to leave approximately $10,000 to his dependents. Note, too, that all three of these men, if they died at 65, would have had to reach their maximum earning levels at the comparatively early ages of 29, 31, and 28 years respectively—a situation which would be the exception rather than the rule. No provision for life insurance was made in any of these cases so that all would remain on the same comparative basis. Invested at 3 percent, the first man's widow would receive the munificent annual income of $600; the second's, $1,500; the third's, $3,000—all subject to income-tax rates at prevailing rates.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. KNUTSON. Mr. Speaker, I yield 5 minutes to the gentleman from Nebraska [Mr. CURTIS].

Mr. CURTIS. Mr. Chairman, it is gratifying to know that when the roll is called on this bill it will receive a very large vote. It is a bill that the country ought to have. It is a bill that will do a great amount of good.

A great many individuals have raised questions about the size of any tax reduction that might be undertaken at this time. It must be borne in mind, however, that this bill is a tax-reduction bill for all the American people. We have 50,000,000 income-tax payers in the United States. We are currently gathering in taxes amounting to around forty or forty-seven billion dollars. This bill is worked out so it gives a just and equitable reduction to all categories of taxpayers within the United States.

I am sure everyone agrees with the principle that exemptions ought to be raised somewhat and that those in the lower-income brackets ought to get a considerable reduction; in fact, the largest reduction. There are some people who would stop there. If they did, they would deny tax reduction not only to millions of American people but they would destroy all the gains that tax reduction brings. There are others who say, "Yes; let us take care of the lower brackets and provide the splitting of income for tax purposes and let us stop there, thus making the reduction less." What are you going to do about the people who are already in a community-property State? They are expecting some tax reduction.

How about the single individuals who are not heads of families, a widow or a widower with no one with whom they can split their income? Are those people entitled to tax reduction? Certainly they are. Every individual is entitled to tax reduction.

We have brought about some added tax relief for the aged of the country. This will not amount to a great deal; but, added to the other things, it means we have to have a bill that does substantially what the Knutson bill does.

Let us consider the old folks for a little bit. Here is someone who gets a retirement check which is tax-free. Across the street there is someone who gets a retirement check on which he must pay a tax. Over on the other corner is someone who cannot retire at 65, but who must work to eat and pay an extra tax because somebody else's retirement check is tax-free. The Knutson bill says that everyone who has reached the age of 65 shall have an additional exemption because of his age. That is sound, that is fair, and the people back home would like to have you adopt the provision and make it the law of the land.

The bill before you has been carefully worked out. It is not simple and easy to reduce the amount of the Knutson bill, because if you once start reducing it you will destroy it; you will take the benefits of tax reduction away from some particular group. All are entitled to consideration. Certainly the poor of the country need what the Knutson bill offers; certainly those in position to provide capital need tax reduction, and if you go that far how can you deny a tax reduction to that great group of middle-class American people who are neither rich nor poor, but who make up America, the people who make up the communities that you and I represent?

I fear that the tax scheme worked out in the motion to recommit will not treat the people back home, the middle-class people, the aged, the heads of families who have no one with whom to split their income, as you would like to have them treated.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. KNUTSON. Mr. Chairman, I yield such time as he may desire to the gentleman from New Jersey [Mr. WOLVERTON].

Mr. WOLVERTON. Mr. Chairman, I rise in support of the pending measure—Knutson tax reduction bill—for the reasons that were so well stated by the gentleman from New York [Mr. REED] when he said that "it is a constructive, sane tax bill."

A careful examination of the provisions of the bill will justify this statement. No attempt has been made to make this bill a political measure.

The plan offered by the President to make a straight $40 cut across the board was open to the charge that it was political and without regard to the fundamental principles upon which a tax bill should be based.

The President's bill was even discarded by the members of his party who serve upon the Ways and Means Committee in not being even mentioned in the minority report. Nothing could more clearly indicate the insufficiency of his plan; and the vote upon this bill when taken today will demonstrate that many serious-minded Democrats have given their support to the Republican measure now before us for consideration.

To draw a tax revenue bill is no easy matter. No bill can be drawn to suit everybody. In fact, there are provisions even in this bill that I think might properly be changed, but taking an over-all view of the whole complicated matter I think the present bill can well be termed "a constructive, sane tax bill," and therefore I give it my support.

This bill, H. R. 4790, provides tax reduction and relief for millions of our people. The present high rate of Federal taxes is a product of wartime conditions. The war has now been over for nearly 3 years. It is time that our people, who have carried the burden of these war taxes so long, should be relieved. The continuance of such high taxes is not only a burden to the individual citizen but is also an obstruction to business and delays that full production that is so necessary if we are to overcome the present inflationary forces and the high cost of living.

Some relief from the present high cost of living is provided by an increase in exemptions under the individual income tax. This relief will be particularly among taxpayers in the low-income class. Such taxpayers also receive preferential treatment in the percentage tax reductions made by this bill. Additional relief in the form of greater exemptions is given to persons 65 years of age and over, and also to the blind.

This bill also equalizes the tax burdens of married couples. It places all married couples, regardless of the State in which they reside, on the same basis as those who have lived in so-called community-property States and who have thereby enjoyed a pronounced preference. It also corrects existing inequalities under the estate and gift taxes, as well as individual income tax.

The changes in the rates and exemptions of the individual income tax under this bill are effective January 1, 1948. The changes in the estate and gift taxes become law on the date of enactment of this bill.

A brief description of the changes provided in the bill is as follows:

First. Personal and dependency exemptions are increased from $500 to $600 per person.

Second. Tax reductions ranging from 30 percent to 10 percent according to the size of the income are provided for all taxpayers. The distribution of these tax reductions is as follows:

(a) Persons with net incomes of $1,000 or less after exemptions receive a 30-percent reduction in their tax.

(b) Persons with net incomes of $1,000 to about $1,400 after exemptions receive a reduction of from 30 percent to 20 percent in their tax.

(c) Persons with net incomes of from about $1,400 to $4,000 after exemptions receive a reduction of 20 percent in their tax.

(d) Persons with net incomes in excess of $4,000 after exemptions receive a reduction of 20 percent on the tax imposed on their first $4,000 of net income after exemptions, and 10 percent on the tax

imposed on any remaining net income after exemptions.

Third. Husbands and wives are permitted to split their income for tax purposes.

Fourth. An additional exemption is granted to taxpayers who are 65 or over. If both husband and wife have attained the age of 65, the $600 exemption is granted to each spouse.

Fifth. An additional $600 exemption is granted to taxpayers who are blind. If both husband and wife are blind, the $600 exemption is granted to each spouse. A blind person 65 or over may claim this exemption in addition to that based on age.

It is said that this bill will reduce the amount received into the Treasury from Federal taxes by over $6,000,000,000. That is probably true. Fortunately, our country is now at the highest peak of national income that it has ever reached. This situation makes it possible to give tax reduction to our citizens, and at the same time have a sufficient surplus to make substantial payments on our national debt. This highly satisfactory state of our fiscal affairs is due in no small measure to the vast reduction in governmental expenses that has come under Republican control during the past year. Thus we are enabled at this time to reduce taxes and at the same time pay off a substantial part of our national debt. It is a record of which every citizen may be proud. It shows that under wise management of our national affairs that even the humblest citizen gains some benefit.

I will close as I commenced, this bill is a constructive, sane tax bill. My vote will be cast for it.

Mr. KNUTSON. Mr. Chairman, I yield such time as he may desire to the gentleman from New York [Mr. JAVITS].

Mr. JAVITS. Mr. Chairman, when the tax-reduction bill was before us in 1947 I supported it because I believed that people in the lower- and moderate-income brackets, now 2 years after the war, must have some tax relief from the wartime tax structure to help them meet the high cost of living—up over 60 percent over 1939. The cost of living has risen materially since then—the spring of 1947—until today food costs for example are up over twice what they were in 1939.

I do not like certain of the features of the bill before us, and I have profound reservations about the aggregate amount by which we can cut our revenue for tax reduction purposes, but the bill before us will get the legislative process going. The need of my constituents for some kind of help to meet the high living costs is so great that I feel as their representative that I must vote for this bill with its imperfections rather than to afford them no help at all at this time.

When the legislative process is complete, I believe it is capable of allowing for a reasonable readjustment of personal income taxes, and adequate revenue for substantial debt reduction and for support of the European recovery program, both of which I consider essential to the future of the country.

I have again surveyed the opinion of the rank-and-file citizens in the various parts of my district as I did on the occasion of the previous tax bill, and consider that this is what they want me to do by an overwhelming majority.

Mr. KNUTSON. Mr. Chairman, I yield 5 minutes to the gentleman from West Virginia [Mr. ELLIS].

Mr. ELLIS. Mr. Chairman, thoughtful men agree that the dangers threatening this country from within are greater than any that threatened us from without.

There is general agreement among thinking men that before we can consider any major expenditures for Europe we must first master the domestic crisis caused by an alarming inflation, coupled with the debt of unprecedented proportions, and a Federal Government the size and cost of which is out of all reason. It has become a Government by professional wasters. This combination creates a situation too grave to exaggerate, yet with determination and intelligent direction it can be successfully dealt with.

However, it is apparent that those now in authority have no understanding of these problems, and it follows that they have no solution. Certainly the President in his address on the state of the Union gave the American people no basis for hoping that he recognized the danger of the situation. His tax and other proposals, if carried to their ultimate conclusion, would lend impetus to the dangerous inflationary spiral and insure continued rise in prices and continued scarcity of commodities.

It is well for us to remember that our American political philosophy after 175 years is still the new, liberal, and revolutionary philosophy in the world today. On its record, it is the best political organization that has ever been developed to promote the well-being of all the people. It recognizes the rights of the individual and is based on promoting the initiative of the millions and not the dictatorship of the few. Under it our country has made great progress in developing social and economic values and in what our forefathers called the pursuit of happiness.

Today that system is threatened from within, not from without. We will not be deceived by being told that the big bogeyman is over the horizon. It is imperative that our domestic crisis be mastered now.

This tax bill is the first step on the road back to a sane fiscal policy. It is an honest and equitable tax-reduction program.

All of us know that there is no tax reduction or tax relief unless the whole Federal tax income is reduced. That is just simple arithmetic and is understandable by any high-school student.

The best recommendation for this tax bill is that the opposition, after 2 months of sleepless nights, have been unable to improve it and their attack and criticism has been anything but impressive.

The budgetary requirements of the Federal Government are the primary factor in the consideration of tax matters, but today we are confronted with a shocking and dangerous situation. In addition to our own budgetary requirements, there is a group in this House maintaining that we should also take into consideration the budgetary requirements of 16 European nations and levy taxes on the American people accordingly. This undertaking is without parallel in all history.

The opposition speaks of additional corporate taxes. There has been no justifiable evidence presented in support of this proposal. They speak of exorbitant profits, yet no Government witness before the committee could point to one single industry that was enjoying exorbitant profits. Certainly there is some profiteering. No industrial nation such as ours could scarcely be without it, yet it is recognized that it is not a major factor in high prices. They recommend that additional taxes be placed on some 22,000 corporations; those with income in excess of $50,000, relieving some 300,000 corporations with income less than $50,000. This in effect is saying the big corporations are profiteers and the smaller corporations do not indulge themselves in exorbitant profits. This arbitrary division is within itself the height of stupidity. Their proposals of additional taxes on corporations ignore the large volume of business done in an inflationary period and the fact that profits have not changed materially in ratio when related to the national income. It omits mentioning that the profit dollar is taxed twice and that the purchasing power of the profit dollar has shrunk by 51 percent while the worker's dollar has diminished 39 percent.

It ignores, moreover, the fact that profit margins or percent per dollar of sales have not varied materially from prewar averages. It overlooks entirely the fact that the book value of capital in terms of the cost of plant or buildings or equipment is low and that any use of "net worth" when applied to 1939 figures will necessarily be wrong today. For the "book value" of capital is not a true picture on which to make measurements of profit.

A locomotive still running today was bought at about $50,000 in prewar days. A new one costs about $150,000. A plant unit to produce an ingot of steel is on the books at a depreciated level of about $50 whereas a new unit would cost close to $200 today.

Plant is wearing out. Machinery must be replaced at present-day costs—not "book value" costs. Where is the capital coming from to replace what is worn out?

After eliminating the inventory profits, which are temporary, and the benefits due to carry-back provisions in the tax laws, corporate profits in 1946 were lower than in 1945. This is the statement recently made by the economic staff of the Legislative Reference Service of the Library of Congress in response to inquiries from the Senate Committee on Labor and Public Welfare.

This bill relieves 7,000,000 persons from any direct Federal taxes. Seventy-one percent of the $6,500,000,000 goes to the men and women in the lower-income bracket. It is a bill to relieve all the people. This bill will give new hope to the American people and confidence to American business. A demoralized and

bankrupt America can make no contribution to a suffering world.

Mr. KNUTSON. Mr. Chairman, I yield such time as he may desire to the gentleman from Michigan [Mr. WOODRUFF.]

Mr. WOODRUFF. Mr. Chairman, unfortunately, it has not been possible for me to be present prior to this time during the debate on the Knutson tax-reduction bill now before us. It was my privilege to sit as a member of the Ways and Means Committee during the hearings on the measure. My vote on reporting the bill to the House was cast in favor of such action. The proposal represents the best judgment of a majority of the committee having had the same under consideration for many weeks.

I take this opportunity to state that I shall vote against the motion to recommit the bill and in favor of the measure on final passage. I am in complete harmony with the others members of the committee who voted to report the bill, and in my opinion the House will approve the judgment of the committee overwhelmingly.

Mr. KNUTSON. Mr. Chairman, I yield such time as he may desire to the gentleman from Kansas [Mr. COLE].

Mr. COLE of Kansas. Mr. Chairman, the tax cut of $6,300,000,000 contemplated by the bill now before the House will not hinder in the least the present program of reducing our $256,000,000,000 public debt by an average of $5,000,000,000 each fiscal year.

We have, during the past few weeks, heard many assertions to the effect that our towering public debt prohibits an over-all tax reduction at this time. Such assertions fly in the face of the plain implications of the present redemption schedule of our national debt. The assertions, moreover, tend to be quite vague in phrasing—they exhort us to reduce the debt by keeping taxes at their present level, but they do not tell us what part of the debt is to be paid, or when the payment is to be made.

All of these pleas to keep taxes at their present level to retire our public debt tend to obscure one important fact; namely, an examination of the redemption schedule of our national debt discloses that 1948 is the best year out of the next 10 in which to reduce taxes.

Seen in this perspective, the current outcry against cutting taxes, lest the cut end debt reduction, is just another aspect of the unceasing and resourceful effort to "tax and tax, spend and spend, and elect and elect" at the expense of the American people.

For the redemption schedule of our public debt is such that a slash in taxes, coupled with a deflation of the hot air which balloons the projected 1949 budget to $39,700,000,000, can produce by June 30, 1949, a cut to the public debt of $247,000,000,000, without relying on wartime tax rates and reckless, inflationary spending.

The same situation will prevail during the 1949 fiscal year, but with different causes. Barring the drastic expedient of merely printing the money as required—and I am sure that not even our confirmed "scientific spenders" want this to happen—the Treasury will have to exchange new securities for the debt which matures during fiscal 1949, because it will simply not have enough money to do otherwise. For example, between September 15 and October 1, 1948, $11,000,000,000 matures in bonds, notes, and certificates. In the best of circumstances this sum cannot be redeemed in full because there could hardly be a surplus exceeding $1,000,000,000, or even half that sum, before December. Until we have administrators who profess, at least, a nodding acquaintance with the idea of a budget which balances at $30,000,000,000, we shall have to defer most of our debt reduction until the second half of the fiscal year, when about three-fifths of the total revenues are gathered. But during this period of fiscal 1949, the only marketable maturities are in short-term notes, certificates, and Treasury bills. Any reductions which result solely from refunding these issues—and I believe they will have to be refunded—will be completely offset by an unavoidable increase resulting from the sale of savings bonds and special issues.

As a matter of fact, the Treasury can, during the coming fiscal year, employ a prospective surplus to best advantage only if it calls for redemption of $1,600,000,000 in 2-percent bonds which are not otherwise payable until fiscal 1951. This amount is about one-third of the surplus in prospect if we pass this tax bill and hold Government spending to the entirely reasonable figure of $36,000,000,000 to assure reduction of the public debt to $247,000,000,000 by June 30, 1949. But it happens to be the administration's only justification for denying a tax cut at this time.

By the testimony of Secretary of the Treasury John W. Snyder before the House Ways and Means Committee, the present tax bill, if it becomes law, will still leave a surplus of $6,000,000,000 for the 1948 fiscal year, of which $1,500,000,000 has already materialized and been used to reduce the public debt. If we add to the remaining surplus of $4,500,000,000 the extra $1,800,000,000 which the Treasury expects to secure before June 30 from the sale of savings bonds to individuals and special issues of Government agencies, and the $1,000,000,000 available from the present Treasury cash balance, we will have $7,300,000,000 on hand before June 30 with which to slash the marketable debt in the hands of the public.

What will happen to all this money?

Most of it, or $5,400,000,000, ought to redeem the three marketable bond issues which can be paid off on March 15 and June 15 of this year.

About $1,250,000,000 may be paid on the 1-year, low-interest certificates of indebtedness which mature in February, March, April, and June.

A small amount may be paid to reduce the $15,000,000,000 now outstanding in Treasury bills; but since nearly all of these 90-day securities are now owned by the Federal Reserve System, which returns as taxes nine-tenths of the interest paid to it by the Treasury, a substantial reduction of this type of debt would cost more than it is worth.

All told, the debt this fiscal year could be reduced to $252,000,000,000 after the current tax bill becomes law. In his budget message President Truman projected a reduction to $251,000,000,000. The difference, I contend, is so slight as to compel a tax slash at this time.

At best, it is a picayune justification. At worst, it is an artful dodge. It is a dodge which obscures the fact that the coming fiscal year offers the lowest bond-redemption totals possible before 1956. Tax reduction in 1948 is challenged by only $2,000,000,000 worth of marketable bonds which can be paid off during the 1949 fiscal year. During the 1950 fiscal year, tax reduction will be challenged by $7,600,000,000 in redeemable, marketable bonds. The total of such bonds during the 1951 fiscal year is $10,400,000,000. For fiscal 1952, the total is $18,700,000,000; and for fiscal 1953, $9,400,000,000. The possible redemptions of $681,000,000 in fiscal 1954 and $2,611,000,000 in fiscal 1955 will be complicated by the maturing of many billions of dollars' worth of war-bought savings bonds. Not until fiscal 1956, with only $1,449,000,000 in long-term marketable bonds then eligible for redemption, will there be as favorable an opportunity for tax reduction as we have at this moment.

This, then, is the blunt truth: If we fail to cut taxes now, the structure and demands of our public debt may force Americans to wait a decade for tax relief.

Mr. RAYBURN. Mr. Chairman, I ask unanimous consent that all Members of the House who desire to do so may extend their remarks on the pending bill at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. LANHAM. Mr. Chairman, I am opposed to the Knutson tax-reduction bill, and shall vote against it. My decision has been reached after careful consideration of the bill and its effects upon our economy. I know that tax reduction is a thing to be desired when it can be had without danger to our economy and national welfare. But desirable as is tax reduction, it is my opinion that tax revision should precede a blind tax reduction as provided in the Knutson bill.

There are many inequities in our tax structure and there are many excise taxes that are burdensome to those of our people who are least able to bear the burden. I refer to the excise taxes on leather goods, telephone and telegraph messages, cosmetics, and upon the transportation of persons and goods. The war rates on these and other items and classifications are still in existence. To me it seems incontrovertible that these wartime rates at least should be removed before there is any reduction in the income tax. And should not the double taxation imposed by taxing the income of corporations and the dividends when distributed to the stockholder be removed before there is a general reduction in income taxes? If the Knutson bill is passed it will reduce the Government's income to such a point that the reductions inherent in tax revision will

not be possible. For this reason alone, I would oppose the Knutson bill, if for no other.

But there are more compelling reasons than this for my opposition. In the first place, it will reduce the Government's income by some $7,000,000,000. This will wipe out the expected surplus of revenue over expenditures for the next fiscal year, and put us in the red. What will those who come after us think of us if we do this foolish thing, and leave nothing to apply upon our huge national debt? As we found in our efforts to reduce the budget last year, it is impossible to make any substantial reduction in our budget so long as the threat of Russian aggression hangs over us, and so long as it is necessary for us to spend large sums in Europe and Asia for our own protection, and still larger sums to maintain our armed strength in the face of the many threats to our very existence as a free people.

To vote for the Knutson bill or any sizable tax cut is unthinkable until we know what our expenditures and incomes will be for the coming fiscal year. I believe it cannot be successfully maintained that there ought to be a tax cut instead of the application of all our surplus funds on the national debt. It hangs like the sword of Damocles over our economy and the stability of our fiscal system. It must be reduced, and there is but one way to reduce it, and that is to apply the surplus of the Federal revenue over our expenditures each year until it is greatly reduced.

In the next place, the tax reduction proposed by the Knutson bill is most inflationary. Its proponents have gone so far as to say that it will help to curb inflation. Those who make this statement are either careless of the truth or are badly misled by the powerful forces who are selfishly demanding this tax cut. No recognized economist has made any such statement about the effects of this huge tax cut. On the contrary, the conservative United States News, edited by David Lawrence, has stated repeatedly that the Knutson bill would add much to the flames of inflation which are sweeping our economy toward the destruction of a depression. That grand old man, Bernard Baruch, has warned us that there should be no tax cuts for 2 years, and that all our surplus revenue should be used to reduce the national debt, especially by using it to retire short-term loans held by the banks, thus reducing the basis for credit. A sound economy demands the reduction of the short-term loans held by the banks, and a regular and sizable yearly cut in the over-all debt.

Last, but not least, I am opposed to the Knutson bill, because it does not give sufficient tax relief to the very people who need it most—the people of the low-income group. Actually we are taxing some of our citizens—unmarried persons—who are making less than $50 a month. They are the people who ought to get the most benefits from any tax reduction that we can afford.

For all these reasons I shall vote against the Knutson bill and shall vote to send it back to the Committee on Ways and Means, with instructions to bring in a bill that will provide for the raising of the exemption from $500 to $700; that will provide the extension of the privilege of dividing income between husband and wife now given in the community-property States to the married people of all our States. I will vote for this tax reduction for these two classes of individuals only because the instructions to the committee will include also the imposition of an excess-profits tax to make up for the loss of revenue entailed by the other provisions of the motion.

I know the sound proposals of the motion to recommit will be voted down, and the Knutson bill will be passed. It is discouraging to see the party in power bow to the wishes of the people with large incomes, who are selfishly or ignorantly demanding this large tax cut which endangers the fiscal soundness of our economy. It is tragic that we do not have the courage, even in a Presidential election year, to discipline ourselves as recommended by Mr. Baruch and others so as to prevent the impending catastrophe of depression and unemployment that will come inevitably unless we check the deadly spiral of inflation that has us in its grip.

Mr. THOMPSON. Mr. Chairman, I came to the present session of Congress thoroughly committed to, and in favor of, reduction of income tax. My people want it, and I want it myself. I am willing to go to any reasonable lengths to accomplish it. Letters from my constituents indicate very clearly that they expect me to support some form of income-tax reduction.

A very few have suggested that taxes should be reduced even without regard to the national debt. For the most part, however, those who have advised me have stressed their concern over the national debt and have in effect taken it for granted that I would protect their interests and the interests of every holder of Government securities.

I have listened to the argument, over the several days of debate, on the Knutson bill. I am convinced that it is not a sincerely drawn measure and that the Republican majority knows perfectly well that it can never become a law. I cannot believe that the conservative men on the other side of the House would, under any conditions, endanger the national credit and take such an unsound step as that which was so ably characterized by the gentleman from Tennessee [Mr. COOPER] as "borrowing money to reduce taxes."

I shall vote against the measure although presumably it is going to pass the House. I hope that the Senate will modify it along lines of good government and good business, and that when it returns to our body for final action it will be in such shape that I can vote for it without apology.

Mr. GRANT of Alabama. Mr. Chairman, I am going to vote to recommit this tax bill to the Ways and Means Committee with instructions to report out a more equitable bill.

I wish it were possible to submit amendments to the present bill that we have under consideration; however, I know that under the rule we are not permitted to do so. I appreciate the fact that a tax bill is highly technical and that it requires a lot of effort and time in perfecting it and that, ordinarily, it would be a mistake to attempt to write such a bill on the floor. Therefore, I do not criticize the Rules Committee for disallowing amendments as it is following the precedent that we Democrats have used for many years. The Republicans say for us to take this bill or leave it.

Last year I voted on two occasions against the Republican-sponsored tax bill and also voted to uphold the President's veto which, as you will recall, was upheld by the House. However, the present bill gives additional relief to married couples and to low-income groups.

Personally, I feel that the bill should not be brought up at this time, but that we should have sufficient time in which to ascertain if the budget is to be reduced and in what amount.

The chairman of the Appropriations Committee, who has a large voice in the cutting of the budget, states that it will be cut in an amount sufficient to justify the present tax bill. While I am sure that he is sincere in his statement, we must recall that this was not done last year. Be that as it may, the time has arrived for a reduction in taxes. I do not believe that many Members would today stand upon this floor and argue that there should not be some reduction.

I have long felt that the present law allowing community family income splitting was neither fair nor just. Married couples in about 12 community-property States may equally divide their total community income regardless of whether such income is property or earned income. Married couples in non-community-property States with earned income cannot split such income resulting in greatly increased income taxes when compared with married couples in community-property States. I am surprised that some of our colleagues from the community-property States argue that the benefits that they enjoy should not, by Federal legislation, be extended to cover all other States. The answer is given that States like Alabama should themselves change the law. However, a citizen of my State should not be penalized by his Federal Government simply because his State fails to pass such legislation. Several bills have been introduced allowing citizens of non-community-property States the same privileges as those enjoyed by the community-property States. However, we all know that the present leadership is not going to allow these bills to be favorably reported by the Ways and Means Committee. Therefore, we might as well be realistic. If the motion to recommit this bill is defeated, the only way by which we will be able to rectify this tragic mistake will be to vote for the bill upon final passage. While this provision of the bill will give little relief to the low-income groups, they must be given proportionate tax cuts by increasing their exemption. The taxpayers of my State are entitled to the same justice, under the law, and in order to get this justice, I am willing to vote for this bill if it become necessary and send it on to the Senate for action.

It is a foregone conclusion that the Senate is not going to take up this bill any time within the immediate future. They are going to wait and see what amount we will be able to cut in the budget. I firmly believe that when this bill gets to the Senate that it will be modified and that we will again be given an opportunity to vote upon it.

The theory has been advanced by some that taxes should not be reduced at this time because it would be inflationary. Even if this be true, I cannot subscribe to such a philosophy. Taxes should be levied for the purposes of revenue only. The people are carrying a heavy load of taxation. Other means should be found for the combating of inflation. People in the low-income groups are finding it hard to buy the necessities of life. They should and must be given some relief. We have several bills increasing salaries of Government workers and salaries and wages of workers in some industries have been raised. These are justified. However, there are thousands of people who have received no salary raise and doubtless will not do so. Their lot is a hard one. It is difficult for them to raise the money to pay income taxes. The only way to give them a raise in pay is to pass a tax bill. I am pleased that a motion to recommit will be offered by the Democrats. This substitute tax program will give the sum of $200 additional exemption for each taxpayer, raising the present exemption from $500 to $700.

Individual exemptions should be raised. The present bill we have before us does this and the motion to recommit will also raise the individual exemptions.

We must not do anything that would threaten the solvency of our Government. There must be something left to pay on the debt. No one knows what the future holds. We must admit that the budget will necessarily have to be reduced to warrant the present tax bill. There are certain set expenditures which cannot be cut very much. Our national defense must be maintained and this necessarily means a large outlay of money. The disabled veterans of all wars must be properly cared for and we have commitments for education and training which must be carried out. The interest upon the public debt must be paid. We have experienced the most expensive war in history and we cannot look to posterity to pay for all of this expense.

I would like to see something in between the present bill and the substitute, something on the order of the suggestion made by the gentleman from North Carolina [Mr. DOUGHTON], who is the ranking minority member and former chairman of the Ways and Means Committee. I believe that we could reduce taxes by three to four billion dollars. Other countries have since the war reduced income taxes, among them being England and Canada. Even some of the countries that come under the Marshall plan have reduced them.

There are many objections that I could raise to the bill that we have under consideration. However, it is here and something must be done with it. Not being willing to go all out for the present bill and seeing the necessity for some relief, I am supporting the Democratic recommittal motion and if it should fail of adoption, I shall vote for the bill.

Mr. ANGELL. Mr. Chairman, one of the most important bills we will consider in the Eightieth Congress is this tax bill, H. R. 4790, because it affects the welfare of every American citizen. The Government has no way to carry forward its activities except through the medium of taxation. We have long been taught that the power to tax is the power to destroy. We also know that the power to spend is the power to destroy.

We have the largest tax burden in all of our peacetime history. In fact, we are still laboring under the high war taxes which were imposed when this Nation was in the throes of a world war, and we had to take heroic means to beat back the attacks upon us and upon our civilization. Crushing taxes, as well as all other emergency measures under such circumstances, are justified, but now that the war is over and it is 2½ years behind us, and we are in a peacetime regime, there is no sound reason why this wartime tax load should not be reduced with the major reductions on the low-income taxpayers. We all know that the more money the bureaucratic spenders have available, the more they will waste and dissipate.

I propose to support this bill, H. R. 4790. Under it all of the 55,000,000 taxpayers will receive a reduction; about 7,400,000 removed from individual income tax entirely. Of the total reduction, about 72 percent will go to taxpayers with incomes under $5,000, and only 28 percent to taxpayers with incomes over $5,000. Low-income taxpayers will receive a 30-percent cut and the big payers only 10 percent, graduated down to 20 percent in the middle brackets. Each taxpayer will receive an additional $100 exemption for himself and each dependent. Blind taxpayers will receive further benefits, and it is estimated 77,560 blind persons in Oregon, my State, will be relieved from any income-tax payment. Aged persons over 65 will also receive an additional $500 exemption.

Tax legislation must originate in the House. It is necessary for the House to get this legislation to the Senate without delay for its consideration. When the bill comes back to the House, we will be able, at that time, to adjust errors and lower the total reduction, if found necessary after the budget is agreed upon.

We all want to balance the budget and keep our financial structure sound, to care for our aged, to provide for veterans' needs, to service the national debt, including a substantial annual payment for its reduction, and to fulfill our just obligations in giving aid to our neighbor nations overseas, crushed by the war.

No one can say that we have not fulfilled our duty on foreign aid thus far. We have expended overseas, since the war ended, over $24,000,000,000 for civilian aid. Reports that come to us here in the Congress from our committees and representatives who have canvassed postwar conditions in foreign countries, are to the effect that many of our American tax dollars have been flagrantly dissipated, and poured down "rat holes" with little or no actual aid or relief to the stricken peoples on the lower-income levels or destitute who are in dire need of immediate help to prevent starvation. Our foreign-aid program has been shamefully administered and much of the money provided for this program has gone to corrupt politicians, designing civilians and military officials, and others who want to profit from the largess of America without themselves making any contribution by their own self-help to the welfare of their fellow citizens. Whatever we do in the way of relief for the war-stricken nations should be to help them to help themselves, and must be hedged about by administrative controls that will make certain that every dollar expended will bring a full dollar's worth of value in relief and rehabilitation to the needy recipients of the gifts from our own people. In giving aid, we must not undermine our own financial structure.

America alone cannot save the world. We are a nation of 140,000,000 persons. The world's population is around 2,250,000,000. We are about one-sixteenth of all mankind. We produce about one-eighth of the world's food supply. Europe has some 350,000,000 persons. There are about 275,000,000 in the 16 countries and that part of Germany included in the European Recovery Plan. The Chinese and others also want to share in our bounty. Some contend Uncle Sam can do the job alone. We are facing this great undertaking, the Marshall plan, with the widespread assumption at home and abroad the job can be done with Uncle Sam footing most of the bills.

WHY NOT A MARSHALL PLAN FOR THE AGED OF AMERICA?

Mr. Chairman, in connection with this tax bill, H. R. 4790, which has for its purpose the lessening of the tax load upon the American taxpayer, it is appropriate to call attention to another obligation of our country which must be financed by taxes. I refer to the inexcusable failure of the Congress to make adequate provision for the aged of America. I pose the question, "Why not a Marshall plan for the aged of America?" While we are considering tax measures and the Marshall plan for Europe, is it not time to adopt a Marshall plan for the old folks of this Nation? The proposal of the Administration is to spend some $17,000,000,000 in aid to European countries under the Marshall plan in the next 4 or 5 years, with an allocation of $6,800,000,000 for the ensuing 15 months. This is in addition to the twenty-four billions that have already been expended for European aid since the war ended. I call attention to the fact that much of this huge expenditure will be made available for the needy of the European countries, including the aged. I maintain it is a decent thing to do, while we are expending such huge sums for foreign aid, to have a Marshall plan for our own old folks in America and give them some help in their distress. The Congress for years has been considering legislation for security for its elderly citizens. Throughout my legislative service here, covering some 9 years, I have urged that the Congress adopt a Federal

old-age program which will do justice to the old folks of America.

On the opening day of the Eightieth Congress, I introduced H. R. 16, which is a bill providing benefits to the aged and the totally disabled. This bill does not provide any fixed monthly annuity for the recipients, but it does provide for a tax and the total amount raised thereby will be prorated monthly among those entitled to take under the bill. The experts of the Congress on fiscal affairs and tax legislation should determine the tax formula necessary so that the bill, when enacted, shall provide an adequate annuity to maintain these old folks in decency and health. It would lie within the province of the Congress to change the tax from time to time as conditions warranted. This bill has been gathering dust in the pigeon holes of the Ways and Means Committee. Before we adjourned at the special session, I urged that every Member of the House interested in the welfare of our old folks, sign a discharge petition which I placed on the Clerk's desk. The Christmas season was then approaching and it seemed appropriate as an evidence of good will and sincere interest in the welfare of these old folks that we sign this petition and bring this bill on the floor for consideration. One hundred and forty Members have signed the petition. When two hundred and eighteen Members sign, the bill will come to the floor under an open rule and will be subject to any germane amendment, and the House will be able to work its will and to adopt any amendments it desires in order to make the bill acceptable to the majority of our Members. The exact terminology and provisions of this bill are not the important consideration, but it is important to enact some legislation making adequate provision for our old folks, with an assurance that they will have an ample monthly income during their old age to permit them to secure the necessary medical care, food, clothing, and shelter to protect them from want, hunger, and cold.

The existing social-security law for the aged is an ineffective gesture. Under it, as shown by the reports from the Social Security Agency, the payments the aged are receiving for old-age assistance through the States of the Union, average from $16.92 a month in the lowest State, to $64.95 in the highest, as shown for the month of November 1947, with a national average of $36.91. Truly, such allowances to cover food, clothing, medical care and shelter, represent a starvation program. As was recently pointed out by the Administrator, in some areas contributions by the State and Federal Governments are not enough to enable people to maintain an adequate diet and they are literally suffering slow starvation.

The United States Public Health Service recently reported the results of a long-range survey which shows that about 35 persons per 1,000 have some chronic illness or major physical disability. A gradual increase takes place to a rate of about 100 cases per 1,000 at 45. From this point on the curve goes up very rapidly. There are nearly 250 chronically ill per 1,000 at 60. In the next 10 years the rate goes up to 400 per 1,000. At 80 more than half of the group needs the regular care of a physician, and at 90 the rate is more than 900 per 1,000.

The critical problem facing our old folks in their endeavor to maintain a bare existence is tragically intensified by the high cost of food and other necessities of life in this inflationary period in which we find ourselves. The Bureau of Agricultural Economics has recently announced that the cost of food bought by the average American family increased 25 percent in 1947 over 1946. Dorothy Bovee, Red Cross nutritionist, reports that the cost of a minimum adequate diet for a family of two in the Washington area at this time, is at least $11.60 weekly, and she lists the items which make up this minimum diet for two adult persons for 1 week, as follows:

Food and amount:	Cost
Whole milk, 7 quarts	$1.47
White potatoes, 10 pounds	.46
Peanut butter, 4 ounces	.09
Baked beans, 14-ounce can	.15
Oranges, 6 medium-sized	.12
Tomatoes, 1 No. 2 can	.16
Tomato juice, 1 No. 2 can	.10
Cabbage, 1-pound head	.06
Spinach or kale, 1 pound	.25
Corn, 1 No. 1 can	.17
Green pepper, 1	.03
Carrots, 2 bunches	.17
Lettuce, 1 head	.13
Celery, 1 stalk	.19
Onions, 1 pound	.12
Banana, 1	.07
Apples, 2 pounds	.19
Pears, 2 pounds	.20
Applesauce, 1 can	.14
Raisins, ½ pound	.10
Prunes, 1 pound	.19
Eggs, 1½ dozen	.93
Cottage cheese, 1 pound	.23
American cream cheese, ¼ pound	.15
Hamburger, 1 pound	.43
Beef liver, ½ pound	.30
Fresh lean pork, ½ pound	.26
Pork butts, ¼ pound	.17
Scrapple	.24
Dried beef, ¼ pound	.33
Fish, 1 pound	.29
Beef stew meat, ½ pound	.22
Bread, 7 loaves	.98
Rice, 1 pound	.22
Rolled oats, ½ pound	.07
Farina, ½ pound	.10
Flour, ¼ pound	.03
Macaroni, 4 ounces	.06
Margarine, 1 pound	.45
Lard, ½ pound	.15
Salad dressing, 1 jar	.23
Sugar, 2 pounds	.18
Cookies, 1 box	.18
Jelly or apple butter, ¾ pound	.25
Coffee, 1 pound	.49
Total	11.60

We all know old-age annuitants with their meager income would not be able to buy this diet, but would be limited to the essential staples only, eliminating the fresh fruit, canned goods, and fancy items. For them it would be a luxury diet.

In contrast to the foregoing minimum fare which old-age annuitants are unable to buy with their limited allotments, is the menu of a dinner recently given in the Statler Hotel here in Washington to 100 guests by Mr. Charles Luckman, who headed the President's meatless-eggless-days program. Here is the menu: Shrimp cocktail, fried oysters, crabs, shrimp and lobster gumbo, curried chicken, roast turkey, baked ham, roast beef, string beans au gratin, fried apple rings, pickled walnuts, celery, olives, rye rolls, assorted finger rolls, ice cream, and coffee. Mr. Luckman's job was to conserve food for hungry Americans.

Mr. Chairman, how can an old person who must maintain himself on old-age assistance, according to the plan provided in the present social security setup, meet his expenses, not only for food but for all other necessities, on an average monthly payment of $36.91? Is there any valid reason why this Eightieth Congress should not give the right-of-way and green light to legislation for old-age assistance while we are opening the Treasury doors wide for European relief?

We have been concerned in the Congress about the rising cost of living, the inflation spiral, and the added burden placed upon the millions of our workers and the low-income groups who must pay these increased prices for food, clothing, and shelter. Cognizant of these difficulties, the Congress has increased substantially the income of some groups of our citizens, but it has given the old people no consideration. Their meager monthly average of $36.91 remains the same, while the simple fare they must provide to keep body and soul together has risen in price by leaps and bounds. Many annuitants receive much less than the average $36.91. The miserable pittance they were receiving was wholly insufficient to care for their modest needs before the advent of high living costs.

According to statistics I received some time before the war with respect to the annuitants under the insurance provision of the Social Security Act, 252,000 past 65 years of age received an average of $23 a month; 74,000 wives of these pensioners 65 or over received an average of $12.25 a month; widows over 65, totaling 25,000, received only $20.16 a month; 28,000 parents received $13 a month; widows under 65, of whom there were 55,000, received $19.50 a month; and 159,000 children under 18 received $12.21. Of all persons 60 years of age or over, four-fifths received less than a minimum for decency and health. Before our entry into the war, it was estimated that of the persons 60 years of age and over in the United States, 54.9 percent were supported wholly or partially by public or private social agencies or were dependent on children, relatives, or friends for their subsistence and care. A considerable proportion of the remainder received part or all of their support from various pension systems—Federal, State, and municipal, industrial or private.

At the beginning of the year 1946, nearly half of all civilian jobs were excluded from coverage under the Social Security program, and nearly 2 in 5 of all persons employed were neither fully nor currently insured. At best the social-security law we now have is a haphazard program which, in effect, is largely financed by the public generally, but the benefits of which are shared in

by only a few selected groups. It encourages inflation by collecting a huge fund currently used for deficit spending. These difficulties would be overcome by the adoption of H. R. 16, which would cover all citizens falling within its provisions, and the obligations and benefits of the program would likewise be shared by all. It would be all-inclusive in its provisions and therefore would obviate the necessity of continuing many social-security laws now in existence and would, for the first time, set up in our country a Federal old-age-security program which would insure all of our elderly citizens 60 years of age or over against the hazards of old age. It would build up no reservoir for deficit spending, but the moneys collected would go back into the channels of trade each month, providing local markets for American production and buying power for aged citizens.

On December 31, 1947, there had been paid into the Social Security fund approximately $10,524,681,961.55, and only $1,772,431,249.69 paid out to beneficiaries; the balance was spent by the Government for general governmental purposes.

Mr. Chairman, we in the Congress are engaged in a great adventure in human welfare. We are charged with the responsibility of planning and building for 140,000,000 Americans a social, economic and cultural structure which will assure their welfare. If we omit from our plans the care and protection of the millions of aged citizens who are in want, we will build in vain. We will build a tower of Babel. We must not reject the guiding hand of Providence in our plans; we need spiritual understanding as well as political wisdom. As Benjamin Franklin said to the Constitutional Convention when the great charter of our liberties was drafted:

> We have been assured, sir, in the Sacred Writings, that "except the Lord build the house, they labor in vain that build it," I firmly believe this; and I also believe that without His concurring aid we shall succeed in this political building no better than the builders of Babel; we shall be divided by our little, partial, local interests, our project will be confounded, and we ourselves shall become a reproach and a byword down to future ages. And, what is worse, mankind may hereafter, from this unfortunate instance, despair of establishing government by human wisdom and leave it to chance, war, conquest.

Daniel Webster, one of our eminent predecessors, said:

> Let us develop the resources of our land, call forth its powers, build up its institutions, promote all its great interests, and see whether we also in our day and generation may not perform something worthy to be remembered.

We should not be unmindful of the fact that these senior citizens were the workers of yesterday. They helped build our cities, our roads, our industries and helped to clear our lands. They were the trail blazers, the pioneers. They built for us. Now that they are old, we cannot pass them by. They do not seek our charity. They only ask simple justice—a modest share in the fruits of American industry, to the production of which their labors in the past have contributed.

Let us prove to the whole world that these aged American citizens are entitled to and shall have vouchsafed to them by their country, "life, liberty, and the pursuit of happiness." Let us prove that humanity is still on the march here in America by enacting an old-age-annuity plan that will provide for our old people an annuity sufficient to maintain them in decency and health.

I most sincerely urge you, my colleagues, to join us in petition No. 7 to bring the old-age-security legislation on the floor of this House at an early date, so that it may be enacted into law before this Congress ends, thereby putting America on record as willing to provide reasonable old-age security for our own elderly citizens while we are spending billions overseas for similar purposes.

Mr. MADDEN. Mr. Chairman, the majority members of the Ways and Means Committee of the House reported out H. R. 4790 in order to save face by reason of a wild promise made to the American people in the last congressional campaign that the Republican Party would slash Federal taxes by billions of dollars. One year ago this month the Republican leadership of the House promised to reduce the cost of Government by $6,000,000,000. At the same time the other body was more conservative and promised the people that the cost of Government would only be reduced $4,500,000,000. The House Democratic leadership, at that time, stated that it was a rash promise merely to mislead the public into believing that they were carrying out their campaign promise to reduce the cost of government. When the first session of the Eightieth Congress adjourned in December, the facts revealed that the Republican leadership misled the American people on its reduction of the cost-of-government figure by over $5,500,000,000. The so-called Knutson tax bill, if passed in its present form, simply means that the Government will be compelled to borrow money to reduce taxes. The Members of this House almost unanimously voted for the billions of dollars that were spent to win the greatest war in all history. We have a debt of $257,000,000,000. We now have the greatest income in our history. The taxpayer in the higher brackets was never more prosperous than now. If we could eliminate the high cost of living, we could say the same for the group in the lower brackets. Now is the time to pay a substantial sum upon our war debt and not pass it on to the future and compel the veterans of World War II who fought the war to also assume the double burden of paying for the war. The sponsors of this tax bill are making misleading statements and double-talk about cutting President Truman's budget in order to save sufficient money to pay on our national debt. They failed to remind the Members that the President already reduced the budget which the various departments originally submitted by over $7,000,000,000. I have heard Members on the majority side compare the high governmental expenditures today with 10 years ago. These comparisons are misleading, and to the average citizen are startling if he is not acquainted with the real facts. The average citizen does not know that in the President's budget five items account for 79 percent of the budget.

One of the greatest speeches made on the floor of this House was delivered last Thursday by the gentleman from Tennessee [Mr. COOPER] the second ranking minority member of the Ways and Means Committee. Mr. Cooper, in that speech, set out some factual figures which I am again going to call to the attention of the House. In breaking down the five items which take up 79 percent of the budget, we have the following:

The first item of the five is national defense. In the fiscal year 1948, the budget provided $10,746,000,000. In 1949, the figure is $11,026,000,000. Ten years ago in 1939 it was $1,074,000,000.

The next item is international affairs. That includes the United Nations, the Marshall plan and programs of that type.

In 1948 the budget provided $5,533,000,000 for this item. In 1949 it provided $7,009,000,000. Ten years ago in 1939, that item was $19,000,000.

The third of the five items is veterans affairs. In 1948 the budget provided $6,632,000,000. In 1949 the budget provides $6,102,000,000. In 1939 it was $559,000,000, substantially half a billion dollars 10 years ago, and now it is more than $6,000,000,000.

The fourth item is interest. In the 1948 fiscal year this item was $5,200,000,000. In 1949, it is $5,250,000,000. Ten years ago, in 1939, it was $941,000,000.

The last of these five items is tax refunds. In 1948 it was $2,049,000,000. In 1949 it is $1,990,000,000. Ten years ago in 1939 it was $68,000,000.

Those five items cover substantially four-fifths of the budget for the next fiscal year 1949. I submit to you, as a practical proposition, how are you going to substantially reduce any one of those five items?

I have not heard any of the respective Members on the majority side advocate any reduction in appropriations for national defense, veterans affairs or interest on the national debt or tax refund. If they insist on a substantial reduction on the international affairs item in the budget, it will necessarily mean an increase in our national defense items. Eliminating these five items, this reduction of six billion must come out of the remaining 21 percent of the President's budget. If the Republican leadership of this House follows their pattern of last year, they will not cut very much from this 21 percent, because in so doing they will encroach upon the veterans' hospital program, flood control, reclamation, aid to State governments, road building and other necessary improvement projects which the people of the various sections of the country will insist on. An example of the House leadership's action on just one item in the last session will convince the American people that they are merely talking for votes. I will mention briefly this example:

Last year, in their frantic effort to reduce the President's budget, they cut his request of $29,000,000 for reclamation

by almost one-half. When Congress adjourned in July, so much protest came from the communities back home that when they returned during the special session, the House leadership not only reinstated the reclamation reduction, but raised the President's original request from $29,000,000 to over $31,000,000. Possibly the Republican leadership is planning on repeating this legislative trickery in 1948 so that the voters next November will not know the true facts on tax and cost of Government reduction.

I am in favor of every possible reduction of taxes if it can be given to the group in the brackets which need it most. I am in favor of the tax-reduction bill submitted by the gentleman from Texas, Minority Leader RAYBURN, which will be offered at the close of this debate. That bill will raise the exemption from five hundred to seven hundred dollars and give 10,000,000 of the low-bracket taxpayers throughout the country a concession so that it will ease the burdensome high cost of living. Mr. RAYBURN's proposal will retain the community-property exemption. It also provides a partial restoration of the excess-profits tax which was repealed 2 years ago when everybody feared we were going to have six to eight million unemployed in the United States. When President Truman, in his state of the Union message, stated that corporate profits increased in 1946—1 year—from $12,000,000,000 to $17,000,000,000, I firmly think that some of these fantastic profits can be applied on our national debt.

I propose to vote for the motion to recommit so that we can get a real tax-reduction bill for the people least able to pay, and if that is defeated, I will vote against the so-called Knutson tax-reduction legislation which will be a windfall for the persons in the high brackets.

Mr. DURHAM. Mr. Chairman, I believe that for the past 2 years, since the end of the war, the American taxpayer has been expecting and should have some tax relief. I supported the tax measure in the last session of Congress and expect to support a tax measure this session. In the first session of the Eightieth Congress the Republican Party brought out a tax bill before a single appropriation measure had been before us. At this session they are following the same procedure as they did last year. Not a single appropriation measure has been passed by the House this session. Today this bill, in my opinion, is premature. In the first session of the Eightieth Congress I voted against the tax proposal when it was first brought out and today I am opposed to this tax measure for the same reason—that is because it is being brought out before any appropriations are made. The tax bill of the first session of the Eightieth Congress went to the Senate after we had passed the majority of appropriation bills and we knew at that time what our income was and also what our expenditures were going to be. When it came back to the House I supported that measure and after the President had vetoed it I voted to override the President's veto. The income for the fiscal year 1947–48 is running at an estimated $47,000,000,000 or more. I do not believe that the majority party expects or even thinks that this measure before us today will be adopted. I want my Government to remain in a sound position and do not desire to see the dollar value further reduced. I also want to support a tax bill that will provide for a reasonable amount to be applied on our national debt. For a long time I have been in favor of the community-property tax provision. I also desire to support a tax bill that will give some relief to the low-income groups and I would like to support a tax bill that will give the people a reduction in taxes of around $4,500,000,000. I believe that the American taxpayers are expecting that much of us and I believe that we can accomplish that amount of tax reduction and remain in a sound position. I am hopeful that the Senate will do a better job on the tax measure than was done on the bill facing us today. The foreign situation today is still serious, in my opinion, and certainly no sound-thinking American desires or wants to jeopardize our national defense. We must stay in a strong position if we expect to remain a free people. When we balanced the budget for the fiscal year 1946–47 we placed ourselves in a much sounder position. I do not believe in deficit spending. I am fearful that this measure before us today will jeopardize a balanced budget before we have determined our expenditures for the fiscal year 1948–49.

Mr. HUBER. Mr. Chairman, within a few hours this House will in all probability approve a tax bill reducing taxes by several billion dollars. How much better it would be to continue the present tax rate and appropriate several billions to attack the ills that beset mankind.

Mr. Chairman, Members of the Eightieth Congress within reach of my voice and loved ones of their families are destined to die of the searing ravages of tortuous cancer. Heart disease, infantile paralysis, diabetes, and other killing and crippling diseases will also take their toll. What a fine opportunity this would be for the Nation that spent over $200,000,000,000 to maim and kill during the war, and $2,000,000,000 for the atomic bomb alone, to say, "Now we shall dedicate ourselves to saving life. We shall forego tax reductions and create the greatest scientific and research group the world has ever known to seek out and eradicate the maladies that have brought hideous and painful death to our fellow men and crippled and killed our children."

Mr. Chairman, I know that if Members of Congress are willing to pass up the substantial savings they would enjoy under this tax bill, those in the lower-income brackets, who suffer most from disease and pestilence, would gladly spurn the few paltry dollars they would receive. They would have the satisfaction of knowing that those in the extreme high brackets would also be making a substantial contribution to the eradication of the greatest curses visited on mankind.

Mr. DOUGHTON. Mr. Chairman, I yield the remainder of my time to the gentleman from Texas [Mr. RAYBURN].

Mr. RAYBURN. Mr. Chairman, there is very little I can do in 13 minutes except to express briefly my opinion of the pending legislation and give you in a brief way my conception of some of the things that should be done at this time in the way of rearrangement or reduction of taxes.

I quite agree with the statement made the other day by the gentleman from Tennessee [Mr. COOPER], after discussing the provisions of this bill and laying down figures that no one has denied, that this bill should be entitled "A bill to reduce taxes and borrow money," because that is what we shall be compelled to do if this bill becomes law, for the bill, if it means anything, means that the Government of the United States will be in the red. The most optimistic figures of those who are supporting this bill are that we shall have a surplus of $500,000,000. Of course, they express the optimistic hope that the President's budget will be reduced two or three billion dollars. A majority of the House around this time last year made the case that they were going to reduce the President's budget by $6,000,000,000. The other body in their enthusiasm said $4,500,000,000. We know the result. The actual result was a reduction of a little more than one-twelfth of that amount.

It has always been my idea that the prudent man should pay his debts when he has the money. We owe in the neighborhood of $256,500,000,000. These gentlemen with the $500,000,000 surplus propound the sound doctrine that they want a balanced budget and to pay a reasonable sum on the public debt. If we do not pay a reasonable amount—I would rather say a large amount—on the debt in 1949, 1950, 1951, and 1952, something might come along to check the economy of this country until our income would not justify and we could not support the other functions of Government and pay one dime on our national debt, as was so well stated by the gentleman from Massachusetts [Mr. MCCORMACK].

I had inserted in the RECORD the other day a statement prepared by the gentleman from Virginia [Mr. GARY] that shows that after the last war bonds went to 80 cents on the dollar. Our national debt at that time was $26,000,000,000, what we had spent in the war and loaned our allies. Of course, that did not break all the banks and all the insurance companies, because they were not holding too much of this amount, but what would be the condition of the commercial banks of the United States under present conditions? The Federal Reserve banks hold $22,000,000,000 of these bonds. The commercial banks hold $69,000,000,000 of them. Do you think they could lose 20 cents on the dollar or 10 cents on the dollar and be solvent banks?

Do you think the insurance companies owning more than $20,000,000,000 of these bonds could be sound and yet lose 20 cents on the dollar? I know this, and I repeat it, that if something disturbs our economy and we do not have this great national income to pay taxes upon this tremendous debt of $250,000,000,000 is going to press down on your dollar and mine, and is going to squeeze the

value out of that dollar and it will be worth less than it is now.

Further than that, I think this is a cruel thing for this committee to put up to you gentlemen on the Republican side of the House, because they know that no bill that even looks like this will ever come out of the committee on conference. Yet they set their rates to provide for a reduction of $5,600,000,000 and it turned out to be $6,500,000,000, and they say that we are going to hang on to those rates. We are going to give this pap to the American people believing that they will swallow it and like it.

Somebody said they want tax reduction. In the motion to recommit, I propose a tax reduction and propose to remove from the payment of income taxes more than 10,000,000 American citizens. That applies to everybody. That will relieve nearly 10,000,000 people. I propose to raise the exemption from $500 to $700. That will affect all of us. They say that is not enough for the high-income fellow. I want to point out that in the motion to recommit which I shall offer and which is in your bill, 97½ percent of the $800,000,000 involved in the community-property provision goes to people with net incomes of more than $5,000 per annum.

Then there is this scare about the excess-profits tax. I disagree with my friend, the gentleman from North Carolina, when he says that that provision was not considered. It was before the committee in the bill presented by the gentleman from Michigan [Mr. DINGELL] all during the hearings.

Mr. DOUGHTON. Mr. Chairman, will the gentleman yield?

Mr. RAYBURN. I yield.

Mr. DOUGHTON. I referred to the bill itself and not just to that part of it dealing with excess profits. You say the bill was considered. I submit it was not considered. I was not referring to just that part of it.

Mr. RAYBURN. Not all of it, but two-thirds of it was, for the simple reason that the $40 per person added up amounts to about $3,200,000,000. The motion that I shall offer to raise the exemption from $500 to $700 is practically the same figure, so that bill relieved the small income-tax payer and took him out of the taxpaying bracket. This motion to recommit does the same thing. Further, is the motion that I shall make cruel to the corporations of the country? I do not think so. Every corporation in the country is given a $50,000 exemption. That takes out of the excess-profits tax more than 300,000 corporations. In other words, it leaves only 22,000 corporations that will be compelled to pay excess-profits taxes. They get their $50,000 exemption and then they get what is tantamount to 33⅓ percent reduction in what their excess-profits tax was during the wartime. So I do not think that is going to be so cruel, when I know that the President's budget will be cut very little; when I know that we are going to need money from some source to make up for that which we are going to lose by these exemptions, if we are going to pay one dollar on the national debt. And no more calamitous thing could come to this country of yours and mine in the years that lie immediately before us if we do not make a substantial reduction in that national debt.

Our friends on the Republican side have always boasted they were sound money people. This money is not going to be sound. This dollar is not going to be worth 100 cents with this tremendous and staggering charge made against it. I want a sound dollar. I want a dollar that will buy as nearly 100 cents' worth of material as possible. I know that unless we make these payments that will not come true.

This bill ought to be sent back to the committee, and not in a hurry but in sound reason and on information they should bring in a bill that will reduce the taxes of those least able to pay, and make that up from those most able to pay. I have always been a disciple of this doctrine, that the way to make the country prosperous is to make the man at the base prosperous so that he would have buying power. That prosperity would go all the way up. It has been the theory of some people in this country for 75, yea, 100 years, that the way to make the country prosperous was to make the rich very rich, and that would trickle down to the common, ordinary man. It will not do it.

This motion to recommit ought to be adopted, because it has in it the safety of the finances of this Government.

Mr. Chairman, in order that the record may contain an explanation of the motion to recommit I insert the following statement and tables at this point in the RECORD:

The motion to recommit, offered under the rule, is the only opportunity of the minority affirmatively to record their views on the kind of tax bill most desirable at this time. The motion will provide for striking out everything in H. R. 4790 after the enacting clause, and inserting four principal provisions:

First. A $200 per capita increase in personal exemptions;

Second. A modified excess-profits tax on corporations;

Third. Income splitting between husband and wife; and

Fourth. Estate splitting between husband and wife.

First, personal exemptions are increased from $500 to $700, which would remove nearly 10,000,000 of the neediest taxpayers from the rolls. The remaining 42,000,000 taxpayers will benefit in proportion to the maximum tax rate now paid by them.

There seems to be no doubt in the mind of anyone that present exemptions are too low. The $500 per capita exemption was fixed by Congress in 1944, and under it individual income-tax payers have increased from 4,000,000 in 1939 to the present 52,000,000. Since 1944, however, over-all consumer prices have increased 31 percent, and food prices by nearly 50 percent. If the 1939 personal exemption were to be allowed to the average American family of four, the equivalent under today's prices would be nearly $5,500. Actually, the exemption of a family of four is $2,000. The $200 increase in exemptions therefore, is in accord with the views expressed by the President on several occasions that the millions of taxpayers with low incomes should have high priority for relief from their wartime tax burdens. Eighty-nine percent of the relief granted by this proposal would go to taxpayers with net incomes of less than $5,000.

Second, to offset the $3,250,000,000 lost from increasing personal exemptions, a moderate excess-profits tax would be imposed upon the 22,000 out of some 360,000 taxpaying corporations with the largest excess profits. The wartime excess-profits tax would be modified by increasing the wartime credits by 35 percent. In other words, a corporation would now be allowed to earn 35 percent more than during the war before being subjected to an excess-profits tax. Small corporations would be excused by a specific exemption of $50,000, and the rate of tax on excess profits would be 75 percent, instead of 85 percent.

Accordingly, a most generous yardstick would be provided for determining whether profits are excessive. With corporate profits after taxes at a level 67 percent above the peak war year, 1943, the imposition of an excess-profits tax is an equitable way of granting some tax relief to those low-income people who are hardest pressed by the inflationary prices out of which the excessive profits are being earned.

Third, married couples, in whatever State they may reside, would be placed on an equal basis by being permitted to divide their income for tax purposes. It should not be necessary to change local property laws of long standing to obtain uniformity in Federal taxation. Yet several States recently have taken such steps, and others will do so if Congress does not act.

Despite the $800,000,000 loss in revenue, and the fact that 97.5 percent of the relief goes to taxpayers above $5,000, the elimination of this inequity should no longer be postponed.

Fourth, essentially the same principle would be applied to estate and gift taxes.

In contrast with H. R. 4790, the proposed amendment would maintain the revenue-producing capacity of the tax system at less than a billion dollars below present levels. This is basic, if we are to have a sound fiscal policy adequate to meet with safety and confidence our responsibilities, in the family of nations. Those who would recklessly cut taxes at the risk of deficit spending may, indeed, be endangering their country to enemies, both foreign and domestic, against whom they have sworn to protect and defend.

Tax relief for those whose need is greatest there should be. But this can be provided without a 6 to 7 billion dollar cut in revenues. The motion to recommit actually would give a greater tax reduction for the average American family of four earning up to $4,150 than does H. R. 4790 in its present form.

In the interest both of the financial integrity of this great Nation, and of equity in the tax system, H. R. 4790 should be recommitted, as I shall propose at the proper time.

The CHAIRMAN. The time of the gentleman from Texas [Mr. RAYBURN] has expired.

Mr. KNUTSON. Mr. Chairman, I yield the remainder of my time to the distinguished Speaker of the House the gentleman from Massachusetts [Mr. MARTIN].

The CHAIRMAN. The gentleman from Massachusetts is recognized for 13 minutes.

Mr. MARTIN of Massachusetts. Mr. Chairman, I have listened with great interest to my able, distinguished, and good friend, the former Speaker of the House. I want to congratulate him. I think he has done a marvelous job of presentation with little to work with. Naturally, he does not like this bill as reported out of the committee, but I must remind him that the distinguished member of the Ways and Means Committee, who has graced the head of that committee for so many years the gentleman from North Carolina, Hon. ROBERT DOUGHTON, is strongly opposed to his substitute measure.

The minority leader is afraid that this will not permit us to balance the budget and commence what is the necessary job of reducing that heavy tax burden which bears heavily upon the people.

I was very sorry to hear him say that the President's budget of $40,000,000,000 could not be cut. Think of that, Mr. Chairman. That is discouraging to me because if there is one job that the people of this country are looking to this Congress to do it is to cut expenditures. This country cannot continue for many years to pay these wartime taxes. The only way that expenditures can be cut is to do it in the House, and I had hoped that that effort would not be partisan. I hoped it would be essentially a nonpartisan effort; yes, an American effort, to put this country back on a sound and solvent basis. And I am sorry, too, that an effort is being made to inject politics into the discussion of this tax bill. That should not be the case, for the Democrats want tax relief just as much as the Republicans do. When we write a tax bill on the books it affects all people regardless of their politics.

Now, what is the motion to recommit? As the distinguished tax expert from North Carolina has said, this tax bill which is represented in the motion to recommit has actually had 1 hour of study in a little back-room conference. No man has had a chance to go to the great Committee on Ways and Means and tell how this bill represented by the motion to recommit would affect his business or his affairs.

It was only a short time ago that the President said it would be necessary to keep this country on an expanding basis to the end that we might get the greater production which is so essential not only to supply the needs of our own people but also those in the devastated countries abroad. Further than that it is necessary to keep down high prices. He estimated that $50,000,000,000 was needed for that purpose. Mr. Chairman, in all seriousness, let me ask where that money is coming from if we increase the taxes of the very people who must provide the capital for expansion of plants. We must have the expansion to take care of the increased production which is the final cure for high costs.

I repeat this is no time for narrow partisanship. This is a measure which interests all of our people.

Some mention was made in the debate to the effect that this motion to recommit would be of greater benefit to the little fellow than the pending bill. What are the facts? The facts are that the motion to recommit will only give 70-percent reduction for the income taxpayers in the group below $5,000, whereas in the bill reported by the Ways and Means Committee the reduction to that same group amounts to 71.5 percent. It looks as though the little fellow was well considered by the committee and certainly better than in the motion to recommit.

Mr. Chairman, let me say to the membership of the House that this tax bill represents another and perhaps the final effort this year to give the American people relief from wartime taxes. Reduced taxes are essential to any real effort to reduce high prices and bring down living costs. The facts are that 20 percent of the cost of food and goods is represented by taxes. That is why it is so essential that we reduce taxes. It is because of taxes that living costs bear so heavily upon the workers of the country. They are demanding this relief. The most effective way to give this relief is to cut down their taxes so they may have a larger take-home pay and meet these high prices of today. This is just as effective to them as a pay increase and it will be still better because it will bring lower prices through the stimulation of production.

Few tax-reduction bills have ever come to our American Congress that give greater tax relief to the workers and small-salaried people than the pending bill. Furthermore, the worker and the low-salaried person will materially benefit by the stimulation this tax reduction will give to production by providing an incentive for work and expansion. Increased production means more goods and more food. It will stimulate the fight against scarcity and through a greater quantity and better quality of goods and food bring about a lowering of

prices and a great gain to everybody. Six million people will be removed from the taxpaying list. Those people will not be required to pay a single dollar of the cost of the Government. The aged and the blind, the most needy of our population, are given a preferential reduction. These are the real needy people of our country. They, above everyone else, need relief from taxes. What they will save in this tax bill might give them the chance to have a little more food to sustain life and perhaps a few more of the luxuries that the American people like to enjoy.

The leadership of this House has a definite program. We must cut the cost of government. No country can indefinitely bear a burden of $40,000,000,000 a year for the operation of the Government. We must keep the budget balanced. We have at last balanced it after 15 years and of necessity we must keep it balanced if this country is going forward to even greater heights. I am one of those who believe we are going forward to better days and a finer civilization than we ever enjoyed before. Let us do our part to build for the future.

We must continue to pay annual installments on the national debt because that is essential. We have made a payment this year and we will make a payment in the coming year. These debt payments are essential to our economic plan to maintain the country's solvency and to plan for a brighter and a better tomorrow. We must continue annual reductions on the national debt. These objectives can and will be achieved. They should not be partisan but should be supported by everyone who wants to restore security and sanity in our Government.

The pending tax bill is the initial step in this sound program. It is the initial step in tax reduction which the American people are demanding. I trust that this bill will pass the House by an overwhelming vote that will embrace not the membership of one party but all Members who realize the American people want tax relief and want an opportunity to have a little more take-home pay so that they can better meet these high prices.

I plead in the interest of orderly government, because, as the gentleman from North Carolina so well said, tax bills cannot be written on the floor of the House. They too seriously enter into the life of every business and every individual in this country to pass with 1 hour's consideration. I therefore ask you to vote down the motion to recommit. Pass this bill, send it to the Senate, and before the Eightieth Congress ends we will give the American people what they are demanding; relief from the high, burdensome, wartime taxes.

The CHAIRMAN. All time has expired. Under the rule, the bill is considered as having been read for amendment. The Clerk will report the first committee amendment.

The Clerk read as follows:

Page 3, strike out lines 1 and 2, and insert:

"(2) In no event shall the combined normal tax and surtax exceed 77 percent of the net income."

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 6, line 18, strike out the remainder of the line after the word "year" and all of line 19, with the exception of the word "and."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 6, line 22, strike out the words "and has", all of line 23, and all of line 24 down to the word "and."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 9, line 14, strike out the word "either."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 9, line 15, strike out the words "or an", all of line 16, down to and including the word "blind)" in line 17.

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 9, line 21, insert the following:

"(C) One additional exemption for himself if, on the basis of facts existing at the beginning of such day, there may reasonably be expected to be allowable an exemption under section 25 (b) (1) (C) (i) (relating to the blind) for the taxable year under Chapter 1 in respect of which amounts deducted and withheld under this subchapter in the calendar year in which such day falls are allowed as a credit."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 10, line 6, strike out "(C)" and insert "(D)."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 10, line 9, strike out "(A) or (B)" and insert "(A), (B), or (C)."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 10, line 13, strike out "(D)" and insert "(E)."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 19, line 2, after "(4)" insert "of the Internal Revenue Code."

The committee amendment was agreed to.

The CHAIRMAN. Are there any further committee amendments?

Mr. SIMPSON of Pennsylvania. Mr. Chairman, by direction of the Committee on Ways and Means, I offer the following committee amendment.

The Clerk read as follows:

Committee amendment offered by Mr. SIMPSON of Pennsylvania:

Page 18, line 3, strike out "and gift tax."

Page 18, after line 3, insert a new heading to read as follows:

"Subpart 1—Repeal of 1942 Community Property Amendments"

Page 18, line 4, strike out "Estate tax—."

Page 18, line 11, strike out "Estate tax—."

Page 18, line 23, strike out "Estate tax—."

Page 19, after line 4, insert the following:

"Subpart 2—Marital Deduction for Bequests, Etc., to Spouse

"SEC. 361. Marital Deduction

"(a) Section 812 of the Internal Revenue Code (relating to deductions in computing net estate in the case of a citizen or resident of the United States) is hereby amended by adding at the end thereof a new subsection to read as follows:

"'(e) Bequests, etc., to surviving spouse:

"'(1) Allowance of marital deduction:

"'(A) In general: An amount equal to the value of any interest in property passing from the decedent to his surviving spouse, but only to the extent that such interest is included in determining the value of the gross estate.

"'(B) Life Estate or Other Terminable Interest: Where, upon the lapse of time, upon the occurrence of an event or contingency, or upon the failure of an event or contingency to occur, such interest passing to the surviving spouse will terminate or fail, no deduction shall be allowed with respect to such interest—

"'(i) if an interest in such property passes or has passed (for less than an adequate and full consideration in money or money's worth) from the decedent to any person other than such surviving spouse; and

"'(ii) if by reason of such passing such person (or his heirs or assigns) may possess or enjoy any part of such property after such termination or failure of the interest so passing to the surviving spouse.

"'(C) Interest of spouse conditioned on survival for limited period: For the purposes of subparagraph (B) an interest passing to the surviving spouse shall not be considered as an interest which will terminate or fail upon the death of such spouse if—

"'(i) such death will cause a termination or failure of such interest only if it occurs within a period (not exceeding 6 months) after the decedent's death; and

"'(ii) such spouse in fact does not die before the expiration of such period.

"'(D) Interest of surviving spouse reduced by reason of estate, etc., Taxes: In determining for the purposes of subparagraph (A) the value of any interest in property passing to the surviving spouse there shall be taken into account the effect which a tax imposed by this chapter, or any estate, succession, legacy, or inheritance tax, has upon the net value to the surviving spouse of such interest.

"'(E) Trust with power of appointment in surviving spouse: In the case of an interest in property passing from the decedent to a trust, if the trust will terminate upon the death of the surviving spouse of the decedent, and if under the terms of the trust such spouse is entitled for her life to all the income from the corpus of the trust, payable annually or at more frequent intervals, with the power to appoint by will the entire corpus to her estate, and with no power in herself

or any other person to appoint or invade any part of the corpus during her life—

"'(i) the interest so passing shall, for the purposes of subparagraph (A), be considered as passing to the surviving spouse, and

"'(ii) no part of the interest so passing shall, for the purposes of subparagraph (B) (i), be considered as passing to any person other than the surviving spouse.'"

This subparagraph shall be applicable only if, under the terms of the trust, such power to appoint by will is exercisable in all events.

"'(F) Limitation on aggregate of deduction: The aggregate amount of the deductions allowed under this paragraph (computed without regard to this subparagraph) shall not exceed 50 percent of the value of the adjusted gross estate, as defined in paragraph (2).

"'(2) Computation of adjusted gross estate:

"'(A) General rule: Except as provided in subparagraph (B) of this paragraph, the adjusted gross estate shall, for the purposes of paragraph (1) (F), be computed by subtracting from the entire value of the gross estate the aggregate amount of the deductions allowed by subsection (b) of this section.

"'(B) Special rule in cases involving community property: If the decedent and his surviving spouse at any time held property as community property under the law of any State, Territory, or possession of the United States, or of any foreign country, then the adjusted gross estate shall, for the purposes of paragraph (1) (F), be determined by subtracting from the entire value of the gross estate the sum of:

"'(i) the value of property which is at the time of the death of the decedent held as such community property; and

"'(ii) the value of property transferred by the decedent during his life, if at the time of such transfer the property was held as such community property; and

"'(iii) the amount receivable as insurance under policies upon the life of the decedent to the extent purchased with premiums or other consideration paid out of property held as such community property; and

"'(iv) an amount which bears the same ratio to the aggregate of the deductions allowed under subsection (b) of this section which the value of the property included in the gross estate, diminished by the amount subtracted under clauses (i), (ii), and (iii) of this subparagraph bears to the entire value of the gross estate.

For the purposes of clauses (i), (ii), and (iii), property shall be considered as "held as such community property" if it was at any time acquired by the decedent (by one exchange or by a series of exchanges) in exchange for his interest in property held as such community property. The amount to be subtracted under clause (i), (ii), or (iii) shall not exceed the value of the interest in the property described therein which is included in determining the value of the gross estate.

"'(3) Definition: For the purpose of this subsection an interest in property shall be considered as passing from the decedent to any person if and only if—

"'(A) such interest is bequeathed or devised to such person by the decedent; or

"'(B) such interest is inherited by such person from the decedent; or

"'(C) such interest is the dower or courtesy interest (or statutory interest in lieu thereof) of such person as surviving spouse of the decedent; or

"'(D) such interest has been transferred to such person by the decedent at any time; or

"'(E) such interest was, at the time of the decedent's death, held by such person and the decedent (or by them and any other person) in joint ownership with right of survivorship; or

"'(F) the decedent had a power (either alone or in conjunction with any person) to appoint such interest and if he appoints or has appointed such interest to such person, or if such person takes such interest in default upon the release or nonexercise of such power; or

"'(G) such interest consists of proceeds of insurance upon the life of the decedent.'

"(b) The amendment made by subsection (a) of this section shall be applicable only with respect to estates of decedents dying after the date of the enactment of this act.

"SEC. 362. Property Previously Taxed

"(a) Section 812 (c) of the Internal Revenue Code (relating to the deduction for property previously taxed) is hereby amended by adding after the first paragraph a new paragraph to read as follows:

"'The following property shall not, for the purposes of this subsection, be considered as property with respect to which a deduction may be allowed: (A) property received from a prior decedent who died after the date of the enactment of the Revenue Act of 1948 and was at the time of such death the decedent's spouse, (B) property received by gift after such date from a donor who at the time of the gift was the decedent's spouse, and (C) property acquired in exchange for property described in clause (A) or (B).'

"(b) Section 812 (c) is further amended by striking out 'subsections (a) and (d)' and inserting in lieu thereof 'subsections (a), (d), and (e)."

PART III—GIFT TAX

Page 19, line 5, strike out "354. Gift Tax—" and insert in lieu thereof the following: "371."

Page 19, after line 11, insert the following:

"SEC. 372. Marital Deduction

"Section 1004 (a) of the Internal Revenue Code (relating to deductions in computing net gifts in the case of a citizen or resident of the United States) is hereby amended by adding at the end thereof a new paragraph to read as follows:

"'(3) Gift to spouse:

"'(A) In general: Where the donor transfers during the calendar year (and after the date of the enactment of the Revenue Act of 1948) by gift an interest in property to a donee who at the time of the gift is the donor's spouse—an amount with respect to such interest equal to one-half of its value.

"'(B) Life estate or other terminable interest: Where, upon the lapse of time, upon the occurrence of an event or contingency, or upon the failure of an event or contingency to occur, such interest transferred to the spouse will terminate or fail, no deduction shall be allowed with respect to such interest—

"'(i) if the donor retains in himself, or transfers or has transferred (for less than an adequate and full consideration in money or money's worth) to any person other than such donee spouse, an interest in such property, and if by reason of such retention or transfer the donor (or his heirs or assigns) or such person (or his heirs or assigns) may possess or enjoy any part of such property after such termination or failure of the interest transferred to the donee spouse; or

"'(ii) if the donor immediately after the transfer to the donee spouse has a power to appoint an interest in such property which he can exercise (either alone or in conjunction with any person) in such manner that the appointee may possess or enjoy any part of such property after such termination or failure of the interest transferred to the donee spouse. For the purposes of this clause the donor shall be considered as having immediately after the transfer to the donee spouse such power to appoint even though such power cannot be exercised until after the lapse of time, upon the occurrence of an event or contingency, or upon the failure of an event or contingency to occur.

An exercise or release at any time by the donor, either alone or in conjunction with any person, of a power to appoint an interest in property; even though not otherwise a transfer, shall, for the purposes of clause (i) of this subparagraph, be considered as a transfer by him.

"'(C) Joint interests: If the interest is transferred to the donee spouse as sole joint tenant with the donor or as tenant by the entirety, the interest of the donor in the property which exists solely by reason of the possibility that the donor may survive the donee spouse, or that there may occur a severance of the tenancy, shall not be considered for the purposes of subparagraph (B) as an interest retained by the donor in himself.

"'(D) Trust with power of appointment in donee spouse: Where the donor transfers in trust an interest in property, and the trust will terminate upon the death of his spouse, and under the terms of the trust his spouse is entitled for her life to all the income from the corpus of the trust, payable annually or at more frequent intervals, with the power to appoint by will the entire corpus to her estate, and with no power in herself or any other person to appoint or invade any part of the corpus during her life—

"'(i) the interest so transferred in trust shall, for the purposes of subparagraph (A), be considered as transferred to the donee spouse, and

"'(ii) no part of the interest so transferred in trust shall, for the purposes of subparagraph (B) (i), be considered as retained in the donor or transferred to any person other than the donee spouse.

This subparagraph shall be applicable only if, under the terms of the trust, such power to appoint by will is exercisable in all events.

"'(E) Community property: A deduction otherwise allowable under this paragraph shall be allowed only to the extent the transfer can be shown to represent a gift of property which does not fall within either of the two following classes:

"'(i) Property which is, at the time of the gift, held as community property under the law of any State, Territory, or possession of the United States, or of any foreign country; or

"'(ii) Property which, although not so held, was at any time acquired by the donor (by one exchange or by a series of exchanges) in exchange for his interest in property held by him and the donee spouse as community property.'

"SEC. 373. Technical Amendment

"Section 1004 (c) of the Internal Revenue Code is hereby amended to read as follows:

"'(c) Extent of deductions: The deductions provided in subsection (a) (2) or (3) or in subsection (b) shall be allowed only to the extent that the gifts therein specified are included in the amount of gifts against which such deductions are applied.'

"SEC. 374. Gift of Husband or Wife to Third Party

"Section 1000 of the Internal Revenue Code (relating to imposition of gift tax) is hereby amended by adding at the end thereof a new subsection to read as follows:

"'(f) Gift of husband or wife to third party:

"'(1) Considered as made one-half by each:

"'(A) In general: A gift made after the date of the enactment of the Revenue Act of 1948 by one spouse to any person other than his spouse shall, for the purposes of this chapter, be considered as made one-half by him and one-half by his spouse, but only if at the time of the gift each spouse is a

citizen or resident of the United States. For the purposes of this subsection an individual shall be considered as the spouse of another individual only if he is married to such individual at the time of the gift and does not remarry during the remainder of the calendar year.

"'(B) Consent of both spouses: Subparagraph (A) shall be applicable only if both spouses have signified (in accordance with the regulations provided for in paragraph (2)) their consent to the application of subparagraph (A) in the case of all such gifts made during the calendar year by either while married to the other.

"'(2) Time and manner of signifying consent: A consent under this subsection shall be signified at such time and in such manner as is provided under regulations prescribed by the Commissioner with the approval of the Secretary. The right to consent, and the right to revoke a consent previously signified, with respect to a calendar year, shall not exist on any day if a return for such year of one spouse (required otherwise than by reason of the application of paragraph (1)) filed on such day would be a return not timely filed.

"'(3) Joint and several liability for tax: If the consent required by paragraph (1) (B) is signified with respect to a gift made in any calendar year the liability with respect to the entire tax imposed by this chapter of each spouse for such year shall be joint and several.'

"Page 2, strike out the heading 'Part II—Estate tax and gift tax' and the five following lines in the table of contents, and in lieu thereof insert the following:

"'PART II—ESTATE TAX

"'SUBPART 1—REPEAL OF 1942 COMMUNITY PROPERTY AMENDMENTS

"'Sec. 351. Transfers of community property in contemplation of death, etc.
"'Sec. 352. Joint and community interests.
"'Sec. 353. Proceeds of life insurance.

"'SUBPART 2—MARITAL DEDUCTION FOR BEQUESTS, ETC., TO SPOUSE

"'Sec. 361. Marital deduction.
"'Sec. 362. Property previously taxed.

"'PART III—GIFT TAX

"'Sec. 371. Gifts of community property.
"'Sec. 372. Marital deduction.
"'Sec. 373. Technical amendment.
"'Sec. 374. Gift of husband or wife to third party.'"

Mr. SABATH. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SABATH. Mr. Chairman, in view of the fact that under the gag rule the bill was not read and further in view of the fact that no one outside of the members of the Committee on Ways and Means knows anything about these amendments, I ask whether it would not be proper that these amendments which change the bill in many respects should not be explained to the membership so that they can vote intelligently knowing what the amendments are.

The CHAIRMAN. The Chair will state that under the rule, proponents of the amendment are entitled to 5 minutes and the opponents to 5 minutes. The Chair recognizes the gentleman from Pennsylvania [Mr. SIMPSON]

Mr. SIMPSON of Pennsylvania. Mr. Chairman, the committee amendment is necessary in view of the provision in the bill as reported which repeals the community-property amendments made in 1942 to the estate- and gift-tax law.

The amendment provides rules whereby in many ordinary situations the same estate tax or gift tax will result whether the taxpayer is a resident of a community-property State or of a common-law State. It is not possible to have complete equalization, however, because of the differences in the systems of property law with which we are dealing.

The benefits of the amendment extend not only to residents of the common-law States but also to residents of the community-property States with respect to their separate property (not acquired in exchange for community property).

Under the amendment if a husband in any State gives his separate property to his wife, one-half of the value of the property is deducted and only the balance is subject to the gift tax.

The principle of splitting is also applied to the estate tax. The method under the estate tax, however, is to allow a deduction for all the property in the husband's gross estate passing to the surviving spouse—but with the limitation, that the deduction shall not exceed 50 percent of the husband's gross estate reduced by funeral expenses, debts, and other claims against the estate. Thus, under the amendment, if a husband leaves all his property to his wife a deduction is allowed for one-half of the value of the estate less claims.

The deduction provided under the amendment, in the case of the gift tax, is not allowed for community property (and property acquired in exchange for community property). This is because title to one-half of the community property is already in the wife and under the bill as reported the donor will be taxed on only the one-half of the property as to which he has title. Double benefits from the community property system are similarly prevented in the application of the amendment to the estate tax.

The deductions provided for under the amendment also do not apply to interests in property which are terminable interests, such as life estates. Thus, a deduction will not be allowed under the amendment if the only interest given a spouse is in property in which the husband also gives or has given an interest to someone else who may possess or enjoy the property after the wife. However, if the only interest the husband had in the property is a terminable interest, such as a lease, and he gives his wife his entire interest in the property, then the deduction is permitted. The deduction is also permitted if the husband transfers his entire interest in property by way of gift into a tenancy by the entirety or a joint tenancy with his wife.

The amendment applies the splitting principle to gifts made by a husband or wife to a third party. It treats a gift made by either spouse to a third party as if the gift were made one-half by the husband and one-half by the wife. The husband and wife will have the opportunity to obtain or refuse this treatment each year with respect to gifts made in such year. If the option is effectively exercised, however, the gift-splitting treatment irrevocably applies to all gifts to third parties made in the calendar year for which the option was exercised. If the husband and wife choose to have the gifts to the third parties so treated, then they will be jointly and severally liable for the entire gift tax of each for the calendar year for which they chose this treatment.

The amendment also has a provision applying to the following situation: Under existing law, if a husband gives or bequeaths property to his wife and she dies within 5 years, a deduction is allowed her estate for the property acquired from her husband. The application of the splitting principle makes this deduction no longer necessary and the amendment disallows it.

Mr. COMBS. Mr. Chairman, I rise in opposition to the amendment.

Of course, it is utterly impossible to take a complicated amendment such as the one before us, which none of us knows anything about except as we have just heard it read and even that not in connection with the reading of the bill and its many provisions, and explain the amendment.

I want to express opposition to it and take this opportunity to point out something about the community-property law that seems to be utterly beyond the grasp of people who live in the common-law States. Perhaps we are as ignorant of your common law, except we lawyers who have had occasion to study it, as you are of our community-property law.

There are slurring remarks in the committee report and repeated suggestions that we of the community-property States have invented some kind of a system to beat taxes. Nothing could be further from the truth. The State of Texas, for example, adopted the community-property system by its first constitution as a Republic, in 1836. We think it is one of the greatest stabilizing influences on our homes that a State can have.

You may not agree, but I will point out that we have no such thing as alimony in Texas. Instead the community property of a divorced couple is divided equally. There is no payment of alimony by a divorced husband to a divorced wife, and therefore no divorce "racket" in my State.

Again in Texas—I am using that as an example because I am so familiar with its system—there is not the slightest inducement offered for a marriage of "convenience." Here you are fixing to put into a bill a standing reward for glamor "gal's" sugar-daddy racket. This is so because in your common-law States the husband and wife may divide the income into two equal parts—thus putting the income into a lower tax bracket even though the husband owns all of it. Consequently, the wealthy man in your States can greatly reduce his income tax by paying a lower rate on half the income he owns. Therefore, a rich, single man in your State can, under the provision of this bill, arrange a marriage of convenience and cheat the American Treasury out of many thousands of dollars with comparatively little risk or expense and he still owns the entire income. This, generally, is the effect of the provision in the original bill which

provides for split-income returns in the common-law States.

But here is what I want to say about the gentleman's amendment. If it means what I think it does, it would deprive the married citizens of my State, and every other community-property State, of half the benefit of the provision which repeals the iniquitous and discriminatory estate-tax law of 1942. The effect of that law is to require a surviving wife to pay an estate tax on her one-half interest which she already owned as well as on the one-half she inherits from the husband. Now the committee amendment offered by the gentleman from Pennsylvania contains a number of provisions which, as I understand them, from hearing them read is like the "fine print" in some contracts. They would take away most, if not all, of the benefits the community-property States would obtain by repeal of the act of 1942, and thus perpetuate most of its bad features. Time will not permit me to even point out the specific provisions of the proposed amendment which will have such effect but I affirm that such will be the result.

Why? Because the amendment overlooks or ignores the simple fact that in Texas and other community-property States neither the husband or the wife has any power to dispose of the other spouse's half interest in the community estate by will.

In Texas the wife has the same freedom to will her property to whomsoever she pleases as the husband has. If she dies intestate her one-half of the community property passes to her heirs in accordance with the statute of descendant and distribution, just as the husband's one-half passes to his heirs under similar circumstances. We have considered our community-property law so sacred and the State courts for a hundred years have guarded it so carefully that the husband or wife by contract before marriage or afterward can by no device change the community-property status of the common holdings of the couple. Why is it that the States that have recently adopted the system are in the West? Because they are out there close by the community-property States and have seen the benefit of such a law.

If you people in the other States feel you are discriminated against, you can get the community-property privilege on taxation, if you wish it, just like we got it, by giving your wives a just half interest in the common earnings of the marriage. Texas was settled by pioneer people. Wives joined their husbands in reclaiming the land from the forests and building the cabins that became the homes of American families. In your common-law State the wife has only the dower right in the husband's real estate. She acquires no title to personal property, including income, except such income as she may get out and earn. This law originated in England hundreds of years ago, when wives were denied the right to own property and the husband had the legal right to whip his wife. In the community-property State we feel that the husband and wife are partners—each in his and her own way making an equal contribution toward the family income. We conceive this truth to be self-evident, that a woman who performs her function as the wife in the home justly earns her one-half and we give it to her beyond question. That is the theory of our community-property law. Furthermore, even if our wives did not work at all, they would still be entitled to 50 percent for putting up with us. On second thought, I had better amend that. I am sorry I said it. On that basis some of our wives would be entitled to 90 percent.

Frankly, this amendment is too complicated a matter for us to consider so shortly. If it does what I think it does, it penalizes the people of the 12 community-property States of this Nation because they have seen fit to recognize the just rights of their wives.

I am "agin" it.

The CHAIRMAN. The time of the gentleman from Texas has expired. All time has expired on this amendment.

The question is on the amendment offered by the gentleman from Pennsylvania [Mr. SIMPSON].

The question was taken, and the Chair announced that the ayes had it.

Mr. DINGELL. Mr. Chairman, I ask for a division.

Mr. KNUTSON. Mr. Chairman, the request comes too late.

Mr. DINGELL. No; it does not come too late. Let the Chair rule on that.

The CHAIRMAN. Was the gentleman on his feet when he made the request?

Mr. RAYBURN. Mr. Chairman, we have always been very liberal in the House about the matter of votes or whether Members were on their feet. We have always been very liberal in the matter of allowing division votes. As far as I am concerned I do not care anything about it.

The CHAIRMAN. If there is any doubt in the minds of the membership the Chair will resolve the doubt in favor of the gentleman from Michigan.

The question was taken; and there were—ayes 202, noes 37.

So the committee amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. HOEVEN, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 4790) to reduce the individual income-tax payments, and for other purposes, pursuant to House Resolution 450, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gross.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mr. RAYBURN. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. RAYBURN. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. RAYBURN moves to recommit the bill H. R. 4790 to the Committee on Ways and Means with instructions to report the same back to the House forthwith with the following amendment: Strike out all after the enacting clause and insert the following:

"That this act may be cited as the 'Tax Adjustment Act of 1948.'

"TITLE I—INCOME TAX ADJUSTMENTS

"SEC. 101. Increase in Personal Exemptions

"Section 25 (b) (1) of the Internal Revenue Code (relating to credits of individuals against net income) is hereby amended by striking out '$500,' wherever appearing therein, and by inserting in lieu thereof '$700', and by striking '$1,000' and by inserting in lieu thereof '$1,200'.

"SEC. 102. Splitting of Income

"Section 12 of the Internal Revenue Code (relating to surtax of individuals) is hereby amended by adding after subsection (c) of such section the following new subsection:

"'(d) Tax in case of joint returns: In the case of a joint return of husband and wife under section 51 (b), the combined normal tax and surtax under section 11 and subsection (b) of this section shall be twice the combined normal tax and surtax that would be determined if the net income and the applicable credits against net income provided by section 25 were reduced by one-half.'

"SEC. 103. Standard Deductions

"(a) Increase of standard deduction in case of joint return: Section 23 (aa) (1) (A) of the Internal Revenue Code (relating to the standard deduction) is hereby amended to read as follows:

"'(A) Adjusted gross income of $5,000 or more: If the adjusted gross income is $5,000 or more, the standard deduction shall be $500 or an amount equal to 10 percent of the adjusted gross income, whichever is the lesser; except that in the case of a joint return of husband and wife under section 51 (b), the standard deduction shall be $1,000 or an amount equal to 10 percent of the adjusted gross income, whichever is the lesser.'

"(b) Election by husband and wife: Section 23 (aa) (4) of such Code is hereby amended to read as follows:

"'(4) Husband and wife: In the case of husband and wife, the standard deduction shall not be allowed to either if the net income of one of the spouses is determined without regard to the standard deduction.'

"(c) Determination of status: Section 23 (aa) of such Code is hereby amended by adding at the end thereof the following new paragraph:

"'(6) Determination of status: For the purposes of this subsection—

"'(A) the determination of whether an individual is married shall be made as of the close of his taxable year, unless his spouse dies during his taxable year, in which case such determination shall be made as of the time of such death, and

"'(B) an individual legally separated from his spouse under a decree of divorce or of separate maintenance shall not be considered as married.'

"SEC. 104. Joint Return of Husband and Wife

"Section 51 (b) of the Internal Revenue Code (relating to joint returns) is hereby amended to read as follows:

"'(b) Husband and wife:

"'(1) In general: A husband and wife may make a single return jointly. Such a return may be made even though one of the spouses has neither gross income nor deductions. If a joint return is made the tax shall be computed on the aggregate income and the liability with respect to the tax shall be joint and several.

"'(2) Nonresident alien: No joint return may be made if either the husband or wife at any time during the taxable year is a nonresident alien.

"'(3) Different taxable years: No joint return shall be made if the husband and wife have different taxable years; except that if such taxable years begin on the same day and end on different days because of the death of either or of both, then the joint return may be made with respect to the taxable year of each. The above exception shall not apply if the surviving spouse remarries before the close of his taxable year, nor if the taxable year of either spouse is a fractional part of a year under section 47 (a).

"'(4) Joint return after death: In the case of the death of one spouse or both spouses the joint return with respect to the decedent may be made only by his executor or administrator; except that in the case of the death of one spouse the joint return may be made by the surviving spouse with respect to both himself and the decedent if (A) no return for the taxable year has been made by the decedent, (B) no executor or administrator has been appointed, and (C) no executor or administrator is appointed before the last day prescribed by law for filing the return of the surviving spouse. If an executor or administrator of the decedent is appointed after the making of the joint return by the surviving spouse, the executor or administrator may disaffirm such joint return by making, within 1 year after the last day prescribed by law for filing the return of the surviving spouse, a separate return for the taxable year of the decedent with respect to which the joint return was made, in which case the return made by the survivor shall constitute his separate return.

"'(5) Determination of status: For the purposes of this section—

"'(A) the status as husband and wife of two individuals having taxable years beginning on the same day shall be determined—

"'(i) if both have the same taxable year—as of the close of such year; and

"'(ii) if one dies before the close of the taxable year of the other—as of the time of such death; and

"'(B) an individual who is legally separated from his spouse under a decree of divorce or of separate maintenance shall not be considered as married.

"'(6) Tax in case of joint return: For determination of combined normal tax and surtax under section 11 and section 12 (b) in case of joint return under this subsection, see section 12 (d). For tax in case of joint return of husband and wife electing to pay the tax under Supplement T, see section 400.'

"SEC. 105. Deduction for Medical Expenses

"Section 23 (x) of the Internal Revenue Code (relating to deduction of medical, etc., expenses) is hereby amended by striking out the second and third sentences thereof and inserting in lieu thereof the following: 'The deduction shall not be in excess of $1,250 multiplied by the number of exemptions allowed under section 25 (b) for the taxable year (exclusive of exemptions allowed under section 25 (b) (1) (B) or (C)), with a maximum deduction of $2,500, except that the maximum deduction shall be $5,000 in the case of a joint return of husband and wife under section 51 (b).'

"SEC. 106. Technical Amendments

"(a) Declaration of estimated tax: Section 58 (a) of the Internal Revenue Code (relating to requirement of declaration of estimated tax) is hereby amended to read as follows:

"'(a) Requirement of declaration: Every individual (other than an estate or trust and other than a nonresident alien with respect to whose wages, as defined in section 1621 (a), withholding under subchapter D of chapter 9 is not made applicable) shall, at the time prescribed in subsection (d), make a declaration of his estimated tax for the taxable year if—

"'(1) his gross income from wages (as defined in sec. 1621) can reasonably be expected to exceed the sum of $4,500 plus $700 with respect to each exemption provided in section 25 (b); or

"'(2) his gross income from sources other than wages (as defined in sec. 1621) can reasonably be expected to exceed $100 for the taxable year and his gross income to be $700 or more.'

"(b) Requirement of returns:

"(1) Individual returns: Section 51 (a) of the Internal Revenue Code (relating to the requirement of individual returns) is hereby amended by striking out '$500' and inserting in lieu thereof '$700.'

"(2) Fiduciary returns: Section 142 (a) of such code (relating to the requirement of fiduciary returns) is hereby amended by striking out '$500' wherever appearing therein and inserting in lieu thereof '$700.'

"(3) Information returns: Section 147 (a) of such code (relating to returns of information) is hereby amended by striking out '$500' wherever appearing therein and inserting in lieu thereof '$700.'

"(c) Credit of estate against net income: Section 163 (a) (1) of such code (relating to credits against net income of an estate) is hereby amended by striking out '$500' and inserting in lieu thereof '$700'.

"SEC. 107. Changes in Optional Tax and Withholding Tables

"The Secretary of the Treasury is authorized and directed to make such changes in the tables in section 400 (optional tax table) and section 1622 (withholding tables) as may be necessary to reflect the reduction in taxes provided for in the preceding provisions of this act.

"SEC. 108. Taxable Years to Which Amendments Applicable

"The amendments made by this title shall be applicable with respect to taxable years beginning after December 31, 1947. The amendment made by section 104 shall also be applicable to taxable years of both husband and wife beginning on the same day in 1947 if at least one of such taxable years ends in 1948. For treatment of taxable years beginning in 1947 and ending in 1948, see section 301.

"TITLE II—EXCESS-PROFITS TAX

"SEC. 201. Reenactment of Excess-Profits Tax

"(a) Reenactment: Section 122 (a) of the Revenue Act of 1945 is hereby amended to read as follows:

"'(a) In general: The provisions of subchapter E of chapter 2 shall not apply to any taxable year beginning after December 31, 1945, and ending prior to January 1, 1948. The provisions of part III of such subchapter shall not apply to any taxable year beginning after December 31, 1945.'

"(b) Decrease in rate of tax: Section 710 (a) (1) of the Internal Revenue Code is hereby amended to read as follows:

"'(a) Imposition:

"'(1) General rule: There shall be levied, collected, and paid, for each taxable year, upon the adjusted excess profits net income, as defined in subsection (b), of every corporation (except a corporation exempt under section 727) a tax equal to whichever of the following amounts is the lesser:

"'(A) Seventy-five percent of the adjusted excess-profits net income, or

"'(B) An amount which when added to the tax imposed for the taxable year under chapter 1 (other than section 102) equals 70 percent of the corporation surtax net income, computed under section 15 or supplement G, as the case may be, but without regard to the credit provided in section 26 (e) (relating to income subject to the tax imposed by this subchapter), and without regard to 70 percent of the credit provided in section 26 (h) (relating to credit for dividends paid on certain preferred stock).'

"(c) Increase in exemption: Section 710 (b) (1) of the Internal Revenue Code is hereby amended to read as follows:

"'(1) Specific exemption: A specific exemption of $50,000;'.

"(d) Increase in excessive-profits credit: Subsections (a) and (b) of section 712 of the Internal Revenue Code (relating to allowance of excess-profits credit) are hereby amended to read as follows:

"'(a) Domestic corporations: In the case of a domestic corporation which was in existence before January 1, 1940, the excess-profits credit for any taxable year shall be an amount equal to 135 percent of a credit computed under section 713 or section 714, whichever amount results in the lesser tax under this subchapter for the taxable year for which the tax under this subchapter is being computed. In the case of all other domestic corporations the excess-profits credit for any taxable year shall be 135 percent of an amount computed under section 714.

"'(b) Foreign corporations: In the case of a foreign corporation engaged in trade or business within the United States, the first taxable year of which under this subchapter begins on any date in 1940, which was in existence on the day 48 months prior to such date and which at any time during each of the taxable years in such 48 months was engaged in trade or business within the United States, the excess-profits credit for any taxable year shall be an amount equal to 135 percent of a credit computed under section 713 or section 714, whichever amount results in the lesser tax under this subchapter for the taxable year for which the tax under this subchapter is being computed. In the case of all other foreign corporations the excess-profits credit for any taxable year shall be 135 percent of an amount computed under section 714.'

"(e) Definition of unused excess-profits credit: Section 710 (c) (2) of the Internal Revenue Code is hereby amended by striking out the last two sentences thereof, and by inserting in lieu thereof, the following:

"'For the purposes of the determination of the taxes imposed by this subchapter for taxable years beginning before January 1, 1946, there shall be no unused excess-profits credit for a taxable year beginning after December 31, 1946. The unused excess-profits credit for a taxable year beginning in 1946 and ending in 1947 shall be an amount which is such part of the unused excess-profits credit determined under the preceding provisions of this paragraph as the number of days in such taxable year prior to January 1, 1947, is of the total number of days in such taxable year. For the purposes of the determination of the taxes imposed by this subchapter for taxable years ending after December 31, 1947, there shall be no unused excess-profits credit for a taxable year ending before January 1, 1948. The unused excess-profits credit for a taxable year beginning in 1947 and ending in 1948 shall be an amount which is such part of the unused excess-profits credit determined under the preceding provisions of this paragraph as the number of days in such taxable year after December 31, 1947, is of the total number of days in such taxable year.'

"(f) No carry-back to 1946 or 1947: Section 710 (c) of the Internal Revenue Code is hereby amended by adding at the end thereof the following new paragraph:

"'(5) No carry-back to 1946 or 1947: Purposes of the determination of the taxes imposed by this subchapter for taxable years ending after December 31, 1947, the term

"preceding taxable year" and the term "preceding taxable years," as used in this subsection, do not include any taxable year ending prior to January 1, 1948.'

"(g) Technical amendments: The following sections of the Internal Revenue Code are restored to read as such sections read immediately prior to the enactment of the Revenue Act of 1945, to be effective as so restored, with respect to taxable years ending after December 31, 1947, as if section 122 (g) of the Revenue Act of 1945 had not been enacted:

"(1) Section 26 (e) (relating to the credit for income subject to the excess-profits tax);

"(2) Section 13 (a) (2) (defining 'normal tax net income');

"(3) Section 15 (a) (defining 'corporation surtax net income');

"(4) Section 26 (b) (relating to the credit for dividends received);

"(5) Section 102 (d) (1) (defining terms for the purpose of the tax imposed by section 102);

"(6) Section 131 (b) (prescribing certain limitations on the foreign tax credit);

"(7) Section 204 (a) (2) (relating to foreign mutual insurance companies other than life or marine).

"(h) Taxable years to which amendments applicable: The amendments made by subsections (b), (c), and (d) of this section shall be applicable with respect to taxable years ending after December 31, 1947. For treatment of taxable years beginning in 1947 and ending in 1948, see section 401.

"TITLE III—FISCAL YEAR TAXPAYERS

"SEC. 301. Fiscal Year Taxpayers

"(a) Income taxes: Section 108 of the Internal Revenue Code is amended by striking out '(d)' at the beginning of subsection (d) and by inserting in lieu thereof '(e)', and by inserting after subsection (c) the following:

"'(d) Taxable years beginning in 1947 and ending in 1948: In the case of a taxable year beginning in 1947 and ending in 1948 the tax imposed by sections 11, 12, 13, 14, 15, and 400 shall be an amount equal to the sum of—

"'(1) that portion of a tentative tax, computed as if the law applicable to taxable years beginning on January 1, 1947, were applicable to such taxable year, which the number of days in such taxable year prior to January 1, 1948, bears to the total number of days in such taxable year; plus

"'(2) that portion of a tentative tax, computed as if the law applicable to years beginning on January 1, 1948, were applicable to such taxable year, which the number of days in such taxable year after December 31, 1947, bears to the total number of days in such taxable year.'

"(b) Excess profits tax: Section 710 (a) (imposing the excess-profits tax) is amended by inserting at the end thereof the following:

"'(8) Taxable years beginning in 1947 and ending in 1948: In the case of a taxable year beginning in 1947 and ending in 1948, the tax shall be an amount equal to that portion of a tentative tax, computed as if the law applicable to taxable years beginning on January 1, 1948, were applicable to such taxable year, which the number of days in such taxable year subsequent to December 31, 1947, bears to the total number of days in such taxable year.'

"TITLE IV—ESTATE TAX AND GIFT TAX

"SEC. 401. Estate Tax—Transfers of Community Property in Contemplation of Death, Etc.

"Effective with respect to estates of decedents dying after the date of the enactment of this act, section 811 (d) (5) of the Internal Revenue Code (relating to transfers of community property in contemplation of death, etc.) is hereby repealed.

"SEC. 402. Estate Tax—Joint and Community Interests

"(a) Effective with respect to estates of decedents dying after the date of the enactment of this act, section 811 (e) (2) of the Internal Revenue Code (relating to inclusion of community property in gross estate of decedent) is hereby repealed.

"(b) Such section 811 (e) is further amended—

"(1) by striking out of the heading of such subsection the words 'and community'; and

"(2) by striking out of paragraph (1) the following: '(1) Joint interests:'

"SEC. 403. Estate Tax—Proceeds of Life Insurance

Effective with respect to estates of decedents dying after the date of the enactment of this act, section 811 (g) (4) of the Internal Revenue Code (relating to life insurance in the case of decedents in community-property States) is hereby repealed.

"SEC. 404. Marital Deduction

"(a) Section 812 of the Internal Revenue Code (relating to deductions in computing net estate in the case of a citizen or resident of the United States) is hereby amended by adding at the end thereof a new subsection to read as follows:

"'(e) Bequests, etc., to surviving spouse:

"'(1) Allowance of marital deduction:

"'(A) In general: An amount equal to the value of any interest in property passing from the decedent to his surviving spouse, but only to the extent that such interest is included in determining the value of the gross estate.

"'(B) Life estate or other terminable interest: Where, upon the lapse of time, upon the occurrence of an event or contingency, or upon the failure of an event or contingency to occur, such interest passing to the surviving spouse will terminate or fail, no deduction shall be allowed with respect to such interest—

"'(i) if an interest in such property passes or has passed (for less than an adequate and full consideration in money or money's worth) from the decedent to any person other than such surviving spouse; and

"'(ii) if by reason of such passing such person (or his heirs or assigns) may possess or enjoy any part of such property after such termination or failure of the interest so passing to the surviving spouse.

"'(C) Interest of spouse conditioned on survival for limited period: For the purposes of subparagraph (B) an interest passing to the surviving spouse shall not be considered as an interest which will terminate or fail upon the death of such spouse if—

"'(i) such death will cause a termination or failure of such interest only if it occurs within a period (not exceeding 6 months) after the decedent's death; and

"'(ii) such spouse in fact does not die before the expiration of such period.

"'(D) Interest of surviving spouse reduced by reason of estate, etc., taxes: In determining for the purposes of subparagraph (A) the value of any interest in property passing to the surviving spouse there shall be taken into account the effect which a tax imposed by this chapter, or any estate, succession, legacy, or inheritance tax, has upon the net value to the surviving spouse of such interest.

"'(E) Trust with power of appointment in surviving spouse: In the case of an interest in property passing from the decedent to a trust, if the trust will terminate upon the death of the surviving spouse of the decedent, and if under the terms of the trust such spouse is entitled for her life to all the income from the corpus of the trust, payable annually or at more frequent intervals, with the power to appoint by will the entire corpus to her estate, and with no power in herself or any other person to appoint or invade any part of the corpus during her life—

"'(i) the interest so passing shall, for the purposes of subparagraph (A), be considered as passing to the surviving spouse, and

"'(ii) no part of the interest so passing shall, for the purposes of subparagraph (B) (i), be considered as passing to any person other than the surviving spouse.

This subparagraph shall be applicable only if, under the terms of the trust, such power to appoint by will is exercisable in all events.

"'(F) Limitation on aggregate of deductions: The aggregate amount of the deductions allowed under this paragraph (computed without regard to this subparagraph) shall not exceed 50 percent of the value of the adjusted gross estate, as defined in paragraph (2).

"'(2) Computation of adjusted gross estate:

"'(A) General rule: Except as provided in subparagraph (B) of this paragraph the adjusted gross estate shall, for the purposes of paragraph (1) (F), be computed by subtracting from the entire value of the gross estate the aggregate amount of the deductions allowed by subsection (b) of this section.

"'(B) Special rule in cases involving community property: If the decedent and his surviving spouse at any time held property as community property under the law of any State, Territory, or possession of the United States, or of any foreign country, then the adjusted gross estate shall, for the purposes of paragraph (1) (F), be determined by subtracting from the entire value of the gross estate the sum of:

"'(i) the value of property which is at the time of the death of the decedent held as such community property; and

"'(ii) the value of property transferred by the decedent during his life, if at the time of such transfer the property was held as such community property; and

"'(iii) the amount receivable as insurance under policies upon the life of the decedent to the extent purchased with premiums or other consideration paid out of property held as such community property; and

"'(iv) an amount which bears the same ratio to the aggregate of the deductions allowed under subsection (b) of this section which the value of the property included in the gross estate, diminished by the amount subtracted under clauses (i), (ii), and (iii) of this subparagraph, bears to the entire value of the gross estate.

For the purposes of clauses (i), (ii), and (iii), property shall be considered as "held as such community property" if it was at any time acquired by the decedent (by one exchange or by a series of exchanges) in exchange for his interest in property held as such community property. The amount to be subtracted under clause (i), (ii), or (iii) shall not exceed the value of the interest in the property described therein which is included in determining the value of the gross estate.

"'(Definition: For the purposes of this subsection an interest in property shall be considered as passing from the decedent to any person if and only if—

"'(A) such interest is bequeathed or devised to such person by the decedent; or

"'(B) such interest is inherited by such person from the decedent; or

"'(C) such interest is the dower or curtesy interest (or statutory interest in lieu thereof) of such person as surviving spouse of the decedent; or

"'(D) such interest has been transferred to such person by the decedent at any time; or

"'(E) such interest was, at the time of the decedent's death, held by such person and the

decedent (or by them and any other person) in joint ownership with right of survivorship; or

"'(F) the decedent had a power (either alone or in conjunction with any person) to appoint such interest and if he appoints or has appointed such interest to such person, or if such person takes such interest in default upon the release or nonexercise of such power; or

"'(G) such interest consists of proceeds of insurance upon the life of the decedent.'

"(b) The amendment made by subsection (a) of this section shall be applicable only with respect to estates of decedents dying after the date of the enactment of this act.

"SEC. 405. Property Previously Taxed

"(a) Section 812 (c) of the Internal Revenue Code (relating to the deduction for property previously taxed) is hereby amended by adding after the first paragraph a new paragraph to read as follows:

"'The following property shall not, for the purposes of this subsection, be considered as property with respect to which a deduction may be allowed: (A) property received from a prior decedent who died after the date of the enactment of the Revenue Act of 1948 and was at the time of such death the decedent's spouse, (B) property received by gift after such date from a donor who at the time of the gift was the decedent's spouse, and (C) property acquired in exchange for property described in clause (A) or (B).'

"(b) Section 812 (c) is further amended by striking out 'subsections (a) and (d)' and inserting in lieu thereof 'subsections (a), (d), and (e).'

"SEC. 406. Gift Tax—Gifts of Community Property

"Section 1000 (d) of the Internal Revenue Code (relating to gifts of property held as community property) is amended by adding at the end thereof a new sentence to read as follows: 'This subsection shall be applicable only to gifts made after the calendar year 1942 and on or before the date of the enactment of the Revenue Act of 1948.'

"SEC. 407. Marital Deduction

"Section 1004 (a) of the Internal Revenue Code (relating to deductions in computing net gifts in the case of a citizen or resident of the United States) is hereby amended by adding at the end thereof a new paragraph to read as follows:

"'(3) Gift to spouse:

"'(A) In general: Where the donor transfers during the calendar year (and after the date of the enactment of the Revenue Act of 1948) by gift an interest in property to a donee who at the time of the gift is the donor's spouse—an amount with respect to such interest equal to one-half of its value.

"'(B) Life estate or other terminable interest: Where, upon the lapse of time, upon the occurrence of an event or contingency, or upon the failure of an event or contingency to occur, such interest transferred to the spouse will terminate or fail, no deduction shall be allowed with respect to such interest—

"(i) if the donor retains in himself, or transfers or has transferred (for less than an adequate and full consideration in money or money's worth) to any person other than such donee spouse, an interest in such property, and if by reason of such retention or transfer the donor (or his heirs or assigns) or such person (or his heirs or assigns) may possess or enjoy any part of such property after such termination or failure of the interest transferred to the donee spouse; or

"'(ii) if the donor immediately after the transfer to the donee spouse has a power to appoint an interest in such property which he can exercise (either alone or in conjunction with any person) in such manner that the appointee may possess or enjoy any part of such property after such termination or failure of the interest transferred to the donee spouse. For the purposes of this clause the donor shall be considered as having immediately after the transfer to the donee spouse such power to appoint even though such power cannot be exercised until after the lapse of time, upon the occurrence of an event or contingency, or upon the failure of an event or contingency to occur.

An exercise or release at any time by the donor, either alone or in conjunction with any person, of a power to appoint an interest in property, even though not otherwise a transfer, shall, for the purposes of clause (i) of this subparagraph, be considered as a transfer by him.

"'(C) Joint interests: If the interest is transferred to the donee spouse as sole joint tenant with the donor or as tenant by the entirety, the interest of the donor in the property which exists solely by reason of the possibility that the donor may survive the donee spouse, or that there may occur a severance of the tenancy, shall not be considered for the purposes of subparagraph (B) as an interest retained by the donor in himself.

"'(D) Trust with power of appointment in donee spouse: Where the donor transfers in trust an interest in property, and the trust will terminate upon the death of his spouse, and under the terms of the trust his spouse is entitled for her life to all the income from the corpus of the trust, payable annually or at more frequent intervals, with the power to appoint by will the entire corpus to her estate, and with no power in herself or any other person to appoint or invade any part of the corpus during her life—

"'(i) the interest so transferred in trust shall, for the purposes of subparagraph (A), be considered as transferred to the donee spouse, and

"'(ii) no part of the interest so transferred in trust shall, for the purposes of subparagraph (B) (i), be considered as retained in the donor or transferred to any person other than the donee spouse.

This subparagraph shall be applicable only if, under the terms of the trust, such power to appoint by will is exercisable in all events.

"'(E) Community property: A deduction otherwise allowable under this paragraph shall be allowed only to the extent the transfer can be shown to represent a gift of property which does not fall within either of the two following classes:

"'(i) Property which is, at the time of the gift, held as community property under the law of any State, Territory, or possession of the United States, or of any foreign country; or

"'(ii) Property which, although not so held, was at any time acquired by the donor (by one exchange or by a series of exchanges) in exchange for his interest in property held by him and the donee spouse as community property.'

"SEC. 373. Technical Amendment

"Section 1004 (c) of the Internal Revenue Code is hereby amended to read as follows:

"'(c) Extent of deductions: The deductions provided in subsection (a) (2) or (3) or in subsection (b) shall be allowed only to the extent that the gifts therein specified are included in the amount of gifts against which such deductions are applied.'

"SEC. 374. Gift of Husband or Wife to Third Party

"Section 1000 of the Internal Revenue Code (relating to imposition of gift tax) is hereby amended by adding at the end thereof a new subsection to read as follows:

"'(f) Gift of husband or wife to third party:

"'(1) Considered as made one-half by each:

"'(A) In general: A gift made after the date of the enactment of the Revenue Act of 1948 by one spouse to any person other than his spouse shall, for the purposes of this chapter, be considered as made one-half by him and one-half by his spouse, but only if at the time of the gift each spouse is a citizen or resident of the United States. For the purposes of this subsection an individual shall be considered as the spouse of another individual only if he is married to such individual at the time of the gift and does not remarry during the remainder of the calendar year.

"'(B) Consent of both spouses: Subparagraph (A) shall be applicable only if both spouses have signified (in accordance with the regulations provided for in paragraph (2)) their consent to the application of subparagraph (A) in the case of all such gifts made during the calendar year by either while married to the other.

"'(2) Time and manner of signifying consent: A consent under this subsection shall be signified at such time and in such manner as is provided under regulations prescribed by the Commissioner with the approval of the Secretary. The right to consent, and the right to revoke a consent previously signified, with respect to a calendar year, shall not exist on any day if a return for such year of one spouse (required otherwise than by reason of the application of paragraph (1)) filed on such day would be a return not timely filed.

"'(3) Joint and several liability for tax: If the consent required by paragraph (1) (B) is signified with respect to a gift made in any calendar year the liability with respect to the entire tax imposed by this chapter of each spouse for such year shall be joint and several.'"

The SPEAKER. The question is on the motion to recommit.

Mr. RAYBURN. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 159, nays 258, answered "present" 1, not voting 12, as follows:

ANSWERED "PRESENT"—1

Cole, N. Y.

NOT VOTING 12

Bennett, Mo.
Combs
Coudert
Dirksen
Judd
Kefauver
Kilburn
Monroney
Morrison
Poage
Smith, Maine
Thomas, N. J.

So the motion to recommit was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Morrison for, with Mrs. Smith of Maine against.

Mr. Kefauver for, with Mr. Bennett of Missouri against.

Mr. Poage for, with Mr. Coudert against.

Mr. COLE of New York. Mr. Speaker, I have arranged a pair with the gentleman from Oklahoma, Mr. MONRONEY, who could not be present today. If present he would have voted "yea"; therefore I withdraw my vote and vote "present."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

Mr. HALLECK. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 297, nays 120, answered "present" 1, not voting 12, as follows:

ANSWERED "PRESENT"—1

Cole, N. Y.

NOT VOTING—12

Bennett, Mo.
Coudert
Dirksen
Judd
Kefauver
Kilburn
Monroney
Morrison
Poage
Smith, Maine
Thomas, N. J.
Tollefson

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Cole of New York for, with Mr. Monroney against.

General pairs until further notice:

Mr. Bennett of Missouri with Mr. Morrison.
Mr. Coudert with Mr. Kefauver.
Mrs. Smith of Maine with Mr. Poage.

Mr. COLE of New York. Mr. Speaker, may I again inquire if the gentleman from Oklahoma [Mr. MONRONEY] is recorded?

The SPEAKER. He is not recorded.

Mr. COLE of New York. The gentleman from Oklahoma and I have a live pair. He is unable to be present. If present he would have voted "no." I therefore withdraw my vote and vote "Present."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate insists upon its amendment to the bill (H. R. 2192) entitled "An act for the relief of the Massman Construction Co.," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. WILEY, Mr. DONNELL, and Mr. MCGRATH to be the conferees on the part of the Senate.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Miller, one of his secretaries.

LOUIS H. DEAVER—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 517)

The SPEAKER laid before the House the following veto message from the President of the United States:

To the House of Representatives:

I return herewith without my approval H. R. 3111, a bill "for the relief of Louis H. Deaver."

The bill authorizes and directs the Bureau of Employees' Compensation of the Federal Security Agency to receive the claim of Louis H. Deaver, of Tuthill, S. Dak., who allegedly was permanently disabled as the result of an injury received in August 1921, while employed as postmaster at Cody, Nebr., and authorizes said Bureau to consider and act upon the claim under the provisions of the Federal Employees' Compensation Act, notwithstanding the time limitations contained in said act within which claims thereunder must be filed. The bill further provides that any claim authorized by this measure shall be filed not later than 6 months after the date of enactment and that no benefits shall accrue prior to the approval of this measure.

It appears that Mr. Deaver was appointed postmaster at Cody, Nebr., on April 12, 1913, when the office was in the fourth class, and that the office was advanced to the third class in 1916, and Mr. Deaver was appointed and reappointed for five consecutive 4-year terms to that third-class office, having served therein until January 30, 1934. It further appears that while Mr. Deaver claims to have sustained an injury in August 1921, in the handling of mail bags, no claim was made with respect thereto, but on January 2, 1936, he wrote to a Member of Congress asking aid in procuring compensation on account of the injuries, and on May 20, 1940, he wrote the Post Office Department asking for financial assistance in the way of a pension or some sort of compensation by reason of the injury he claims to have sustained in August 1921. Mr. Deaver is now approximately 75 years of age.

The proposal contained in this measure is objectionable, first, by reason of the fact that at the time of the alleged injury Mr. Deaver was an "officer" as distinguished from an "employee," and officers of the Federal Government were not at that time, and are not now, entitled to benefits under the Federal Employees' Compensation Act of 1916, as amended. Second, even if Mr. Deaver had been an employee of the Federal Government at the time of the alleged injury, it would be practically impossible to develop evidence at this late date—some 27 years after the alleged injury—as to the circumstances under which the injury occurred, and especially in connection with a hernia injury. Finally, the approval of this measure would be discriminatory since it would extend to Mr. Deaver privileges not available to other officers and employees of the Federal Government, especially in cases where injuries are alleged to have occurred many years ago.

While I feel constrained to withhold my approval of this measure, I would be glad to approve a general measure which would make the provisions of the Federal Employees' Compensation Act applicable to the civilian officers of the Federal Government, effective from the date of such enactment, if such civilian officers are injured in the performance of their duties and comply with the time limitations required by the act in the filing of claims thereunder.

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 31, 1948.*

The SPEAKER. The objections of the President will be spread upon the Journal, the bill referred to the Committee on the Judiciary, and the message ordered to be printed.

THE ECONOMIC SITUATION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 516)

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, together with the accompanying papers, referred to the Committee of the Whole House on the State of the Union and ordered to be printed:

To the Congress of the United States:

In the state of the Union message on January 7, 1948, I spoke of five great goals toward which we should strive in our constant effort to strengthen our democracy and improve the welfare of our people. The first of these is to secure fully our essential human rights. I am now presenting to the Congress my recommendations for legislation to carry us forward toward that goal.

This Nation was founded by men and women who sought these shores that they might enjoy greater freedom and greater opportunity than they had known before. The founders of the United States proclaimed to the world the American belief that all men are created equal, and that governments are instituted to secure the inalienable rights with which all men are endowed. In the Declaration of Independence and the Constitution of the United States, they eloquently expressed the aspirations of all mankind for equality and freedom.

These ideals inspired the peoples of other lands, and their practical fulfillment made the United States the hope of the oppressed everywhere. Throughout our history men and women of all colors and creeds, of all races and religions, have come to this country to escape tyranny and discrimination. Millions strong, they have helped build this democratic Nation and have constantly reinforced our devotion to the great ideals of liberty and equality. With those who preceded them, they have helped to fashion and strengthen our American faith—a faith that can be simply stated:

We believe that all men are created equal and that they have the right to equal justice under law.

We believe that all men have the right to freedom of thought and of expression and the right to worship as they please.

We believe that all men are entitled to equal opportunities for jobs, for homes, for good health, and for education.

We believe that all men should have a voice in their Government and that Government should protect, not usurp, the rights of the people.

These are the basic civil rights which are the source and the support of our democracy.

Today, the American people enjoy more freedom and opportunity than ever before. Never in our history has there been better reason to hope for the complete realization of the ideals of liberty and equality.

We shall not, however, finally achieve the ideals for which this Nation was founded so long as any American suffers discrimination as a result of his race, or religion, or color, or the land of origin of his forefathers.

Unfortunately, there still are examples—flagrant examples—of discrimination which are utterly contrary to our ideals. Not all groups of our population are free from the fear of violence. Not all groups are free to live and work where they please or to improve their conditions of life by their own efforts. Not all groups enjoy the full privileges of citizenship and participation in the government under which they live.

We cannot be satisfied until all our people have equal opportunities for jobs, for homes, for education, for health, and for political expression, and until all our people have equal protection under the law.

One year ago I appointed a committee of 15 distinguished Americans and asked them to appraise the condition of our civil rights and to recommend appropriate action by Federal, State, and local governments.

The committee's appraisal has resulted in a frank and revealing report. This report emphasizes that our basic human freedoms are better cared for and more vigilantly defended than ever before. But it also makes clear that there is a serious gap between our ideals and some of our practices. This gap must be closed.

This will take the strong efforts of each of us individually, and all of us acting

together through voluntary organizations and our governments.

The protection of civil rights begins with the mutual respect for the rights of others which all of us should practice in our daily lives. Through organizations in every community—in all parts of the country—we must continue to develop practical, workable arrangements for achieving greater tolerance and brotherhood.

The protection of civil rights is the duty of every government which derives its powers from the consent of the people. This is usually true of local, State, and national governments. There is much that the States can and should do at this time to extend their protection of civil rights. Wherever the law enforcement measures of State and local governments are inadequate to discharge this primary function of government, these measures should be strengthened and improved.

The Federal Government has a clear duty to see that constitutional guaranties of individual liberties and of equal protection under the laws are not denied or abridged anywhere in our Union. That duty is shared by all three branches of the Government, but it can be fulfilled only if the Congress enacts modern, comprehensive civil-rights laws, adequate to the needs of the day, and demonstrating our continuing faith in the free way of life.

I recommend, therefore, that the Congress enact legislation at this session directed toward the following specific objectives:

1. Establishing a permanent Commission on Civil Rights, a Joint Congressional Committee on Civil Rights, and a Civil Rights Division in the Department of Justice.
2. Strengthening existing civil-rights statutes.
3. Providing Federal protection against lynching.
4. Protecting more adequately the right to vote.
5. Establishing a Fair Employment Practice Commission to prevent unfair discrimination in employment.
6. Prohibiting discriminaton in interstate transportation facilities.
7. Providing home rule and suffrage in Presidential elections for the residents of the District of Columbia.
8. Providing statehood for Hawaii and Alaska and a greater measure of self-government for our island possessions.
9. Equalizing the opportunities for residents of the United States to become naturalized citizens.
10. Settling the evacuation claims of Japanese-Americans.

STRENGTHENING THE GOVERNMENT ORGANIZATION

As a first step, we must strengthen the organization of the Federal Government in order to enforce civil-rights legislation more adequately and to watch over the state of our traditional liberties.

I recommend that the Congress establish a permanent Commission on Civil Rights reporting to the President. The Commission should continuously review our civil-rights policies and practices, study specific problems, and make recommendations to the President at frequent intervals. It should work with other agencies of the Federal Government, with State and local governments, and with private organizations.

I also suggest that the Congress establish a Joint Congressional Committee on Civil Rights. This committee should make a continuing study of legislative matters relating to civil rights and should consider means of improving respect for and enforcement of those rights.

These two bodies together should keep all of us continuously aware of the condition of civil rights in the United States and keep us alert to opportunities to improve their protection.

To provide for better enforcement of Federal civil rights laws there will be established a Division of Civil Rights in the Department of Justice. I recommend that the Congress provide for an additional Assistant Attorney General to supervise this Division.

STRENGTHENING EXISTING CIVIL-RIGHTS STATUTES

I recommend that the Congress amend and strengthen the existing provisions of Federal law which safeguard the right to vote and the right to safety and security of person and property. These provisions are the basis for our present civil-rights enforcement program.

Section 51 of title 18 of the United States Code, which now gives protection to citizens in the enjoyment of rights secured by the Constitution or Federal laws, needs to be strengthened in two respects. In its present form this section protects persons only if they are citizens, and it affords protection only against conspiracies by two or more persons. This protection should be extended to all inhabitants of the United States, whether or not they are citizens, and should be afforded against infringement by persons acting individually as well as in conspiracy.

Section 52 of title 18 of the United States Code, which now gives general protection to individuals against the deprivation of federally secured rights by public officers, has proved to be inadequate in some cases because of the generality of its language. An enumeration of the principal rights protected under this section is needed to make more definite and certain the protection which the section affords.

FEDERAL PROTECTION AGAINST LYNCHING

A specific Federal measure is needed to deal with the crime of lynching—against which I cannot speak too strongly. It is a principle of our democracy, written into our Constitution, that every person accused of an offense against the law shall have a fair, orderly trial in an impartial court. We have made great progress toward this end, but I regret to say that lynching has not yet finally disappeared from our land. So long as one person walks in fear of lynching, we shall not have achieved equal justice under law. I call upon the Congress to take decisive action against this crime.

PROTECTING THE RIGHT TO VOTE

Under the Constitution, the right of all properly qualified citizens to vote is beyond question. Yet the exercise of this right is still subject to interference. Some individuals are prevented from voting by isolated acts of intimidation. Some whole groups are prevented by outmoded policies prevailing in certain States or communities.

We need stronger statutory protection of the right to vote. I urge the Congress to enact legislation forbidding interference by public officers or private persons with the right of qualified citizens to participate in primary, special, and general elections in which Federal officers are to be chosen. This legislation should extend to elections for State as well as Federal officers insofar as interference with the right to vote results from discriminatory action by public officers based on race, color, or other unreasonable classification.

Requirements for the payment of poll taxes also interfere with the right to vote. There are still seven States which, by their constitutions, place this barrier between their citizens and the ballot box. The American people would welcome voluntary action on the part of these States to remove this barrier. Nevertheless, I believe the Congress should enact measures insuring that the right to vote in elections for Federal officers shall not be contingent upon the payment of taxes.

I wish to make it clear that the enactment of the measures I have recommended will in no sense result in Federal conduct of elections. They are designed to give qualified citizens Federal protection of their right to vote. The actual conduct of elections, as always, will remain the responsibility of State governments.

FAIR EMPLOYMENT PRACTICE COMMISSION

We in the United States believe that all men are entitled to equality of opportunity. Racial, religious, and other invidious forms of discrimination deprive the individual of an equal chance to develop and utilize his talents and to enjoy the rewards of his efforts.

Once more I repeat my request that the Congress enact fair employment practice legislation prohibiting discrimination in employment based on race, color, religion, or national origin. The legislation should create a Fair Employment Practice Commission with authority to prevent discrimination by employers and labor unions, trade and professional associations, and Government agencies and employment bureaus. The degree of effectiveness which the wartime Fair Employment Practice Committee attained shows that it is possible to equalize job opportunity by Government action and thus to eliminate the influence of prejudice in employment.

INTERSTATE TRANSPORTATION

The channels of interstate commerce should be open to all Americans on a basis of complete equality. The Supreme Court has recently declared unconstitutional State laws requiring segregation on

public carriers in interstate travel. Company regulations must not be allowed to replace unconstitutional State laws. I urge the Congress to prohibit discrimination and segregation, in the use of interstate transportation facilities, by both public officers and the employees of private companies.

THE DISTRICT OF COLUMBIA

I am in full accord with the principle of local self-government for residents of the District of Columbia. In addition, I believe that the Constitution should be amended to extend suffrage in Presidential elections to the residents of the District.

The District of Columbia should be a true symbol of American freedom and democracy for our own people, and for the people of the world. It is my earnest hope that the Congress will promptly give the citizens of the District of Columbia their own local, elective government. They themselves can then deal with the inequalities arising from segregation in the schools and other public facilities, and from racial barriers to places of public accommodation which now exist for one-third of the District's population.

The present inequalities in essential services are primarily a problem for the District itself, but they are also of great concern to the whole Nation. Failing local corrective action in the near future, the Congress should enact a model civil-rights law for the Nation's Capital.

OUR TERRITORIES AND POSSESSIONS

The present political status of our Territories and possessions impairs the enjoyment of civil rights by their residents. I have in the past recommended legislation granting statehood to Alaska and Hawaii, and organic acts for Guam and American Samoa, including a grant of citizenship to the people of these Pacific islands. I repeat these recommendations.

Furthermore, the residents of the Virgin Islands should be granted an increasing measure of self-government, and the people of Puerto Rico should be allowed to choose their form of government and their ultimate status with respect to the United States.

EQUALITY IN NATURALIZATION

All properly qualified legal residents of the United States should be allowed to become citizens without regard to race, color, religion, or national origin. The Congress has recently removed the bars which formerly prevented persons from China, India, and the Philippines from becoming naturalized citizens. I urge the Congress to remove the remaining racial or nationality barriers which stand in the way of citizenship for some residents of our country.

EVACUATION CLAIMS OF THE JAPANESE-AMERICANS

During the last war more than 100,000 Japanese-Americans were evacuated from their homes in the Pacific States solely because of their racial origin. Many of these people suffered property and business losses as a result of this forced evacuation and through no fault of their own. The Congress has before it legislation establishing a procedure by which claims based upon these losses can be promptly considered and settled. I trust that favorable action on this legislation will soon be taken.

The legislation I have recommended for enactment by the Congress at the present session is a minimum program if the Federal Government is to fulfill its obligation of insuring the constitutional guaranties of individual liberties and of equal protection under the law.

Under the authority of existing law, the Executive branch is taking every possible action to improve the enforcement of the civil-rights statutes and to eliminate discrimination in Federal employment, in providing Federal services and facilities, and in the armed forces.

I have already referred to the establishment of the Civil Rights Division of the Department of Justice. The Federal Bureau of Investigation will work closely with this new Division in the investigation of Federal civil-rights cases. Specialized training is being given to the Bureau's agents so that they may render more effective service in this difficult field of law enforcement.

It is the settled policy of the United States Government that there shall be no discrimination in Federal employment or in providing Federal services and facilities. Steady progress has been made toward this objective in recent years. I shall shortly issue an Executive order containing a comprehensive restatement of the Federal nondiscrimination policy, together with appropriate measures to insure compliance.

During the recent war and in the years since its close we have made much progress toward equality of opportunity in our armed services without regard to race, color, religion, or national origin. I have instructed the Secretary of Defense to take steps to have the remaining instances of discrimination in the armed services eliminated as rapidly as possible. The personnel policies and practices of all the services in this regard will be made consistent.

I have instructed the Secretary of the Army to investigate the status of civil rights in the Panama Canal Zone with a view to eliminating such discrimination as may exist there. If legislation is necessary, I shall make appropriate recommendations to the Congress.

The position of the United States in the world today makes it especially urgent that we adopt these measures to secure for all our people their essential rights.

The peoples of the world are faced with the choice of freedom or enslavement, a choice between a form of government which harnesses the state in the service of the individual and a form of government which chains the individual to the needs of the state.

We in the United States are working in company with other nations who share our desire for enduring world peace and who believe with us that, above all else, men must be free. We are striving to build a world family of nations—a world where men may live under governments of their own choosing and under laws of their own making.

As part of that endeavor, the Commission on Human Rights of the United Nations is now engaged in preparing an international bill of human rights by which the nations of the world may bind themselves by international covenant to give effect to basic human rights and fundamental freedoms. We have played a leading role in this undertaking designed to create a world order of law and justice fully protective of the rights and the dignity of the individual.

To be effective in these efforts, we must protect our civil rights so that by providing all our people with the maximum enjoyment of personal freedom and personal opportunity we shall be a stronger nation—stronger in our leadership, stronger in our moral position, stronger in the deeper satisfactions of a united citizenry.

We know that our democracy is not perfect. But we do know that it offers a fuller, freer, happier life to our people than any totalitarian nation has ever offered.

If we wish to inspire the peoples of the world whose freedom is in jeopardy, if we wish to restore hope to those who have already lost their civil liberties, if we wish to fulfill the promise that is ours, we must correct the remaining imperfections in our practice of democracy.

We know the way. We need only the will.

HARRY S. TRUMAN.

THE WHITE HOUSE, *February 2, 1948.*

EXTENSION OF REMARKS

Mr. REED of New York. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. ARNOLD] may insert in the Appendix of the RECORD his speech, together with the speech made by the gentleman from Iowa [Mr. CUNNINGHAM] at the Good Roads Association meeting in which he properly extolled the virtues of our present Speaker.

The SPEAKER. Is there objection to the request of the gentleman from New York [Mr. REED]?

There was no objection.

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD in two instances, in one to insert an editorial from the Maryland Gazette, the oldest newspaper in the United States, on the tax bill; and also an address delivered by Dr. C. S. Duncan before the annual meeting of the railway treasury officers at Swampscott, Mass., last January.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

SPECIAL ORDER GRANTED

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 20 minutes after any other special orders today, and to include as a part of my remarks an article from a commercial paper regarding currency, notwithstanding the estimated cost which it may entail.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

EXTENSION OF REMARKS

Mr. MACKINNON asked and was granted permission to extend his remarks in the Appendix of the RECORD.

Mr. WOODRUFF asked and was granted permission to extend his remarks in the RECORD and include five different articles on the question of the Marshall plan.

Mr. HOFFMAN asked and was granted permission to extend his remarks in the RECORD in four separate instances and to include newspaper articles and letters.

Mr. WOODRUFF. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include an address by George Weller, foreign correspondent of the Chicago Daily News, and a Pulitzer prize winner, on the subject of the Marshall plan and what it means to Europe and what it means to us. In that connection, Mr. Speaker, this gentleman is undoubtedly as fully informed about conditions in Europe as any man living. He certainly ought to be able to present his views, and he does present his views in a way that will be helpful to the Members of this House.

I have submitted this to the Public Printer and I find it will cost $260.34. I ask unanimous consent that it be printed in the RECORD as a part of my remarks, notwithstanding the additional cost.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. WOODRUFF]?

There was no objection.

Mr. BRADLEY asked and was given permission to extend his remarks in the Appendix of the RECORD and include therein an article from the Southgate Press of Southgate, Calif.

Mr. BUSBEY (at the request of Mr. HALLECK) was given permission to extend his remarks in the RECORD and include a radio address.

Mr. JOHNSON of Oklahoma asked and was given permission to extend his remarks in the Appendix of the RECORD.

Mr. MILLER of California asked and was given permission to extend his remarks in the Appendix of the RECORD and include certain excerpts from a program held recently in Oakland, Calif., by the B'nai B'rith Lodge in which they honored General Clark, Dr. Sproul, of the University of California, and California Supreme Court Judge Gibson.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. JONES of Washington (at the request of Mr. TOLLEFSON), indefinitely, on account of illness.

To Mr. COUDERT, indefinitely, on account of illness.

To Mr. JOHNSON of Oklahoma, for 28 days, on account of official business.

To Mr. TALLE, for the remainder of this week, for the purpose of attending to business in his district.

The SPEAKER. Under the previous order of the House, the gentleman from California [Mr. JOHNSON] is recognized for 60 minutes.

RETIREMENT FOR RESERVE COMPONENTS OF OUR ARMED SERVICES—H. R. 2744

Mr. JOHNSON of California. Mr. Speaker, for a short while this afternoon I wish to discuss the matter of retirement for reserve components of our armed services. It is my purpose today to tell you briefly a little bit about a bill which was reported from a subcommittee of the Committee on the Armed Services, of which subcommittee I was chairman. I want to emphasize the importance of this bill and the need for its enactment. Also I wish to tell you that we are going to ask the Rules Committee for a rule on this bill. If any of you are interested and will support our application we will greatly appreciate it.

The bill referred to is the bill H. R. 2744 of which the gentleman from Louisiana [Mr. BROOKS] is the author. I might say he is the pioneer in trying to develop the reserves of the Army, Air Force, and the Navy. In the last Congress a bill similar to H. R. 2744 of which he was the author passed the House but unfortunately it was lost in the Senate legislative log jam, at the end of the Seventy-ninth Congress and never received consideration by the Senate itself.

In this Congress we again took up the matter and after very prolonged hearings we recommended the bill which bears the name of the gentleman from Louisiana [Mr. BROOKS] and the number H. R. 2744.

Very briefly, this is what the bill provides: We are departing from the old plan that we have had in our country for over a century of having Reserves serve without pay, except when on active duty, and are proposing to offer incentives to men who devote their time to reserve service, by offering them retirement pay, based on length of service. The pay will be modest but it will be an incentive we think for men to stay in the Reserves.

Without exception every leading man in the Army of the United States, in the Regular Army and in all the other components of our armed services, believes and states emphatically that in order to win a war we must have Reserves. The First World War showed the importance of the Reserve components. Those of you who were in that war—and I was one—know that over two-thirds of the divisions that fought on the front and won the victory and that made the sacrifices were National Guard and Reserve divisions. I can recount some of the numbers for you. The Thirty-second, the Twenty-seventh, the Twenty-ninth, the Twenty-eighth, the Twenty-sixth, the Thirty-fifth, the Thirty-sixth, the Forty-second, and others that served tremendously well.

Our national policy since the inception of this country has been to have a small professional Army and in times of conflict and stress to suddenly expand that by means of the Reserve system through the National Guard and the Organized Reserves. It is all the more important today that we have a group of Reserves in our Army. In my humble judgment, it is especially important that we have well-trained junior officers who can lead men in the event of conflict. I need not tell you here today that in the event of a conflict we will have no time to prepare; we will have no cushion of distance, we will have no cushion of climate, no cushion of latitude or geography. If a war should break out against us we would have to be partially ready the very first day the war started. We could receive a devastating blow on the first day the war started.

The trouble spots of the world are in the northern part of the hemisphere, from 30 degrees latitude north. From any point in that area we can today go to any other important point and back after dropping bombs. You can, therefore, see how imperative it is that we be at least partially prepared in the event of a sudden conflict.

Mr. Speaker, I want to offer another thought for consideration that I think is even more important. Every man I have ever met in the Army, be he enlisted man or officer, has always told me that the purpose of fighting our last two wars was to end the war game, to find some means of collective security that would make the world safe to live in. We fought the first war to end all wars. Some of us believed that slogan was right. Some of us came out of that war firmly convinced that we had played our part to end all wars.

As soon as our sons got old enough to fight we were in another war, a war much more devastating. Let us consider for a moment our bonded debt in the two wars. Our bonded debt in the First World War was roughly $25,000,000,000. We staggered under it and thought it might wreck our economic system. In the war just closed the bonded debt because of the war was finally $269,000,000,000. In other words, in just the short space of a quarter of a century the economic cost of war rose over 10 times. Concurrently with that the capacity for destruction rose in different types of destructive missiles from 10 to 100 times between the First and Second World Wars.

It is my firm conviction that to bring about a peaceful world through collaboration with other countries, to bring about the agreements we must have and the understandings that are so essential to have a world of peace, we must have strength. We can only obtain it through strength, and when I say strength, I mean economic strength, I mean military strength, I mean moral strength. I mean an absolute determination on the part of our people that if trouble comes they will be willing to fight to defend their country. This bill provides one of the steps, in my humble judgment, that will give us the strength in its various phases and activities to bring about the cooperation we have to have in order to achieve world peace.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of California. I yield to the gentleman from Oklahoma.

Mr. ALBERT. The gentleman is making an excellent statement, with which

I thoroughly agree. As the gentleman knows, we have in the United States today a vast reserve army of battle-trained men. Unless we pass this legislation the investment we have made in that training will eventually be lost. These men are forgetting what they learned in time of war. We should do all we can to encourage continued participation on the part of these men who have had 3, 4, and 5 years of actual wartime experience as a part of our great reserve Army which I think we will need for the next few years. I certainly appreciate the fine statement the gentleman is making.

Mr. JOHNSON of California. I thank the gentleman very much for his statement. It is men like the gentleman that I want to encourage to participate in the Reserve activities of the United States Army. He served with distinction during the past war, and we should use his experience and talents. Seated on the floor of this House are men like the gentleman, as well as many others on the outside, who looked down a barrelhead during this war, who sacrificed from 2 to 5 years of their time that they could have devoted to their profession or vocation. We think this bill enables them to participate and offers them a small incentive for the time and the effort that they will give. I hope and believe that that typifies the sentiment of many men and women who served in this war.

Coming to the bill, it provides roughly as follows: That in order to obtain the benefits of this retirement bill you would have to serve a minimum of 20 years, and in various categories you would have to serve also a minimum of 3 years in some cases and down to one-half year in other cases of active service; in other words, a man who did not serve in either war would have to serve a minimum of 3 years following the Second World War. A man, for instance, who before the last war had served in the Reserve some 10 or 15 years and served a total of 20 years must have 4 years of active service, 1 year of which must be after the close of the last war. Many men in Congress will have complied with that by serving perhaps 4 years in the active service during the recent war, but they would have to serve 1 year following the war; and in a few instances only 6 months.

Our committee is making provision for what we call extended active service, so the men would serve from maybe 15 days perhaps to a high of 90 days to get their active service. How is the computation made to pay these men? Here is the plan: For each year of inactive service, when you are on the Reserve rolls or on the National Guard rolls, you will receive one-half of 1 percent credit. Suppose you serve 18 years. In that way you would acquire what I call 9 percent of credit. Then, if you served 3 years in active service, part of which could be in the World War, you would receive 2½ percent per year for each year of active service. That would be 7½ percent. So, you would get 9 percent for inactive service, 7½ percent for other service, which would make a total of 16½ percent. You would then, when you became 60 years of age, be paid 16½ percent of the pay of the highest rank you satisfactorily held. Most of the men that would serve that length of time in the Army would be at least majors and probably they would go up to colonels, and they would receive longevity pay based on the total number of years in service, both active and inactive; in other words, you would receive a fee or annuity when you were 60 years of age that would last throughout your life that in the general average, considering all the cases that we were able to figure out, would be $1,900. There would be some higher and some lower; in other words, you would receive approximately $150 a month for the rest of your life if you had the active service I indicated in my discussion.

Here is the way that would work: In addition to receiving pay for your active service, this annuity, if you bought it and spent 23 years paying for it, would cost you $406 a year for 23 years. So, the effect of this bill is buying an annuity at Government expense for you which will begin to be paid at the age of 60. To give another illustration, using an enlisted man: If he served 20 years and, say 3 years of which were after the war, a man who was not in the World War, and he attained the position of staff sergeant, he would receive roughly $359 retirement benefits at the age of 60 for the rest of his life; in other words, he would get about $30 a month for that service as an enlisted man, which would mean if he bought an annuity over that length of time it would cost him about $100 a year. This retirement pay would in effect be deferred payment for his service.

The way to look on it is that for every year of service that you get, in addition to your pay you will receive the equivalent of the insurance premium you would have to spend to get that annuity. We believe that would hold a good many men on the list. At the same time we are not unmindful of the fact that many men as they get older get married, they get commitments, they get obligations, they move into different parts of the country, and they cannot carry on this continuous service. So a great many men would drop out on the way up to the 60 years of age or on the way up to the 20 years or more of service which they must have. This means that only a very small fraction of these men would ever obtain this annuity, but it does mean that we would have a great many Reserves on our list of 3, 5, 7, 10, 12, and even 15 years of service, and we would build up a reserve list that would be a hundredfold as big in the aggregate of service of the men as we had at the beginning of the last war, and the need for them is almost a hundredfold what it was at the time the last war broke out.

Mr. REEVES. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of California. I yield to the gentleman from Missouri.

Mr. REEVES. The problem as to how our Reserve forces may best be handled is a very vexing one. I believe the gentleman has made a keen analysis and an exceedingly clear presentation of the solution offered by the bill to which he has made reference. I congratulate him upon what he has told us today.

I should like to make this point: We are expending some billions of dollars a year at this time for the benefit of veterans simply because they are veterans and need some kind of assistance from the Government. It seems to me we have an opportunity to utilize this vast reservoir of trained manpower, battle-trained in a great many cases, as the nucleus of any fighting force we may be called on to utilize in the next few years.

I might point out in that connection that when World War II came upon us our battle-trained officers and enlisted reservists had not seen service for more than 20 years. As the matter now stands, if we should ever engage in another international conflict in the near future we would be in a position to utilize a big reservoir of men who had been service-trained within a comparatively recent period of time. It seems to me it is particularly important today that we apply a certain amount of the expenditure we are applying to veterans' benefits to preserving in some kind of organized training that great national asset which we will be desperately in need of in the event we become embroiled in another war.

I repeat my congratulations to the gentleman on a splendid presentation of this important bill.

Mr. JOHNSON of California. I appreciate the gentleman's comments tremendously, especially as they come from a veteran of the last war.

May I point out how nominal the cost of this bill will be. On the best estimates we could obtain we found that in 1949, assuming the bill had gone into effect in 1948 or 1947, the annual cost would be $52,000. The reason for that is that there are some officers who served in both wars who would be eligible under this law without any service after the second World War. That amount would gradually climb until in 1957—this was based on the assumption that the law would be passed in 1947—the total cost would be only $1,455,000. The cost, considering what I conceive to be the benefits of this thing, are very, very nominal.

I believe this is the key to one way of getting and holding reserve officers and reserve men in the ranks as well. As I pointed out before, these are the ones that have to win all our wars, if we are to properly interpret past experience.

Mr. GATHINGS. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of California. I yield.

Mr. GATHINGS. I served many years with the gentleman on the Committee on Military Affairs as it was then called. I know that when the gentleman goes into a committee room he does so to study a question fully and completely. I do appreciate the good work the gentleman has done, as well as the work of my colleague, the gentleman from Louisiana [Mr. BROOKS], in bringing this legislation to the floor. I hope the Committee on Rules will give you a rule at the earliest possible moment because it is highly essential that we do have these trained men and utilize the skills that they possess, because we never know

what will happen and we want to be ready for any eventuality.

I am heartily in accord with the gentleman's legislation.

Mr. JOHNSON of California. I thank the gentleman, and am especially grateful to my old associate on the Military Affairs Committee for his fine boost for this bill. I might say that we have the gentleman from Florida [Mr. SIKES] who has been a pioneer in this movement also. I would like to yield to the gentleman from Louisiana [Mr. BROOKS], the author of this bill, who has probbaly devoted more time, study, and effort to bring about the passage of a bill of this kind than any other man in the Congress in either House. I take pleasure in yielding to the gentleman from Louisiana [Mr. BROOKS].

Mr. BROOKS. Mr. Speaker, I join in the complementary remarks about my colleague the gentleman from California [Mr. JOHNSON], who is now addressing the House. He has shown great interest in Reserve legislation over a period of years, and especially since the end of the Second World War. He has worked as chairman of the subcommittee handling this retirement legislation and has worked long, arduously, and faithfully. Certainly he is entitled to be recognized as a man who is most interested in the safety and security of our country. I think you have made a splendid statement, sir, and I join with the other gentlemen in congratulating you on the statement you are now making about this bill.

May I say in addition to what you have already said that when this Nation came out of the Second World War, we had the mightiest Army and Navy that the world had ever seen. It was splendidly organized and equipped and certainly magnificently trained. They each did a magnificent job. The country decided to demobilize them as fast as we could. We got them out so fast that at times I felt they were getting in each other's way as they came out of the armed services. Then as they were leaving the service they were given an opportunity to show their interest in the Reserve components of the Army and Navy and Marine Corps by enlisting in the Reserve organization. The Army alone, I am told, obtained over a million voluntary enlistments in its organized Reserves from the enlisted men and officers. When demobilization ended we had available well over 1,000,000 Reservists who had expressed an interest in the Army. Today, through lack of interest and through lack of a program, the number has dwindled greatly. We have not been able to keep up with them. We do not know the addresses of the Reserves who are anxious and willing to serve. We have no substantial program for them. But, more important than that, Mr. Speaker, in my humble judgment, is the fact that we do not have a long-range program to offer them to keep them interested over a period of years in the work of the organized Reserves. This bill seeks to remedy that very thing. We have just today passed a bill in the House reducing taxes. I think the present bill could be called an economy measure. I do not know of any measure anywhere, Mr. Speaker, that will give the Government the return in service from men who are trained, and are willing to be trained, for as small a cost as is indicated in this bill. As the gentleman has just said, the first year will cost about $50,000 and at the end of a 10-year period it will cost about $1,500,000. When we make the comparison of expenditures of $11,000,000,000 over all for the Army and Navy and Marine forces, you can see the relative comparison under H. R. 2744.

May I just add to what has been said the fact that we began work on this bill in 1941. It has been built up over a period of years. Every provision of the bill has been weighed most carefully and exactly and has met the test. When the bill came out of the committee presided over by my distinguished colleague from California [Mr. JOHNSON], it had the endorsement of all the armed services; it had the endorsement of all patriotic organizations; it had the endorsement of every reserve organization. It came to the floor with the unanimous report of the committee.

A similar bill passed the House of Representatives last year by unanimous consent. It went to the Senate and came within a fraction of passing the Senate. Only the limited time due to the final days of the last session of Congress kept it from passing the Senate. So I say to you today, I know of no legislation which, in my humble opinion, will do as much at so little cost to build up and preserve the organized reserves of our country as will this retirement legislation.

Mr. JOHNSON of California. The gentleman has made his usual fine contribution. I want to congratulate him on his persistence in pressing this legislation for the last 6 years.

I now yield to the gentleman from South Carolina [Mr. DORN].

Mr. DORN. Mr. Speaker, I would like to add my endorsement of this bill. I think at a time like this when many different things are being discussed, this is very timely. I was one of the pioneers in getting universal military training started in my section of the country, but I think universal military training, for which I will vote, may give the Nation a false security. I am receiving petitions every day from the Women's Auxiliary of the American Legion, from the American Legion, signed by hundreds of people. They seem to think that is the only thing we need in national defense. But I may say that if we had 100,000,000 men armed in the United States, and did not have control of the air, it would not be worth one dime. So I wish to commend the gentleman. I will vote for universal military training. I took a leading part in the fight for the unification bill last year. I fought in executive session for months with some of the leaders of the Army and the Navy in order to get that bill out, but I think one point you mentioned is worth a lot to this Congress. That is what you had to say about north of the 30° latitude. The nearest point from any point in the Soviet Union to any point in North America is over the North Pole, where there are no highways and no sea lanes. The only force that can meet an attack from the north is an air force. Now, think that over for yourselves. I might add this, I am told that the temperature at 30,000 feet over the North Pole is 1° warmer than it is at 30,000 feet at the Equator. It makes no difference to air power whether you are flying over the North Pole or the Equator if you have to travel at 30,000 feet or more altitude.

I wish to commend the gentleman from California for what he had to say about the air force reserves, as well as the other components of the armed services reserve. May I say that in 1937 a Russian Stormovik plane flew from a point in Russia to San Francisco, a distance of between 6,000 and 7,000 miles, nonstop, flying, mind you, 11 years ago. That is still the world's nonstop long-distance flying record. Yet a lot of people say that Russia is too dumb to do this or that. I believe that today they have planes that can fly to San Francisco and back. I may be wrong, but I recall the experts were wrong when Japan attacked Pearl Harbor. Before that they told me they could knock the Japs out in 3 weeks. So when they tell me Russia is dumb, I do not agree with them. We need more people on this floor like the gentleman from California [Mr. JOHNSON] to bring things like this to the attention of Congress.

Mr. JOHNSON of California. I want to compliment the gentleman from South Carolina who was a member of the Air Forces in this war. I was a humble member of the Air Forces in the First World War.

I think it is fair to state that practically everything that happened in this war in the air was predicted by General Mitchell and others. It was just the unfolding not only of the dreams but of the plans of the Air Forces, especially those who had devoted their entire lives to this branch of our national security organization.

Mrs. ROGERS of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of California. I yield.

Mrs. ROGERS of Massachusetts. This would apply equally to the Navy as well as the Army?

Mr. JOHNSON of California. It would apply to every part of our armed services.

Mrs. ROGERS of Massachusetts. Apply equally to so-called naval air—I think that is the phrase they use now.

Mr. JOHNSON of California. Naval air and land air.

Mrs. ROGERS of Massachusetts. I sometimes think that the Navy is very much forgotten today. There seems to be a feeling that airplanes can leave this country, go to Russia and return—a very difficult feat. They certainly are going to need the Navy carriers in order to do that.

Mr. JOHNSON of California. This applies to every branch of the armed services, everything we have.

I now yield to the gentleman from Texas [Mr. TEAGUE], a veteran of World War II.

Mr. TEAGUE. Mr. Speaker, I agree that we must have the finest planes in the world, I agree that we must have the best equipment; but it is my belief also that the strength of this country will be found in the caliber of the men who operate those planes and that equip-

ment. I believe that in many cases in the recent war we had equipment inferior to that of our enemies. We won the war not because of superior equipment but because of the superiority of the American soldier. It was interesting to read in the papers about the big tank battles, but there was not one tank out of a thousand that started out intact that did not have three or four American boys to protect it.

I believe that one of the primary duties of the Department of Air during peacetime is to develop reserves. I believe that up to date they have not developed those reserves. This past summer during my trip to Texas I heard many criticisms concerning our reserve program. I came back to Washington and wrote letters to the 48 different departmental commanders in the United States and asked what the status of the reserves was in their States. About 71 percent of the replies I received said the main thing needed was some legislation and a good program from the Department of the Army and the Air Force. Thirty-eight percent mentioned the bill the gentleman has been discussing here today, the retirement bill. About 71 percent mentioned the inactive-duty-pay bill. I give this just as an example of how the people who defended us in the last war are thinking and I want to compliment the gentleman for taking a leading part in stimulating interest in our reserves.

It is my opinion that this Congress should not lose sight of the fact that the strength of this country will be the men in it and not necessarily the weapons we have. It is the duty of Congress to stimulate reserves and reserve programs. It is my opinion that this bill will do much to that end.

Mr. JOHNSON of California. I thank the gentleman for his contribution and wish to compliment him. He was a soldier in the last war, and a decorated one as well, who will carry the scars of battle to the end of his days.

The gentleman, in my opinion, has put his finger on an important function of this bill. As the gentleman stated, the man behind the gun, and the man in the tank, and the man who handles the plane is the important part of the picture; manpower and skilled manpower in every single rank is essential to win battles. We hope this bill, if it passes, will have the effect of producing such trained manpower.

I take pleasure in yielding to the gentleman from Florida, who has been very active in this field.

Mr. SIKES. My distinguished friend is taking the lead in a very worthy cause. We have come to know the gentleman from California, ROY JOHNSON, in this House, as one of its hardest workers and most valuable Members. I have had the pleasure of working with the gentleman from California, ROY JOHNSON, very closely in the Military Affairs Committee and later the Committee on the Armed Services on this and many other pieces of legislation. I know something about the work that went into it. More important, I know something about the need for this legislation. There is a place for a strong Reserve and a strong National Guard in this Nation, a very important place. At the moment it is the only thing that we have that provides a backlog of trained men. Every Member of Congress knows that we must have a backlog of trained men to implement our armed forces, make it possible for them to speedily get into action and to do a job after they are in action.

We have not progressed very far in building up a strong National Guard and a strong Reserve. There are paper plans, and those paper plans look good, but the work out in the fields has not gone very far. If an emergency were to occur tomorrow, the Reserve and the Guard would do all they could, but they are not organized and developed to the point that they could do very much.

The passage of this measure is one of the steps that would strengthen the Guard and the Reserve. One of the things it would do is to make for an effective organization that we must have if our security forces are to be what this Nation requires. I sincerely hope we can continue to have the type of fine support that has been evidenced by expressions made on the floor this afternoon so that the will of Congress can be worked toward the passage of H. R. 2744.

Mr. JOHNSON of California. I thank the gentleman for his contribution. As far as I am concerned, I do not deserve any special credit for work on this bill. It has been mostly a labor of love. But what more important work could we do than to try to find a means of protecting our institutions, our people, and our property? In my humble judgment, this bill will bring that about.

Mr. Speaker, I ask unanimous consent to include as part of my remarks a table showing the benefits and some of the features of this bill in table form.

The SPEAKER pro tempore (Mr. BISHOP). Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BROOKS. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of California. I yield to the gentleman from Louisiana.

Mr. BROOKS. I want to add this to what has been said in reference to the need for this bill. I made a study of the needs of the Reserve components of the armed services several years ago. In fact, I was interested in the ROTC prior to the Second World War. I checked into the situation to see what the chief problem of the Reserve was at that time. I found then the great trouble was in maintaining a continuing interest in the Reserves. I found that each year showed a 10-percent turn-over in the Officers' Reserve prior to the Second World War. In other words, every 10 years the country had a completely brand new organization of reserves.

After we train a man for 2 or 3 years he becomes very valuable as a Reserve officer, but if we lose him, immediately his value is lost to our establishment. The idea of retirement legislation when we first began to work upon it was to develop a means whereby we could obtain competent and adequate reserves. Then after they were obtained and trained to develop means whereby we could retain them over a period of years during their usefulness. Some of us felt that some little inducement such as retirement would be the means of continuing those men in service.

The Reserve components of the armed services are not in good shape at the present time. The reserves of the Army are weak; far below the required strength. We had hearings before our committee only recently and we were given figures to show that the National Guard had only about 240,000 men as against a goal of 660,000 for the National Guard alone.

This is not the only branch of the reserve components that are below required strength. We need legislation to stimulate interest in our reserve components, and after we have stimulated the interest and obtained these men, who are interested in serving their Nation, our problem is to maintain this interest. About 2 years ago I visited a great meeting of reservists in one of our cities. There must have been 1,000 present, and there was a great amount of enthusiasm in that meeting. I went back to this same place this year to a similar meeting. There were a much smaller number present and they seemed to lack enthusiasm. I noticed this lack of the enthusiasm which I found in the first meeting which I attended. It is deeply to be regretted, and I think Congress is certainly to blame, at least somewhat to blame, in not giving these men who want and need legislation at the present time.

Mr. JOHNSON of California. The gentleman has made his usual fine contribution. I want to point out that the evidence by men who know the military and the naval profession was overwhelming to the effect that the efficiency of a man increased much more rapidly in the accumulation of service; in other words, a man who served 3 years was probably worth 10 times as much as a man who served only 1 year, and that is why we are anxious to do something to hold in the service for some longer period these young reserve officers and enlisted men.

Mrs. LUSK. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of California. I yield to the gentlewoman from New Mexico.

Mrs. LUSK. I would like to say that it is my impression that there is a strong feeling among the members of the reserve forces of the Army, the Navy, and the Air Force that this legislation is very much needed. I think that those people, perhaps better than the average person, realize the cost of training during the past war and the importance of having that training immediately. In any future need that might arise, their experience and their organization would mean a great deal toward meeting the first line of defense. I think UMT is important; perhaps it is basic to any national-defense program, but this is another component of defense that we cannot overlook.

Mr. JOHNSON of California. I thank the gentlewoman very much for that statement. That very idea was emphasized by, what I call, the civilian soldier in this war who saw the fumbling that we did trying to get ourselves ready to

protect ourselves. I just want to emphasize again in connection with the comments of the lady from New Mexico that in the next war we will not have the time to get ready as we did in past wars. We must have trained men who are ready and will be ready when and if the emergency comes.

In closing, I want to mention again that I think every one of our committee and probably everyone who studied this matter looks upon this not as a war measure but as a peace measure. We are trying to retain our strength so that we can get the understandings and get the agreements that will bring about world peace. That is why we believe that the reservists are the ones who can help us more than anyone else. They are the key to peace, through reserve military strength.

Mr. CURTIS. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California. I yield to the gentleman from Nebraska.

Mr. CURTIS. Is there anything before the gentleman's committee in this legislation or other legislation that would provide some benefits or compensation to members of the National Guard who are injured or killed while training under official training orders?

Mr. JOHNSON of California. I do not know what the Federal legislation is, but in my State of California, and I think it is typical of other States, we have included national guardsmen under the workmen's compensation provisions, so if a man is injured—and I know of one very distressing case where a man had his back injured—he receives comparable benefits to what the workman receives who works in industry. Our law gives him the maximum amount of benefits.

Mr. CURTIS. But that is State legislation only.

Mr. JOHNSON of California. Yes. Of course, while a man is in the National Guard he is not in the Federal service, and I think the State has some responsibility as distinguished from the Federal Government. When he is called into active duty I believe there may be some Federal provision, but I am not sure as to the specific provision regarding it.

Mr. CURTIS. I call this situation to the attention of the gentleman. Perhaps in the old days when the National Guard was ground forces only, the State, in return for certain police protection that would come from having such a Guard, should stand the expense of some sort of benefit or protection to the members in that training. We have in the State of Nebraska a very fine air National Guard. It is making a definite contribution not to the defense of the State but to the defense of the Nation. We have had at least one case where a young father was killed while training under the official orders of this air National Guard. It seems to me that that is a responsibility of the Federal Government, that his unit is very definitely a part of the defense of the Republic, and certainly there should be some Federal law on it.

Mr. JOHNSON of California. Perhaps there should be, but of course it is a very minor matter in the total over-all picture of the reserves. I will say to the gentleman that I think the principle he advocates is correct, and I would be glad to join with him or to initiate myself legislation to take care of the situation that he mentions. It is a particularly aggravating situation in the air branch, where accidents are frequent and sometimes very sericus.

Mr. BROOKS. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of California. I yield to the gentleman from Louisiana.

Mr. BROOKS. I have a similar case in my home city, where a young man was injured participating in the activity of the ROTC in a high school. It involves a similar point. I think we have to go into it and give it some attention.

Mr. CURTIS. Does not the gentleman from Louisiana agree that especially in the case of the Air National Guard the increased hazard as well as the very type of training these men are put through inures to the benefit of the Federal Government?

Mr. BROOKS. I agree that the National Guard should come under this program, but it should especially apply to the Reserves.

Mr. JOHNSON of California. Mr. Speaker, I ask unanimous consent that all Members who participated in this discussion may be permitted to revise and extend their remarks, and I further ask that I be permitted to include in my remarks a table.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

(The matter referred to follows:)

Nondisability retirement plan

I. SERVICE REQUIREMENT FOR RESERVE COMPONENT RETIREMENT

Aggregate service credited at date of enactment	Total aggregate service required for eligibility	Total active Federal service required	Active Federal service subsequent to date of enactment
None	20 years	3 years	3 years.
Less than 5 years	do	do	2 years.
5 to 10 years	do	4 years	18 months.
10 to 15 years	do	do	1 year.
15 to 20 years	do	do	6 months.
Over 20 years	do	do	None.

II. GRADE IN WHICH RETIRED

Highest grade or rank, permanent or temporary, satisfactorily held during member's period of service.

III. RETIREMENT BENEFITS

A. Retirement pay commences upon attainment of age 60.

B. Pay formula: Two and one-half percent multiplied by years of active Federal service at time of retirement multiplied by active-duty base and longevity pay of grade or rank in which retired, plus one-half of 1 percent multiplied by years of inactive service at time of retirement multiplied by active-duty base and longevity pay of grade or rank in which retired; maximum at 75 percent of active-duty pay.

EXTENSION OF REMARKS

Mr. CURTIS asked and was given permission to extend his remarks in the RECORD and include a speech.

Mr. KEATING asked and was given permission to extend his remarks in the RECORD.

Mr. JOHNSON of Texas (at the request of Mr. BROOKS) was given permission to extend his remarks in the RECORD and include statements from two colleges and a statement from the general manager of the Guadalupe-Blanco River Authority of Texas.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Massachusetts [Mr. LANE] is recognized for 20 minutes.

OUR VETS NEED MORE SUBSISTENCE PAY

Mr. LANE. Mr. Speaker, millions of veterans who washed their hands of war now find that they are up against the toughest enemy of their experience: inflation.

They had planned to return to the peace and securty of civilian life, to resume their education which was interrupted by war, or to learn a trade.

The Congress of the United States, in an effort to compensate for the sacrifices made by these young men and women for whom "nothing was too good," passed the Servicemen's Readjustment Act, popularly known as the GI bill of rights.

To veterans and civilian alike, the title of this law, in popular speech, had a hopeful, healthy ring, consistent with the best of our traditions. In spite of the best-laid plans, there was a tragic inequality of sacrifice during World War II. Some were called upon to suffer and die, while others fattened on their martyrdom. This bothered the conscience of most Americans who believe in fair play. As early as 1944, the Congress determined to make up for this disparity when the veterans came home. Realizing the financial and psychological difficulties of readjustment to civilian life, the Congress made provisions for the veterans to continue their education or take on-the-job training as a free gift of a grateful Government, clearly expressing the will of the people.

Never before in the history of any nation had such a comprehensive plan to help the returning veterans been formulated. The veterans themselves, oriented to this fact, were hopeful that they could make up in some measure for the years of normal living which they had sacrificed in behalf of all of our people.

On the strength of the Government's promise to help, many of them married and then went to school, reversing the customary order of development. True, there was a housing shortage, which could have been anticipated and provided for during the 1930's, if some people had not been so greedy, but that was second-guessing. There was hope and opportunity for the returning veteran, and he was prepared to put up with the inconveniences of living with the in-laws or starting housekeeping in one room, as long as he could acquire an education or the "know-how" of a trade in the meantime.

Bravely, the young couples faced their double responsibility.

Gradually, however—almost imperceptibly—they discovered that their situation was deteriorating from day to day.

In spite of rigid economies, it was becoming impossible to make both ends meet. And the veterans found that the war was not yet over. The visible enemy was gone but they had another which was pressing against them from every side and against whom they could not fight back.

Many were being forced to the wall by inflation.

Everyone else in the United States, with the exception of the profiteers, had to contend against this unseen foe which was stealing their income and was forcing them back into debt and despair.

There was relief for some. Many workers were able to win pay increases which enabled them to keep their heads above the swelling costs of inflation. Others were going under, and among them were the veterans who had sacrificed once and were being called upon to sacrifice again.

The danger to their morale and to the future of our country because of this neglect is great. The present Congress must make immediate adjustments so that the intent of the GI bill of rights will measure up to the realities of life. It must increase allowances—subsistence allowances—to those veterans who are getting an education or training under the Servicemen's Readjustment Act. For no veteran can properly learn a profession or a trade while his very existence is being threatened by economic forces beyond his control.

The Government's solemn obligations to the veterans must be carried out in full and not in part.

The cost of living is rising each month, yet the veteran is held to a fixed level of subsistence payments. From my own knowledge the VA is frequently months behind in payments to these veterans. We all understand the terrific work load of meeting the various needs of 14,000,000 eligible veterans, but this is small comfort to those veterans who do not get enough subsistence allowance in the first place, and then find that the checks are lost, strayed, or stolen.

In hearings held by the Committee on Veterans' Affairs of the United States House of Representatives nearly a year ago, some startling testimony came to light revealing the plight of veterans in the colleges and universities.

The findings of a survey made by students of the graduate school of business at Stanford University showed that single and married veterans alike need twice as much as they receive through their Government monthly allotment. This was published in Higher Education, semimonthly publication of the United States Office of Education. Single men receiving $65 a month from the Government spend an average of about $120 and a minimum of $90. The average monthly recreational expense is $20; for rent they pay out $10 to $20.

To make up the difference, the survey at Stanford indicated that 85 percent of the single veterans draw on savings. About 30 percent have part-time jobs and some 20 percent are helped by their parents. Minimum cost of living for married veterans with $90 coming from the Government is $140, while the average is $180. Rents average $50, with a low of $40, and recreation amounts to $15.

Extra expenses of married men are made up in most cases by wives who work. Nearly two-thirds of the wives of Stanford veterans work, most of them full time. Among men with children 75 percent draw on savings and 37 percent work part time, since wives must remain at home.

One student, a sophomore in engineering, said that he had to carry fewer hours one semester so that he could work part time to meet the rising cost of living.

"My wife works," he said, "but we still can't make a go of it with high rent and zooming food costs. It takes about twice my allotment to get by each month."

A sophomore in the arts and sciences, also married, said that rent and food costs run his bill up to at least twice what the Government pays him, even with his pension added.

"My wife works, and I work part time," he said, "but our average expenses run about $185 monthly."

It seems that the university living costs for married men are about the same as those at Stanford. One married veteran, a junior in engineering, said, "We are expecting a baby, so my wife can't work. I work part time to meet high rent and food costs, since my $90 a month isn't adequate. If expenses go higher than that, I draw on my savings. With this baby coming, it's going to be tough on us."

Even earlier than this, on December 14, 1946, W. J. Bender, counselor for veterans at Harvard University, wrote to the editor of the Army Times:

Our experience is that almost no students under Public Law 346 can get by at Harvard on the Government subsistence payments alone. Students without dependents, however, can come close enough to it that their situation is not serious. Veterans with dependents are in a hopeless situation unless they have considerable savings, help from outside sources, scholarship aid, or the wife has a job. If there are children, it is, of course, difficult for the wife to earn.

If any increases in subsistence payments are to be made, I feel strongly that they should be made first to veterans with dependents and that the amount should vary with the number of dependents. This is in answer to your letter of December 5, addressed to President Conant.

From Columbia University, December 16, 1946:

However, the financial strain on veteran students appears to be increasing and a thorough congressional reconsideration of the whole level of subsistence payments is urgent and inevitable.

North, south, east, west—all over the Nation, colleges report that veteran students are hampered in their work by meager subsistence allowances which are falling far behind the rising cost of living.

And what about those veterans who are taking on-the-job-training? Their subsistence allowances are the same, plus a ceiling on wages they may receive from the employers who are training them in skills or trades. A graphic description of the situation is contained in the tabulation of on-the-job-trainees, by States, made by the Veterans of Foreign Wars, together with the recommendations of the V. F. W. State departments.

Confining ourselves to New England, here are the facts:

State	Those taking on-the-job training as of Dec. 31, 1946	Estimates of trainees affected on basis of 70 percent	Veterans of Foreign Wars department opinion as regards ceiling
Connecticut	8,777	6,144	Veterans are leaving training situations to seek more income; propose $250 single, $325 with dependents.
Maine	7,604	5,323	$175 single, $250 with dependents.
Massachusetts	25,599	17,919	Lack of incentive as result of Public Law 679 resulted in marked withdrawal of veterans from program: $250-$325.
New Hampshire	3,795	2,657	No report submitted.
Rhode Island	5,166	3,616	Cost-of-living ceilings imposed by Public Law 676 are too low: $200-$225.
Vermont	3,074	2,152	Wage ceiling discourages veteran from bettering himself; should no count earnings of worker outside program: $175-200.

You will note that I have given you some indication of the testimony submitted by the Veterans' Committee of the House of Representatives regarding the predicament of veterans seeking an education or on-the-job training as of 1 year ago.

The situation for them was difficult enough at that time.

What is it today?

The cost of food alone has gone up more than 20 percent during the past year, and the cost of all items has increased 15 percent.

The net result is that the buying power of the veteran's allotment, scant as it was, has been further reduced by 15 percent. Unless compensatory relief is forthcoming, and soon, many veterans will have to give up their ambitions and join the scramble for quick dollars to their own long-range disadvantage and that of the Nation.

The present Congress is considering several bills to make up for these deficiencies. In particular, H. R. 4212 would raise the subsistence allowance to $75 a month if without a dependent or dependents, to $105 a month with one dependent, or $120 per month if he has more than one dependent. H. R. 246 would raise ceilings on wages and allowances payable to veterans undergoing training on the job up to $250 a month for a veteran without a dependent, $325 per month for a veteran with one dependent, and $350 for a veteran with two or more dependents.

We have made a promise to our veterans.

It is our duty to carry out our obligation without short-changing them.

This calls for swift enactment of the two bills to raise subsistence allowances for students and trainees in justice to them and in realistic fulfillment of our commitments under the GI bill of rights.

This we will do.

(Mr. LANE asked and was granted permission to revise and extend his remarks and include a certain table.)

SPECIAL ORDER

The SPEAKER pro tempore (Mr. BISHOP). Under previous order of the House, the gentleman from Massachusetts [Mr. HESELTON] is recognized for 15 minutes.

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to revise and extend the remarks I am about to make and include therein certain quotations and excerpts; and I further ask unanimous consent to extend my remarks in the Appendix of the RECORD and include certain editorials.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, at the outset I wish to read two paragraphs from an editorial appearing in the Springfield Daily News, of Springfield, Mass., on Saturday evening. It is entitled "The Oil Fiasco."

The fuel-oil and kerosene shortage which has come in the middle of one of the most severe winters southern New England has experienced in a number of years is a disagreeable commentary on the failure of an industry to meet requirements it had every reason to anticipate.

The editorial concludes with this paragraph:

Like the petroleum industry, the Government has also failed the public and has added to domestic problems by authorizing excessive shipments of oil abroad. This latter policy is checked as of today under an order of the United States Department of Commerce drastically curtailing oil exports to Europe. That order is long overdue, but the fact that it was made at this late date is strong evidence that the oil situation in many parts of America is more grave than most people have been allowed to know heretofore.

I referred to that order last Friday afternoon when I received it. I find I was in error in one respect. I was advised that shipments of oil in the quota program to Japan and Ryukyus had been reduced from 1,600,000 barrels to 1,000,000 barrels. As a matter of fact, I understand now that the quota has been reduced from 1,600,000 barrels to 100,000 barrels, a reduction of 1,500,000 barrels.

As suggested in the editorial to which I have just referred, the action of the Department of Commerce, belated though it was, was clear recognition of the serious shortage which exists in this country, was recognition of the merits of the repeated recommendations which have been made by the Committee on Interstate and Foreign Commerce, and destroys completely the contentions made be representatives of the Government to that committee and to other committees here in Congress that we could not reduce this export program without jeopardizing the industrial productivity of these nations which are, after all, our friends.

Let me illustrate these untenable contentions by quoting from testimony before that committee:

On Tuesday, January 27, during the course of his testimony before the House Interstate and Foreign Commerce Committee, Hon. William C. Foster, Under Secretary of the Department of Commerce made a very significant statement, in response to a question of the chairman, as to the attitude as of that moment of the Department of Commerce.

The chairman asked:

Even though the picture may have been taken in the spring, it develops that the program that was then carried out by the Department of Commerce has resulted in the unfortunate situation that we have today facing us. So that whether the oil was shipped recently, or whether it was shipped before, the net result is that oil went out of this country that could have been used at the present time to advantage. And that brings me to this question:

When these allotments were made for foreign countries during this past year, 1947, was it contemplated by the Department of Commerce that there would be this shortage in our domestic use at the present time?

In other words, was the oil shipped out with full knowledge that there would be this shortage? And if so, why?

Mr. Foster replied:

Mr. Chairman, during the spring of 1947, the industry and most experts were of the opinion that there was plenty of oil. As the spring developed it became obvious that there was an increasing shortage of petroleum products. Due to that fact, on June 30, 1947, we again controlled the shipment of petroleum products for export. Up to that time there had been considerable question.

The shortage has progressively worsened, I think, well beyond the best judgment of the experts in the industry and in Government. We have been faced with a winter much more severe than we have had for many years. Due to that combination of factors, due to shortages of transportation, we are now faced with the situation which you point out.

However, it does seem to me that there are degrees of need, and certainly there is great need in other countries as well as in our own. You must recognize that the only control we have, Mr. Chairman, is to control the amount of material that leaves this country. We have no power to direct it to the particular urgent emergent conditions here. If we keep more petroleum here—and we are doing that; we have reduced the amount progressively ever since the shortage became apparent—if we keep it here it may go to the points of greatest need or it may not. We would have no control over that.

I do think we have a moral responsibility to the other nations who depend upon us for this material. I think we have a responsibility that goes back over many years. If we are to carry out the moral responsibility and the thing which has given this Nation its strength with the other freedom-loving countries I think we must continue to carry out that moral responsibility.

If we were today to shut off a small proportion of our total petroleum production it would mean the difference between complete collapse in some of those countries as contrasted with a very modest addition to our supplies in this country.

I am sure that this committee will give consideration to that point.

Compare that sort of a position with the action of that Department 3 days later in reducing exports in the first quarter by 2,200,000 barrels of petroleum products. The contentions demonstrate their own inherent unsoundness when the amount allocated for Japan and the Ryukyus was slashed from 1,600,000 barrels to 100,000 barrels—a cut of 1,500,000 barrels—a 94 percent reduction. If that can be done in that instance, who prepared the original allotment? If that sort of savings can be made in that area, what possible argument can be advanced justifying the relatively insignificant and totally inadequate cut to other countries?

Last Saturday I spent some time in the Department of Commerce and the Department of State in an endeavor to find out how this further reduction has been accomplished. I understood at that time that cables had been sent to the foreign countries, but I was not able to see copies of the cables at the time. This morning I asked the Office of International Trade to send me copies of their cables which I understood had been sent last week. A matter of 15 or 20 minutes ago I received a report that the cables had actually not been sent, that they are actually in the process of preparation and will be sent sometime this week, probably not earlier than Thursday. However that may be, it is particularly pertinent that the Committee on Interstate and Foreign Commerce this afternoon in a special meeting passed another resolution in which it recited every step it has taken successively from December 19 throughout the month of January resulting in a partial recognition of the validity of its recommendation on January 20 that there should be an immediate cessation of the exportation of all petroleum products until it can be determined whether they are at the expense of our national economy or our national security. The last four paragraphs are particularly pertinent. Under leave previously granted me I shall insert the entire resolution in the RECORD, but at the present time I wish to read this portion:

Whereas on January 30 the Department of Commerce issued another bulletin announcing the further revision and stating that this was done "in view of the serious shortage of fuel oil in certain areas of the United States"; and

Whereas this most recent revision does not result in the saving of heating and industrial oils necessary to alleviate the serious shortages in certain areas of the United States; and

Whereas during this week end conditions in certain areas of the United States have become even more acute: Now, therefore, be it

Resolved, That this committee insists that the Department of Commerce shall immediately consult with all countries to which allocations of petroleum and petroleum products were made on January 16, with a view to arranging without further delay a reduction in the quotas for the months of February and March of kerosene, gas oil, and distillate fuel oil, and residual fuel oil to at least 50 percent of the amount listed in the tabulation of January 16, 1948—

This following for the reason that, much to our astonishment, certain high officials in the Government who have testified before our committee indicated that previous recommendations had not reached up to their level. This sentence I call your attention to particularly—

and that certified copies of this resolution be delivered this date to the office of the President of the United States, to the Secretary of Commerce, to the Director of the Office of International Trade, Department of Commerce, and to the Chairman of the Board of Review.

I certainly trust, with those certified copies having been sent to the various offices in the executive departments who are responsible for the welfare, the comfort, and the safety of the people of this country, as well as for the possible prejudice any such program might bring to the comfort and welfare of people of other countries, that we will not have a repetition of any witness appearing before us and saying he has not been forewarned of what a committee of this House unanimously recommends be done on the part of the executive department.

In conclusion, I want to refer to certain astonishing figures. May I say, in connection with House Joint Resolution 312, which I introduced last week, dealing with the proposition of the historical use of our exports to other countries, that I acted on the assumption a 5-year period would be a fair period for prewar judgment. However, it was suggested to me Saturday, and I think rightly, that the years 1939 and 1940 should not be used because, since the invasion into Poland had begun and the European war was on, naturally conditions were abnormal. Consequently, I shall either introduce a new resolution using the period from 1934 to 1938, inclusive, or I shall ask the committee to consider an amendment providing for a substitution of those 5 years.

Using the official statistics of the Department of Commerce on Sunday, I analyzed the exports of certain kinds of fuel and industrial oils to the various countries on a historical basis, using that 5-year period. I think you may be interested in a few of the figures. I have not had a chance to verify all of them, but as soon as I do, I shall place them in the RECORD.

To Australia, under the program undertaken, assuming we would send four times as much fuel oil as was designated for the first quarter, and the Department testified that was at least a minimum of what we might anticipate, we would send 400,000 gallons of gas oil and distillate oil to Australia in the calendar year 1948. As a matter of fact, in the 5 years 1934 to 1938, inclusive, we sent only 119,152 gallons of that particular kind of petroleum product. In the case of the residuals we would send, if this program is not checked and revised immediately, 100,000 gallons of the residual oil. During this same 5 years we sent to Australia a total of only 31,416 gallons of that type of oil. In those two fields alone we would be sending 500,000 gallons of those two types of oil against a record of 5 years' experience in that period when we sent a total of only 150,568 gallons.

That points up some of the weaknesses on the part of the program which has been undertaken down town here.

To Belgium we would send residual oil under the program 400,000 gallons of that much-needed type of fuel oil. We only exported to that country in the years 1934 to 1938, 34,918 gallons against a proposed export of 400,000 gallons. I may add that in the years 1936 and 1938 we sent nothing of this kind over there to Belgium.

This is not of the same character, but at least it is indicative of the type of thing that is being done. It is proposed under program to send 1,200,000 gallons of gas oil and distillate fuel oil to France in the calendar year 1948. In the 5 years to which I have referred we sent only 1,469,784 gallons of that type of oil.

In other words, we would send, if we approve this program and it goes on unchecked, 269,784 gallons less than we sent in the entire 5-year period to which I have referred.

Now, there is another analysis which obviously should be made, and I know those of you who are interested in this problem expect me to make it and I promise that I will. Although it is clear that we are setting up a program or have set up a program which, if carried through, would produce those very amazing contradictory and absolutely unjustifiable results on any explanation which has been given to us yet, nevertheless my suggestion obviously is that we should average the exports and consequently take the figures I have given you and divide them by five. We can do that with the other countries which I have not mentioned. I hope to have that done sometime tomorrow and will insert it in the RECORD.

Earlier in my statement I read excerpts from an editorial which appeared in the Springfield Daily News of January 31, and I also read certain paragraphs from a resolution adopted by the Committee on Interstate and Foreign Commerce of the House. For the convenience of those interested in the matter and under permission previously given me, I set forth both in full at this point:

[From the Springfield (Mass.) Daily News of January 31, 1948]

THE OIL FIASCO

The fuel oil and kerosene shortage, which has come in the middle of one of the most severe winters southern New England has experienced in a number of years, is a disagreeable commentary on the failure of an industry to meet requirements it had every reason to anticipate.

Several factors have been emphasized repeatedly to explain the fuel oil and kerosene shortages by the petroleum industry. Among them is the explanation that oil consumption has undergone a tremendous increase in the postwar period. Obviously, the petroleum industry should have anticipated that increase. The industry knew that oil burner installations began to multiply by the thousands after the war ended. The industry knew that replacement of steam engines on the railroads with Diesels would require many millions of gallons of oil. The industry knew that greater use of oil by manufacturing plants would join in causing demands to accelerate. The petroleum industry encouraged every development, which would increase the use of oil at the same time.

Now the public is told in the midst of a shortage that the facilities of the petroleum industry have been unable to keep pace with demands for oil. The public is assured that the petroleum industry is expanding its refineries and processing equipment so that one day, perhaps 2 or 3 years hence, it will be in a position to supply everyone with oil.

Not a very pleasant outlook for those people and businessmen who have committed themselves and their finances to the use of oil, certainly.

When John L. Lewis was pushing up the price of coal by enforcing wage demands for the miners under the threat of strikes, which would have paralyzed the Nation, many turned to oil for security. The Daily News editorially encouraged this trend, little realizing that in the space of a year or two the petroleum industry would leave many oil users in much the same position if they had stuck to coal and Lewis had gone ahead with his strikes. The Daily News was not forewarned of the situation that has arisen now. If it anticipated a crisis in the future, the petroleum industry let no inkling of it fall where the oil situation could be brought into the propert perspective for the benefit of the public at large.

It is too late, of course, to do much about the situation now. Like the Pied Piper of Hamelin, the petroleum industry has lured many citizens down a road along which they must struggle as best they can, by maintaining an unwarranted attitude of complacency until the crisis virtually had arrived in many sections of the country.

Like the petroleum industry, the Government also has failed the public and has added to domestic problems by authorizing excessive shipments of oil abroad. This latter policy is checked, as of today, under an order of the United States Department of Commerce, drastically curtailing oil exports to Europe. That order is long overdue. The fact that it is made at this late date is strong evidence that the oil situation in many parts of America is more grave than most people have been allowed to know heretofore.

Whereas this committee, by committee resolution, recommended on December 19, 1947, that the export-control authority granted by section 6 of Public Law 703, Seventy-sixth Congress, as amended, should be exercised to place such prohibitions or curtailments on the exportation of fuel oil and other petroleum products for such period of time, as may be necessary to alleviate such shortages; and

Whereas it also recommended that the President and the departments and agencies of the Government should take all other possible and appropriate action to utilize such powers as they now possess to aid in alleviating such shortages; and

Whereas on January 2, 1948, the Department of Commerce issued a bulletin referring to the fuel-oil difficulties in this country and advising that Canada had agreed to reduce exports from the United States of certain types of heating oil by 50 percent in the month of January, and stating in part, "This quota continues the policy of restricting exports of major petroleum products to the maximum extent possible until the current domestic shortages are alleviated; and

Whereas on January 16, 1948, the Department of Commerce issued another bulletin giving the tabulation of the export of petroleum products which would be allocated for shipment to all countries but Canada in the first 3 months of this year; and

Whereas on January 26, the House committee further recommended "The immediate cessation of the exportation of all petroleum products until it can be determined whether they are at the expense of our national economy or national security," and "The deferment of making any foreign commitment involving the supply of petroleum products until a complete review has been made of the entire petroleum problem to determine to

what extent such commitments can be made without injury to our national economy or security"; and

Whereas on January 30, the Department of Commerce issued another bulletin announcing the further revision and stating that this was done "in view of the serious shortage of fuel oil in certain areas of the United States"; and

Whereas this most recent revision does not result in the saving of heating and industrial oils necessary to alleviate the serious shortages in certain areas of the United States; and

Whereas during this week end conditions in certain areas of the United States have become even more acute: Now, therefore, be it

Resolved, That this committee insists that the Department of Commerce shall immediately consult with all countries to which allocations of petroleum and petroleum products were made on January 16, with a view to arranging without further delay a reduction in the quotas for the months of February and March of kerosene, gas oil, and distillate fuel oil, and residual fuel oil to at least 50 percent of the amount listed in the tabulation of January 16, 1948, and that certified copies of this resolution be delivered this date to the office of the President of the United States, to the Secretary of Commerce, and to the Director of the Office of International Trade, Department of Commerce, and to the chairman of the Board of Review.

The SPEAKER pro tempore (Mr. BISHOP). Under previous order of the House, the gentlewoman from Massachusetts [Mrs. ROGERS] is recognized for 20 minutes.

REISSUANCE OF UNITED STATES CURRENCY

(Mrs. ROGERS of Massachusetts asked and was given permission to revise and extend her remarks and include a resolution and an article.)

Mrs. ROGERS of Massachusetts. Mr. Speaker, you may remember that last summer I asked the Treasury Department to change the color of the money and have different colors instead of greenbacks. I have not been successful in getting the Treasury to act, and I have introduced a joint resolution which provides for the calling in by the Secretary of the Treasury of all outstanding paper and note United States currency in all amounts, and for the reissuance of new paper and note currency in place thereof in new and different colors for each denomination. That is only part of the bill, which I will insert at this point:

Joint resolution to provide for the calling in by the Secretary of the Treasury of all outstanding paper and note United States currency in all amounts, and for the reissuance of new paper and note currency in place thereof in new and different colors for each denomination

Whereas many benefits will be derived from the issuance of new United States paper and note currency in place of the present currency: Therefore be it

Resolved, etc., That notwithstanding any provision of law to the contrary the Secretary of the Treasury of the United States is authorized and directed to call in all outstanding paper and note United States currency in all amounts, and to issue new paper and note currency in place thereof in new and different colors for each denomination.

Mr. Speaker, on Thursday, November 27, 1947, the Commercial and Financial Chronicle carries a reprint from an article by James J. Quinn, investment counsel, entitled "New Money for Old—Hot or Cold?" It states:

[From the Commercial and Financial Chronicle of November 27, 1947]

NEW MONEY FOR OLD—HOT OR COLD?

(By James J. Quinn, investment counsel)

(Investment counsel strongly favors Representative ROGERS' proposal for recall and alteration of currency's color scheme. Asserts this would be temporarily inflationary, but ultimately very deflationary. Suggests four to ten billion dollars of "hot" money of tax evaders might be recovered as incidental result—enough to launch Marshall plan and reduce taxes.)

THE COMING CURRENCY CHANGE—A RECOLORING OR A RECALL?

The proposal of Massachusetts Representative EDITH NOURSE ROGERS to replace our green and black paper currency with a separate color for each denomination may have more to it than meets the eye. At first blush, the sole virtue of the idea would seem to be the greater ease of distinguishing between the various bills. Without imputing to Mrs. ROGERS' suggestion any other motivation, it is still true that the replacement of the old with new paper currency at this time carries with it implications of vast importance to many phases of our economic life—not the least of which are the relatively recently developed habits of conducting personal and commercial business transactions and keeping liquid savings in cash amounts of staggering proportions. Before examining the various possibilities, however, it may be helpful, perspectivewise, in gaining an appreciation of the scope and nature of the task that such an alteration in our currency would involve, if the events leading up to the last major change in United States folding money are reviewed.

The 1929 currency alteration

From 1861 until the late 1920's, the size of United States paper currency remained the same ($7\frac{7}{16}$" by $3\frac{1}{8}$"). During that period, the economic development of the country was accompanied by various efforts to tie our money (a) to silver, (b) to gold, (c) to a combination of both, (d) to national bank deposits, and (e) to Treasury bond issues—among many other bases. The resultant hodgepodge currency of the 1920's was a natural outcome of the past haphazard approach to the problem of printing and engraving United States paper currency. While the size did not change during the 60-year period, its appearance, especially as regards colors and portraits used, ran the gamut of the entire spectrum on the one hand, and included, on the other, a wide variety of national and local heroes immortalized in print. At one time there were five separate designs for the $5 bill—the type of variety in design that is an open invitation to counterfeiters, who gave the Secret Service many a busy day. Uniformity, however, was not the only reason for the proposed change. There were others.

First of all, the new size ($6\frac{5}{16}$" by $2\frac{11}{16}$") was more convenient to handle. The Philippines had been using the smaller size for years and had lauded its superiority. Since the new series bill could fit into pocketbooks without folding, the freedom from creasing, necessary with the old series, lengthened its life appreciably. The smaller, more uniform, but simpler designs, with their fine engraving, were considerably harder to counterfeit. Additionally, substantial economies in the cost of paper, ink, printing, and especially storing, were important factors. But more decisive than any of these was the 50-percent increase that the change automatically effected in the plant capacity of the Bureau of Engraving and Printing. The Bureau's building, erected in 1914, had not been designed to cope with the swelling currency demands (jumped 76 percent from 1917–26) of post World War I's booming economy. Without the change in size of the bills, a new building extension and a larger printing plant would have been unavoidable.

How the change was put through

The change-over presented the Treasury with the enormous problems of manufacturing, printing, scheduling, and public education. The latter was one of the gravest that Treasury officials had to cope with. A wide variety of difficulties cropped up that had not been anticipated. They ranged all the way from universal public dismay (especially on the part of the banking fraternity) at the prospect of having to transact business with two sizes of currency during the transition period, to derisive remarks about "the new cigar store coupons." Redesigning the various denominations and printing the 900,000,000 separate pieces was a huge task in itself. Nevertheless it was completed well ahead of original expectations. It was the scheduling of the distribution that brought on most of the headaches.

At first, only the $1 bills were to be issued and those only over an estimated 12-month period. The others were to follow in appropriate order. So well, however, had the designing and printing progressed (including doing an additional last-minute job of an unscheduled redesigning and issuing of new national bank notes, which constituted 15 percent of all of the currency outstanding), that a general rather than an individual distribution date was decided upon, and even advanced by many months. On July 10, 1929, issuance of the new-sized current in $1 to $20 bills was begun. The larger denominations were issued later. No attempt was made to replace at one swoop the entire amount of old-series bills. Instead the normal procedure or retiring such old-series bills as came into the banks during everyday transactions was followed. The 4- to 6-month period estimated for the transition period when both old series and new series would be outstanding was, as it turned out, about right for all practical purposes. At any rate, except for odd stragglers, the outside limit for the complete change-over would hardly have exceeded a year since the number of pieces of the new series, about 900,000,000, was approximately equivalent to 1 year's normal retirements.

Legal aspects

In view of the ease with which the legal aspects of the 1929 currency change were handled—no legislation was necessary—the reported proposals by Representative ROGERS to prepare and submit a bill to Congress on what is essentially the same matter is puzzling. Secretary of the Treasury A. W. Mellon merely directed his Assistant Secretary to look into the matter of reducing the paper currency's size and submit recommendations. According to a press release at the time (1927), "Mr. A. W. Mellon announced that he has approved the recommendations submitted by Assistant Secretary Dewey for a reduction in the size of the paper currency ($7\frac{7}{16}$" by $3\frac{1}{8}$" to $6\frac{5}{16}$" by $2\frac{11}{16}$")." That was all there was to it. Secretary Mellon was on firm legal grounds.[1] No change in the Secretary of the Treasury's powers over the currency has occurred in the interim. It would seem, then, that the pres-

[1] His powers over the currency's physical composition were complete and rested upon certain statutes: viz, national notes—section 104 of title 12 of U. S. Code: "Such notes * * * shall be in such form as the Secretary of the Treasury shall direct." Other U. S. currency is covered by sec. 40, title 31, U. S. Code, Money and Finance: "U. S. notes * * * shall be in such form as the Secretary of the Treasury may deem best." (Also see R. S. 3571, U. S. Laws and Statutes.)

ent Secretary's powers to effect the change proposed by Representative ROGERS in the color scheme of our currency are already ample. Mrs. ROGERS' proposal for special legislation to accomplish the revision is, in view of the foregoing, somewhat mystifying. It is in this apparent anomaly that the more searching implications for the entire economy of a currency recall at this time exist.

The implications of a currency recall

Unlike the 1929 recall, the proposed currency modification, if adopted, will have been preceded by over 12 years of steady annual increases in the amount of money in circulation (see table). From 1920 to 1930, money in circulation (MIC) actually declined irregularly, a period of the greatest peacetime boom in the country's history, not surpassed until post-World War II. Some of the reasons for the fantastic increase in MIC since 1936, especially that from 1941–45, are patent, others are abstruse, and still others downright suspect. The accompanying table I attempts to discover whether there is any correlation between the expansion of MIC and the changes that have occurred since 1920 (that is, where available statistics permit) in the various phases of the economy.

Although all of the gold now in the United States is not specifically pledged behind the currency, column 1 reveals that the actual yellow metal backing for the dollar has weakened drastically since 1940, and except for 1946, has not been so poorly supported in that respect since 1921, coincidentally the last comparable postwar year. Nevertheless, the ups and downs in the United States gold stocks are not especially indicative of MIC causation. In reality they reflect the flight to the dollar that began with the devaluation in 1934 and accelerated rapidly with the gathering of war clouds in the late 1930's.

Columns 2 and 3 are purposely juxtaposed. They show clearly that while MIC per capita has, since 1936, jumped 304 percent, MIC per dollar of wages and salaries gained only 166 percent—slightly more than half. Obviously we shall have to look elsewhere than to the serviceman and the laboring man for the explanation.

Column 4 contains the first, and as will be developed later, the closest correlative in the entire table. Liquid assets per dollar of MIC retain their identity with MIC because of the war-inspired practice (prewar, postwar, and during war) of transacting both business and personal affairs on a cash basis in ever-increasing amounts—especially as the price level mounted and the workings of OPA grew to be most onerous with war's end. This is clearly shown by column 5 where the amount of MIC in relation to bank debits doubled since 1939 and quadrupled since 1929. Currency in the hands of the public constitutes by far the greatest amount of MIC, as column 6 illustrates: Right now, 92 percent is publicly held, as against 75 percent in 1929, 85 percent in 1939.

It has been argued that the vastly greater rate of consumer expenditures since 1936 justifies unprecedented expansion of MIC. Columns 7–10 do not support this view—the reverse being true if anything. Total consumer expenditures in 1947 (column 7), for some reason apparently required 80 percent more cash than in 1936, a year of considerably less personal credit expansion and generally weaker personal credit position. Broken down, it would seem that purchasers of durables need 44 percent more cash, nondurables 58 percent, and services 138 percent. In view of the 62 percent increase in consumer credits since 1936 (128 percent since 1944, the war's low point), our quest for the solution of the MIC riddle may be finding a large part of its answers in the nature and scope of business practice surrounding personal expenditures.

TABLE I.—*United States currency relationships*

Year	Money in circulation (billions)	Gold stocks per dollar (1)	Money in circulation per capita (2)	Wages and salaries, per dollar (3)	Liquid assets total, per dollar (4)	Bank durables, commercial banks (5)	Currency outside banks, per dollar (6)	Per dollar personal consumption expenditures			
								Total (7)	Durables (8)	Nondurables (9)	Services (10)

NOTES.—(1) MIC excludes 1920–33 $287,000,000 withdrawn from circulation in 1934. (2) All 1947 figures estimated. (3) All amounts computed by dividing columnar figures (1–10) into money in circulation.

The anatomy of United States money in circulation

The above table suggests that not even in the course of studying usual economic pursuits will the answer to the question regarding the phenomenal rise in money in circulation during the past 12 years be found. It almost seems to hint that the explanation may not be an economic one at all. That is, such would be the case were it not for the peculiar correlation of the growth of money in circulation with that of liquid assets; the end of our quest will probably be found in an examination of the nature and motivation behind the extraordinary accumulation of liquid asset savings that has occurred, particularly during the war. No doubt the equally phenomenal rise in factory pay rolls during wartime expansion, and in servicemen's pay, were among the prime causes behind the initial issuance of the currency out of the banks; but the question still remains, why, once these funds were expended, they did not find their way back into the banks as deposits in the usual manner.

That war workers' wages and servicemen's pay were not the only causative factors behind the initial withdrawals of currency is demonstrable. The number of factory workers hit the wartime peak in 1943 (14,560,000); in no year since has that figure been exceeded. In August 1947 it was about 15 percent below (12,565,000). Factory pay rolls, for all the intervening wage hikes, are still about 10 percent below 1943's. The armed forces averaged 11,300,000 in 1944, the peak year, increasing from January's 10,300,000 to December's 11,800,000, about 15 percent. It is now down to 1,400,000. Further, Series E war bond sales averaged over 33 percent of annual average factory pay rolls in 1943 and 1944. Moreover, most overseas personnel (about 40 percent of the total in 1944) were paid in foreign currencies. The writer can personally attest to this, having disbursed naval funds in Brazil as a supply officer. All payments were in Brazilian cruzeiros. No incoming personnel could bring in more than $50 for any reason, and that had to be exchanged immediately for native currency. Thus, despite a stabilized factory wage and armed forces pay situation, 1944 saw MIC increased from $20,400,000,000 to $25,300,000,000, over 26 percent (well in excess of the entire amount of MIC in 1929). With large amounts of workers' and servicemen's pay going into war bonds, these figures would suggest that the astounding expansion in wartime MIC and the continuance of its rise into the postwar period has been in major part due to an obvious preference, newly developed on the part of civilians, for transacting personal and business affairs in cash.

Tax evasion and black marketeering

The two obvious motives for conducting a sizable business chiefly on a cash basis have been tax evasion and black-market operations. There has been a third, the financing of enemy intelligence and propaganda activities within and without the United States; this latter is admittedly of minor importance, however, in relation to the first two. The extent of tax evasion and black marketeering, nevertheless, in terms of dollars and cents is almost impossible to delineate accurately. Some idea, though, of their scope may be derived from table II below showing the changes that have occurred in outstanding amounts of the various currency denominations, with the emphasis on the unprecedented growth in large bills ($50–$500 notably), suggesting eloquently the probable nature of their function.

By indexing the individual denominations, using 1936 as 100, the table reflects the effect upon United States currency of (a) the flight to the dollar; (b) individual uncertainty about the security of banks, especially after the 1933 experience; (c) fears of inflation and soft money (this explains the notably greater increase in coin over the $1–$5 bills); (d) the rise in the commodity price level; (e) the impact of war. As is plainly evident, the most striking increases occurred in those denominations least used in ordinary consumer business transactions, the $10–$100 bills. Such ordinary transactions would justify an increase of about 60 percent in the $1–$5 categories in view of the rise in the consumer's price index. The additional 40-percent to 80-percent jump actually experienced may represent a combination of the effects of the notorious "stoopies" market, and incidental saving (that is, hoarding).

Considering, however, the relative rarity of the $50 and $100 notes for business purposes,

the continued growth in their rate of issuance in the postwar period, as against the stabilizing to decline in the others, suggests that they are being used as a repository for savings, or as temporary storage for capital, rather than as a medium of exchange. Because of the ease in handling and storing fewer bills, the larger denominations, $500, $1,000, and $10,000, would appear to be superior for this purpose. Oddly, nevertheless, a curious reversal occurred in the burgeoning popularity of these large bills, coincident with the issuance by the United States Treasury Department through the Federal Reserve System in May 1945, of an order directing all financial institutions to make a full report of any exchange of currency involving sums of cash in excess of $1,000 in bills of $50 and above, or any denominations if the sum exceeded $10,000. Accompanying a later revision of the report form, on October 24, 1945, the Treasury advised the Federal Reserve as follows: "The end of hostilities has, unfortunately, not put an end to tax evasions, nor lessened the need for tax enforcement. Accordingly this Department is continuing to give the fullest attention to the reporting and other phases of its tax-enforcement program."

It would seem, then, that the five- and six-fold increase in those bills ($20, $50, and $100) that are free from official surveillance and therefore most suitable for saving as against trading, strongly intimates an unwillingness on the part of many owners to submit their cash accumulations to the routine scrutiny of bank officials by depositing them—for reasons that can only be guessed at. Among those reasons are, as mentioned, income-tax evasion and/or black-market operations—they usually go hand in hand.

TABLE II.—*United States money in circulation, by denomination*

NOTE.—1947 is as of Aug. 31.

Should Representative ROGERS' recoloring proposal be adopted, in effect a currency recall will result. In the process, all those deposits for the new-colored money of the old-colored cash, not susceptible to full explanation to the Bureau of Internal Revenue, are liable to confiscation; their owners, more importantly, are liable to criminal prosecution for tax evasion (tax avoidance is only liable to a penalty fine). Mr. Henry Lustig and associates, once of Longchamps fame, like Al Capone, have become fully acquainted with the workings of the Bureau of Internal Revenue when tax evasion is an issue. Our peculiar Federal income-tax law does not concern itself with the sources of taxable income (Lucky Luciano, the white slaver, was always careful to pay his income taxes). Black marketeers have little to fear as such. It is only if they have been so careless as to overlook the necessity of full disclosure on Form 1040 that they would run into difficulties with an aroused Bureau of Internal Revenue.

Black marketeering, it is generally known, occurred in numerous forms of business and agriculture at about every stratum of income. The usage of large-denomination bills was necessary in such transactions to insure expeditious movement, while maintaining the required confidential atmosphere with the small physical size of the bundle. The old tin box and the bulging black suitcase went out of style with the torrid twenties. Further, in this connection, an undetermined number of refugees, who had converted their foreign funds into United States currency and who habitually had all their liquid resources with them, descended upon our shores in the late 1930's and early 1940's. The habits these individuals had developed in Europe, of necessity, due to the Fascist harrying, of doing business for cash only, had become too ingrown to cast off easily. Carrying large amounts of currency on one's person could only be accomplished comfortably with the larger bills. Undoubtedly, this group's monetary practices augmented the MIC out of all proportion to its numbers.

Rather than face the almost dead certainty of confiscation and criminal prosecution, tax-evader holders of an undetermined amount of the MIC would not attempt to exchange their currency for the new-colored money. As the Government could set a deadline, by which time all old-colored currency must be exchanged, the Treasury would come into "windfall" taxes of vast proportions. (The banks would simply credit the Government with the amount of unexchanged currency as of the deadline date.) The exact figure which this sum would reach, though, is not easily ascertainable. If the view is taken that a large part of the extraordinary concentration of currency savings in the higher denominations cannot, generally speaking, stand the light of day, then the Government, it can be seen, would benefit by an indirect payment of what might be considered a huge backlog of uncollected taxes. This amount, were the relationship of the larger denominations reverted to the 1940 status and personal expenditures financed in the same proportion, could range between $4,000,000,000 to $10,000,000,000.

Looked at another way, the nonbusiness denominations ($50-$10,000), that is, those not used regularly as a medium of exchange, constitute over 30 percent of the MIC. In addition, it is extremely doubtful that all of the lower denominations outstanding are actually required in normal business transactions. Were a return made to the 1936–40 relationship of financing personal consumption expenditures with about 10 cents per dollar of money in circulation (see table I) instead of the present 18 cents, a 45-percent reduction in the MIC would be in order. This would imply a return of most of the largest denominations and some of the smaller to bring the MIC down to about $16,000,000,000, that is, a reduction of $12,000,000,000. Parenthetically, it should be appreciated also that a decrease in the present unprecedented rate of personal expenditures would further lessen the need for even a $16,000,000,000 total of MIC. Any such contraction in the MIC would, it is submitted, have a shock value for the economy not now susceptible to full evaluation. The remainder of this article will be devoted to exploring the possible impact a currency recoloration or recall would have on certain segments of United States life.

Effects of a currency recall

A currency recall would not actually have to occur to set off reverberations that would register in most parts of the economy immediately. The mere threat of such a change in the amount of the money in circulation would touch off so many anticipatory moves of a far-reaching nature, by both actual and potential owners of outstanding currency, that most phases of the Nation's life would be markedly affected. Few citizens' daily lives would be quite the same for some months afterwards, once the currency change proposal evidenced a convincing chance of going through.

Financial repercussions

In reality, money in circulation is undeposited bank deposits. Conceivably, all transactions whether business or personal, could be financed by check. Experience, nevertheless, has demonstrated the feasibility of restricting the payment for certain business, personal expenditures, and purchases to cash. That most of the currency now outstanding is not necessary for such purposes, at least when they are bona fide, has already been discussed. A return to banks as deposits of the excess currency, estimated in round figures at about $12,000,000,000, could profoundly alter the present money supply situation. Instead of banks having excess reserves of about $1,000,000,000, the figure would be $13,000,000,000, permitting a credit base expansion of about $65,000,000,000, three times the present amount of all loans outstanding in the Federal Reserve System.

As the Federal Reserve has already recorded its desire to curb inflationary forces through contracting credit, this development would be a major set-back. In order to sop up the additional excess reserves, reserve requirements would have to be increased to 31 percent. They are now 20 percent in central reserve cities; at their highest, 1937 and 1942, they never exceeded 26 percent, the statutory limit. Since reserve requirements could not, if increased, exceed 26 percent, excess reserves would, with the currency recall, be over $4,000,000,000, and that has important implications for the securities markets.

Such an amount of excess reserves would be almost totally investable, and would find its way mostly into the United States Government bond market. The resultant effect on Treasury bond prices would probably carry them toward record high ground. In the purest sense of the word, that would be "monetizing" the debt with a vengeance. The technical position of treasuries, incidentally, would be further strengthened by any debt reduction which application of the windfall taxes, supra, would effect. The municipal bond market would similarly be affected, perhaps more so if no reduction in personal and corporate income-tax rates has occurred beforehand.

Stocks and commodities would benefit pricewise initially. Such of the old colored money as is "hot" would rapidly be sold at discounts to those willing to assume the risks. Much of such currency would in small amounts find its way into the markets. The greatest of all markets, however, would be

the black market in the currency itself. Now a settled part of the postwar economic life of most of the world, black markets in currency would soon be well established in the United States—at least until the deadline date. As its life would be short, no necessity for setting up special controls would apparently exist, so its activities would probably justify the description of being "rampant," to put it mildly.

The banks' problem in handling the mechanics in exchanging the new for the old currency would be manifold. Whereas in the 1929 currency face-lifting, 900,000,000 pieces were involved in the Rogers recoloration project, over 2,600,000,000 pieces would have to be processed. There would be the usual transition period when both currencies would be outstanding, with its implications of confusion and extra clerical outlays. Combined with the probability of a deadline on completing the substitution, the foregoing would infer a measure of out-of-pocket expense by banks. Alert bank management would, however, take full advantage of the opportunity to add a previously untapped source of new deposits and new business with an unplumbed potential.

Economic repercussions

The onset of a major black market in United States currency, either in anticipation or during the actual processing of the Rogers proposal, would be an inflationary force of the first magnitude. The only course open to those holders who may not, for one reason or another, exchange their old currency for the new, would be to swap it for anything tangible—houses, cars, jewels, stocks, commodities, what have you. There would be no way of effectively curbing these activities. In an already tight market for durables these operations would of necessity be disruptive. On the other hand, removal of any such sum as $12,000,000,000 from the public's hands, which the actual exchange would probably effect, would be somewhat deflationary, since the new holders, the banks, would funnel such of it as the Federal Reserve left investable, but not loanable, into fixed interest securities directly.

After World War I's postwar boom burst, MIC dropped 18 percent in 2 years from 1920–22. While a similar contraction following the current boom would be material, it would still leave about $8,000,000,000 more than is needed as a medium of exchange. In this connection, it is interesting to note that were the rate of increase in MIC for World War II to be equal to that of World War I, the amount of MIC now would be about $15,000,000,000 in excess. In view of the similarity in the extent of the rise in the wholesale price level, this is an illuminating contrast, the explanation for which may possibly lie to some extent in the eye-opening difference in income-tax rates—lowest and highest in World War I ranged from 1 percent to 65 percent; in World War II, 20 percent to 91 percent.

The more profound economic intimations in the Rogers currency proposal would flow from the politico-diplomatic steps which the Federal Government could take, especially as regards tax reduction and financing the Marshall plan.

The politico-diplomatic repercussions

Outside of the risk of possibly stepping on the toes of some party officials, both high and low, there should be no politico-diplomatic reasons why both Republicans and Democrats would not welcome such a currency plan as Representative ROGERS proposes, with open arms. On the contrary, it opens up possibilities which in a Presidential election year, could not be more promising. First of all, few politicians would miss the chance of engaging in a Nation-wide witch-hunt for the rascals in a key election year. It is such a worthy cause, like being "agin sin." Second, and vastly more important, a currency recall may provide the perfect answer to the politician's $64 question regarding the Marshall plan—who is going to pay for it? As estimated above, the take in "hot money" could approximate $4,000,000,000 to $10,000,000,000. Such a sum would, in the upper range, not only finance the heavy first year of the Marshall plan, but much of the second. This would clear the way for the politician to put his best foot forward in a Presidential year—by cutting taxes.

At the same time, the diplomatic front would be strengthened. Not only would the success of the Marshall plan in some tangible form be assured; certain other frictional aspects of our relations with foreign countries would be eased. One of these is the surging black markets [2] in various currencies with United States money usually the base. Recall of the currency would put an end to many such markets for an indefinite period. Operations of the International Monetary Fund would, as a result, benefit greatly.

From a governmental administrative point of view, Representative ROGERS' currency recoloration could be the inaugural for a periodical refurbishing of United States money, say, every 5 or 10 years. Not only would this confound counterfeiters, it would also serve to thwart any concerted efforts to use United States currency as other than a medium of exchange. Further, on a piece basis, the entire currency is normally turned over (that is, renewed) about once a year anyway. Therefore, the element of cost would be of minor consequence.

Prospects and summary

Undoubtedly there is a good chance of Representative ROGERS' proposal going through, if not in 1948, perhaps in 1949. It has all the best arguments on its side. Nevertheless, it would run into strong opposition from many quarters, whose arguments would not be too easy to rebut. They run as follows:

1. A recall of the currency would be disruptive to the economy in a critical, i. e., a Presidential, year.

2. A probable increase in the banking structure's credit base has harmful implications, especially with outstanding loans now at or just below the all-time highs.

3. There is no assurance that the amount of "windfall" taxes, to which the Government may fall heir, would anywhere nearly approximate the sums postulated above (viz, $4–$10 billion). Therefore, the alleged benefits are of doubtful eventuality.

On the other hand, the opposition would probably find it even more difficult to cope with the arguments of the pros. They follow:

1. A new color scheme for the currency would undeniably facilitate the handling and counting of bills and thereby accelerate bank business transactions.

2. The country does not need any more than $16,000,000,000 of currency in circulation, if that much. The recoloration could serve as a recall which would probably reduce MIC to that figure, as the owners would doubtless leave the difference in banks as deposits.

3. Recoloration at this time could be the inaugural of a periodical currency recall which would formally fix control over the end use of United States money as an exchange medium, in the hands of the individual designated by law, the Secretary of the Treasury.

4. Tax evasion would be restricted to other than currency media.

5. The Federal debt and income taxes could be reduced in 1948 by applying such of the windfall taxes, which the tax evaders provided by failure to exchange their old currency holdings for the new.

6. The Marshall plan financing may, as an alternative to or in conjunction with No. 5, be based in part upon employment of the same windfall tax income.

7. The inflation potential in the present amount of MIC, long a bugaboo of private and Government economists, will have been largely eliminated, as over 40 percent of the MIC would have been more or less immobilized.

8. As no changes in the designs of the currency are in prospect, the mechanics of the job are much simpler than those of 1929 when, in effect, the entire currency was completely revamped. The major difficulties, printing time and color processing, are technological and probably could be easily overcome. The problem of assigning colors could be simplified by making the rarely used $50–$10,000, notes the same color and reserving four standard shades for the bills most often used—the $1–$20 denominations. The $2 bill, race-track money, has long outlived its usefulness and should be eliminated from the currency. The Rogers recoloration proposal would offer a good opportunity to do it while accomplishing more essential objectives.

Mr. Speaker, it is obvious to my mind now that without a great deal of agitation the Treasury Department does not intend to act on this extremely important matter of changing the color of our paper currency, which would involve the recall of millions and millions of dollars and would be of untold value to the United States.

BILLS PRESENTED TO THE PRESIDENT

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee did on January 30, 1948, present to the President, for his approval, bills of the House of the following titles:

H. R. 2361. An act to authorize the filing of actions in State courts to quiet title to lands described in a treaty between the United States and the Delaware Indians, dated October 3, 1818.

H. R. 3153. An act to provide for the sale or other disposal of certain submarginal lands located within the boundaries of Indian reservations in the States of Montana, North Dakota, and South Dakota.

H. R. 3322. An act to empower the Secretary of the Interior to grant rights-of-way for various purposes across lands of individual Indians or Indian tribes, communities, bands or nations.

H. R. 3326. An act to provide for the granting of certificates of competency to certain members of the Osage Indian tribe in Oklahoma, and for other purposes.

H. R. 3645. An act relating to the exchange of certain private and Federal properties within Gettysburg National Military Park, Pa., and for other purposes.

ADJOURNMENT

Mr. BRADLEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 2 minutes p. m.) the

[2] Since finishing this article, a noteworthy development regarding British currency has taken place. In England, the alleged black marketeering in sterling has become so rampant as to lead the Government to consider a recall of the entire British currency and an issuance of new notes. Sir Stafford Cripps, the Chancelor of the Exchequer, revealed on November 18. In order to achieve maximum effectiveness in squelching marketeering in sterling, Cripps stated that such "a currency cancellation would come without warning." Since it is a foregoing conclusion that United States currency is being used for a base for marketeering in sterling, a recall of American money probably would accomplish the Chancelor's objectives without necessitating a British currency cancellation.

House adjourned until tomorrow, Tuesday, February 3, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1273. A letter from the Administrator, War Assets Administration, transmitting the progress report for the fourth quarter of 1947; to the Committee on Expenditures in the Executive Departments.

1274. A letter from the United States Atomic Energy Commission, transmitting the Third Semiannual Report of the United States Atomic Energy Commission, as required by the Atomic Energy Act of 1946; to the Joint Committee on Atomic Energy.

1275. A letter from the president, Potomac Electric Power Co., transmitting a report of the Potomac Electric Power Co. for the year ended December 31, 1947; to the Committee on the District of Columbia.

1276. A letter from the president, Potomac Electric Power Co., transmitting the report of the Washington Railway & Electric Co. for the year ended December 31, 1947; to the Committee on the District of Columbia.

1277. A letter from the Acting Secretary of the Navy, transmitting a copy of a report of real and personal property leased by the Department of the Navy under the authority of Public Law 364, Eightieth Congress; to the Committee on Armed Services.

1278. A letter from the Under Secretary of Agriculture, transmitting the report on cooperation of the United States with Mexico in the control and eradication of foot-and-mouth disease; to the Committee on Agriculture.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. COLE of New York: Joint Committee on Atomic Energy. H. R. 5216. A bill to amend the Atomic Energy Act of 1946 so as to provide that no person shall take office as a member of the Atomic Energy Commission or as General Manager of such Commission until an investigation with respect to the character, associations, and loyalty of such person shall have been made by the Federal Bureau of Investigation; without amendment (Rept. No. 1290). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. PASSMAN:

H. R. 5238. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. SUNDSTROM:

H. R. 5239. A bill to promote recovery programs abroad, to strengthen the national defense, to discourage illegal and gray-market operations, to aid in stabilizing the currency of the United States, and for other purposes; to the Committee on Banking and Currency.

By Mr. WELCH:

H. R. 5240. A bill to authorize the withdrawal of public notices in the Yuma reclamation project, and for other purposes; to the Committee on Public Lands.

By Mr. DIRKSEN:

H. R. 5241. A bill to amend the act entitled "An act to regulate the practice of optometry in the District of Columbia"; to the Committee on the District of Columbia.

By Mr. LUDLOW:

H. R. 5242. A bill to amend the act of July 6, 1945, relating to compensation of postal employees, so as to provide for giving appropriate credit for periods of past service in the making of assignments to salary grades; to the Committee on Post Office and Civil Service.

By Mr. TWYMAN:

H. R. 5243. A bill to repeal the tax on oleomargarine; to the Committee on Agriculture.

By Mr. BARTLETT:

H. R. 5244. A bill to amend an act entitled "An act to allow credit in connection with certain homestead entries for military or naval service rendered during World War II"; to the Committee on Public Lands.

By Mr. FOOTE:

H. R. 5245. A bill to advance the effective date of within-grade salary advancements of officers and employees subject to the Classification Act of 1923 and of grade-to-grade promotions of officers and employees in the postal service; to the Committee on Post Office and Civil Service.

By Mr. HOPE:

H. R. 5246. A bill to amend section 4 of the act of March 1, 1911 (36 Stat. 961; 16 U. S. C. 513), to relieve the Secretary of the Army from serving as a member of the National Forest Reservation Commission; to the Committee on Agriculture.

By Mr. WILLIAMS:

H. R. 5247. A bill for the relief of Amite County, Miss.; to the Committee on the Judiciary.

By Mr. HARTLEY:

H. R. 5248. A bill to declare the national policy regarding the test for determining invention; to the Committee on the Judiciary.

By Mr. McCORMACK:

H. R. 5249. A bill to provide for the amendment of the Fair Labor Standards Act of 1938, and for other purposes; to the Committee on Education and Labor.

By Mr. ROBERTSON:

H. R. 5250. A bill to provide for the acquisition and preservation as a memorial to Theodore Roosevelt of the Maltese Cross Ranch, Billings County, N. Dak.; to the Committee on Public Lands.

By Mr. ROSS (by request):

H. R. 5251. A bill to amend certain provisions of the National Service Life Insurance Act of 1940, as amended; to the Committee on Veterans' Affairs.

By Mr. WEST:

H. R. 5252. A bill to extend the time for commencing the construction of a toll bridge across the Rio Grande at or near Rio Grande City, Tex.; to the Committee on Foreign Affairs.

By Mrs. ROGERS of Massachusetts:

H. J. Res. 315. Joint resolution to provide for the calling in by the Secretary of the Treasury of all outstanding paper and note United States currency in all amounts, and for the reissuance of new paper and note currency in place thereof in new and different colors for each denomination; to the Committee on Banking and Currency.

By Mr. BUSBEY:

H. J. Res. 316. Joint resolution to place temporary restrictions on the exportation of certain petroleum products; to the Committee on Interstate and Foreign Commerce.

By Mr. KNUTSON:

H. Con. Res. 142. Concurrent resolution authorizing the printing of additional copies of parts 4 and 5 of the hearings relative to revenue revisions, 1947–48, held before the Committee on Ways and Means; to the Committee on House Administration.

H. Con. Res. 143. Concurrent resolution authorizing the printing of additional copies of the hearings relative to reduction of individual income taxes held before the Committee on Ways and Means; to the Committee on House Administration.

By Mr. MUNDT:

H. Con Res. 144. Concurrent resolution authorizing the Committee on Foreign Affairs to have printed additional copies of a special subcommittee report and appendix on the United States Information Service in Europe; to the Committee on House Administration.

By Mr. KEATING:

H. Con. Res. 145. Concurrent resolution to request the French Government for repatriation of Horst Kupski, and for other purposes; to the Committee on Foreign Affairs.

By Mr. O'TOOLE:

H. Res. 451. Resolution to create a special committee to investigate the oil-supply situation as it affects the eastern seaboard; to the Committee on Rules.

MEMORIALS

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Rhode Island, memorializing the President and the Congress of the United States to have included in the forthcoming river and harbor bill the project of dredging Bullocks Cove in the town of East Providence; to the Committee on Public Works.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEALL:

H. R. 5253. A bill to place Emanuel H. Waldecker upon the appropriate register of eligibles for appointment in the classified civil service; to the Committee on Post Office and Civil Service.

By Mr. DAWSON of Utah:

H. R. 5254. A bill authorizing the issuance to Mountain States Development Co. and Crescent Eagle Oil Co. of patents for certain placer-mining claims located in Grand County, Utah; to the Committee on Public Lands.

By Mrs. DOUGLAS:

H. R. 5255. A bill to authorize the naturalization of Michael Kroskof-Thomas; to the Committee on the Judiciary.

By Mr. JAVITS:

H. R. 5256. A bill for the relief of Elza Friedrych; to the Committee on the Judiciary.

By Mr. MUNDT:

H. R. 5257. A bill for the relief of Allan A. Bryan; to the Committee on the Judiciary.

By Mr. REGAN:

H. R. 5258. A bill for the relief of Mrs. Mary Chagra; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1276. By Mr. ANDREWS of New York: Resolution adopted by the Board of Supervisors of Erie County, N. Y., in strong opposition to the St. Lawrence seaway proposal, and urging all organizations, public, semipublic, and private, in the Niagara frontier to create a united force to the end that all opposition possible may be brought against this unsound and undesirable project; to the Committee on Public Works.

1277. By Mr. GWYNNE of Iowa: Petition of Mrs. Anna Haberkorn, Osage, Iowa, and others, in re S. 265, the Capper bill; to the Committee on Interstate and Foreign Commerce.

1278. Also, petition of Mrs. Ralph S. Moore and others, in re S. 265, the Capper bill; to the Committee on Interstate and Foreign Commerce.

1279. Also, petition of Mrs. Wm. E. Sasse, Waterloo, Iowa, and others, in re S. 265, the Capper bill; to the Committee on Interstate and Foreign Commerce.

1280. By Mr. JENISON: Petition of the American Legion, Donovan, Ill., signed by 34 persons, petitioning the Congress to enact legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1281. By Mr. LEWIS: Petition of 28 residents of Tippecanoe, Ohio, in support of the passage of S. 265, a bill to prohibit the transportation of alcoholic-beverage advertising in interstate commerce and the broadcasting of alcoholic-beverage advertising over the radio; to the Committee on Interstate and Foreign Commerce.

1282. Also, petition of 36 residents of Steubenville, Ohio, and vicinity, urging legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1283. By Mr. LUDLOW: Petitions of citizens of Indianapolis, Ind., requesting enactment of universal military training legislation, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1284. Also, petition of residents of Indianapolis, Ind., urging the enactment of legislation establishing a system of universal military training; to the Committee on Armed Services.

1285. By Mr. REED of Illinois: Petition of Rev. Clarence F. Hammen, Elgin, Ill., containing the signatures of 25 residents of Elgin, protesting the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1286. By the SPEAKER: Petition of legislative department, Board of Aldermen of Chelsea, Mass., petitioning consideration of their resolution with reference to protesting a temporary easement granted to the Mystic Bridge Authority for the purpose of making a preliminary survey for the proposed bridge between Chelsea and Charlestown; to the Committee on Public Works.

1287. Also, petition of John P. Hamilton, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1288. Also, petition of J. A. Justice, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1289. Also, petition of J. T. Lawlor, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1290. Also, petition of Mrs. Hattie Erdman, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1291. Also, petition of the Missouri River States Committee, petitioning consideration of their resolution with reference to the development of the Missouri River Basin; to the Committee on Appropriations.

1292. Also, petition of the Engineering Association of Hawaii, petitioning consideration of their resolution with reference to endorsing immediate action to enable Hawaii to be admitted as a State; to the Committee on Public Lands.

1293. Also, petition of Department of Massachusetts, Veterans of Foreign Wars of the United States, petitioning consideration of their resolution with reference to urging the granting of a rule to bring the universal-training bill to the floor of the House for action; to the Committee on Rules.

1294. By Mr. MARTIN of Massachusetts: Petition of Mrs. Martha E. Meinhardt and sundry citizens of Massachusetts, advocating enactment of universal military training; to the Committee on Armed Services.

SENATE

TUESDAY, FEBRUARY 3, 1948

(Legislative day of Monday, February 2, 1948)

The Senate met at 12 o'clock meridian.

Rev. James D. Bryden, assistant minister, New York Avenue Presbyterian Church, Washington, D. C., offered the following prayer:

O God, the source of our very life, help us, Thy children, in our need and give Thy guidance to this body, the Senate of the United States, assembled this day. We do believe not only that Thou art omnipotent, but that Thou art near, and not only that Thou art almighty, but that our best concerns are Thine also. Help now those who labor here for the good of our people to depend on Thee, knowing that they need not carry their burdens alone. May they have not only strength for their bare duties, but strength also for responsibility which lies far beyond all assigned duty. Having insight to see the final importance of trivial matters, may they be delivered from the tyranny of small concerns and have joy in their work. Bless through them the people of the United States; may Thy will be done and Thy kingdom come. For Thy name's sake. Amen.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Monday, February 2, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILL AND JOINT RESOLUTION

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on February 2, 1948, the President had approved and signed the following act and joint resolution:

S. 1100. An act for the relief of Frankie Stalnaker; and

S. J. Res. 179. Joint resolution to change the date for filing the report of the Joint Committee on the Economic Report.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its reading clerks, announced that the House had passed a bill (H. R. 4790) to reduce individual income-tax payments, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H. R. 1826) making it a petty offense to enter any national-forest land while it is closed to the public, and it was signed by the President pro tempore.

MEETINGS OF COMMITTEES DURING SESSIONS OF THE SENATE

Mr. BARKLEY asked and obtained consent for a subcommittee of the Committee on Labor and Public Welfare to hold hearings during the session of the Senate today.

Mr. WHERRY asked and obtained consent for the Subcommittee on Interior Department Appropriations of the Senate Committee on Appropriations to hold hearings during the sessions of the Senate today and for the rest of this week.

Mr. LANGER asked and obtained consent that the Senate members of the conference committee considering the retirement bill be excused for the remainder of the session today.

LEAVES OF ABSENCE

Mr. WHERRY. Mr. President, I ask unanimous consent that the Senator from Nevada [Mr. MALONE] be granted leave of absence from the Senate for a period of 2 weeks for the purpose of holding hearings on behalf of the National Resources Economic Subcommittee of the Committee on Interior and Insular Affairs.

The PRESIDENT pro tempore. Without objection, the leave is granted.

Mr. FERGUSON asked and obtained consent to be absent from the Senate until February 16.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

QUARTERLY REPORT UNDER SECOND DECONTROL ACT OF 1947

A letter from the Secretary of Commerce, transmitting, pursuant to law, the second quarterly report under the Second Decontrol Act of 1947 (with an accompanying report); to the Committee on the Judiciary.

REPORT ON LEASE OF CERTAIN PROPERTY BY NAVY DEPARTMENT

A letter from the Acting Secretary of the Navy, transmitting, pursuant to law, a report of real and personal property leased by that Department, for the period August 5 through December 31, 1947 (with an accompanying report); to the Committee on Armed Services.

TRANSFER BY NAVY DEPARTMENT OF NAVAL MOTOR BARGE TO CITY OF BLAINE, WASH.

A letter from the Acting Secretary of the Navy, reporting, pursuant to law, that the city of Blaine, Wash., had requested the Navy Department to transfer a motor barge for use by that city in rescue and disaster work; to the Committee on Armed Services.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Archivist of the United States, transmitting, pursuant to law, a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

The PRESIDENT pro tempore appointed Mr. LANGER and Mr. CHAVEZ members of the committee on the part of the Senate.

PETITION

The PRESIDENT pro tempore laid before the Senate a resolution adopted by

the West Hudson Bar Association at Newark, N. J., favoring the enactment of legislation providing equal taxation in community-property and non-community-property States, which was referred to the Committee on Finance.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. WILEY, from the Committee on the Judiciary:

S. 111. A bill for the relief of Donat and Laura Laroche; with an amendment (Rept. No. 859);

S. 129. A bill for the relief of Anastasios P. Ionnetos; without amendment (Rept. No. 857);

S. 511. A bill for the relief of Francisco Gamboa Giocoechea; without amendment (Rept. No. 858);

S. 936. A bill for the relief of Burnett A. Pyle; without amendment (Rept. No. 879);

S. 981. A bill for the relief of Carl W. Sundstrom; without amendment (Rept. No. 880);

S. 1395. A bill for the relief of Jose Maria Gerardo de Amusategui and Ramon de Amusategui; with an amendment (Rept. No. 860);

S. 1706. A bill to limit the operation of sections 109 and 113 of the Criminal Code and section 190 of the Revised Statutes of the United States with respect to counsel in certain cases; without amendment (Rept. No. 881);

H. R. 422. A bill for the relief of Francesco and Natalia Picchi; without amendment (Rept. No. 861);

H. R. 648. A bill for the relief of Mrs. Elfreida Sakowsky Passant, alias Elfreida Sakowsky, alias Elfreida Pogue; without amendment (Rept. No. 862);

H. R. 650. A bill for the relief of Ruston Jamsetji Patell; without amendment (Rept. No. 863);

H. R. 928. A bill for the relief of Riyoko Patell; without amendment (Rept. No. 864);

H. R. 1078. A bill for the relief of Mrs. Audrey Ellen Gooch; without amendment (Rept. No. 865);

H. R. 1408. A bill for the relief of August W. Dietz; without amendment (Rept. No. 866);

H. R. 1650. A bill for the relief of Maria Hedwig Feresz; without amendment (Rept. No. 867);

H. R. 1788. A bill for the relief of the estate of John F. Hopperton, a minor, deceased; without amendment (Rept. No. 882);

H. R. 2350. A bill for the relief of Mrs. Daisy Park Farrow; without amendment (Rept. No. 868);

H. R. 3088. A bill for the relief of William Dudley Ward-Smith; without amendment (Rept. No. 869);

H. R. 3168. A bill for the relief of Antone G. Pina; without amendment (Rept. No. 870); and

H. R. 3778. A bill to amend section 30 of the Revised Statutes of the United States (U. S. C., title 2, sec. 25); without amendment (Rept. No. 871).

By Mr. BUTLER, from the Committee on Interior and Insular Affairs:

S. 134. A bill to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190); without amendment (Rept. No. 872);

S. 1583. A bill to provide for the conveyance to the State of Maryland, for the use of the University of Maryland, of the northern portion of a parcel of land previously constituting a part of the campus of the university and previously conveyed by the State of Maryland to the United States for the use of the Bureau of Mines; without amendment (Rept. No. 873);

S. 1782. A bill to provide for selection of superintendents of national cemeteries from meritorious and trustworthy male members of the armed forces who have been disabled in line of duty for active field service; with amendments (Rept. No. 874);

H. R. 3503. A bill to permit the issuance of unrestricted deeds for town-site lands held by Alaska natives, and for other purposes; with amendments (Rept. No. 875); and

H. R. 4115. A bill to quiet title and possession with respect to certain land in the town of Cheverly, Prince Georges County, Md.; without amendment (Rept. No. 876).

By Mr. DWORSHAK, from the Committee on Interior and Insular Affairs:

S. 1037. A bill to authorize the revision of the boundaries of the Caribou National Forest in the State of Idaho; with amendments (Rept. No. 877).

By Mr. WATKINS, from the Committee on Interior and Insular Affairs:

S. 1990. A bill to provide a means for the orderly continuation and completion of the Deer Creek and aqueduct divisions of the Provo River project, Utah; without amendment (Rept. No. 878).

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TOBEY (by request):

S. 2122. A bill to authorize the Coast Guard to operate and maintain ocean stations; to the Committee on Interstate and Foreign Commerce.

By Mr. GURNEY:

S. 2123. A bill to exempt certain officers of the Regular Army and Regular Air Force from the provisions of statutes requiring retirement by reason of age, and for other purposes; to the Committee on Armed Services.

By Mr. LANGER (for himself and Mr. EASTLAND):

S. 2124. A bill to amend the Trading with the Enemy Act, as amended, so as to permit American citizens and charitable, religious, and other nonprofit organizations to make donations for use in the repair of war damage in any area of Germany occupied by or under the control of the United States; to the Committee on the Judiciary.

(Mr. JOHNSON of Colorado (for himself and Mr. MCFARLAND) introduced Senate bill 2125, to provide allowances for dependents of veterans of World War I and World War II with service-connected disabilities, which was referred to the Committee on Finance, and appears under a separate heading.)

ALLOWANCES TO DEPENDENTS OF SERVICE-CONNECTED DISABLED VETERANS

Mr. JOHNSON of Colorado. Mr. President, on behalf of myself and the Senator from Arizona [Mr. MCFARLAND] I ask unanimous consent to introduce for appropriate reference a bill providing for the payment of an allowance to the dependents of service-connected disabled veterans. While the Congress has been most liberal in the treatment accorded to servicemen and veterans generally, there are certain inequalities in the laws insofar as the service-connected disabled and his dependents are concerned. I know it is not the intention of the Congress to allow such a condition to continue to exist.

The title of our bill explains its purpose. It would provide an allowance to the dependents of service-connected disabled veterans, based upon the degree of disability and upon the number of dependents. The theory of dependency allowances has been established by the Federal Government. During World War II the Congress, upon the recommendations of its then Military Affairs Committees, enacted the Servicemen's Dependents Allowance Act of 1942. Under this law provision was made for the families of enlisted men of the Army, Navy, Marine Corps, and Coast Guard. Our social-security laws take into consideration the minor children of a deceased social-security-covered employee. Presently, however, no distinction is made in veterans' laws as to payments to the service-connected disabled veteran, whether he is single or has one or more dependents.

From all directions we hear more and more concerning the increasing cost of living. Under such rapidly advancing living costs, we may well visualize the manner in which an unemployable, totally and permanently disabled veteran, and his family, must live. His income from the Veterans' Administration is $138 monthly. The 70-percent service-connected disabled veteran, and his family, receive $96.60 monthly from the Federal Government. Assuredly, these persons are not living extravagantly.

It is true that the service-connected disabled veterans with lesser degrees of disability are able to supplement their disability compensation awards through regular, though in some instances limited, employment. A survey was conducted during the last 3 months by the Disabled American Veterans. This revealed that only 10 percent of the service-connected veterans, disabled to the extent of 60 percent or more, are able to follow full-time employment. Excepting the very few instances where there is private income, these veterans are compelled to exist upon the charity of their relatives. I feel certain the Congress does not want such a condition to continue.

Another Nation-wide survey, made for a different purpose, but which has a bearing upon veterans' living costs, was recently completed by the American Council on Education, and financed by the Disabled American Veterans. It was conducted to investigate the cost of living of a scientifically selected and representative cross-section of veterans attending colleges and universities throughout continental United States. These veterans included both the able-bodied and the disabled. To determine how much of a differential exists between the monthly subsistence payments and actual living expenses, each veteran was asked to make a careful estimate of his average total monthly expenses while attending school. The results indicate that the average monthly expenses of single veterans in college is $106.13, while the average for married veteran college students is $175.38. This means that single students spent $106.13 monthly, but received only $65, a deficit of $41.13. Married students spent $175.38, but received only $90 from the Veterans' Administration, a deficit of $85.38. This data furnishes a clear picture as to the deplorable plight of the totally disabled veteran, physically unable to attend school.

Let me give you one example—not by any means an isolated case—as to how World War II veterans are affected. A

master sergeant, married, with two children, was being hospitalized at Walter Reed Hospital. With his allotments and combat infantry pay, he received $269 per month. He had been in the Japanese Death March, and is suffering from recurrent draining osteomyelitis. It was the hospital authorities' opinion that this veteran should be discharged to a Veterans' Administration hospital where he could receive the same medical treatment as he is receiving at Walter Reed General Hospital. After such a transfer, this veteran must be rated by the Veterans' Administration, but the maximum rating that could be awarded would be "totally disabled," and his award would be $138 monthly, or $131 less per month than he received before his effective discharge. Because of the nature of his disability he would be unable to work. The Members of the Senate are fully aware of the tremendous increase in the cost of living index in recent months; until now it is estimated that a family of four must have an income of about $3,400 a year in order to live. This is more than double the compensation received by a totally and permanently disabled veteran.

Only modest rates are provided in the bill which my colleague and I are introducing. These would provide that if and while a veteran is totally disabled and has a wife, an allowance of $30 monthly shall be granted; for a wife and one child, $50; for a wife and two children, $65, plus $15 for each additional child. These amounts would be pro rated for the partially disabled in the same ratio which the degree of the veterans' service-connected disability bears to total disability.

It is our hope that the Senate Finance Committee will hold early hearings upon this legislative proposal so that it may give consideration to the granting of some relief to a most deserving segment of our own population.

I ask unanimous consent that the bill be printed in the RECORD as a part of my remarks.

There being no objection, the bill (S. 2125) to provide allowances for dependents of veterans of World War I and World War II with service-connected disabilities, introduced by Mr. JOHNSON of Colorado (for himself and Mr. MCFARLAND), was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That any person entitled, under any law administered by the Veterans' Administration, to compensation at wartime rates for disability incurred in or aggravated by active service in either World War I or World War II as defined in Veterans Regulation No. 10, as amended, shall be entitled to additional compensation for dependents in the following monthly amounts:

(1) If and while rated totally disabled and—

(a) has a wife but no child living, $30;

(b) has a wife and one child living, $50;

(c) has a wife and two children living, $65 plus $15 for each additional child;

(d) has no wife but one child living, $20;

(e) has no wife but two children living, $35 and $15 for each additional child;

(f) has a mother or father, either or both dependent upon him for support, then, in addition to the above amounts, $25 for each parent so dependent.

(2) If and while rated partially disabled, in an amount having same ratio to the amount specified in subsection (1) hereof as the degree of his disability bears to the total disability.

SEC. 2. No person shall receive additional compensation for dependents under any other law administered by the Veterans' Administration during the same period that any additional compensation, as provided by this act, is paid.

SEC. 3. The administrative, definitive, and penal provisions of Public Law No. 2, Seventy-third Congress, and Veterans Regulations thereunder, as amended, shall be for application under this act.

SEC. 4. This act shall take effect on the first day of the second calendar month next succeeding its enactment.

CONTROL AND REGULATION OF BANK HOLDING COMPANIES—AMENDMENTS

Mr. BUCK submitted amendments intended to be proposed by him to the bill (S. 829) to provide for control and regulation of bank-holding companies, and for other purposes, which were ordered to lie on the table and to be printed.

CONTROL AND REGULATION OF BANK PAYMENTS—AMENDMENT

Mr. FULBRIGHT submitted an amendment intended to be proposed by him to the bill (H. R. 4790) reducing individual income-tax payments, which was referred to the Committee on Finance and ordered to be printed.

AUTHORITY OF MARITIME COMMISSION TO SELL, CHARTER, AND OPERATE VESSELS—AMENDMENT

Mr. SPARKMAN submitted an amendment intended to be proposed by him to the joint resolution (S. J. Res. 173) to continue until July 1, 1949, the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes, which was ordered to lie on the table and to be printed.

HOUSE BILL REFERRED

The bill (H. R. 4790) to reduce individual income-tax payments, and for other purposes, was read twice by its title and referred to the Committee on Finance.

INVESTIGATION OF IMMIGRATION SYSTEM

Mr. WILEY. Mr. President, under the provisions of Senate Resolution 137, which was agreed to in the closing days of the last session of the present Congress, the Senate Committee on the Judiciary, or any duly authorized subcommittee thereof, was directed to make a complete and full investigation of our entire immigration system. This resolution providing that with respect to findings and recommendations on the subject of displaced persons a separate report should be made on or before January 10, 1948.

Pursuant to Senate Resolution 137 a special subcommittee was appointed consisting of the Senator from West Virginia [Mr. REVERCOMB], chairman, the Senator from Kentucky [Mr. COOPER], the Senator from Missouri [Mr. DONNELL], the Senator from Nevada [Mr. MCCARRAN], and the Senator from Rhode Island [Mr. MCGRATH]. The subcommittee has devoted a great deal of time in study and deliberation on the subjects involved in the resolution and the matter has only today been submitted by the subcommittee to the full Committee on the Judiciary.

The original resolution provided, as I have indicated, that the report on the subject of displaced persons should be made on or before January 10, 1948. On December 18, 1947, pursuant to Senate Resolution 178, this date was extended to February 10, 1948. It was the unanimous conclusion of the members present at a meeting this morning of the full Committee on the Judiciary that a further extension of time to March 1, 1948, should be made. I remained at the meeting until 20 minutes of 12, until I could get a quorum. The quorum then instructed me to request the Senate to relieve the committee of its responsibility of reporting on the 10th of February, and asked that the date be extended to the 1st of March.

I therefore ask unanimous consent to submit a resolution and request its immediate consideration.

Mr. President, I ask for the immediate consideration of the resolution to effectuate the purpose I have stated. It will be impossible to get a quorum in the Judiciary Committee for some little time now. We had with us the Senator from New Jersey [Mr. SMITH], who was one of the advisers; and he, too, agreed that the step proposed by the resolution is an appropriate one to take.

Mr. SALTONSTALL. Mr. President, reserving the right to object, I should like to ask whether the chairman of the committee has discussed this matter with the Senators who were so eager to have the report made on January 10 originally. I refer to the Senator from New Jersey [Mr. SMITH] and, I think, several other Senators.

Mr. WILEY. Yes; the Senator from New Jersey was at the meeting this morning.

Mr. SALTONSTALL. And they were agreeable to the proposed step; were they?

Mr. WILEY. Yes; that was the purpose the Senator from New Jersey had in coming to the committee meeting, for he is not a member of the committee.

As I have said, the report cannot be made before March 1. The purpose is to relieve the committee of a mandate which cannot be carried out because sufficient members of the committee will not be present to give final consideration to the matter between now and February 10.

The Senator from Missouri [Mr. DONNELL] will bear me out as to that.

Mr. DONNELL. Mr. President, I absolutely agree that it will be impossible to obtain the attendance at the committee meetings of the necessary members of the committee in order to do this by February 10.

Mr. SALTONSTALL. Let me ask the Senator if it is his definite opinion that a report will be rendered by March 1?

Mr. DONNELL. The staff of the subcommittee has prepared a very extended typewritten statement of facts, in addition to which the subcommittee caused to be prepared, and has handed to the full committee, a confidential committee draft of a proposed bill. My judgment is that it will be possible to submit the

report and the bill to the Senate by March 1, if the Judiciary Committee approves them.

Mr. SALTONSTALL. I know that the Senator took the trip abroad last autumn to personally investigate conditions there.

Mr. DONNELL. I did.

Mr. SALTONSTALL. The Senator knows that many persons in our country are most anxious that a report be rendered on this subject and some decision reached promptly by the Congress.

Mr. DONNELL. Yes; I am aware of that; and I am anxious to have the committee make a prompt report.

Mr. MORSE. Mr. President, reserving the right to object, I wish to share what I think are the clear implications of the comments of the Senator from Massachusetts. Also, Mr. President, when my good friend the Senator from Misscuri [Mr. DONNELL] says it is his opinion that in all probability the report will be prepared by March 1, and that every effort will be made to have such a report prepared, I wish to state that I think it is of the utmost importance that we have some action taken on this matter by March 1, because it has been more than a year, now, since by way of a special assignment I visited a large number of these camps and made a report to the then Secretary of War in regard to my observations. I wish to repeat what I have said before, namely, that we shall never win this peace on the basis of at least one of the objectives for which we fought in the war—in short, to put an end to the persecution of minority groups in the world—until we settle properly the displaced-persons problem; and it will never be settled properly, Mr. President, by keeping those persons in what amount to—I do not care what phrase one may use to sugar-coat it—concentration camps, because that is what they are. Those camps are festering sores in Europe today, and in my judgment they are threatening the political health of the world.

So I think the time has come when the Congress of the United States has either to fish or cut bait on this issue. The people of this country are entitled to know what our final course of action will be.

I say that in the name of everything that is right and just, there is only one thing we can do, and that is to see to it that those people, who have been the victims, and still are the victims—although hostilities have long since ceased—of persecution by totalitarian states, are distributed around the globe in equitable fashion so that they and their offspring can lead decent lives, lives of self-production, lives which will offer them some hope of peace for their offspring.

I recognize that the Judiciary Committee has been heavily pressed with other duties; but I do not wish to see June 1 or June 10 arrive with the displaced-persons problem still pending on the calendar of the Senate of the United States. I think March 1 should be set down as the last possible date by which we shall hear from the Judiciary Committee on this matter, because I think it is a matter that should be disposed of and must be disposed of at this session of Congress.

Mr. WILEY. Mr. President, I wish to make it plain that this subcommittee of the Judiciary Committee, of which the Senator from Missouri [Mr. DONNELL] happens to be a member, and of which the Senator from West Virginia [Mr. REVERCOMB], the Senator from Rhode Island [Mr. MCGRATH], and the Senator from Nevada [Mr. MCCARRAN] also are members, has held hour-after-hour sessions on this matter. I myself attended either one or two of their meetings. I wish to compliment each and every one of them. That subcommittee is made up of individuals, men with diametrically opposite views as to the amount of responsibility this country owes and can absorb. Apparently they have now arrived at some kind of compromise. It is not yet available for publication; it was given to us in executive session. Just today, for the first time, it was brought to the committee—at 20 minutes of 12; and, of course, we had to be in the Senate Chamber at 12 o'clock. It was the censensus of every member of the full committee who was present that this extension of time was necessary and should be granted. That is the point I make, and that is why I make the request, for it was obviously humanly impossible for the subcommittee to have an opportunity to meet with the full committee on this matter. We tried to arrange a meeting for Thursday, but were unable to arrange to have sufficient members of the committee present at that time. We then tried to arrange a meeting for next week, but that also was impossible. On the other hand, it will be possible for the meeting to be held the week after that. At that time we hope to have the entire committee devote an hour to this matter.

As the Senator from Missouri has said, we hope then to be able to report to the floor of the Senate something that is the result of hours and days and weeks and months of labor. As the Senator from Oregon [Mr. MORSE] has said, this problem is one of the tremendous problems facing the United States. However, when the Senator from Oregon said, in effect, that we must see to it that these displaced persons are taken care of all over the world, that poses the issue. Certainly we have no jurisdiction anywhere except in the United States. So that point poses the issue.

Mr. President, I now move the adoption of the resolution.

Mr. DONNELL. Mr. President, I would not want the Senate to be under the impression that the subcommittee was unanimous as to the report presented to the full committee this morning. I may say that there are two members of our subcommittee who are not in agreement, certainly, as to much of the bill that was presented. The bill as presented meets, as I understand, with the concurrence of three members of the subcommittee. I simply wish to make this statement in view of the fact that the Senator from Wisconsin has referred to an "apparent compromise" which he says he understands has been entered into. I make this statement in order that there may be no misunderstanding in his mind or in the mind of any other Senator as to the unanimity or absence of unanimity as to the bill.

Mr. WILEY. I thank the Senator.

Mr. President, I ask that the resolution be read at the desk.

The PRESIDENT pro tempore. The resolution will be read.

The resolution (S. Res. 193) was read, as follows:

Resolved, that Senate Resolution 137 of the Eightieth Congress, first session, relating to an investigation of the immigration system, as amended by Senate Resolution 178 of the Eightieth Congress, first session, is amended by striking out the word and figures "February 10, 1948," on page 2, section 2, line 12, and inserting in lieu thereof the following words and figures: "March 1, 1948."

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

Mr. DONNELL. Mr. President, I should like to make a brief statement at this point. I do not recall whether the Senator from Wisconsin mentioned the fact that in the subcommittee we have had the help of the senior Senator from Virginia [Mr. BYRD], who now is on his feet, doubtless in connection with some other matter. But I think it would not be proper to overlook the fact that we have received not only the help of the junior Senator from New Jersey [Mr. SMITH], but likewise the highly efficient suggestions and help of our good friend the senior Senator from Virginia.

ADDITIONAL REPORT OF JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES RELATING TO FEDERAL PERSONNEL

Mr. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an additional report of the Joint Committee on Reduction of Nonessential Federal Expenditures relating to Federal personnel, together with a statement by me.

There being no objection, the report and statement were ordered to be printed in the RECORD, as follows:

FEDERAL PERSONNEL IN THE EXECUTIVE BRANCH, DECEMBER 1947, AND COMPARISON WITH NOVEMBER 1947

(The following report is compiled from signed, official personnel reports by the various agencies and departments of the Federal Government. Table I of the report shows personnel employed inside continental United States, by agency. Table II shows personnel employed outside continental United States, by agency. Table III shows total personnel employed inside and outside continental United States, by agency. Table IV gives, by agency, the industrial workers employed by the Federal Government. For purposes of comparison, figures for the previous month are shown in adjoining columns.)

According to monthly personnel reports submitted to the Joint Committee on Reduction of Nonessential Federal Expenditures, the total Federal personnel for December decreased 6,592 from the November total of 1,999,863 to the December total of 1,993,271. (See table III.)

Exclusive of the National Military Establishment, there was a decrease of 4,738 from the November total of 1,168,776 to the December total of 1,164,038.

Total employment for the National Military Establishment showed a decrease of 1,854 from the November total of 831,087 to the December total of 829,233.

The Department of the Army reported a decrease of 2,555 from its November total of 380,184 to the December total of 377,629. Inside continental United States the Army

decreased its civilian personnel 2,131, while outside continental United States personnel decreased 424.

The Department of the Navy reported an increase of 49 civilian employees from the November figure of 339,219 to the December figure of 339,268.

The Department of the Air Force increased employment 471 from its November total of 111,229 to the December total of 111,700.

INSIDE CONTINENTAL UNITED STATES

Federal personnel within the United States decreased 6,439 from the November total of 1,777,918 to the December total of 1,771,479. (See table I.)

Excluding the National Military Establishment, personnel inside the United States decreased 4,666 from the November figure of 1,115,400 to the December figure of 1,110,734.

Total civilian employment within the United States for the National Military Establishment for December is 660,745—a decrease of 1,773 under the November figure of 662,518.

Department of the Army personnel within the United States decreased 2,131 from the November figure of 255,142 to the December total of 253,011.

Navy Department within the United States decreased its civilian employment 294, from the November figure of 295,692 to the December figure of 295,398.

The Air Forces increased civilian personnel within the United States by 471 from the November figure of 111,229 to the December figure of 111,700.

OUTSIDE CONTINENTAL UNITED STATES

Outside the continental United States, Federal personnel decreased 153 from the November total of 221,945 to the December total of 221,792. (See table II.)

A reduction of 72 was reported in overseas personel by the departments and agencies other than the National Military Establishment.

Total overseas employment for the National Military Establishment for December is 168,488, a decrease of 81 under the November figure.

The Department of the Army reported a decrease of 424 civilian overseas employees, from the November figure of 125,042 to the December figure of 124,618.

The Department of the Navy increased its overseas employment 343, from the November figure of 43,527 to the December figure of 43,870.

INDUSTRIAL EMPLOYMENT

Total industrial employment during the month of December decreased 3,078 from the November total of 549,992 to the December total of 546,851. (See table IV.)

The departments and agencies, exclusive of the National Defense Establishment, decreased 937, from the November figure of 21,218 to the December figure of 20,281.

The National Defense Establishment effected a net decrease in industrial employment of 2,141, from the November figure of 528,711 to the December figure of 526,570.

The Department of the Army decreased its industrial employment 2,389; 1,826 of this decrease was within the United States, and 527 was effected outside continental United States.

The Department of the Navy increased its industrial employment 248, from the November figure of 236,481 to the December figure of 236,729.

The term "industrial employees" as used by the committee refers to unskilled, semiskilled, skilled, and supervisory employees paid by the Federal Government who are working on construction projects such as airfields and roads, and in shipyards and arsenals. It does not include maintenance and custodial employees.

STATEMENT BY SENATOR HARRY F. BYRD, DEMOCRAT, OF VIRGINIA, CHAIRMAN OF JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES, SUMMARIZING MID-FISCAL-YEAR GOVERNMENT PERSONNEL SITUATION AND MAKING RECOMMENDATIONS IN CONNECTION WITH THE COMMITTEE'S PERSONNEL REPORT ON FEDERAL EMPLOYMENT IN DECEMBER

Reduction of Federal personnel in the Executive agencies during the first 6 months of the current fiscal year was negligible.

Action with respect to personal service funds by the House Appropriations Committee on the independent offices appropriation bill—the first to be reported in this session of Congress—was equally disappointing.

Increase—not decrease—in Federal personnel is to be expected in the remainder of the year on the basis of present prospects.

There is ample experience in proof of the statement that economy and efficiency in government decrease in proportion to excessive personnel. If neither the Executive nor Congress will do anything effective about the situation, who will? Here are the facts:

WILL-O'-THE-WISP REDUCTIONS

On the basis of reports to the Joint Committee on Reduction of Nonessential Federal Expenditures by executive agencies (exclusive of the White House and Central Intelligence Agency) their personnel in December totaled 1,993,271—a net reduction of 81,562

Footnotes at end of table.

for the first 6 months of the current fiscal year. But midyear analysis reveals:

Nearly 25 percent, or 19,891, of the reduction was largely seasonal in Agriculture and Interior Departments. Most of this personnel will be back with appropriate weather.

More than 50 percent, or 43,624, of the reduction was in jobs which simply ran out, with no possible justification for continuation—but even some of this is expected to be temporary. In this category there were 32,610 Army and Navy industrial employees overseas. Most of them were native laborers, and many of them were necessarily discharged with the withdrawal from Italy. There is reason to expect increases in such employment in other areas. The other 11,014 in this group were in emergency war agencies and the War Assets Administration which are in belated liquidation.

The remaining 18,046, or less than 1 percent of the total employment, may possibly be attributed to retrenchment of a sort. But even this figure is highly conservative because 10,032 of it is in Veterans' Administration reduction which is regarded as temporary and may be recovered before the year is out. Another 1,352 is a reduction in RFC which was still liquidating war activities.

Actually there were net increases during the first half of the year in nearly half of the agencies.

CONGRESS ALLOWS IT THAT WAY

The situation to date in the current year is running about as Congress provided for it. By the records of the agencies, 29 of 54 agencies requested and received funds for employment of more people during the current fiscal year than they had last year. In fact, 2 agencies which asked for less money for this year than they had last year received more.

Too frequently Congress is satisfied with itself when it whittles down the Executive's budget requests, but actually allows increases over the previous year. This is the case with the independent offices bill reported to the House last week.

This bill carries appropriations from which a score of agencies will start spending July 1. As reported, the bill would provide increased personal-service funds for more than half of them as compared with money for this year. While some of this increase will go for promotions and raises, it is reliably estimated that the aggregate employment will not be reduced, but, to the contrary, it probably would be increased under the bill as it stands.

Employment in these agencies totals more than 50,000. A token reduction would be at least 10 percent under the current year. None of these agencies is involved with the European emergency, except the Executive offices and the General Accounting Office, and the latter was cut at its own request. In addition to these two, only NACA has to do with national defense. No one would disturb the mission of the Battle Monuments Commission, but the Congress would be perfectly safe in assuming that as a whole the personnel of this group of agencies could be cut 10 percent without impairment of the efficiency in any way.

EMERGENCY HANG-OVERS

On the basis of the President's requests, the budget for fiscal year 1949 would provide for employment of 2,010,000 who would be paid more than $6,000,000,000. If we are to obligate this much or more for foreign subsidies during the next 18 months, people will be required. If we are going to stay even within the budget employment estimate, personal-service funds in some of the appropriation bills must be cut more sharply than they have been to date in the independent offices bill.

Such reductions are obviously indicated in view of the fact that, exclusive of national defense agencies—Army, Navy, and Air Force—civilian employment in the executive branch of the Government, as reported to the Committee on Nonessential Federal Expenditures, has increased by 60,220 over peak wartime employment of June 1945.

ADDITIONAL COPIES OF REPORT ENTITLED "THE UNITED STATES INFORMATION SERVICE IN EUROPE" (PT. 2 OF REPT. NO. 855)

Mr. SMITH. Mr. President, from the Committee on Foreign Relations, I ask unanimous consent to report an original resolution and I request its immediate consideration. A few days ago, as chairman of the subcommittee of the Committee on Foreign Relations which went abroad to study the Voice of America program, I made a report. I find that the detailed appendix runs slightly over the ordinary length, and a routine resolution, I am advised by the Joint Committee on Printing, will be needed to have the printing of the appendix authorized. I have taken the matter up with the Senator from Indiana [Mr. JENNER], and he has approved the resolution.

The PRESIDENT pro tempore. The resolution will be read for the information of the Senate.

The resolution (S. Res. 194) was read as follows:

Resolved, That there be printed 2,000 additional copies of Senate Report No. 855, part 2, current session, submitted pursuant to Senate Resolution 161, a resolution authorizing the Committee on Foreign Relations to make an investigation of the effects of certain State Department activities, of which 1,000 copies shall be for the use of the Committee on Foreign Relations and 1,000 copies for the use of the Senate document room.

The PRESIDENT pro tempore. Is there objection to the request for immediate consideration of the resolution?

Mr. WHERRY. Mr. President, reserving the right to object, it is my understanding that the Printing Committee has approved the resolution providing for additional copies, and that there is no objection made to it whatever.

Mr. SMITH. That is correct.

Mr. WHERRY. No objection.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

SPECIAL SESSION OF CONGRESS—STATEMENT BY SENATOR O'DANIEL

[Mr. O'DANIEL asked and obtained leave to have printed in the RECORD a statement on the subject of the calling of the special session of Congress, issued by him at Fort Worth, Tex., on November 10, 1947, which appears in the Appendix.]

THE WORKER AND THE MARSHALL PLAN—ADDRESS BY JOHN T. KMETZ

[Mr. MYERS asked and obtained leave to have printed in the RECORD an address entitled "The Worker and the Marshall Plan," delivered by Mr. John T. Kmetz, Assistant Secretary of Labor, at a dinner meeting of the Wanamaker Post of the American Legion, in Philadelphia, December 2, 1947, which appears in the Appendix.]

WHAT THE AMERICAN PEOPLE EXPECT OF BUSINESS AND INDUSTRY—ADDRESS BY FRANK W. ABRAMS

[Mr. HAWKES asked and obtained leave to have printed in the RECORD an address on the subject What the American People Expect of Business and Industry, delivered by Frank W. Abrams, chairman of the board of directors of the Standard Oil Co. of New Jersey, before the graduating class of the Rensselaer Polytechnic Institute, Troy, N. Y., January 24, 1948, which appears in the Appendix.]

PRESENTATION TO SENATOR BALDWIN OF UNITED STATES JEWISH WAR VETERANS' AWARD OF MERIT

[Mr. HAWKES asked and obtained leave to have printed in the RECORD the proceedings in connection with the award to Senator BALDWIN by members of the United States Jewish War Veterans' award of merit, which appears in the Appendix.]

AN APPROPRIATE GOP SLOGAN—EDITORIAL FROM THE ANNISTON STAR

[Mr. SPARKMAN asked and obtained leave to have printed in the RECORD an editorial entitled "An Appropriate GOP Slogan," from the Anniston (Ala.) Star of January 11, 1948, which appears in the Appendix.]

THE ST. LAWRENCE SEAWAY—EDITORIAL COMMENT

[Mr. MYERS asked and obtained leave to have printed in the RECORD an editorial entitled "Waterway Fight On," from the Plain Speaker (Hazleton, Pa.) of January 27, 1948, and an editorial entitled "The St. Lawrence Seaway," from the Pittsburgh Post-Gazette of January 29, 1948, which appear in the Appendix.]

THE ST. LAWRENCE PROJECT—EDITORIAL FROM THE RUTLAND HERALD

[Mr. AIKEN asked and obtained leave to have printed in the RECORD an editorial entitled "The St. Lawrence Project," from the Rutland (Vt.) Herald of February 2, 1948, which appears in the Appendix.]

CAN WE AFFORD A DECENT WORLD?—ARTICLE BY SENATOR MYERS

[Mr. MYERS asked and obtained leave to have printed in the RECORD an article entitled "Can We Afford a Decent World?" written for the 1947 Labor Day edition of the Trade Union Courier, which appears in the Appendix.]

DECENTRALIZATION OF GOVERNMENT—ARTICLE BY SENATOR WILEY

[Mr. WILEY asked and obtained leave to have printed in the RECORD an article entitled "We Must Decentralize," written by him and published in the magazine the Reserve Officer for February 1948, which appears in the Appendix.]

EFFECT OF INDIA AND PALESTINE PROBLEMS ON THE UNITED NATIONS—ARTICLE BY LOWELL MELLETT

[Mr. BREWSTER asked and obtained leave to have printed in the RECORD an article entitled "India and Palestine Have Put Our Faith in United Nations to Test," written by Lowell Mellett and published in the Washington Evening Star of February 3, 1948, which appears in the Appendix.]

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

The PRESIDENT pro tempore. The question is on agreeing to the first amendment of the Committee on Foreign Relations.

Mr. BARKLEY obtained the floor.

Mr. WHERRY. Will the Senator yield in order that I may suggest the absence of a quorum?

Mr. BARKLEY. I reluctantly yield for that purpose.

Mr. WHERRY. I thank the Senator. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	George	Morse
Baldwin	Green	Murray
Ball	Gurney	Myers
Barkley	Hatch	O'Conor
Brewster	Hawkes	O'Daniel
Bricker	Hayden	Overton
Bridges	Hill	Reed
Brooks	Hoey	Robertson, Va.
Buck	Ives	Robertson, Wyo
Bushfield	Jenner	Russell
Butler	Johnson, Colo.	Saltonstall
Byrd	Johnston, S. C.	Smith
Cain	Kem	Sparkman
Capehart	Kilgore	Stennis
Capper	Knowland	Stewart
Chavez	Langer	Taylor
Connally	Lodge	Thomas, Utah
Cooper	Lucas	Thye
Cordon	McCarthy	Tobey
Donnell	McClellan	Tydings
Downey	McFarland	Umstead
Dworshak	McKellar	Vandenberg
Eastland	McMahon	Watkins
Ecton	Magnuson	Wherry
Ellender	Martin	Wiley
Ferguson	Maybank	Williams
Flanders	Millikin	Wilson
Fulbright	Moore	Young

Mr. WHERRY. I announce that the Senator from Iowa [Mr. HICKENLOOPER] is absent by leave of the Senate on official business of the Joint Committee on Atomic Energy.

The Senator from Nevada [Mr. MALONE] is absent by leave of the Senate on official business of the National Resources Economic Subcommittee of the Committee on Interior and Insular Affairs.

The Senator from West Virginia [Mr. REVERCOMB] is necessarily absent.

Mr. LUCAS. I announce that the Senators from Florida [Mr. HOLLAND and Mr. PEPPER] and the Senator from Nevada [Mr. MCCARRAN] are absent by leave of the Senate.

The Senator from Rhode Island [Mr. MCGRATH], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Oklahoma [Mr. THOMAS] are absent on public business.

The Senator from New York [Mr. WAGNER] is necessarily absent.

The PRESIDENT pro tempore. Eighty-four Senators having answered to their names, a quorum is present.

Mr. BARKLEY. Mr. President, I do not wish to occupy the time of the Senate very long, and therefore I hope that I may be permitted to conclude what I have to say on the pending matter without interruption, though I do not foreclose interruption. I am merely expressing a prayerful hope.

Mr. President, I do not rise to occupy the time of the Senate at this time in the hope that I may add anything very material or very new to what has been said about the St. Lawrence seaway project from time immemorial. It is one which has been pending not merely since the introduction of the particular joint resolution now under consideration, but negotiations regarding it have been pending for many years between the United States and the Dominion of Canada, and have occupied the attention of the Congress on many occasions. The project has been before the Congress by way of joint resolution ratifying an agreement made between the United States and Canada through the President. It has been before the Senate in the form of a treaty. It has been before innumerable joint commissions set up by the United States in conjunction with the Dominion of Canada, all of whom have endorsed the project of a seaway in the St. Lawrence River.

I rise in support of this international seaway, and I shall undertake very briefly to give my reasons for that support.

In the first place, I think it would be economically wise and advantageous to have such an international waterway along the St. Lawrence route, first, because it would shorten the distance between a great commercial and industrial section of the United States and the markets of Europe, and, by the same token, of course, would bring ocean transportation, or the possibility of ocean transportation, to the great Middle West, which we have frequently referred to as the granary of the American Republic, and which is more and more becoming the industrial center of the American Republic.

I can visualize a day when it will be the industrial center of the United States, because, as our population increases and gradually moves out toward the West, it will find in the future, as it has found already, that in the great Mississippi and Ohio Valleys, and in the valleys of all their tributaries, there will be focused that industrial activity which will not only make it one of the great industrial centers of the United States, but it will require, in my judgment, additional transportation facilities in order that that industry may find its way to the markets of the world.

I am one who believes, Mr. President, that the day of railroad building in the United States is over. The great railroad pioneers who bridged our streams and tunneled our mountains and linked our country with hoops of steel in the form of railroad rails and cross ties, have done their work, and they did it well. But there is no longer any field within the continental United States for the old-fashioned railroad development with which we are so familiar. The problem of railroads now is to improve their facilities where they are by whatever device or mechanism may be possible, to expand their capacity without expanding their territory, in order that they may meet the demands of commerce in a growing, prosperous Nation which more and more will increase its production both of industry and agriculture in order to supply not only our own demands and the needs of an increasing population, but in the new world situation in which we have automatically become the leader, may supply the demands of mankind for the things which we can produce and will continue to produce for a long time in greater quantities than is true of any other country in the world.

I recognize that many of the railroads are opposed to the St. Lawrence seaway on the theory, of course, that it will bring about greater competition with railroad transportation and lessen their opportunity to serve the American people. I was not a Member of the Congress at the time the legislation was enacted which authorized the Panama Canal, but I recall very vividly that the same type of opposition now registered by our transcontinental railroad systems against the St. Lawrence seaway was registered against the construction of the Panama Canal, on the theory that it would interfere with their ability and their opportunity to carry trade across the continent from the Atlantic to the Pacific Ocean.

Likewise they have historically opposed the improvement of our waterways. They have opposed the improvement of our navigable streams on the theory of competition with them, of course, which is a perfectly legitimate attitude. I am not criticizing them for looking after their own interests. I am not criticizing them for opposing the utilization of a God-given means of transportation because it competes with them. But they did oppose our Nation-wide program of waterway improvements, and I have in mind particularly the Ohio River, with respect to which Congress in the early part of this century passed a law obligating itself to provide a 9-foot stage of water the year around from Pittsburgh, Pa., to Cairo, Ill. That waterway improvement was finally completed by the Congress, through the Corps of Engineers, in spite of this opposition.

The Panama Canal was constructed, Mr. President, in spite of the opposition of those who felt that it might afford a means of competition with them, but, instead of injuring the railroads, as it was predicted, it has not only not injured them, but, in one sense of the word, has been of benefit to them. There may have been some diversion of traffic from one road to another, but, on the whole, taking the railroads of the United States as a single unit of transportation, no injury has been created by the construction of the Panama Canal. The point is that they all opposed it, just as they oppose this project. In spite of that opposition, Congress authorized it, and it was dug and is now in operation. Also, in spite of such opposition, our rivers have been improved for navigation and commerce.

Mr. President, I feel about the means of transportation on our great waterways just as I feel about the preservation and improvement of our soil fertility as our population increases. It is now more than 140,000,000. It is predicted that by 1960 it will be 160,000,000, and that by 1980 it will be approximately 190,000,000. We know, as a matter of common sense, that with such an increase in our population every acre of land in the United States will be required to support more people each year than it did before. There is no escape from that logic. Also, every possible means of transportation available to the United States and her people will be required to haul more freight, to be more efficient and more serviceable each year than it was the year before, if our economy and industrial and agricultural prosperity are to

continue, with the facility for carrying all that we produce wherever it may be needed throughout the world.

So I cannot accept the argument—it has not been advanced on the floor of the Senate, but has been advanced in letters, resolutions, and other forms of expression which we have received from time to time in opposition to this project—that it would afford competition to other means of transportation and, therefore, be injurious to them.

I support this program, Mr. President, because I believe that it will be economically to the advantage of and in the interest of the welfare of the United States. A while ago I stated that it would afford a shorter route, not merely along the line of the St. Lawrence seaway, not merely for the benefit of the contiguous territory, but for the benefit of the entire United States west of the Allegheny Mountains, and in many sections east of the Allegheny Mountains, for the transportation of products to the markets of the world.

I believe that when this seaway shall have been completed freight rates, outgoing and incoming, between the United States and other markets, especially across the Atlantic to Europe, will be reduced by a very substantial margin. According to the estimate of economists and engineers, as set out in the report of the committee, the freight rate from Milwaukee or Chicago through this seaway and across the Atlantic will be less per ton than the rates now charged between the city of Baltimore and the city of Chicago. That will be important some day, because ultimately our own supply of raw materials, especially the ores from which we manufacture steel and other things in this country, will be exhausted, and we shall be required to import them into the United States from other countries. It is a matter of great importance to our agricultural producers who have to buy farm machinery made of steel, to our petroleum industry, which must buy steel, and to industries of the United States which must use steel in the mechanization of their plants and in the machinery and tools with which they work. It will be important, when the time comes when we shall have to import those ores instead of producing them in our own country, to have an international seaway by which ships may come up the St. Lawrence River and into the inland ports on the Great Lakes. I believe that the people of those great sections of our country are entitled to that sort of transportation facility.

I am not in a position to say that the construction of the St. Lawrence seaway may not temporarily divert some freight from some seaport. It may affect, in a way, the city of New Orleans; and I can very well understand the attitude of our good friends from the State of Louisiana. It might affect for a time the port of Baltimore; and I can therefore understand the attitude of the Senator from Maryland [Mr. TYDINGS]. It may affect the port of New York and the port of Boston for a time; and therefore I can understand the attitude of Senators coming from those sections.

But, Mr. President, it seems to me that in the consideration of a great project like this, just as in the consideration of the Panama Canal and the improvement of our rivers, we must look upon this enterprise as a national project and not a local project. We must take an over-all view of its advantages as a whole, and not merely the effect it may have upon some particular locality from a geographical standpoint. That is the basis of my support of this measure. I am trying to look at this question from the standpoint of the welfare of the country. It may well be that the construction of this seaway might affect transportation in the Ohio Valley. It may well be that for a temporary period the construction of this seaway might affect river traffic on the Ohio or the Mississippi, although I do not believe it will substantially do so. Even so, I am not looking at it from the standpoint of a county, but from the standpoint of the American people, not tomorrow or next year, but for all the time during which this seaway will be operating and will be needed by the people of the United States.

Mr. AIKEN. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. COOPER in the chair). Does the Senator from Kentucky yield to the Senator from Vermont?

Mr. BARKLEY. I yield.

Mr. AIKEN. The Senator may recall that about 20 years ago 23 States of the Union supported the construction of the St. Lawrence seaway. As I recall, most of them appropriated funds to further the construction of the seaway. Speaking of the Ohio Valley, among those 23 States was the State of Ohio, which obviously would benefit greatly from the project, so far as the northern half of the State is concerned. The Senator's own State of Kentucky and the State of West Virginia also joined the group of States which were attempting to secure approval of the development of the St. Lawrence River. I think the reason is very obvious. It would facilitate the movement of millions of tons of coal from northern Ohio shipping points to Canada and other parts of the world.

But it is quite noticeable that when it was proposed to develop the St. Lawrence River and to construct a dam to produce power at low cost for the benefit of all the people, certain interests in these States were able to swing support away from the St. Lawrence project. In other words, so long as the private power companies could control the development, the coal interests favored the St. Lawrence seaway, but evidently from the way in which they are now acting, the coal companies think they would be injured if the St. Lawrence River were developed for the benefit of all the people.

I simply call that historical fact to the attention of the Senator from Kentucky and of the Senate, namely, that at one time the coal-producing States backed the St. Lawrence seaway. Its construction certainly would result in the shipment and use of more coal. But when the special interests found that private power companies could not grab all the power benefit, they seemed to withdraw their support.

Mr. BARKLEY. I recall that Kentucky and West Virginia were among the 23 States which endorsed this project many years ago. I should not be willing to state, or even to believe, that the failure of my own State to pursue during the interim period the appropriation for the purposes originally intended was due to any power interests within the State. Sometimes things happen, and support is not continued for various reasons. This project has been discussed for a long time, and it would not be strange if a State had started out to assist other States in bringing about a situation in which the project might be constructed and, finally, merely through inactivity or immediate lack of interest, withdrew its financial assistance. I can say, I am sure, that it was not any power influence or any power possibility that induced the State of Kentucky to withhold its appropriation.

There is no State in the Union which has been more enthusiastic and more unanimous in its support of the improvement in the Tennessee Valley than has the State of Kentucky. Outside of the State of Tennessee, and probably one or two other States, I do not know of any State that would benefit more by that great development than would the State of Kentucky.

Mr. AIKEN. I do not want the Senator to think that I was applying my statement to all the people in the State of Kentucky. So long as it appeared that private interests would get the power which was developed they were in favor of it, but there were certain groups who withdrew their support, and evidently coal operators were among them, when they found that if power should be developed it would be developed as public power, for the benefit of the people.

The same statement applies to New England. Twenty-two years ago the Associated Industries of New England appointed a committee of five men from each State, I think it was, to study the St. Lawrence River seaway and to make recommendations. This committee of 30 was headed by Mr. Charles Gow, of Boston, one of our finest New England citizens, who is still strong for the seaway. The Associated Industries of the six New England States unanimously approved construction of the St. Lawrence seaway at that time, but, again, when it was found that private interests could not develop power for themselves, but that it was to be public power, they withdrew their support.

I mentioned the names of the members of the committee in a public speech which I delivered in Boston a couple of years ago, and I received a letter from the president of one of the larger power companies in New England naming an electric light company of which Mr. Sam Ferguson was the president. He was a member of the associated industries committee which had enthusiastically endorsed the St. Lawrence seaway. He took exception to my mentioning his name as one of the supporters at that time, saying that he had since changed his mind. Then he added that if we, the supporters, would say to the power companies that they could have 100 percent of the power generated by the St. Lawrence River project to distribute themselves, and would give none of it

to municipal plants or to the REA cooperatives, except that which they might buy through the private companies, they would get behind the St. Lawrence seaway and again support it; but that so long as the power was to be developed as public power, and so long as any of it was to be sold to the municipal systems or to the REA, they wanted to be regarded as opposed to it.

Mr. BARKLEY. I appreciate the Senator's contribution to the subject. Undoubtedly some of those who were at the beginning enthusiastically in favor of the St. Lawrence seaway as a means of navigation, when they discovered that the improvement might be used for the generation of power, found their enthusiasm dwindling and their opposition mounting. What I wanted to do was to disabuse the Senator's mind of the belief that the mere fact that Kentucky had not continued over the years to contribute to the fund originated by the 23 States was no indication of power company influence.

Mr. AIKEN. I think the Senator is making a very valuable contribution. I know as well as does anyone else that it is not the effect upon the coal mines and the effect upon transportation that is responsible for the opposition to the St. Lawrence seaway. This fight is between the power interests and the people of the United States. The reason for that is that the people of New York and New England today pay approximately $400,000,000 a year more for electric energy than they would have to pay at TVA rates. That is the real reason for the opposition, in my opinion. Various fronts are put forward. Recently some of the electric power companies have come out into the open, but in general they have kept in the background, using the railroad and other interests as a front. They have interlocking directorates. But the real reason is that there is a $400,000,000 overcharge for power that the Northeastern States have to pay every year.

Mr. BARKLEY. I thank the Senator from Vermont.

I referred a moment ago to the opposition to the construction of the Panama Canal. As I recall, without having looked at the figures recently, that Canal cost somewhere in the neighborhood of five hundred or six hundred million dollars. I dare say, Mr. President, that there is not a Member of the Senate, and I dare say there is not an American citizen, who would today be willing to exchange the Panama Canal for the $500,000,000 it cost to construct it. There is not a man or woman in America who would be willing to close up that Canal and put that $500,000,000 back into the Treasury of the United States.

I was called on yesterday by the head of a great industrial organization located in Pittsburgh, Pa., who operates four or five plants producing a technical commodity. He has been in the Tennessee Valley with a view of locating a plant in that valley. I have never seen any advocate of the Tennessee Valley project and the Tennessee Valley improvement who was as enthusiastic as was this man about the possibility of that great valley, which includes, of course, all the tributaries of the Tennessee River, in the development of the industrial and economic life of the people who are beneficiaries of that great improvement, and he is now looking for, and I might say has selected, a site upon which to erect a plant which will give employment to many persons and will bring additional prosperity to those who are using for industrial development and for home consumption the power and the facilities created by the Tennessee Valley.

Mr. WILEY. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. STENNIS in the chair). Does the Senator from Kentucky yield to the Senator from Wisconsin?

Mr. BARKLEY. I yield.

Mr. WILEY. I was very much surprised the other day—and agreeably so—to note some very interesting additional particulars in regard to the TVA. We remember that one of the objections which was made to building the TVA was that it would deprive the coal barons of their market for coal. But now the facts are that although the TVA has developed the entire section in that part of the country and has added wealth to the Nation and has displaced what were coal-burning electric-generating plants, the demand in that valley for coal now is more than ever before. So we see that the economic health of that part of the country has been vastly improved as a result of the power coming from the generating plants of the TVA.

To my mind, that is just another answer to the argument which we had to meet several years ago when John Lewis argued that the St. Lawrence waterway would mean that foreign coal would be imported into the United States. The fact is that we have been shipping abroad this year more than 40,000,000 tons of coal. Foreign coal has never come into the Atlantic coast ports except in a small trickle, so that argument has proved to be without foundation.

I am happy to corroborate what the Senator from Kentucky has said with regard to the TVA. It is one of the contributions that far-sighted Americans have made to a section of our Nation that needed it. I say to the Senate that the Nation also needs the development which will come from the St. Lawrence seaway.

Mr. President, I shall close in just a moment, but I wish to say now that the United States has built up all of the section around the St. Lawrence seaway except for the short distance of approximately 100 miles. We have built seven of the canals. The United States Government has appropriated money for the preparation of plans, and the plans now are made. Congress has voted that money. The only thing left is to build a short connecting link.

Let me point out that, up to 1944, 184,000,000 tons of cargo went in and out of the one port of Montreal annually. Think of that, Mr. President—184,000,000 tons. Yet the opposition contends that we shall not even have 20,000,000 tons as a result of the St. Lawrence seaway. They admit there will be approximately 15,000,000 tons, but they say we shall not have 20,000,000 tons going through the St. Lawrence waterway.

Mr. President, the unfinished length remaining is the bottleneck; and as I have said, there were 184,000,000 tons of traffic in 1944 in that one Canadian city.

I thank the Senator.

Mr. BARKLEY. Mr. President, I appreciate the contribution from the Senator from Wisconsin, which leads me to a very brief comment upon the question of power. I have no fear that the construction of this seaway will flood the United States with coal from abroad. Today the whole continent of Europe is straining every nerve to get coal for its own demands—to increase the facilities of its own mines, to modernize and mechanize them, in order that they may meet the demands of the people of Europe. As the Senator has said, we have been shipping coal across the Atlantic to Europe during this emergency. It has been costing the people of France and the people of Italy $24 a ton for soft coal, shipped across the Atlantic Ocean, to keep those people from freezing and to enable them to begin to start some of their industries for which they do not have sufficient coal nearby.

Of course, it is hoped that the coal industry of Europe, and especially of the Ruhr, may be developed and expanded so that it may meet the demands for coal in Europe, because there is no particular economic value to us in undertaking to ship coal all the way across the Atlantic Ocean to Europe, if they can produce coal closer at home cheaper, not only in order that they may furnish coal for their own domestic-consumption purposes, but also so that they may get their industries back on their feet and proceeding under their own steam.

Mr. WILEY. Mr. President, will the Senator yield to me once more?

Mr. BARKLEY. I yield.

Mr. WILEY. The Northeast section of the United States, as well as the Middle West section of this country, right now is shivering because of a lack of heat units, whether developed from coal or from oil. It is very well established that if we had the electric generating power that is ready to be developed at the St. Lawrence, thus providing 2,200,000,000 horsepower, there would be available a great deal more oil and coal with which to keep the people of New England and New York and Maryland warm. The figures show, beyond any question of doubt, that the Northeast section of our country is hungry for electricity; it is in need of it. The figures further show that, just as in the case of the TVA section, if the needed electrical energy were now available to the northeast section of the United States, it would result in building up industries, improving the economic health, increasing the economic bloodstream of that section.

To my mind, unless some of our folks from the East remove their blinders, they will be hearing rather definitely from their people pretty soon—as they would know if they looked at the polls—that the people of the Northeast, including Boston, Maine, and other sections, want this development.

Mr. BARKLEY. Mr. President, we are depleting our natural resources in this country; there is no question at all about

it. Men may disagree as to how long the coal in the United States will last or how long we shall have an ample supply of oil in the United States; but we know that regardless of the number of years during which we may have ample supplies of those resources, we are depleting them year by year, and the time will come when we shall not have an adequate supply of coal or petroleum for purposes of generating steam with which to carry on industry in the United States. Already the Secretary of the Interior has recommended to Congress the expenditure of $9,000,000,000 for the development of a process by which fuel oils may be extracted from the earth. If the Secretary of the Interior, who, I am able to say, has no political motive in mind so far as he is concerned, feels that the supply of petroleum is so rapidly reaching a state of depletion that he has asked the Congress to appropriate out of the Treasury of the United States, over a period of time, $9,000,000,000 in order that we may develop a substitute for what we are now getting out of the ground, certainly it is worthy of the attention of the Members of the United States Congress. Mr. President, since we are depleting our petroleum supplies so rapidly and since we are depleting our coal supplies so rapidly, and since the time will come when we shall not be able to develop from those two natural resources any power for industry, where shall we then get our power except from the development of our waterways and the power which ensues from their development? I have always believed and I now believe that our great rivers which flow throughout the United States—and, as a matter of fact, the great rivers throughout the world—are just as much a natural resource as are coal and oil, just as much a natural resource as is the fertility of our soil. Everyone knows that neither private industry nor private initiative can develop these rivers. They could not develop the Tennessee Valley. They might have built a dam at one place or another in order to create some power for a local community, but they could not have developed the great power which now lies within the grasp of the people of the Tennessee Valley. It was utterly impossible for them to do so. They could not have developed the great Columbia Basin. Private industry could not have developed any of these great power resources. Therefore, the Government of the United States has stepped in to develop these rivers and these power plants, not in order that the Government might go into business, not in order that private industry might be stifled, but in order that these great natural resources might be made available to the people through the only method by which they could be made available, namely, through the interference of the Government of the United States, and in their protection.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. AIKEN. I should like to call the Senator's attention to the extremely critical shortage of power which exists in the Northeast today, and I should like to give him two or three examples.

Only a few weeks ago one REA cooperative in my State was given 24 hours to get their power somewhere else. They had been supplied by the Green Mountain Power Co., which is a subsidiary of the New England Electric Association. They had two or three old Diesels, which were adequate to supply their membership when they had only 500 members. They have 1,900 members today. Nineteen hundred farmers were given 24 hours' notice to get off the private power interest's line. They got some portable Diesels, they borrowed some oil from the Navy, and they are managing to get by, producing very high costing power today. That is one example of what is happening, and that has been going on in northern New England and in northern New York, and getting steadily worse, now, for months.

I will read some of the headlines. Here is one from a local paper, the Rutland Herald, of January 7:

Public Service Commission issues report forecasting continued power shortage. Chase says northern section of Vermont faces deficiency of 37,400 kilowatt-hours this week; urges cooperation of consumers in curtailing use of electricity.

Here is a headline from the St. Albans Messenger of January 7:

Situation on power unchanged. Public light seeks end of Newport contract.

Here is one from the Newport Express of January 7:

Newport area power crisis still unsolved. Some aid expected tomorrow from Canada, but outlook remains gloomy.

Another, from the Montpelier Evening Argus, of January 5:

Temporary improvements noted in power shortage in northern Vermont today.

There was a rain that helped out a little.

Another, from the Newport Express of December 31:

Industries closed in face of power crisis. Northern Vermont towns blacked out last night.

That is almost within a stone's throw of the proposed St. Lawrence Dam.

From the Montpelier Evening Argus:

Power shortage threatening Vermont.

I have here a report of the Vermont Unemployment Commission, saying that payments of unemployment compensation increased during the month of October, because men had to be laid off while plants were shut down. There are small plants across the country that have to shut down during the day and can run only at night. Others, of course, shut down during the night and can only run in daytime. Our papers have been full of reports of that kind.

I have received many telegrams, one yesterday coming from Massena, N. Y., the site of the proposed 2,200,000 horsepower development on the St. Lawrence River.

It reads as follows:

MASSENA, N. Y., *January 29, 1948.*

Hon. GEORGE AIKEN,
United States Senate,
Washington, D. C.:

Employment is dropping steadily and metal orders are delayed in filling because of a power shortage in Massena, N. Y., today. Ninety-four men have been laid off at the Aluminum Co. of America plant this week. Power supply present operations at this aluminum plant is largely imported from Canada. One pot line that reduces alumina to aluminum by an electrolytic process was shut down Monday, January 26, for lack of power. The power that would be available by harnessing the St. Lawrence River for producing electric power is desperately needed in this entire area. The United States Senate must approve the St. Lawrence project in its entirety.

ALUMINUM WORKERS UNION 19256,
J. J. CALLAHAN, *Secretary.*

I have here a release by Walter P. Reuther, international president of the UAW-CIO, again calling attention to the desperate shortage of power in the United States.

Why talk about preparedness and then fight to prevent the means of successfully waging war in the event it should come?

Here is a telegram from the Standard Shade Roller Corp., of Ogdensburg, N. Y., another town near the dam site:

Lack of power forced this plant employing 318 to close October 31 and November 1, 1947, despite urgent need for full production.

Here is a telegram from the Farmers' Union of Syracuse, N. Y.:

St. Lawrence power very necessary to north country dairy farmers as we have had many complaints of power shortages especially in early evening, when power was insufficient to operate electric milking machines.

In one county in my State the power was thrown off at 8 o'clock. The milking machines just could not operate while the current was off. I have had complaints from men that they could not get power enough to run their potato graders.

Here is another telegram from the Diamond Watch Co. in upper New York State, saying that they had to shut down their plant.

The people of Vermont are trying desperately, in the face of these obstacles, to keep on doing business. One establishment there, which produces about 1,000,000 pounds of copper a month, is throwing away 150 tons of pure iron a day because they cannot get power—and pure iron is as valuable as steel. I just cannot understand the attitude of our neighbors who want us to continue in that condition without being able to operate our industries in northern New England, particularly Vermont, but who still insist on taking the very narrow local view that it might injure the port of Boston or might force the power companies to reduce their rates, and urge other arguments like that. As a matter of fact, the port of Boston does not have so much export business today. To hear the opponents talk, one would think Boston exported 400,000,000 tons a year. The exports have dropped to about 400,000 tons. It was all diverted from the port of Boston long ago. It was diverted first to the port of New York. New York had 2,000,000 tons of grain a year to export. Now the railroads who manipulate things and who pull the wires, turning the freight and the traffic wherever they desire, have diverted most of the grain from the port of New York to the ports of Philadelphia and Baltimore.

Nobody knows where it will show up next, but when one talks about hitting

the export trade of the port of Boston, I just call attention to the fact that the port of Boston does not have much export trade. There are at least four cities on the Great Lakes which have a larger export trade today than the port of Boston. So I call the attention of the Senator from Kentucky and of the Senate to the desperate condition of the people who live in the northeast part of the country.

It is not a case of getting somebody else's business, it is a case of maintaining what we have. If the St. Lawrence project were approved by the Congress, probably half a dozen small industries would be moved from Massachusetts or possibly from Connecticut up to Vermont and New Hampshire. That would not be a drop in the bucket compared with the increased business which those States would receive by reason of being part of an infinitely stronger nation and a stronger economy than we have now. I do wish the opponents would look at the problem from the standpoint of the Nation as a whole, the way it affects the security of the Nation as a whole, and the way it will affect the economy of the Nation as a whole. There are 48 States in our Union, and the welfare of every one of them is vital to the welfare of the other 47. Let us look at the issue from that standpoint.

Mr. BARKLEY. Mr. President, I thank the Senator from Vermont. The story that he has repeated here through telegrams and letters can be repeated in many sections of the United States at this time, showing the results flowing from a lack of power. I have received telegrams from communities within my State and from communities within Indiana, complaining that because the Federal Power Commission had seen fit or had been compelled to shut off a supply of natural gas due to a shortage in the country, not only many industries and schools were compelled to go without fuel for heat, but many homes were likewise deprived of fuel for heat, because of a shortage of natural gas. We must look forward, it seems to me, to the day when there may be a shortage of all sorts of heating fuels and industrial fuels, and the only substitute for them I know anything about is power. It will never be developed for the benefit of all the people of the United States by little piecemeal developments here and there, by the building of a little dam over a creek or a very small river, for some particularly local purpose. It must be done on a broad scale. It might as well be said that every community ought to protect itself against floods. That was tried long ago. It failed, and finally Congress declared by legislative enactment, with all the solemnity that goes with such action, that flood control is a national obligation. Necessary appropriations are now made year by year to protect cities and towns and communities and farm lands from the devastating floods of great rivers, because it cannot be done by private enterprise. That is utterly impossible. It must be done by the only agency the American people have for such a development. That is the Government of the United States.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. WILEY. I hold in my hand, Mr. President, what we may call a map, gotten out by the Power Authority of the State of New York. I think it is one of the most illuminating things that can be brought to the attention of the Senate. I want every Senator to look at it. What the distinguished Senator from Kentucky has said is very true, that what we have to do is to develop those natural resources that are ours.

Now, I call attention to the map, and I ask the Senator from Kentucky to look at it.

I call attention to a map which I hold in my hand on which are shown Federal projects completed or authorized all over the United States, except in the area in question. I point to the two projects which would be built if the joint resolution were passed. There are shown on the map in all 46 Federal projects all over the United States. Yet some Senators do not want to help the great area now under consideration.

The two black rings I point to are at Niagara Falls and on the St. Lawrence. They are the two projects which are contemplated to be built under the pending legislation. In all there are 46 Federal projects shown on the map, covering practically all the area of this country. Now when we ask that Congress authorize, not appropriate, money for, the project in question we hear certain persons say "No." Then we hear men of good judgment and long experience, such as the distinguished Senator from Kentucky, who has served his country so well in the House and in the Senate, pleading that we look after our own. Yet, either because of provincialism or for some other cause, there is opposition to the project. One Senator who occupied the chair not so long ago told me that yesterday he was contacted six times to oppose the project. Because of such opposition are we going to lose the higher view?

Mr. President, I propose to pin the map up on the wall in the rear of the Senate Chamber, so Senators can see it. The only section of the country which has not received its share of Federal projects is the section we are asking to have developed now, the Great Lakes and the St. Lawrence section. We are not asking that Congress give any money, but that money be loaned for the project. The minute we ask for a loan every possible impediment is thrown in our way, every possible false suggestion is thrown out that the project will not work, that it will not pay, that it is not practicable. It is charged that the St. Lawrence freezes over 4 months and 10 days in the year. Yet, as I stated a few moments ago, Montreal is the second largest port in America from the standpoint of volume. Through that port went 184,000,000 tons of traffic in the season of 1944.

So I ask Senators again to look at the map I hold in my hand, which was prepared by the Power Authority of New York, and ask themselves if it is not fair that this section be given a fair shake also.

Mr. BARKLEY. Mr. President, is that not susceptible of being printed in the CONGRESSIONAL RECORD.

Mr. WILEY. I wish it were.

Mr. BARKLEY. Well, is it not?

Mr. WILEY. If the Senator will ask that it be printed in the RECORD——

Mr. BARKLEY. I ask unanimous consent that the map referred to by the Senator from Wisconsin be printed in the RECORD at this point in my remarks.

Mr. BREWSTER. Mr. President, reserving the right to object, and I do not propose to object, I should like to ask that there be printed alongside it a map also indicating the industrial development of the alleged provincial area. I am sure the Senator from Wisconsin will be kind enough to withdraw his statement respecting provincialism of an area which I think it will be found possesses 75 percent of the industrial development of the country, not as a result of Federal grants, but as the result of the enterprise, the ingenuity, and the diligence of the people who developed it.

The PRESIDING OFFICER. The Chair understands that the printing of the map in the RECORD will require the consent of the Joint Committee on Printing before the order can be entered.

Mr. BARKLEY. In view of that statement, I withdraw the request that it be printed in the RECORD.

Mr. WILEY. Will the Senator yield?

Mr. BARKLEY. I yield.

Mr. WILEY. I do not mean to say that the area referred to by the Senator from Maine is provincial. I mean to say that some of those who represent the area are provincial in their approach to the problem we are considering. That was the intent of my remark. In view of the fact that the Senator has spoken about the industrial area of the East, I want to say that what many who represent the East are asking for now is more and more centralization of the industrial area in the East, in the atomic age, when industry ought to be decentralized.

Mr. BARKLEY. Mr. President, I congratulate the Senator from Maine and the people of Maine, and of New England, upon their industrial development.

Mr. WILEY. So do I.

Mr. BARKLEY. I have been all through New England, and I am glad New England has had such development. But if they have been able to develop their industry without the St. Lawrence River improvement, how much more would they have been able to accomplish had the St. Lawrence River improvement been in existence.

Mr. BREWSTER. Perhaps the people of Maine are a little suspicious of Greeks bearing gifts.

Mr. BARKLEY. I doubt if they are suspicious of all Greeks bearing gifts. That will call for a definition of who the Greeks who are bearing gifts are in this particular instance.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. WILEY. We do not want Greeks withholding from us that which is our inheritance.

There has been talk about building up the East into a great industrial center. I want to say to those representing

the East that it was the iron ore from the Middle West that made it possible. It was the iron ore that made it possible for the great skyscrapers to be erected. It was the iron ore which made it possible for the development of all of the great industries the East now has. Now that the East has taken that ore from us to the tune of 2,000,000,000 tons, we ask them to give us a break, to open up the arteries of traffic so that America can have a fifth coast line. There are some rapids in the St. Lawrence which stop the natural flow of the traffic through the river, although 184,000,000 tons of traffic pass through the port of Montreal in 1 year. But now some say, "No, we are a little afraid of doing what is proposed by the joint resolution, because it might hurt us."

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. AIKEN. I listened to the Senator from Maine, and I heard him say something about 75 percent of the industrial development being in New England.

Mr. BREWSTER. No; I said in the Northeast.

Mr. AIKEN. In the Northeast?

Mr. BREWSTER. Yes.

Mr. AIKEN. I should like to call attention to the fact that the industrial activity in the Northeast has been steadily dropping in relative importance now for the last 30 years, and has been spreading out over other parts of the country. It does not mean that the total volume of the production in the Northeast has dropped, but the relative importance of the Northeast in the national economic picture has dropped.

I am supporting the St. Lawrence seaway for the same reason that I would support it if it were in the State of Utah or in Montana or Arkansas, or wherever it might be. The reason is that we have become a Nation of very short distances. It requires only a few hours to go across the continent. The welfare of one section of the country is inextricably interlocked with the welfare of every other section. When we get into emergencies, as we did at the beginning of the last war, it requires the agricultural resources and the industrial resources of every part of the country to carry us through. When the late war began the War Production Board got out a map showing where it would be possible to expand industry to meet the war needs. This map showed where power was available for expansion of industry. Of course, we expanded industry in all areas, because our plants were not working to capacity, and we did use existing plants' capacity wherever they happened to be. But there were shortages of power for expansion of industry in a radius not many miles away from Buffalo and Niagara Falls. Western New York suffered the greatest shortage of power. The areas which suffered the next greatest shortage of power were the rest of New York State, and New England, and I believe a small area in southern Illinois across the river from St. Louis, and also in southern Indiana. The areas nearest the St. Lawrence River and Niagara Falls were the shortest of power for the expansion of industry, and all through New England very few new plants were built—almost none at all. There were a few which were renovated, some which were expanded a little, but there were no new plants erected in New England, and hardly any in the Northeast at the close of the war. It was necessary to go elsewhere to secure low-cost war plants.

Mr. President, I expect this has been told to the Senate many times before. The Government constructed three aluminum plants, one at Massena, one on Long Island, and one in northern New Jersey, at a cost of between $70,000,000 and $80,000,000. Attempts were made to produce power in New York City from steam and send it to those plants, but it was found to be unworkable. Those plants were closed. One hundred million dollars was spent on the plant of the Aluminum Corp. of America, on the Saguenay River in Canada, which was acquired, I believe, from the Duke power interests, which still own a part of it. We spent $100,000,000 to develop that plant for them up there. Here was 2,200,000 horsepower going to waste at this single site on the St. Lawrence. Seven hundred horsepower was going to waste on the American side of the Niagara Falls. There was inability to expand industry in that area as it should have been expanded.

It was not very long ago that I received a copy of a letter from one of the Niagara chemical concerns advising me that they would have to cut their use of power 50 percent because it was not available for them.

I could read many headlines and articles dealing with shortage of power. I have here the Montpelier Evening Argus of December 31, 1947. The headline is as follows:

Power shortage threatening Vermont. Low water likely to paralyze four counties.

The article continues:

A power shortage, created by low water, threatened today to paralyze industries employing thousands of persons in four northern Vermont counties.

Here is an advertisement by a power company in the Newport (Vt.) Express, calling upon their customers to cut down their use of electricity as much as possible because of the shortage of power. They asked the people not to use colored lights for the children's Christmas trees this year in Vermont because there was not power enough. How can our colleagues from any of the Rocky Mountain States oppose the development of power to operate our plants and at the same time come before the Congress and ask for money to develop their regions? I am for developing their regions; but I do not think anyone from any part of the United States has any right to adopt the selfish attitude of opposing giving us living conditions for our farms, homes, and industries in the Northeast, and at the same time expect us to go all-out in supporting whatever they want for expansion in their own communities. I feel that I can say this because I have never voted against the development of natural resources in any State in the Union where it was economically feasible. I ask those from other sections to do for their country what they would be doing for themselves and for their country by developing resources in their own communities.

Mr. BARKLEY. A while ago the Senator read a message from Messina, I believe.

Mr. AIKEN. Yes.

Mr. BARKLEY. If I am not mistaken, the plant at Messina was compelled to close because of lack of power.

Mr. AIKEN. It was.

Mr. BARKLEY. And is now idle.

Mr. AIKEN. It was idle. An earlier telegram which I read showed that last week 94 men had been laid off because of power shortage at Messina.

Mr. IVES. Mr. President, will the Senator yield?

Mr. BARKLEY. Mr. President, I should like to proceed.

Mr. SALTONSTALL. Mr. President, will the Senator yield for a question?

Mr. BARKLEY. I yield.

Mr. SALTONSTALL. Perhaps the Senator answered this question when I was not in the Chamber. As one who has been termed a provincial because of my opposition to the seaway, I should like to say to the Senator that I am in favor of the power project. I believe that the power project should be built. During the last half-hour of discussion I have heard nothing except the power end of this project. I should like to ask the distinguished Senator from Kentucky if he has considered and if he would favor the building of the project as a power project alone, until we know more about the practicability of the seaway under modern conditions than we know now.

Mr. BARKLEY. No. I wish to be frank with the Senator. I am for the entire seaway and power project. I do not believe it is advisable to handle this project piecemeal and build a power plant somewhere on the St. Lawrence River. Private enterprise, which must act upon the profit motive, would not feel that there would be a sufficient return on the investment to justify developing the St. Lawrence River.

Mr. SALTONSTALL. I did not mean to say that it should be built privately. It should be similar to a TVA project. Of course, the separation of the power project from the rest of the undertaking would eliminate a very substantial expense. While no figure is given, I think it would cut the expense to less than half.

Mr. BARKLEY. The building of a power plant at some point on the St. Lawrence River, even by the Government, would be cheaper than the building of the entire project; but it would be only one segment of the entire program, which I think should be carried forward as a whole.

Mr. IVES. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. IVES. In connection with the question raised regarding Messina, it is my understanding that the Messina aluminum plant is still in operation, and is in fact producing a great deal of aluminum from time to time, but is not able to produce anything like what would be possible if the power development were available. In that connection I shall have more to say on this subject tomorrow.

Mr. BARKLEY. I appreciate the Senator's suggestion. I do not claim to have any familiarity with the situation at Messina. I do not know how many plants are there which could operate on a more extensive basis if they had the power. Evidently they do not have the power to operate at full capacity. If there are any that are shut down—and I was told that there was one that was idle because of lack of power—that is an additional factor.

Mr. IVES. Alumirum is still being produced there.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. AIKEN. I think the Senator from New York refers to the original aluminum plant.

Mr. IVES. Yes.

Mr. AIKEN. And not the new one which was built by the Government during the war.

I was interested to hear the Senator from Massachusetts say that he would favor a TVA for the St. Lawrence River. Did I correctly understand the Senator from Massachusetts to say that he would favor a TVA for the St. Lawrence River area?

Mr. SALTONSTALL. I used the expression "TVA" as a symbol to indicate a public-power project. I would be in favor of a public authority, provided the Federal Government kept control of it, so that all areas which could be served by it would be fairly and equally treated.

Mr. AIKEN. May I ask if the Senator from Massachusetts would favor the development of public power for the Connecticut River, which is close to home? The Senator must know that the city of Holyoke is running out of power.

Mr. SALTONSTALL. I am on record in favor of the policy of considering that question and looking into it to see how it would affect conditions up there, and whether such a project would be feasible and practicable.

Mr. AIKEN. There is no question that it would force the New England power companies to reduce their rates, and provide more power for people who need it. I was hoping that the Senator from Massachusetts would be as ardent in favoring development of public power for Massachusetts, Vermont, and New Hampshire as he is for New York and other areas.

The point raised by the Senator from Massachusetts is a part of the old tactics which have been used against the seaway for almost a generation—the policy of divide and conquer. Some will say, "We are for the power, but not the navigation." Others will say "We are for the navigation, but not the power." The New York financial interests, which control both the railroads and the power companies, are saying, "We are for the Missouri Valley system. We must have that first. If we appropriate money for the St. Lawrence, there wil be no money for reclamation in the West, and for the Missouri Valley." Those who are saying that are just as dead set against the development of the Missouri Valley as they are against the development of the St. Lawrence River; but they are adopting these divide-and-conquer tactics. I hope that no one will be misled by the Senator from Massachusetts repeating the arguments which the opponents of the St. Lawrence seaway have been feeding the public and the Congress for years.

Let me read from a letter which I have received from the president of the Hartford Electric Light Co., 266 Pearl Street, Hartford, Conn. The letter is dated December 11, 1945. In reference to the St. Lawrence development, the writer said:

> Even today I would favor it if the enabling legislation required that all power developed is to be sold at the bus to private distributing companies under the proviso that all savings effected by the purchase and resale of federally generated power shall be passed on to the ultimate consumer as directed and regulated by the appropriate regulatory authority.
>
> S. FERGUSON,
> *President.*

Mr. Ferguson, who operates perhaps the best electric system in New England, came to see me about this subject, and intimated that the power companies would support the development of the St. Lawrence if they could be assured of 100 percent of the power, and that the REA and the municipal systems in northern New York and New England would get none of it except what they bought through the private system.

I have always felt that Mr. Ferguson was sent here by the New England power group to size up the situation and see what could be done toward making a trade. But no trade was made on my part, because in my judgment the power from the seaway and any additional power at Niagara should be developed for the benefit of all the people, and not for the particular benefit of half a dozen or more men who hold the reins of our economy in their hands and can turn it this way or that way according to their own personal or collective whims.

Mr. BARKLEY. Mr. President, I thank the Senator from Vermont and other Senators for their contributions by way of interruptions. I wish now to proceed and bring my remarks to a close. I have already extended them far beyond my original intention.

Natural gas is a natural resource of this country. Coal is a natural resource. Petroleum is a natural resource. It so happens that the profit motive has been sufficiently strong to induce men to develop these natural resources by the investment of private capital in the hope that profits would flow from the investment; and, by and large, their investment has been justified. But none of these things are any more natural resources than are the rivers of the United States. They are just as much a natural resource as are any of the commodities which lie under the ground. The rivers which flow by and through our States are natural resources.

It so happens that the profit motive cannot be sufficiently justified to induce the investment of large sums of money in the development of these great waterways. It cannot be done by any agency except the Government of the United States. The question which we are called upon to decide is whether the people of the country are to be deprived of the use of the natural resource of which I am speaking merely because it involves a governmental expenditure which is indispensable to the development, and, in a particular case, because it involves an agreement between the United States and the Dominion of Canada.

Objection has been made to the pending joint resolution because it is not a treaty, but is a mere agreement. I shall not go into the long history of executive agreements. Any Senator who has an open mind and is willing to be guided by the history of executive agreements will find that almost from the very beginning of our history executive agreements were entered into between this country and other countries.

On yesterday I referred to the waters of the lower Colorado River and said there had been an executive agreement between the United States and Mexico involving the use of some of the waters of that river. I was quite peremptorily challenged on the ground that that was a treaty. The most recent act was in the form of a treaty, but back in 1909, before any of us here were Members of the Congress of the United States, there was an agreement between the United States and Mexico involving the distribution and control of the waters of the lower Colorado River.

There have been innumerable agreements that were not treaties. Sometimes they were made as the result of an act of Congress authorizing the President to make an agreement and thereby in advance ratifying the agreement which he might make, such as the trade agreements which have been in existence for some time. They are not treaties. Congress authorized the President to make those agreements. They were not brought back here to be passed on by the Senate by a two-thirds vote, or even by a majority vote, because consent had been given in advance.

In other cases agreements have been made and submitted to the Congress for ratification of both Houses. There is a certain field within which we permit agreements between this country and another nation to be made by executive agreement or by treaty. The Executive has very wide discretion in determining what shall be done within that field.

In this particular case numerous commissions have been appointed by the two Governments to investigate the St. Lawrence waterway. Every one of them has recommended the project. One of them was presided over, I believe, by former President Hoover. If I am mistaken about that I will stand corrected, but I know Mr. Hoover was appointed as chairman of an American group which recommended this seaway.

Every bridge which has been constructed across the St. Lawrence River has been constructed in accordance with an agreement, and not under a treaty. We have passed bills authorizing the construction of bridges across the St. Lawrence River with a proviso that the law should be effective and the bridge should be constructed if and when the Government of Canada likewise approved its construction. A treaty was not necessary. That was a case in which Congress itself initiated the matter by passing a law giving consent for the construction of a bridge, with a provision that it should not take effect un-

less and until the Canadian Government approved it. I think that in nearly all cases the Canadian Government has approved, and I have no doubt that in every case there were informal negotiations between the two Governments.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. AIKEN. The Senator understands, does he not, that those bridges were constructed and other works undertaken under the provisions of the treaty of 1909?

Mr. BARKLEY. Yes.

Mr. AIKEN. I am sure that is correct. But what I want to call to the Senator's attention is that yesterday we heard the opposition refer repeatedly to the sanctity, the dignity, and the morality of international agreements. I call the Senator's attention to the fact that when the private power interests were constructing a dam across the St. Johns River between the State of Maine and the Province of New Brunswick, we did not hear a word about the sanctity, the dignity, and the morality of an action of that kind. The opposition never raised their voice against the construction of dams across international waters until it was proposed to construct a dam across the St. Lawrence River for the benefit of all the people.

Mr. BARKLEY. Mr. President, just a word regarding the matter of agreements. I have no doubt, so far as my studies have gone, that this is a legitimate exercise of the power of the President of the United States to enter into an executive agreement. The mere fact that it involves a little different situation from that which was involved in the agreement between the United States and Mexico with reference to the Colorado River does not vitiate the right of the President to enter into such an agreement. The mere fact that it involves an international waterway which can only be improved by agreement between the two nations does not vitiate the right of the President to enter into an agreement.

I listened all day yesterday to vociferous and vehement opposition because this is an agreement rather than a treaty. But the record shows that when the matter was here in the form of a treaty in 1934 the Senators who now object because it is an agreement voted against it at that time because it was a treaty. They are now opposed to the joint resolution because it involves an agreement.

In what form could we bring it into the Senate to induce its opponents to support it? Now that they oppose it because it is an agreement instead of a treaty, how can they square their present opposition with their opposition in 1934 when a treaty was involved and was submitted to the Senate and defeated on a vote of 49 to 47? It received a majority vote, but not a two-thirds vote.

The fact that it was defeated as a treaty in no way forecloses the right of the President or of Congress to present it, because the President has a wide discretion within that field in the exercise of his power to make an agreement under his Presidential powers. We have the power, in requiring agreements among the States and with foreign nations, to bring it here as an agreement. We have the same power to do it by an agreement or by an act of Congress that we have to provide for the navigation of our inland waterways. Every bridge which has ever been built across a navigable stream in the United States was built under the commerce clause of the Constitution. Every dam which has been built, every improvement made on our navigable streams to deepen them and make them available all the year round for traffic and commerce, has been built and made under the commerce clause of the Constitution of the United States. Obviously we cannot do that with respect to an international waterway by any unilateral action of our own. We cannot pass an act of Congress to improve the St. Lawrence River. We must have an agreement with Canada in order to do that. That agreement has been made under the authority which I think has been confirmed over and over for more than a century on the part of the Supreme Court, not the Supreme Court referred to yesterday in contemptuous terms, which might decide anything now because of its composition, which I did not think was a very happy allusion to that Court. Long before the present personnel became members of the Supreme Court it had acted for more than a century and had sanctioned agreements of this kind made by Presidents of the United States.

So, Mr. President, I support this resolution and this project because I think we have the power to do it in the exercise of control and regulation of commerce with a foreign country—in this case Canada. I support it because I believe it is economically necessary. It is an investment and not a grab; it is an investment of money which will be returned to the United States. It is and must be an investment out of the Treasury, because there is no corporation and no combination of corporations and individuals in the United States that can improve the St. Lawrence River by private funds. The only way it will ever be improved is by the Government of the United States with the Government of Canada, both nations sharing the responsibility and the obligation.

I support the resolution, Mr. President, because not only will it provide for a great waterway, which we need, but it will be a source of great power which we may need even sooner than we may need the waterway. I support it because I think it is in the interest of national defense. I know the project will be constructed some day. I have no more doubt about the fact that some day the St. Lawrence waterway will be constructed than I have that we have already built the Panama Canal and improved many of the rivers of the United States. The Senate of the United States may delay the project, but it cannot ultimately defeat it.

I hope the joint resolution will be agreed to by the Senate and by the House, and that it will be approved in the form in which it has been submitted, so that these two great nations may make use of this great national resource between them. I hope that construction of the work will be begun so that we may have the project available for our people at the earliest possible date.

I regret that I have been impelled to consume more time than I had intended. The interruptions have been helpful to me, and, I hope, to the Senate, and I thank the Members of the Senate for allowing me to intrude upon their patience so long.

Mr. O'DANIEL. Mr. President, I am opposed to the St. Lawrence waterway project. I am opposed to this fantastic idea of spending around a billion dollars of the overburdened taxpayers' money to build another transportation system partly on foreign soil. The stench of two similar squander-maniacal projects has not yet assumed an attar-of-roses odor. I refer to the scandalous Alcan Highway and the Pan-American Highway. Of these three brain blisters, this St. Lawrence waterway is the worst.

In the first place, I have heard of no lack of transportation facilities for getting everything that is loose in this Nation shipped out and given away to foreign lands. Everything seems to be moving out rapidly enough. Our present transportation systems appear to have been adequate enough to ship out of the country more of our foodstuffs than we can safely spare, thus causing prices of food products to our American consumers to soar to unprecedented heights. So, why squander more millions to build more unnecessary transportation systems?

In the second place, if we just must squander or get rid of these hundreds of millions of dollars, which some people apparently think are burning holes in the pockets of Uncle Sam's $260,000,000,000 "deficit pants," then why not dredge out some rivers in our own country, which empty into the ocean along our own coast line? Inasmuch as we are generously blessed with 3,561 miles of seacoast on the Atlantic side of our Nation, 1,872 miles on the Pacific side, and 2,908 miles on the Gulf coast, it appears to me that we have enough seacoast of our own so that we need not spend hundreds of millions of dollars to provide facilities to use the seacoast of some foreign nation for our exports and imports.

I realize that under this strange bipartisan-New Deal arrangement, it seems out of order for any public servant not under its spell, to suggest doing something beneficial for the people of our own Nation; but assuming it is still permissible, I suggest that instead of fixing up export facilities on foreign soil or which are subject to control by foreign nations, we could better improve the transportation system for handling domestic shipments within our own borders, so as to prevent the fuel shortages which are causing so much suffering and discomfort to a very large segment of our own people at this very moment.

If the railroads were not cuffed and cussed, regimented and abused, and scared so much by this gang of scheming totalitarian-minded New Deal bureaucrats, they might feel safe to risk more capital to buy additional tank cars to transport fuel oil from the oil fields to the homes and factories in our own Nation.

The same thing applies to the transportation of wheat from the railroad sidings to the consuming centers. Millions of bushels of wheat had to be piled on the ground in the open weather where much of it spoiled or wasted simply because the railroads did not have enough boxcars to handle this most important food commodity during the wheat harvesting season.

Also, our public highways are now so worn out, outmoded, obsolete, and cluttered up that it is extremely dangerous for our American citizens to use them. Our entire Nation-wide highway system needs to be rebuilt for use by our own citizens—the taxpaying public. Also, if one wants to do something really beneficial to transportation, Mr. President, let him start at the receiving end of the transportation line. Let him go back to the farms and ranches and see how the producers of food for this Nation have to drive through muddy or sandy cow-trail roads and ford creeks and rivers to get their produce from farm to market. That is where transportation money should be spent, on farm-to-market roads, instead of being squandered for a spillway from the top of our Nation to some other Nation's seaport that is frozen up 5 months in the year.

There have been tomes of statistics recited on the Senate floor. Much argument and debate has poured forth. It has all been very interesting. I am not criticizing the views expressed. I am condemning the whole idea.

Mr. O'CONOR. Mr. President, I should like the indulgence of the Senate to offer some considerations in respect to the pending legislation, the joint resolution approving the St. Lawrence seaway.

Confronted by serious world problems, affecting every phase of the lives of our people, we may well ask, "Is this the time for such a project as the proposed St. Lawrence seaway?"

At a time when our people are woefully short of housing, when transportation systems and industries are experiencing difficulty in replacing their warworn equipment and when hospitals cannot be built, and much-needed harbor improvements, reclamation and flood-control projects cannot be undertaken because of the shortage of critical materials and manpower; at a time when we are being asked, and are planning to give freely of our substance to the rehabilitation of Europe, which will place an even greater strain on our scarce materials—at this time when inflation is lapping at the national structure—we are asked to add further to the scarcity of materials and to the inflationary pressures by embarking upon this project.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. O'CONOR. I yield.

Mr. WILEY. I have listened to the statement of the distinguished Senator from Maryland. He understands, does he not, that the resolution is nothing but an authorization?

Mr. O'CONOR. I so understand.

Mr. WILEY. The Senator also understands, does he not, that it authorizes the President to enter into arrangements in reference to tolls, and so forth? I am sure the Senator must understand that not one cent can be spent on the project until an appropriation has been made.

Mr. O'CONOR. I so understand, but I am equally clear in my understanding, I will say to my friend from Wisconsin, that with favorable action by this body at this time, it will of course be a definite expression of the desire, and by way of instruction, as it were, that the project should proceed. I hope to develop this in the statement which I am about to make.

Mr. WILEY. Mr. President, will the Senator yield further?

Mr. O'CONOR. I yield.

Mr. WILEY. I wanted to ask a question in that connection. I think that a study of the undisputed facts shows that about three or three and one-half billion dollars is authorized for projects, but it is not an appropriation. This is my point. In view of the dire prophecies that have been made by many economists and others, that eventually the bubble, as they call it, will burst, I am asking the Senator if it would not be wisdom on our part to build up a group of projects that would not be classified as WPA projects, and to have them ready to meet the impact of the bursting of any bubble. Would not that be the part of wisdom?

Mr. O'CONOR. I will say in answer to the Senator that I think it would be unwise to give approval now to a dubious project like this, merely to anticipate some wholly unforeseeable future emergency. If the Senator will bear with me throughout the presentation of that statement, I hope to convince him that now is not the appropriate time to embark upon this as a long-range proposition.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. O'CONOR. I yield.

Mr. WILEY. I want to express this thought: The Senator argues that this is not the time. Time for what? Does he mean it is not time for the authorization, or does he mean it is not time for construction?

Mr. O'CONOR. I will say in answer to the Senator that I do not think it is the time to give approval, which approval will be construed as an authorization to proceed forthwith.

Mr. WILEY. I thank the Senator. I think he has made himself clear.

Mr. O'CONOR. Mr. President, this project has been reappearing before this body for several decades, but I doubt that ever before its appearance has been so ill-timed.

There is no one who knows the future of Europe. The United States is trying mightily to hold it together, body and soul, or rather the western half of it. But certainly no one can predict with any confidence what the future state of trade between those countries and the United States will be. This is also true of trade with the Orient.

One thing is known. World trade, insofar as this country is concerned, has been deteriorating for many years. It is not necessary to debate the reason for the deterioration. Regardless of the reason, it has been a one-way affair, which our economists generally agree is an impossible situation.

America did a land-office, one-way, foreign trade during the war. It is doing a land-office, one-way foreign trade now. Manifestly, this cannot continue. It is a subsidized trade, borne by the American taxpayers.

I am only seeking to point out, Mr. President, the complete uncertainty of future world trade.

Yet our people are being asked here to set up another transportation system to handle this trade. What trade? To and from what countries?

Is there anyone who can say if and when vessels will again move freely between the ports of this country and those of Europe and Asia, bearing to them our surplus goods and bringing to us their exports? Do the proponents of this measure expect an early lifting of the iron curtain? Is not the practice of block bargaining which Hitler intimated still the trend?

Advocates of this project may visualize oceangoing vessels leaving the harbor of Leningrad, of Helsinki, the harbors of the Scandinavian ports, of Bremen and Hamburg, the British ports, Le Havre, of the Far, Near, and Middle East, laden with cargoes for the people of the central United States and Middle West, moving slowly up the St. Lawrence, through a system of locks and canals and eventually reaching the ports of the Great Lakes. In turn, they visualize the sending back to these countries over the same laborious route, of their surplus of grain and other products of their soil and industry.

A great navigational accomplishment will have been achieved here, Mr. President, the accomplishment of bypassing the eastern ports. A navigational accomplishment that should dwarf Magellan's circumnavigation of the globe.

I cannot see that it would have been a vital accomplishment back in the time of normal world trade. Certainly it would not be a vital accomplishment now when the only so-called world trade is that which the Middle West and the rest of Americans are paying for.

One could say in passing that, even if the project were now completed, its proposed 27-foot depth would not accommodate the vessels which the project's proponents seek. But aside from that, and without again bringing up a question which has been so thoroughly thrashed out in this body, it can be pointed out that the inescapable trend now, in ocean commerce, as elsewhere, is toward speed and increased size, not toward canals and locks.

For example, our steamship lines are worried about the competition of steadily developing transoceanic airways and insisting they cannot survive unless they are permitted to operate airways in connection with their water-borne carriers. But more to the point is the fact that in the matter of the water-borne carriers the trend is toward larger and more economically operated vessels.

Our present Liberty ships could not use a 27-foot depth which permits vessels of a 24-foot draft. They have a mean draft of 28 feet and possibly 32 feet when under way and loaded.

Last November the President's advisory committee on the merchant marine told of the trend toward bigger ships. It recommended a 4-year plan of construction of passenger vessels drawing 32 to 35 feet. More important to the subject we are considering, this committee recommended that the first tankers built under this program should draw 32 feet and the first cargo vessels 29½ feet. Manifestly none of these vessels could use a 27-foot channel which is proposed for the St. Lawrence waterway.

We are concerned now with the area east of the Mississippi and north of the Ohio. With the growth of the country, a great transportation system has developed by which goods destined for foreign ports move by rail and highway down to the seaboard, there to be loaded in oceangoing vessels. Conversely, our imports come to our ports and thence are carried to the interior by rail and highway.

This is not a set-up that was created by one massive blueprint. It developed step by step over a period of time. It was a natural development, perfected by the energies and talents of our people. Communities, large and small, have grown up. A definite way of living has been evolved.

In this area the railroads employ 560,000 workers; the coal industry 325,000. American ships in Atlantic and Gulf trade employ 42,000.

To these are added 55,000 longshoremen who work in this area. Related groups, such as truckers, stevedores, warehousers, brokers, pilots, tugmen, and their families bring the total involved up to not less than 4,000,000 persons on the Atlantic seaboard and Gulf areas directly dependent for their livelihood on the successful operation of the railroads, steamship lines, and coal mines.

The direct effect upon this number of people, if the seaway were built and if it should accomplish what its proponents claim it will accomplish, cannot be estimated, but the fact remains that with the industries certain to be adversely affected, lowered incomes, unemployment, part-time work, and loss of taxes to communities would be bound to follow.

What possible justification is there to enter upon such a gigantic experiment, involving so much loss and offering so little positive assurance of proven benefit?

Much has been heard lately from officials well versed in Government financing of the vital necessity of reducing the huge burden of debt which now oppresses American business and individuals alike. It is generally agreed that a national debt of $250,000,000,000 is dangerous in the extreme, and would prove a veritable millstone around our national neck in the event of a future war emergency of anything like the character of World War II. And more and more each day we hear warnings that just such an emergency is possible.

Along with the demand for debt reduction, and, indeed, as a necessary part of any efforts along this line, is the urgent need for national economy. By this is not meant the type of economy that would forego all projects except those in which we personally are interested, but an economy that will impartially study every proposal for the expenditure of governmental funds, and approve or reject such a proposal strictly on the basis of its vital need and its benefits to the country generally.

Inasmuch as it now seems clear, even from the very inadequate financial details available, that the completion of such a project would entail over-all expenditures that might well exceed a billion dollars, it would seem that there is quite a definite relation between any such proposed expenditure and our admitted need for reducing rather than increasing our national obligations.

Only a few years ago, when Liberty loans and later Victory loans of huge magnitude were required to finance the conduct of the war, our people gave their support in the very well-defined belief that such tremendous national budgets as were the rule during those years, were extraordinary expenditures of which there would be no recurrence once the war was ended.

Many persons interested in governmental spending urge that before giving approval to the projected expenditure of a possible billion dollars for any new venture, we should seriously consider the effect upon what we know to be the proper national financial policy. They believe we should refuse to approve any such project unless it can be clearly and indisputably shown that it is first of all urgent, and, secondly, that it will be beneficial to the great mass of people in our country and not entail losses out of proportion to the benefits derived.

Certainly, if we use the yardstick of urgency in considering the St. Lawrence seaway project, a study of the record will show that it is no more urgent now than it was when the idea was first envisioned decades ago. America and the midwestern section of our country have both gotten along wonderfully throughout the year without a 27-foot channel from the Great Lakes to the ocean. And, in times of war and peace, there has been no particular belief generally that America was failing to do its duty by the people of that area in not providing a passage to the sea for heavier vessels.

If we take the second necessary consideration, that of general benefit to the people of the United States, we find as wide a divergence of opinion, with as many tortuous channels and dangerous rapids, as the St. Lawrence seaway, if ever completed, would provide.

Against the claimed benefits for the people of the Great Lakes section, we can balance much more definite damage to the already established transportation and port facilities of the Atlantic seaboard and the Gulf. The interested Government agencies do not agree upon a definite figure of the expected tonnage. The Department of Commerce has expressed the belief that with a 27-foot channel it will be possible to transport 16,000,000 tons of cargo. Of this, the claim is made that approximately 10,000,000 tons would be additional to that now using the various canals existing along the waterway.

By additional tonnage, they mean merely additional to the St. Lawrence. They do not emphasize that most of this 10,000,000 tons of freight will be taken away from the already established ports of Baltimore, New York, Philadelphia, Boston, Buffalo, New Orleans, and Norfolk.

They fail to mention what such a decrease in tonnage would do to these well-established ports, with their hundreds of millions of dollars worth of port facilities, their thousands of port workers. And they overlook, as well, the other millions of dollars that would be required to make the lake ports usable for vessels requiring a 27-foot channel.

We are not informed how much of this 10,000,000 additional tons of cargo would be taken from the carriers which now serve that area, during the 7 months or less when the waterway would be free of ice for passage of vessels. Nor are we advised how these carriers, deprived of that huge amount of traffic 7 months during the year, could have available the necessary stand-by facilities to care for the full traffic of that region when ice closes the waterway to the sea.

I do not approach this question from a sectional point of view. In the determination of this all-important subject it would be unfortunate if the decision turns on the special interests of a particular area or section of our country, but that is not to say that grave losses to individual localities, when considered together, would not in the aggregate constitute a calamitous loss to the country as a whole.

The adverse effect upon the port of Baltimore with its millions of dollars of capital investment in port facilities, in which the Federal Government is vitally interested as a contributor, and also with its 15,000 port workers, plus the adverse effect upon the ports of New York, Boston, Philadelphia, Norfolk, New Orleans, and of many others, when considered all together represent a distinct and irreparable loss to the economy of the country as a whole.

Baltimore's value to the Nation as a clearance point for millions of tons of imports and exports each year has been established. During the war a large portion of overseas shipments passed through our port's facilities. Since the war, volume has increased until during a portion of the past year Baltimore led the Nation's ports in imports and was among the very top ports of the country in combined water tonnage handled.

Not only would Baltimore suffer, but the same thing would happen to every port of any consequence along the Atlantic seaboard. To a great extent, therefore, the additional traffic handled on the St. Lawrence seaway would not be additional traffic at all, but merely tonnage transferred from some other port, to be carried at a great expense far up the Atlantic seaboard and down the winding 1,800 mile stretch of river and lake until it arrived at its destination.

If the St. Lawrence project were of real benefit, one would suppose that the shipping interests of the country would be the first to acclaim it. Have they done so? The record does not show this to be the case. The large lines serving Baltimore, almost without exception, have expressed themselves as being uninterested in using the proposed facilities.

Among others, the following have expressed themselves, in some cases vigorously, to the effect that they would not be interested in sending their vessels into the St. Lawrence seaway: Moore-McCormack Lines, Inc.; United States Lines Co.; Alcoa Steamship Co., Inc.; Grace Line, Inc.; Calmar Steamship Corp.; American South African Line, Inc.; United Fruit Co.; Stockard Steamship Corp.; Lykes Bros. Steamship Co., Inc. Their unanimous opposition hardly indicates that the seaway offers any great advantage to shippers, or indeed that the seaway can attract anything like the volume of tonnage which its proponents claim for it.

It is impossible to determine the feasibility of this project without more definite and authoritative information as to the extent of tonnage to be transported and the rates of charges or tolls to be levied. The only limitation is the provision that in no event is the toll charge to exceed the equivalent of $1.25 per ton of laden cargo.

The question of division of tolls among the governments is, of course, a determinative one. Until some decision, even a tentative one, is reached on this question, no final conclusion can be reached that the project would be self-liquidating. Apropos of this, it is necessary to state that the data thus far presented by the Department of Commerce, the United States Army Engineers, and by others is not convincing that a sufficient amount of cargo would be transported to make this project self-liquidating.

In this connection, already suggestions have been advanced that, inasmuch as the proposed 27-foot channel would not permit heavily laden Victory or Liberty ships to use the facility, the channel depth might be increased to 30 feet. Engineering authorities have been quoted as warning that a 30-foot depth was the least that should be planned. They further declare that to keep the initial construction on a 27-foot channel basis and later to attempt to deepen it, would entail an exorbitant outlay.

Furthermore, we cannot ignore the consideration that the subject matter involved in this issue is one which should be covered by treaty rather than by agreement between the two countries. Persuasive arguments presented on this point here on the Senate floor should certainly be considered by every Senator. If the question is surrounded by such doubts as to warrant such forceful argument as has been made, might it not be a question with which to be concerned as to whether we would be involved in litigation for the next decade if the project were to be authorized by such a questionable method as under the form of agreement rather than by treaty?

Because one of the ever-present arguments in any proposal for favorable action has to do with the matter of national defense, and the proponents of the seaway stress its value to our country during an emergency, attention must also be given to this angle of the situation.

In the first place, the greatest portion of the seaway would be within the borders of another nation—an extremely friendly nation, we cheerfully admit—but the seaway would still be outside the borders of the United States and, as such, beyond our control even though the United States would have expended the major portion of the funds required for its construction.

As to the claim that it would open up a vital, protected area for war industries, particularly shipbuilding, during an emergency, it is well known, and it is admitted in every discussion of air power that in this age of long-range bombers and transpolar flights the Great Lakes area would be more accessible to an aggressor than would the now established Atlantic ports. If a war were to be waged only in the summertime, there would be a certain advantage, possibly, in the seaway. During the winter months, however, its value from a defense standpoint would be highly questionable, because everything would be ice-bound, and any ships constructed would have to wait until the arrival of warm weather before they could be launched and dispatched to their destination.

Mr. THYE. Mr. President, will the Senator yield?

Mr. O'CONOR. I am very pleased to yield to the Senator from Minnesota.

Mr. THYE. The Senator speaks of navigation being stopped in the wintertime. Practically all the iron ore brought into the blast furnaces comes by way of the Great Lakes from the Mesabi range. We have a winter season now, and we have had it in the past. We shall probably have a winter season in the future.

Mr. O'CONOR. I well understand the force of the observation made by my friend from Minnesota; but I suggest that if there were any appreciable increase, such as is claimed by the proponents of this measure, the extent of the increase would, of course, add to the uncertainty of transportation when ice conditions in the St. Lawrence would make transportation impossible.

Mr. LODGE. Mr. President, will the Senator yield?

Mr. O'CONOR. I yield.

Mr. LODGE. Let me say, first, that I appreciate the very complete character of the Senator's speech. I think it is a very real contribution to the subject.

I should like to ask him whether it is not true that when we look at the project from the standpoint of national defense, leaving out the economic factor, it is essential that any kind of national defense installation shall be usable throughout the year. While it is undoubtedly true, as the Senator from Minnesota says, that the freezing of this waterway for 5 months in the year is not a vital consideration from an economic standpoint, because industry can stock pile, yet it is a very decisive factor when we examine this project as a factor in our national defense.

Mr. O'CONOR. I am obliged to the Senator from Massachusetts for his observation. The basis upon which I was attempting to make this point was related to the national defense aspect of the situation; and considering it from that viewpoint, I feel that that is certainly a very questionable undertaking.

Another point that deserves real consideration is raised by a Canadian writer who, after a study of the entire proposal, expresses the conviction that the havoc that could be created by bombing of the locks would be so great that this portion of the seaway would be a priority project of any aggressor. Among other things, he said, destruction of the locks would release such a flood of water that it would surely destroy a third of the city of Montreal. None is heard to deny that one or two well-placed bombs could destroy the locks and render the seaway unusable over an extended period, without any agents of a country inimical to the United States ever setting foot on United States territory.

The power angle of the project should not serve to gain approval by itself for the entire project. It appears to be the tail that is wagging the dog. The dams required for the power projects envisioned would be extremely costly, and absolutely uneconomical, if their cost had to be assigned to the power-development feature alone.

All in all, the whole St. Lawrence seaway project seems to be one that does not stand up under close inspection. A check of the previous hearings shows clearly that the Chief of Army Engineers was indeed reluctant to declare that the project could be self-liquidating and admitted that his data was not only old, but incomplete.

In these days of extensive financing, a billion dollars is not unheard of by the American public. If we are ever to get back to the kind of sensible economy that permitted the United States to grow strong and to retain its world leadership, we shall have to get back to a policy under which a billion-dollar project will be scrutinized 10 times as closely as a $100,000,000 project, and 1,000 times more closely than a million-dollar project. In other words, we shall have to begin once again to consider a billion dollars a great amount of money, and we owe it to our citizens to get in such a frame of mind right away.

If America is to fulfill its responsibilities to the needy nations of the world without imposing an insupportable burden upon our national economy, it is requisite that only essential expenditures be given approval at this critical period.

Conservation of our financial and physical resources is a must. In the other direction lie uncontrolled inflation and possible chaos. The Great Lakes-St. Lawrence project is no more essential than other desirable reclamation and other public projects. It can be deferred without any provable serious detriment to sectional or national interests—certainly until such time, as the able Senator from Massachusetts pointed out several days ago, a more intensive survey as to the actual economic factors has been conducted. It cannot be approved without danger of serious further upset to our national economic balance. The Congress would be flying in the face of sound business practices to add this huge expense to a budget which already is dangerously high. I believe the interests of America as a whole require the defeat of this resolution, and I shall so vote.

Mr. McCLELLAN. Mr. President, I had not intended to undertake a discussion of this measure because of pressure of other duties which have prevented me from giving it the necessary study and doing the necessary research to substantiate with facts the conclusions which I have reached with respect to it. However, I feel that on issues of this magnitude and importance one ought to make his position clear. I am taking this occasion simply to record my views and to state why I cannot support this measure.

In the first place, assuming that the project is economically justified, and assuming that it is to our advantage and in our interest as a nation to incur this enormous expense, and assuming further that the benefits which would flow from it, either as a project for national defense or as a project affecting the economics of our Nation, would greatly improve and enhance our position, it is of such far-reaching magnitude that it involves, in a measure, our national sovereignty. Likewise it involves an obligation with respect to the sovereignty, in part, of our neighboring country.

A great deal has been said with regard to whether this document is in fact a treaty or an executive agreement; and much effort has been made in debate to sustain the position that even though it properly should be a treaty and not an executive agreement, the objectives can be accomplished in this way.

Let us grant that is true, Mr. President, for the sake of discussion at the moment. Assuming it can be done this way is the only thing with which we are concerned as Senators of the United States, the fact that it can be done legally in this way? Are we not a little more concerned than that? Should it be done this way? That should give us primary concern. The very fact that a thing can be done by subterfuge, however worthy it may be, does not justify resorting to that course of procedure. If it were not for the fact that the proponents—and I include the State Department and the administration—are of the opinion that the merits of this proposal do not carry with them the persuasion to influence a two-thirds majority vote of the Senate, there would have been written the title of "Treaty" instead of "Executive Agreement." This is a subterfuge. It is a device to circumvent the very fundamental law of the land. Even if it can be done legally, as the guardians of our liberty and of our fundamental law, I say the Senate should not permit it to be done by this procedure.

There is a great tendency by some in America to break down the Constitution and to distort it, to read into it interpretations which the founding fathers never even conceived or imagined. That is a process and practice, slow though it may be, which will ultimately destroy the Constitution of the United States. Where there is doubt—and certainly the course which this debate has taken does indicate great doubt among the best legal minds—where there is doubt, what is our responsibility? How should that doubt be resolved? It should be resolved in accordance with the plain letter and intent of the Constitution as written and adopted.

At the very inception of this undertaking a treaty was proposed and submitted for congressional approval. It was written first as a treaty. What caused the change? Who changed their minds, and why? Back of it, Mr. President, is political expediency. That is why today the words "executive agreement" have been substituted for the word "treaty." Let me suggest this to the Senate. If by that device the State Department and the present administration, or any other administration, can evade the plain mandate of the Constitution of the United States with respect to an international agreement and covenant of this magnitude and of this duration, which involves a part of the sovereignty of the two nations involved—if by this process it can be done, and the Senate, by a majority vote, should accept this procedure, then we shall have nullified for all time to come that provision of the Constitution requiring treaties to be ratified by a two-thirds vote of the Senate. Can the Senate possibly conceive of any other agreement respecting the national boundary between these two neighboring countries? Can the Senate possibly conceive of any other agreement that can ever be made which will be of any more importance than this one unless it should be a treaty of peace following war between the two countries? I cannot conceive that in the future there will ever be any reason, necessity, or opportunity for any more important agreement to be made between two countries than is this one. If we now are willing to take a device, however legal it may be, to circumvent the Constitution, and to do it by executive agreement, we are simply, in my humble judgment, failing in our duties and responsibilities to say to the State Department, the administration, and the proponents of this measure that we shall not encroach upon or sacrifice the fundamental law of this land for the sake of political expediency and the gaining of a desirable momentary objective.

If this project has in it genuine merit which will justify this country in assuming the obligation involved with respect to expenditures which will be required in order to do this work, if it can be justified on that basis, Mr. President, it can certainly receive a two-thirds vote of the Senate. The only reason it is presented in the form of an executive agreement, Mr. President, is to evade the plain mandates of the Constitution. With small measures pertaining to our own internal affairs and domestic economy we might sometimes be a little careless, and we are. In the pressure of duties we do not always weigh as carefully as we should, perhaps, the constitutional requirements. But in a matter of this magnitude it is dangerous for us to ignore them. Some may be complaisant about these dangers, these encroachments, these circumventions of the basic law of the land, but once we find a device to get around one plain mandate, the ingenuity of others will be employed to find another device to circumvent another section, article, and clause of the Constitution. It will become a habit—an established procedure, and that provision of the Constitution will be nullified.

We have it in our power in the United States Senate to vote an end to that practice. Once we turn down proposals of this kind and require the Constitution to be followed we shall have little trouble with respect to maintaining its dignity and preserving its integrity. We shall not have a lot of loose legislation. The practice of endeavoring to circumvent the Constitution will be discouraged. We also have it within our power to be careless and complaisant and let these dangers grow and increase, but I am unwilling, Mr. President, to be a party to that course or to sanction it by my vote.

Therefore I cannot vote for this resolution. If it were submitted as a treaty I could give more favorable consideration to it. It has been urged that this project is a great defense project necessary to our national security. I am not an expert on national security. I can well understand that the increase in production of hydroelectric energy and the development of our waterways, the implementing of our present navigation systems, and all those things go, it is true, to build a stronger nation. As a general proposition, Mr. President, I certainly favor the development of our waterways and our resources to their fullest potential, so as to convert them to the greatest service to humanity. This project may be economically justified. There is some doubt about it, but as a national defense project, Mr. President, except for the additional power which will be generated, I have serious doubt about it. I think we have only to read the statement of General Bradley, which is found on page 3 of the minority report, to be convinced—and it does not require military genius in order to understand it—that this seaway constructed with locks and dams as provided would simply present an exposed target on our border and in the neighboring country of Canada.

Mr. President, any military man of competent judgment and experience, and certainly those who participated in the last war or those who have seen the destruction which is wrought by one well-placed bomb, knows that it would take only one properly placed bomb at any time to put the whole project out of commission for the duration of a war. It is said that the proposed project could be defended, but General Bradley says it could not be.

Mr. President, what would be required to protect it as a national defense facility? How many airfields would have to be built around it, and how many men, airplanes, and other facilities would be required? Such items would amount to a great total expense. In the end, would the increased shipping and power be a net gain? Would they prove to be an asset or a liability in the event of war? I say, Mr. President, that on the basis of the evidence presented in the hearings and on the basis of the other information available, there is just as much to indicate that it would prove to be a liability as there is to substantiate the contention that it would be an asset, in time of war.

Whether this proposed project can be economically justified in regard to our domestic economy may be the subject of honest differences of opinion. As to the power project, Mr. President, I am convinced that enormous benefits would flow from it. Frankly, I should like to see it constructed for that reason. I should like to see both our Nation and our neighbor country of Canada utilize the great potentialities from the development of hydroelectric power. But I do not believe the claimed navigation benefits are at all substantiated by the testimony I have read in the hearings.

Mr. President, there has been some criticism here from those who say, "You believe in the power project, but you do not believe in the navigation project." I do not say I do not believe in the navigation project. Probably it, too, can be developed. But I believe it to be the inescapable, an irrefutable conclusion, based on the testimony developed at the hearings, that if this project is to be developed, there will have to be a far more extensive development than that which is provided for in the present proposal. Otherwise only half the benefits possible from this project will be made available, and the remainder will be destroyed or lost. If we are going to construct this project, let us do a thorough job of it. I know that some of our resources have been more or less wasted by reason of the lack of proper and adequate planning, construction, and improvement so as to develop the maximum benefits that might be made available.

Mr. President, as I have said, I had not planned a prepared speech. But I come now to another feature of the project which attracts my attention. Just how much effect the development of this waterway might have on the other economy of the Nation, I cannot say; but we know it would have a terrific impact on the finances of our Government. I know it may be said that a few hundred million dollars is not very much money; but before we get through with this proposed project we will have spent a billion and a half dollars. Suppose the seaway and the power plants are built, at the estimated cost, plus the increased cost which has accrued since the estimates were made. If we are to protect such an investment, it will be necessary to build air bases on both sides of the project, in our country and in Canada. Such bases and further developments will be required if the project is to be adequately defended in time of war. So before we are through with the project, the initial investment will, in my humble judgment, be a billion and a half dollars, at the very minimum.

Let me point out that I do not wish to see this project retarded, insofar as any part of it can be economically justified; but today we have on the statute books authorizations for some $6,000,000,000 worth of inland-waterway projects. If the proposed St. Lawrence project is authorized as a national-defense project, at this tremendous cost, and if as we go along with the program a recession comes and Federal revenues fall off and we have to curtail expenditures, where will the cuts be made? I can tell you where they will be made, Mr. President. They will be made on the inland waterways of this country. This St. Lawrence project, having been authorized, if it is, will have been authorized as a national-defense project; and then it will be argued and insisted upon that inasmuch as it is authorized as a national-defense project, we cannot afford to delay its construction. That would mean that it would be constructed at such a period, in all probability at the expense of the inland waterway improvements which already have been authorized, and many of which are well planned and ready for construction. The sum total and benefit of those projects, Mr. President, as a matter of implementation of national defense and enhancement of our domestic economy, will far exceed all the claimed benefits which can possibly flow from the St. Lawrence seaway.

Mr. President, my present reason, however, for opposing the St. Lawrence seaway is based on another objection. I should like to see these other phases of the St. Lawrence project given further study; and certainly if it is to be constructed, I should like to see the plans modified to such an extent as to provide for the maximum development and benefit from it. Such a development would cost more, of course; but whenever we do such a job, it should be well and completely done. But, Mr. President, I am unwilling to cast my vote for and give my sanction to the practice that is present in this instance, namely, the writing of the words "executive agreement" in place of the word "treaty," in a case which does involve a treaty, which is known to call for a treaty, which was conceived of as a treaty, and which was attempted to be executed as a treaty, although when it was found that it did not have the merit and the appeal and the persuasive force to muster support of two-thirds of the Members of this body, the device of an executive agreement was resorted to. I repeat, Mr. President, that even though such a step can be taken, that is not sufficient for me. Even though the proposed step might be termed legal by the present Supreme Court, that is not the controlling factor. The real issue with all of us should be whether this proposed step should be taken by means of subterfuge, for political expediency, and by circumventing the plain mandate of the Constitution.

Mr. President, I now ask unanimous consent that at the conclusion of my remarks there be printed in the RECORD an editorial entitled "The St. Lawrence Seaway," from the Arkansas Democrat of January 28, 1948.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ST. LAWRENCE SEAWAY

The proposed St. Lawrence seaway is up in Congress again. It would provide a channel 27 feet deep at the shallowest, from the Atlantic Ocean through the St. Lawrence River and the Great Lakes to Duluth, Minn., at the western tip of Lake Superior—a third of the way across the continent.

The estimated cost is about $675,000,000, of which $330,000,000 would be paid by the United States Government, $184,000,000 by Canada, and $161,000,000 by the State of New York.

No doubt there would be large benefits—to the northeastern part of this country and to Canada: cheaper shipping and a lot of electric power. But disadvantages are also pointed out, and they must have weight, or the project wouldn't still be hanging fire after a half century of agitation for it.

From our point of view down here it seems doubtful wisdom to provide for concentrating more industry and people in the already congested Northeast. It doesn't look sound as a factor in the Nation's defense.

The Nation will be stronger in every way, for peace or war, if it is more uniformly developed. And a project that would contribute much to this is the plan for the Arkansas River. Our Congressmen should urge attention to it.

Mr. WILEY. Mr. President, I have listened to the argument of the Senator from Arkansas, and I want to say that, coming from the State of Wisconsin, I have always been proud of the fact that the Spooner Act, which brought into being the Panama Canal, was fathered by a predecessor of mine from Wisconsin. The Panama Canal did not help the Middle West, but it was a boon to Boston, New York, Philadelphia, Baltimore, New Orleans, and the west coast. In fact, the Middle West was placed at a competitive disadvantage, but the Senator from Wisconsin fathered the act in the national interest. I am proud of what it did for the national interest. I am glad we have today men who are not concerned simply about their States.

It was Justice Holmes who said that the Constitution is a living, growing, and pulsating organism. It was Patrick Henry who said, "Give me liberty or give me death," and then when it became a question of whether we should have a Constitution, he said, "No." He had not grown with the times. But men like Marshall, Washington, and Madison saw the need of national unity and national effort.

This is the first time the cat is out of the bag, and that men from the East have joined with the inland waterways boys claiming the seaway will injure their highways on the rivers, if it is completed.

I give the opponents this one word: If this matter becomes an issue, since we of Wisconsin have stood and will stand by the development of the Missouri and the Arkansas, we would like to see a little reciprocity of fair and open-minded consideration on the merits of the seaway resolution. We expect it to be realized that if there is to be an 8-foot, a 9-foot, or a 7-foot channel on a river, as happened in the case of the Mississippi, then it would be well from a national standpoint, and on its own merits, to have a 27-foot channel for just 100 miles on the St. Lawrence.

A little reciprocity of fair and open-minded consideration from each of us on the merits of measures of this character, regardless of their geographic origin, will of course properly benefit many sections, and in so doing will promote the general welfare. Without that kind of open-minded consideration, any appropriation bill relating in any way to any geographic area would face fights till hell freezes over—undesirable sectional fights, which none of us want.

THE EUROPEAN RECOVERY PROGRAM

Mr. JENNER obtained the floor.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. JENNER. I yield to the Senator from Nebraska.

Mr. WHERRY. I understand the distinguished Senator from Indiana is about to deliver an address on the so-called European recovery plan. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	George	Morse
Baldwin	Green	Murray
Ball	Gurney	Myers
Barkley	Hatch	O'Conor
Brewster	Hawkes	O'Daniel
Bricker	Hayden	Overton
Bridges	Hill	Reed
Brooks	Hoey	Robertson, Va.
Buck	Ives	Robertson, Wyo.
Bushfield	Jenner	Russell
Butler	Johnson, Colo	Saltonstall
Byrd	Johnston, S. C.	Smith
Cain	Kem	Sparkman
Capehart	Kilgore	Stennis
Capper	Knowland	Stewart
Chavez	Langer	Taylor
Connally	Lodge	Thomas, Utah
Cooper	Lucas	Thye
Cordon	McCarthy	Tobey
Donnell	McClellan	Tydings
Downey	McFarland	Umstead
Dworshak	McKellar	Vandenberg
Eastland	McMahon	Watkins
Ecton	Magnuson	Wherry
Ellender	Martin	Wiley
Ferguson	Maybank	Williams
Flanders	Millikin	Wilson
Fulbright	Moore	Young

The PRESIDING OFFICER. Eighty-four Senators having answered to their names, a quorum is present.

Mr. JENNER. Mr. President, anyone acquainted with the realities of present-day Europe, its grinding pressures, its hunger, its spiritual starvation, must feel that wherever relief from this vast ugliness and injustice may be looked for—there we must make due search. This search must be made in full awareness that our Nation abroad is confronted with a new and sinister power bent upon an implacable mission of world domination.

We are not at peace. At best we enjoy but an uneasy armistice. At home we are already at grips with the evils of monetary inflation and propaganda appeals for the controls of state socialism.

It is in this spirit of humanity and humility and yet with these foreboding facts squarely before us that we must study to comprehend the veiled generalities of the so-called Marshall plan.

The United States Senate has never failed to show unmistakable sympathy for the peoples and the nations who need and have earned that sympathy. No upright person will ask or expect the United States Senate to be a "sucker" for nations which have not earned the right to our sympathy. The Senate will fail in the discharge of its responsibility if it fails to go beyond mere emotionalism and inquire fully and fearlessly into the underlying facts and into the nature and causes of the problems with which we are attempting to deal.

Indeed the decisive considerations must be the facts rather than any so-called general principles regarding the charitable obligations of this Nation in the matter of care and protection for other nations. A glance at the world deterioration of the past 12 months will reveal the all-encompassing reasons for a national policy of greatest care and most balanced judgment.

Scarcely a year ago America was still talking about one world. Less than 3 months ago the last conference of foreign ministers collapsed like a punctured balloon and notified the world that American diplomacy, under Mr. Truman, is little more than a system for announcing public disagreements publicly arrived at.

The past year has clearly revealed the frightfully precarious margin of time within which we can hope for exclusive custody of the power to destroy all civilization. It also disclosed in its ominous sunset the forbidding outline of the tens of millions who would exult to destroy us. There can be no denying a crisis in our national life and a crisis in world affairs.

There can be no denying our duty to determine the exact stuff of which this crisis is made. Just as in the crisis of President Lincoln's time, so in the crisis of our time, pernicious abstractions are everywhere being urged upon us. Among the most insidious of these, in my judgment, is the doctrine that the United States has a positive duty to give huge sums of money to European nations if it is to save the world from communism and chaos. This is said to be a calculated risk. It is clearly that dubious sort of risk for the success of which no one is yet willing to pledge his honor or give the least assurance that it is more than a gambler's chance. Taking gamblers' chances with our Nation's future was a recognized New Deal procedure. My mail indicates that America is now awake to the peril implicit in this procedure—and wants no more of it.

Indeed, under clear-eyed scrutiny, this calculated-risk business is credible only as a lively fiction intended to obscure the suffering that inevitably will follow for the American taxpayer. I know that many thoughtful Members of this Congress regard it as little better than a strange frolic of generous impulse, which might well imperil and disrupt our entire national structure.

It is obvious that the protection of our national integrity rests far less on the acceptance of formulas, in which agreement may be all too easy, than upon a correct appraisal of the actual purposes and the actual effects of our proposed conduct when applied to the facts of life in Europe.

It is the constitutional function of the Senate to guard the Nation's welfare in matters of foreign policy. It will be a crime against the people if we indulge in pernicious abstractions while resolutely shutting our eyes to the social, political, and economic facts of the present-day Europe.

In this connection, we should remember that there is nothing inevitable in history except as the acts of men make it so—and that unless we move with promptness and vigor to protect the strength of our own land, we shall shortly have precious little with which to help anyone anywhere in the world.

It seems to be a universal assumption that if the European crisis deepens or if European shortages continue, then Europe will turn in desperation to communism.

Apparently it has never occurred to anyone that Europe's crisis, if left to those responsible for it, could well lead to a demand, not for communism, but for a return to economic freedom. Indeed, there are already some signs of this. Italy has recently found it expedient to restore relative freedom in foreign exchange. France has found it necessary to drop some of its more important controls, and, only a few days ago, marked the franc down sharply toward its true worth.

Mr. Truman has been warning us about the dangers of providing "only half-hearted and halfway help." He has ignored the dangers of half-hearted and halfway self-support in Europe. Unless Mr. Truman is actually and secretly opposed to the American free-enterprise system, I doubt that he will deny the tremendous risk that funds supplied by the Marshall plan could make the situation in Europe sufficiently easy, for the time being at least, that they would serve in fact to delay or prevent a return in Europe of free markets and free enterprise upon which the economic health of the whole world is grounded.

I am not one of those who would discount the European problems that are a direct result of war damage. It is true, nevertheless, that in the whole of Socialist and neo-Communist Europe, production has been so disorganized and reduced by economic prohibitions and by the requirements of a special license for almost every economic act that the world-respected London economist has felt impelled to warn us that—

> What is planned is actually a series of bottlenecks.

With many others I believe that the most damaging single circumstance in the whole effort toward European recovery resides in the socialist economic controls that systematically suffocate its own capital production and investment. Former Premier Daladier of France recently declared in debate that inflation cannot be overcome in France as long as a managed economy prevails. There are many evidences in Britain that public faith in a managed economy is dying. Certainly, we are simple-minded and stupid if we embark on a program that amounts to nothing more than paying for French and Italian strikes.

While the typical European national budget is wretchedly unbalanced, it is still true that massive sums are being spent on armaments, on increasing pensions and family allowances, on nationalized industries operating under huge deficits, on food subsidies, and other forms of social security, while those governments blame their consequent economic distress on speculators and hoarders.

Indeed, both in Europe and America the whole subject of inflation requires the kind of clear intelligence which the London Economist gives us again when it pointed out recently that—

> Rising prices and inflation are associated together like scarlet fever and rising temperatures—but, so far from being the same thing, one is the cure for the other.
>
> Inflation is an excess of demand over supply and one way in which the two can be brought into balance is by such a rise in prices that the available supply satisfies the demand. * * * Nobody in his senses would advocate an indefinite rise in prices as an end in itself.
>
> But it does bring the inflation to an end whereas holding all prices down merely guarantees that it * * * shall go on forever.

There is nothing new in all this.

More than 100 years ago that eminent economist John Stuart Mill wrote:

> It is not so much the general or average price of food, as its occasional high price in times of emergency, which governments have studied to reduce.
>
> In some cases * * * the compulsory regulation was attempted by the ruling powers to counteract the necessary consequences of their own acts; to scatter an indefinite abundance of the circulating medium with one hand and keep down prices with the other, a thing manifestly impossible under any regime, except one of unmitigated terror.

The confusion of today is well illustrated by the statements of two eminent gentlemen who have posed as possessing some authority on this subject, the President of the United States and Mr. Chester Bowles.

On February 14, 1946, President Truman said:

> Production is our salvation—production will do away with the necessity for Government controls.

In October of 1947, in a radio address, Mr. Truman asserted:

> We are producing more goods for civilian use than ever before in history.

Testifying before a committee of this Congress on February 18, 1946, that noisy expert on price controls, Mr. Chester Bowles, said that "production is the only answer to inflation."

Since we are now turning out more than 50 percent of the world's known industrial production as against 30 percent before the war, it is perfect nonsense to suggest that a lack of production has brought the current palsy of inflation upon us.

In 1947 we produced in goods and services more than $230,000,000,000 worth, or more than 13 percent above the record peacetime year of 1946.

This achievement, moreover, cannot be charged to a rise in prices for the items turned out were 23 percent in excess of the astounding total of 1946—Time, page 75, January 12, 1948.

A clear examination of the contradictions and the fear that constitute the core of Mr. Truman's ever-shifting policy serves but to emphasize that our crisis is a crisis in leadership rather than a crisis in economics or diplomacy.

Amidst all the claims and counterclaims of the Truman administration the astounding fact remains that the Nations of Europe have turned to the United States, the last free market in the world, to make up their own deficiencies exactly when Mr. Truman has been asking us to reestablish at home the collectivist system of rationing, allocations, licensing, wage controls and price controls that have in their very nature created the present European crisis.

With gold and dollars now held by the outside world having reached the unprecedented total of twenty billions and with the United States having contributed in cash and goods during the past 2 years an estimated seventeen billions additional, we justly stand in amazement at the rising chorus of complaints over Europe's ever-growing dollar shortage.

How can there be a dollar shortage, and who is responsible?

The simple truth is that nearly every currency in the world is deliberately overpriced in relation to the dollar.

This is true because nearly every country in the world wants to buy at the lowest possible price in the American market.

Our foreign friends are trying to do this by keeping their official currency exchange rates high and making it a crime to buy or sell their currencies below the official rates.

The responsibility falls squarely upon the shoulders of these governments.

It is exactly this policy of overvaluation coupled with socialistic government controls that encourages the Europeans to increase their buying from us while discouraging our purchases from them.

The balance of international trade can never be restored under any such system.

Marshall plan or no Marshall plan, this problem will never be solved until all nations are willing to accept the verdict of the open market as to what their currencies are really worth.

France's recent devaluation is simply a courageous and clear-headed recognition of the fact that she must earn more dollars and pay her own way, rather than rely on the charity of America or any other nation.

In trying to measure these problems, we must never forget that if we send food or money to European nations which maintain enormous standing armies, defaulting state-owned industries, and immense pension and family allowances for nonproductive workers, we may be solving their immediate food problems only by making it possible for them to take their most productive youth away from the farm and the factory in order to keep them in military service.

Under the proposed Marshall plan, the money we lend or give to relieve a foreign nation from providing for any of the needs of its own people can be used for any purpose that nation may choose, including the increased publication of anticapitalist propaganda.

The conclusion is inescapable that gifts which serve only to prolong the paralysis of European production and European self-help are worse than thrown away.

In November of last year, Mr. Truman asserted that—

> An attempt has been made to place the blame (for higher prices) on our foreign aid program, but this has not been borne out by the facts.

As to our domestic inflation, Mr. Truman may be quite correct.

Our inflation is the direct result of his own policy of high wages and continuously expanding bank loans.

In truth, Mr. Truman's administration seems to be "all apoplexy at the center and apathy at the extremities."

It seems to be Mr. Truman's thesis that the international crisis can only be solved if we buy off the dangers of communism by giving large cash donations from the American taxpayer's pocket to already shaky European governments most of whom are, in fact, only a degree or two removed in color from the menace from which we are supposed to be protecting them.

The giddiness of this reasoning becomes apparent with our first glance at the facts.

In the December 22 issue of one of our leading national publications—Newsweek—we find the following dispatch:

> As a result of the Communist-inspired strikes, economic advisers have told the State Department that France now faces a production deficit of around $800,000,000 not contemplated at the time stopgap aid figures were prepared.
>
> This more than offsets the $328,000,000 contained in the interim-aid bill calculated to tide France through the winter crisis up to March 31.

In other words, the Communist-inspired strikes in France cost in production $800,000,000, when we as representatives of American taxpayers were hurriedly called back into special session to rush money over to France to tide them over to March 31.

To be sure, the Communist-inspired strikes in France and Italy and elsewhere can quickly cancel out the value of our aid.

Our aid can never hope to cancel out the evil effects of those strikes.

If European governments lack the unity and the purpose to prevent these ruinous disruptions of output, then it is manifestly impossible for us to save Europe.

Europe has 350,000,000 people to feed and nobody suggests that as a nation we have more than a narrow margin, of less than 5 percent, to spare from what we produce, to feed and clothe our own 140,000,000 people.

It is an elementary fact that aid to European governments will be futile unless they change their own economic policies—Marshall plan or no Marshall plan. In support of this conclusion, I offer the words of the most distinguished British economist of our era:

> The United States is disinclined to entangle herself further (after recent experiences) in the affairs of Europe. * * * There is no guaranty that Europe will put financial assistance to proper use, or that she will not squander it and be in just as bad a case in 2 or 3 years hence as she is now * * * in short, America would have postponed her own capital development and raised her own cost of living in order that Europe might continue for another year or two the practices, the policy and the men of the past 9 months. * * *
>
> If I had influence at the United States Treasury, I would not lend a penny to a single one of the governments of Europe.

These are not the cracked and hollow words of some current American isolationist. They are the ringing denunciation of John Maynard Keynes, uttered in 1919, when European economy was immeasurably healthier than it is today. They constitute an amazing prophecy and a stinging rebuke to the President, who goes blithely forward with a huge program of foreign aid, piled on top of the swollen buying power of our own domestic market, a swollen buying power which has been created almost entirely by the vast increase in money and bank credit brought on by his own fiscal policies.

Does Mr. Truman think the American people will fail to perceive the dangerous insincerity implicit in the efforts of his administration to protect us from the evil consequences of his own deliberate policy of easy money, high wages, and massive foreign loans—just because he asks for more powers against speculators, producers, and profiteers?

Mr. President, recently, Mr. Truman told us he wanted legislation permitting him to impose price ceilings. Now he blames us for not giving it to him. Yet we all know, as the most elementary lesson of the last war, that mere price controls fail to solve anything.

We all know that if prices are held below the point where supply and demand meet on natural ground, then a few people, like Mr. Edwin Pauley, will soon buy up the entire available supply—and thus require iron-fisted rationing.

In truth, rationing is the inevitable and absolute corollary of price controls.

In truth, too, Mr. Truman wants us to accept for America—in this hour of our supposed victory—the wartime controls of a police state—so that he can more easily pursue a foreign-aid policy of the very sort that Lord Keynes so roundly and wisely denounced a generation ago.

It is pure nonsense to suppose that if we throw in enough money or goods to raise the standard of living in western Europe, the nations of that area will automatically withdraw from state socialism and communism, and will follow their supposedly natural bent toward free enterprise.

It is at least a startling coincidence, if not a calculated and deliberate phenomenon, that only a few weeks ago the pinko-Socialist Labor Party in Britain was materially aided by the very fact of Mr. Truman's appeal for the reestablishment of price controls here in America.

The New York Times reported from England that Mr. Truman's appeal had become a major factor in the Gravesend by-election, in which labor conducted its Socialist campaign under the slogan:

Do you stand with Attlee and Truman on the controls issue, or with Churchill and the price racketeers?

Mr. President, the question of utmost gravity to many of us is not whether Europe wants to return to the ways of freedom, but whether Mr. Truman may not be seeking to press our Nation inexorably down the path of state socialism.

Under the massive cloud of doubt that now envelops him, I sorely question whether Mr. Truman can lift either our foreign or our domestic policies above the level of dread suspicion and mounting alarm.

As one student of affairs and as a soldier who served in the European theater in the recent war, I long since have reached the conclusion that the nations of Europe are not in danger of communism today because they have run into a chain of economic crises. They have run into a chain of economic crises because they have succumbed to the illusions of a dictated economy, socialistic controls, and deliberate monetary inflation—those three things. Taken together, these have destroyed the mechanism of free enterprise and its irreplaceable incentives to self-respect and self-support.

It is precisely because Europe is in such economic distress that she needs free enterprise—and needs it right now—and not, as Cripps says, in effect, "On with the socialistic program, although we run up a billion-dollar deficit next year, even with the aid we are supposed to get."

If the United States tries to bolster the whole western world with dollars, it is quite conceivable that we may contribute to the world's future nothing better than a corresponding paralysis of local responsibility everywhere else.

Every statesman in history, sooner or later, has had to learn that patriotism and unselfishness have been invoked repeatedly for causes far below the level of the common good.

Every Member of this Congress knows, moreover, that there must be some limit to our prodigalities if the bitter seeds of discontent are not to be planted deep in our already painful self-inflicted wounds.

Mr. President, the desires of President Truman and Secretary Marshall seem to be as nebulous as the very Marshall plan itself. As late as January 29, only 4 or 5 days ago, President Truman told his news conference he wanted "all or nothing." Secretary Marshall said earlier to the Congress, "take it or leave it." And, as I have said, Mr. Truman said, only a few days ago, that he wanted "all or nothing." Yet, while insisting on authorization for the full 4¼ year program, he, at the same time, voiced arguments for the $6,800,000,000 cost of the European recovery plan for the first 15 months. But now they are talking about cutting it down to 12—in other words, to make it more palatable, so we can swallow it more easily.

Could it be that this is somewhat of a hasty and ill-conceived retreat from Mr. Truman's original demand of $17,000,000,000? Must we accept this as his own acknowledgment of the new unrest and the rising public temper toward these problems?

Mr. President, having watched with careful anxiety the mounting anger in masses of men and women as Mr. Truman's domestic price policy and his prodigal foreign policy have heaped burden upon burden on their aching backs, I have become increasingly certain that the quality of our future civilization will never measure our hopes if it is to depend on some happy accident of maudlin generosity.

We must do far better than to create on a world-wide basis another "boondoggling PWA."

You may well ask what I have to suggest—what may be in fact an available and sensible alternative.

I have the following suggestions to make:

First. Since the United Nations is the world's last hope for widespread and long-continued peace, I would ask America to take the lead in putting real teeth into its procedures so as to make it work—at whatever cost—with or without the cooperation of Russia—for if Russia will not cooperate then the unity of the rest of the civilized world is still the last and best hope for peace which humanity can find anywhere in this troubled world.

Second. I would defend free enterprise without apology, recognizing that from its deep well-springs of imaginative enterprise and human incentive have flowed the whole magnificent achievement of our people.

Third. I would resolutely oppose the doctrine of the welfare state both at home and abroad and would therefore extend loans or grants only on terms and under conditions that make the solvency of the borrower certain and the repayment of a fair and equitable consideration to the United States an equal certainty.

Fourth. I would tell the American people the truth, the whole truth, and nothing but the truth.

If our purpose is honestly and actually to prevent Communist expansion I would explain to them that the present administration and its predecessor are totally responsible for the Communist domination in all that vast land mass from Berlin, across Europe and Asia, to the very waters of Alaska.

I would tell the American people what the deals were that made this possible—at Yalta, Tehran, and Potsdam.

I would tell them by what right they may now expect a better result from the same hands that thus far have produced only diplomatic chaos.

If Russia is our enemy, I would explain to the American people why American engineers are now, at this very minute, working in Russia with the knowledge and acquiescence of our State Department, to restore Russia's mightiest military potential, her bombed and broken power dams and hydroelectric plants.

Fifth. I would demand that the international monetary fund cancel the requirement that member nations maintain controlled exchange rates, or withdraw from the fund altogether.

Sixth. I would recognize that the business of lending money is a specialized business and that international lending is doubly perilous for the uninitiated.

I would place this entire project, therefore, in experienced hands, where the customary safeguards to our money and property will be assured.

Seventh. I would open our private financial markets to foreign loans, under proper safeguards for the protection of the ultimate investor.

Eighth. I would recognize and accept the challenge of communism in the fullest realization that appeasement of Stalin will be no less calamitous than was the appeasement of Hitler and Hirohito.

Ninth. Last, I would recognize, above all things, the devious Oriental mind that guides Stalin to oppose the Marshall plan on the carefully calculated assumption that his opposition will insure its passage.

He certainly wants it to become a law, for only thus can he continue the collossal game of "Put and take" in which we "put" and he "takes."

For it is the simple truth that while we have been giving aid to the extent of seventeen billions, in Europe, Russia has been taking in reparations twelve billions out of Europe. (U. S. News-World Report, January 30, 1948, p. 19.)

Only so long as we continue to "put" can he continue to "take."

Marshal Stalin knows better than anyone now living that his sole hope for world domination lies in the success of his secret purpose to have America spend herself into bankruptcy.

With these guiding principles in mind I shall gladly join in the effort to achieve a world of order and stability in which the American people will not be asked to respond to economic superstition or serve the will of any demagogue.

Proceeding in this spirit, I believe there is a genuine opportunity for us to lift from our generation the sense of desperation and terror which, for so long a time, the enemies of liberty have been permitted to encourage without challenge.

Mr. CONNALLY. Mr. President, will the Senator yield?

Mr. JENNER. I yield.

Mr. CONNALLY. The Senator from Indiana has delivered a very interesting and comprehensive address, which it was expected he would do. Unfortunately, the proposals he makes are not before us. The Marshall plan is before us. I just wanted to inquire whether the Senator is for or against the Marshall plan.

Mr. JENNER. In its present form I am unalterably opposed to it.

Mr. CONNALLY. The Senator could be induced to support the plan, though, if a few modifications here and there were made?

Mr. JENNER. It seems to be the trick now to "induce." We start off with a 4-year program to spend $17,000,000,000.

Mr. CONNALLY. I did not ask that.

Mr. JENNER. The Senator propounded a question, and I am trying to answer him. Did we not cut it then to $6,800,000,000? Now we are talking about shortening the period from 15 months to 12 months, and of reducing the amount to $4,500,000,000. I say, tell the people the truth, the whole truth, and nothing but the truth.

Mr. CONNALLY. That is the reason why I am interrogating the Senator.

Mr. JENNER. I am answering.

Mr. CONNALLY. I suppose the Senator is going to tell me the truth, the whole truth, and nothing but the truth. What can be done now to make the plan acceptable to the Senator?

Mr. JENNER. I will say to the Senator that I have tried in my remarks today to explain my position on what I think should be done.

Mr. CONNALLY. I thank the Senator. I am not trying to heckle him. I am just trying to find out what his attitude is going to be, because if his attitude is adamant——

Mr. JENNER. It is not adamant. I just want to protect my country.

Mr. CONNALLY. The Senator proposes about eight different things that he would do.

Mr. JENNER. Nine.

Mr. CONNALLY. Would the Senator require that all those nine things be done before he could agree to the Marshall plan?

Mr. JENNER. I realize that in legislative bodies there must be compromise, but I do not want to compromise away my country.

Mr. CONNALLY. So at present we cannot count on the Senator?

Mr. JENNER. It is too weak.

Mr. CONNALLY. Very well.

CENSORSHIP

Mr. KNOWLAND. Mr. President, I wish briefly to call to the attention of the Senate a matter which I think should be of some concern to the Members of Congress and also to the country. Not very long ago we had up for consideration on the floor of the Senate the so-called Smith-Mundt bill, which I was pleased to support. Having been in Europe last October I saw the need for the Voice of America program. Also I saw how in some of the countries of Europe the Soviet Government, through its information service, was running circles around us. I think the enactment of that bill was a constructive step for us to take.

However, I think it is doubly important, along with the Smith-Mundt bill, in which we bring to the attention of the world the facts as to what is going on, and try to lift at least the corner of the iron curtain, that we in the United States not permit an iron curtain of any type or character to exist either between the Government and the people of the United States, or between any of our occupied areas and our home country.

I call to the attention of the Senate a series of articles and telegrams, which I shall later put into the RECORD. To give some continuity to the situation I first wish to read an article by Mr. Keyes Beech, of the Chicago Daily News foreign service, written under a Tokyo date line on January 26. It reads as follows:

ARMY CENSORS IRK NEWSMEN

(By Keyes Beech)

TOKYO, Japan, January 26.—"That's classified" remains the stock reply correspondents here get when they want to know anything the supreme command for the Allied powers doesn't want them to know.

Apparently SCAP still operates today—28 months after the occupation of Japan—on the military principle that the American people are entitled to know only what the military wants them to.

At any rate, though no longer subject to court martial as in the early days of occupation for indiscreet reporting, correspondents cannot get any facts considered unfavorable to General MacArthur on his occupation.

JAPANESE WARNED

With few exceptions, section chiefs simply refuse to discuss matters they don't want printed, and their subordinates talk with correspondents at risk of their jobs. Furthermore, Japanese officials have been warned by SCAP against giving out any information without its approval.

News items which have gotten "classified" treatment recently include the question of how the Army is making up the $80,000,000 lost earlier in the occupation on illegal yen-dollar transactions.

A recent report by a Government section investigator criticizing the extravagance of Emperor Hirohito's travels was also pigeonholed.

The matter of how much of Japan's products, classified as war material, has been returned to the Japanese Government is on the shush list.

PRESSURE EXERTED

Last week MacArthur's headquarters indicated that it was prepared to give this unofficial censorship teeth by restricting travel by correspondents based in Japan but assigned to cover all of the Far East.

A correspondent ordered to temporary duty outside the command area must leave without assurance that he will be permitted to return, and instead must reapply for formal accreditation through Army channels.

Under the housing ruling families of correspondents temporarily assigned outside the command area will forfeit the right to housing and, therefore, will be compelled to return to their home countries.

Correspondents and their families are dependent upon the Army for all necessities, including food and housing.

The headquarters' intimation was thus almost unanimously regarded by the 60 newsmen affected as an implied warning that life would get more difficult unless they accept hereafter what the brass hats consider pertinent news.

Based presumably on that article out of Japan, and some inquiries by the American press in this country, the Department of the Army sent an inquiry to General MacArthur, under date of January 26. Since it is a classified document I shall not read it in toto, but merely paraphrase it.

The public relations section said they had received certain complaints regarding what appeared to be a change of policy; that they were not familiar with any new policy having originated from the Department of the Army, and would SCAP please advise them what it was all about.

Under date of January 27, SCAP replied in a message signed by General MacArthur to the Department of the Army. This document is an incoming clear message, and so that Senators may be familiar with it I ask that it be printed in full in the RECORD at this point in my remarks.

There being no objection, the message was ordered to be printed in the RECORD, as follows:

JANUARY 27, 1948.

From: CINCFE, Tokyo, Japan, signed MacArthur.

To: Department of the Army, Washington, D. C., for CSPID:

Reurad WAR 94717, correspondents accredited to this theater are allowed full latitude of coverage within its various sectors, such as Japan, Korea, Philippines, Marianas, and Ryukyus. When they leave the theater to go to other areas for assignment thereto, such as Siam, Indochina, Malaya, the Dutch Indies, India, or other foreign countries,

their accreditation here is closed. To reenter the theater they must make reapplication through normal channels for reaccreditation. This follows the principle of the policy enunciated by the War Department that correspondents accredited here and returning temporarily to the United States must be reaccredited before return. This policy is completely sound as the theater cannot assume the implied responsibility for their activities in foreign areas where it exercises no jurisdiction of correspondents whose official standing is based upon accreditation to this command. Nor should the United States permit such correspondents to enter foreign areas without special consideration of each case and proper clearance for formal accreditation by the nation involved. It would also be improper for this headquarters to issue orders authorizing travel by correspondents in areas outside his command, except for travel between home offices and this theater.

Homes and billets are assigned to correspondents here on exactly the same basis as to the military and civilian members of the occupation. They were commandeered from the Japanese and assigned by proper roster arrangements. All housing available for this purpose has been exhausted. When a correspondent leaves the area, just as when a member of the occupation leaves, the home which had been assigned him becomes available for other distribution. If the correspondent is reaccredited he is again assigned a residence in accordance with the general rules. Accommodations are entirely inadequate to care for the dependents of present members of the occupation, there being a backlog of many hundreds still waiting in the United States. To establish a different rule for correspondents would grant privileges denied all other personnel and would result in the barring from the theater of a corresponding number of families now waiting in the United States for available quarters here. It is patent for the above and many other reasons that Japan is unsuitable for use as a press base for all of Oriental Asia. The United States alone is competent to serve as such a base for American correspondents. There is no justification whatsoever for any complaint in this matter.

Mr. KNOWLAND. Now I call to the attention of the Senate an article which appeared in the New York Herald Tribune, under date of January 31, 1948. This article is also dated Tokyo, January 30, and is as follows:

CORRESPONDENTS DISPUTE MAC ARTHUR ON TRAVEL BAN

TOKYO, January 30.—The executive committee of the Tokyo Correspondents' Club took issue today with Gen. Douglas MacArthur on his statement to an American radio network that it was "sadly misinformed" about travel restrictions on newspapermen.

The committee said Bill Costello, of CBS, and Alpheus W. Jessup, of McGraw-Hill Publications, again were told yesterday they must give up their homes and move their families out of General MacArthur's Far East Command if they make reporting trips to southeast Asia, as instructed by their home offices.

Reporting to the club's 61 members, the executive committee explained that the Columbia Broadcasting System had radioed Mr. Costello it received a message from General MacArthur that it was "sadly misinformed" when it sent the supreme commander a protest.

The CBS protest said in part: "We are advised that travel order of October 21, 1947, permitting correspondents to travel outside of Japan without losing accreditation or billets, has been rescinded. Currently we are informed that if correspondents wish travel orders and receive them, they automatically give up living quarters and upon returning must apply for reentry into Japan."

The restrictions were repeated to the two correspondents by Frayne Baker, General MacArthur's public-information director.

Then in Time magazine, under date of January 22, is an article headed "Censorship in Tokyo?" I ask that it be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CENSORSHIP IN TOKYO?

The working press has never known quite where it stood with Gen. Douglas MacArthur. Zealous public relations officers, by fending off reporters in his Far East Command, have kept the press from finding out. At his rare press conferences MacArthur has talked freely; between times, his public relations officers have acted on the theory that no news but good news should be written about MacArthur.

Last week the Tokyo Headquarters Press Corps was angered and surprised by a new shift in policy. First sign of a change came when the London Daily Herald's Hugh Hessell Tiltman, who had criticized some occupation policies, applied for round-trip orders to Malaya and the East Indies. He was told that if he left the area of the Far East Command he would lose his credentials and his family its quarters. He left anyway. Hitherto correspondents had been allowed to leave the theater on reportorial assignments and reenter without trouble.

Like Tiltman, William Costello of CBS had sent critical reports on General MacArthur. Costello, who planned a trip to Java, got the same notice as Tiltman. McGraw-Hill's Alpheus Jessup wanted to visit Malaya and Burma. Ex-Gen. Frayne Baker, MacArthur's public relations officer, ruled Jessup would have to take his wife, who is expecting a child in a month, with him.

When a correspondents' committee asked who was cracking down on whom and why, Baker said: "Every time [you] have pressed for a clarification of policy, the policy has grown tighter." To correspondents, the latest turn of the screw seemed to mean that the squeeze was on correspondents to write only good news about MacArthur.

Mr. KNOWLAND. Mr. President, coming to the office yesterday morning I tuned in on the CBS broadcast, the round-the-world news broadcast, which comes on between 8 and 8:15, I believe, every morning. At that time, speaking directly from Tokyo, was a broadcast by Mr. Costello. I immediately got in touch with the CBS organization and asked them to send me the script. I have the text of it, and I wish to read it at this point:

Tokyo correspondents who are assigned to cover the whole Far East learned positively today that General MacArthur considers them unwelcome in Japan. From an unofficial source newsmen obtained copies of a press policy statement cabled to the War Department in Washington by MacArthur last Tuesday.

I might interpose at this point to say that that I believe is the SCAP message which I previously asked to place in the RECORD. I continue to read:

In it MacArthur says categorically: "Japan is unsuitable for use as a press base for all of oriental Asia." He maintains he cannot assume responsibility for correspondents traveling in other parts of the Far East, although no reporter has ever asked for more than permission to reenter Japan after trips elsewhere. He also argues there is a housing shortage which makes it impossible for newsmen to keep their families in Tokyo while away on trips. The fact is, as reporters discovered this afternoon, there will be 12,350 allied housing units here by spring, and reporters occupy 19 of them. But the most disturbing sentence in MacArthur's entire official statement is that the United States should not permit correspondents to enter foreign areas without special consideration of each case. Correspondents wonder what he means by "special consideration." Does he want the United States Government to screen the people hired by editors and publishers. Does he want to censor the American press by dictating hiring and firing policies.

Secretary of National Defense Forrestal is now planning a conference at which he will ask editors and publishers to establish a voluntary code of censorship on matters of military security. MacArthur's policy suggests he wants a bureaucratic censorship which would be imposed, rather than voluntarily assumed.

Just recently I was informed that Newsweek's correspondent in Japan, Mr. Compton Pakenham, who had come back to the United States, had reapplied for admission into Japan. This was denied him by the public-relations officer of SCAP. I understand that the management of Newsweek Magazine then made a direct appeal to General MacArthur, and received word that the matter had personally been turned down by the commander in Japan. I ask unanimous consent that at this point in the RECORD there be printed a statement which I understand will be published in Newsweek Magazine, relative to this incident.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Last August the chief of Newsweek's Tokyo bureau, Compton Pakenham, came to the United States on leave of absence. Last December, Newsweek made the routine application for his reaccreditation in preparation for his return. The Army Department told Malcolm Muir, publisher of Newsweek, that the request for reaccreditation had been personally denied by General MacArthur.

Mr. Muir thereupon informed the Army Department that although "technically, a theater commander has the right to refuse admittance to any correspondent for any reason or no reason at all * * * the war has now been over for more than 2 years" and "no correspondent has been refused admission to a theater since the end of the war" under similar circumstances. Mr. Muir went on to state that in Newsweek's opinion "an important principle of freedom of the press is involved."

During the past year Newsweek has published a number of stories reporting criticism of certain phases of the occupation of Japan. The first of these in the issue of February 10, 1947, dealt with the purge of Japanese businessmen. General MacArthur issued a statement expressing strong disagreement with the conclusions reported in the story. It was also understood that some of MacArthur's commanders greatly resented not only the criticism as reported but also the fact of its publication.

In April 1947 Harry Kern, Newsweek's foreign editor, went to Japan to make a special report on the occupation. While there he talked to General MacArthur. In view of the General's statement on the Newsweek story Kern raised the question of such reports of criticism. The General informed him: "I love criticism."

At no time during this long interview did the General in any way complain against Newsweek's Tokyo bureau chief. It seemed

a fair assumption that General MacArthur would have availed himself of this opportunity to mention any charges against Pakenham serious enough to warrant his exclusion from the theater a few months later.

In its December 16 letter announcing Pakenham's exclusion the Army made no definite charges against him. It merely intimated that MacArthur had excluded Pakenhame because: (1) he was a British subject; (2) he had shown a marked antipathy toward American occupation policy; (3) he had associated with feudalistic and reactionary Japanese.

The facts on which these reasons were based seemed to be:

1. As an officer in the Coldstream Guards, who served with distinction on the Western Front from 1914 to 1918 and won the Military Cross, Pakenham felt he should maintain his British status even though he has lived in the United States since 1921. He was sent to Japan by Newsweek because he had spent much of his early life in that country and possessed a rare knowledge of the language and people.

2. Under instructions from Newsweek Pakenham had gathered material for this magazine's stories covering every phase of occupation policies. These policies have recently been the subject of severe censure on the floor of the United States Senate and may soon be investigated by the Appropriations Committee.

3. Pakenham was under instructions to report what all Japanese, including reactionaries, were thinking. Lack of this knowledge was a contributing factor in unpreparedness at Pearl Harbor.

In view of the above facts, Mr. Muir therefore asked the Army to refer the matter to higher authorities. On January 21 Newsweek was informed by Secretary of the Army Kenneth C. Royall that the question had been taken up personally with General MacArthur and that he had again reported that Pakenham was entirely unacceptable to him. Mr. Muir thereupon sent the following cable to General MacArthur:

"Knowing your interest in the freedom of the press, I cannot believe that you have made an irrevocable decision, and so I ask you to look further into the facts. Pakenham has my full support and that of the responsible editors of Newsweek, who consider him a thoroghly competent correspondent with exceptional qualifications to serve in Japan. Pakenham has faithfully carried out the instructions of his editors here, and we are unaware of any bias or inaccuracy in his reporting. We've been informed of no charges against Pakenham's personal conduct in your theater. If such charges have influenced the decision of your headquarters, I feel in fairness to all concerned this information should be given us at your earliest possible convenience for appropriate action.

"Both in our domestic edition and the edition published in Tokyo we feel we are doing a sincere job in the interest of public enlightenment. I am sure you'll understand that we cannot help but feel that the exclusion of Pakenham as our selected representative is a serious blow to freedom of the press."

General MacArthur's only reply was: "I am sorry to have to disagree with you in reference to the Pakenham case." On February 2 Mr. Muir sent this final cable to MacArthur:

"We naturally recognize your authority to declare any correspondent unsuitable to you. Nevertheless we do feel this refusal to accredit Pakenham is a very grave infringement on rights of the press, particularly as you haven't thought it suitable to provide us with the reason for this expulsion. Under the circumstances we are forced to conclude your decision is motivated by the fact that articles published in Newsweek reported criticisms which had been made of some policies adopted by your command."

Mr. KNOWLAND. Then, Mr. President, in order that the other side of the picture may be clearly given, I will say that I have today received a copy of the cablegram sent to the publisher of Newsweek magazine, Mr. Malcolm Muir, and signed "Gen. Douglas MacArthur, GHQ, Far East Commission," in Tokyo. I make the request that the telegram be published in the RECORD so the Senate may be advised of the entire situation.

There being no objection, the cablegram was ordered to be printed in the RECORD, as follows:

With reference to your message of February 2, I have no slightest objection to anything you publicize concerning the Pakenham matter provided the true facts rather than a distorted version are carried. There is no, repeat no, basis whatsoever for your suggestion that freedom of the press is in any way involved, or that the critical editorial policies of Newsweek have a bearing upon the matter. To the contrary, such editorial criticisms which Newsweek has expressed with reference certain policies being implemented here based upon directives received from the United States Government and the Far Eastern Commission have never been attributed to Pakenham's reporting. As to the suggestion that freedom of the press is in any way infringed, I doubt that the allied press enjoys anywhere in the world greater freedom in the gathering and dissemination of the news than it does here in Tokyo. Your own Bureau would undoubtedly be among the first to bear this out. The danger with respect to the return of Pakenham, during this critical period, lies in the disturbing influence he is believed to exercise among Japanese malcontent and the jeopardy this causes to the objectives and security of the occupation and the interests of the United States. Your statement that no, repeat no, reasons for Pakenham's exclusion have been furnished you is not, repeat not, understood in view of the recent letter to you from the Department of the Army in Washington, which summarized the matter as follows: "In his recent residence in Japan he, Pakenham, has shown a marked antipathy toward American policy and American personnel in the occupation zone. This is undoubtedly due to his long residence and prewar affiliations in Japan which have led him to associate, personally, with reactionary Japanese of deep-rooted futilistic and militaristic tendencies in their resistance to the objectives of the Allied occupation. This, as SCAP points out, makes his return undesirable as such return would not be in the best interests of either the occupation forces or of your publication. I feel compelled to support SCAP's position in this matter. I suggest your office assign another competent correspondent to proceed to Japan. We shall do everything in our province to expedite his clearance and to make suitable arrangements in order that we can evidence our desire that the pleasant and cooperative relationship we have enjoyed in the past, can continue in the future." This is the basis for Pakenham's exclusion and the position with respect to his replacement in which I fully concur. If you do decide to publicize your version of the matter, I trust that in the same issue you will include this message unabridged.

Gen. DOUGLAS MACARTHUR,
GHQ, Far East Commission, CINCFE, Tokyo.

Mr. KNOWLAND. Mr. President, in conclusion I wish to say that I think all of us in the Congress of the United States, and certainly all of us who served in the armed services during the war, recognize that during a war it is necessary, in the interests of national security, to withhold certain information from the American people. I can say, I believe without fear of contradiction, that during the whole wartime period when we had the so-called voluntary censorship of the American press, newspapers did not violate the confidence that was reposed in them. In many instances they had access to information and had in their possession information which from a pure news point of view would have made good news stories. Yet, in compliance with the desires of their Government and in the interest of national security, they did not violate the confidence reposed in them.

I think that newsmen today recognize full well that in the field of, let us say, atomic power, there are certain secrets which obviously cannot be and should not be discussed in public or in the public print. I am sure there would be no violation of that type of security at this time.

We also have legitimate need for censorship in the development of new weapons, such as guided missiles, and I am sure that there would be no violation of that type of a voluntary censorship in peacetime.

I am frank to admit that there are certain other phases, perhaps in the delicate negotiation of a treaty, where it would be harmful for information regarding the negotiations to be disclosed. But I want to say, Mr. President, that I think the executive departments of this Government have all too often used a security classification, not for the protection of national security as such, but merely to keep from being bothered by either the Members of Congress or by the American press. They have put a cloak of security around their activities which they have no legitimate right to place around them. I think it is high time that the Congress of the United States take steps to see to it that the executive departments do not hide behind a security cloak of that nature when in fact no national security itself is involved.

As I pointed out earlier in my remarks, Mr. President, certainly we should not tolerate any iron curtain between an occupied area where the American flag flies and this home country. We should not place any type of iron curtain between the Government departments and the people of the United States. There may be additional facts which I have not yet been able to bring out, relative to the situation in Japan. It may be, as General MacArthur points out, that there are certain restrictions in regard to housing, and that if he permitted a concession to the correspondents it would tend to discriminate against American military or civilian personnel in Japan. It may be that he does not want to put the correspondents in what he might term a privileged class. However, let me say that, contrary to the views expressed by SCAP, Japan is an ideal place for American news services, American magazines, and American newspapers, to base their correspondents and have them go out from that country to cover the rest of the Far East. I think it is essential that the

American people become fully informed as to what is happening in the Far East—in Japan, China, Burma, the Philippines, Indochina, Siam, and the rest of the Far East.

I believe that the American people—and I dare say even the Congress of the United States—in many instances receive more accurate information from the newspaper and radio foreign correspondents as to what is going on overseas than they receive from their own State Department or from the other Government departments. For that reason I think the Congress itself should have a very vital interest in seeing to it that there is not, directly or implied, any type of censorship upon American correspondents serving in any area of the world. Some might say that there has been no charge of censorship as such. I agree that that is true at the present time. But when a correspondent knows that if he leaves Japan he cannot get back into that country without again going through the whole process of being accredited, it may have at least a tendency to make him not quite as free in reporting as he otherwise might feel that he should be. For that reason, Mr. President, I have felt that this matter was of such vital importance that I should bring this information to the attention of the Senate.

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the joint resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

Mr. LUCAS. Mr. President, I ask unanimous consent that on the convening of the Senate tomorrow I be recognized by the chair.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WHERRY. Mr. President, has the Senator from Illinois concluded?

Mr. LUCAS. I have finished.

Mr. WHERRY. Mr. President, it appears that the work of the Senate has been concluded for the afternoon. I now move that the Senate take a recess until tomorrow——

Mr. LODGE. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. LODGE. Before the Senator makes the motion to recess, I should like to express once more for the RECORD my hope that it will be possible to proceed with the St. Lawrence seaway with some dispatch. I think we shall be making an exhibition of ourselves before the country if we do not vote this thing up or down very soon. It will appear that we are pettifogging, dawdling, and delaying.

Mr. BUTLER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUTLER. Assuming that the debate has been concluded on a subject which is under discussion, and there is no agreement to vote, would a motion to lay on the table be in order?

The PRESIDING OFFICER. Such a motion would be in order for consideration.

Mr. WHERRY. That would bring to a close the debate which apparently had already been finished. Is that the answer?

The PRESIDING OFFICER. Will the senior Senator from Nebraska again state his inquiry?

Mr. BUTLER. As I understand, a motion to lay on the table would bring the debate to a close.

Mr. WHERRY. In the absence of a unanimous consent agreement to vote on a certain day. That was the Senator's question, was it not?

Mr. BUTLER. Yes.

Mr. WHERRY. After the debate on a subject matter has apparently been concluded, and in the absence of a unanimous-consent agreement, the senior Senator from Nebraska is asking if a motion to lay on the table is in order. That is as I understand his inquiry.

Mr. BUTLER. That is correct.

The PRESIDING OFFICER. The Chair rules that if the motion is made and agreed to, it disposes of the pending measure.

Mr. WHERRY. If a motion to lay on the table is made and agreed to, it does dispose of the pending measure.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. WHERRY. I yield to the Senator from Massachusetts.

Mr. SALTONSTALL. Let me say to the senior Senator from Nebraska, in connection with what he has said, that I have in mind making some remarks tomorrow on the St. Lawrence seaway.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. WHERRY. I am glad to yield to the senior Senator from Nebraska.

Mr. BUTLER. I assure the distinguished Senator from Massachusetts that it is not my intention to make a motion to shut off debate, so long as there is a purpose on the part of Senators to debate the measure.

Mr. LODGE. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. LODGE. Let me repeat what I said yesterday. I know of only two Senators who desire to be heard in opposition to the seaway project. One is the senior Senator from Massachusetts [Mr. SALTONSTALL] and the other is the junior Senator from New York [Mr. IVES]. It is planned that they will seek recognition tomorrow.

Mr. LUCAS. Mr. President, I do not know whether there is a move on foot to cut off debate on the St. Lawrence seaway. Am I to understand that that is the purpose of the suggested motion?

Mr. BUTLER. No.

Mr. LODGE. No.

The PRESIDING OFFICER. The inquiry was addressed to the Chair as to whether or not a motion to lay on the table could be considered. The Chair ruled that it could be considered, and that if it were agreed to it would dispose of the measure.

Mr. LUCAS. Of course. That is one of the first rules in the book, as I understand parliamentary law. However, a Senator would not ask that kind of a question unless there were some reason behind it. I wonder what the reason is. May I inquire from the senior Senator from Nebraska what the reason is? Is it planned to cut off debate on the seaway project?

Mr. BUTLER. Mr. President, I certainly would not be a party to any plan to limit debate on the St. Lawrence seaway or any other question before the Senate. However, I am rather anxious to have a vote on the measure when the debate apparently has been concluded.

Mr. VANDENBERG. Mr. President, if anything of the sort is contemplated, I think Senators should be very frank about it so that all Senators may know what lies ahead. It is my understanding that a number of Senators have already left the city, relying upon what is called a gentleman's agreement, to the effect that a unanimous-consent agreement is to be entered into in respect to a vote later in the month. As I understand, the reason for the postponement is that the absence of Senators makes it impossible to obtain a quorum until the Lincoln anniversary circuit is finished and until the subsequent week of Democratic speeches is concluded.

If there is any lurking concept of a motion to lay on the table, I think in simple, fundamental, elementary fairness the plan should be known in advance so that Senators may guide themselves accordingly. I make no plea, one way or the other, in respect to a time to vote, but I do assert that Senators have a right either to rely upon the information which has been given them or to be notified that they had better return to Washington.

Mr. WHERRY. Mr. President, I wish to make an observation relative to the situation in which we now find ourselves. I announced yesterday at the close of the session that there had been much talk on the floor of the Senate about arranging a unanimous-consent agreement. I stated then that I thought it was a mistake to try to arrive at a unanimous-consent agreement on the floor of the Senate; that none had been made; that the program for the Senate would be to meet on Monday, Tuesday, Wednesday, and Thursday; and that unless a unanimous-consent agreement had been entered into by the time of the conclusion of business on Thursday, or late in the afternoon, we would announce the program for the remainder of the week, and for the next week. That is as far as anything that I know of has been said or done officially, which meets with the approval of the Senate, relative to the procedure in the disposition of the proposed legislation.

I think I am in duty bound to say at this point that it is my understanding that the proponents and opponents of the pending measure have concluded what I understand to be a unanimous-consent agreement, to which they have subscribed, and which is to be proposed to the Senate, according to the announcement which I made yesterday, when the proper time arrives. The debate has continued yesterday and today, and will continue tomorrow. I feel that Senators should remain in attendance until a unanimous-consent agreement is made

or until we have a vote on the pending measure, or agree to set it aside and take up something else.

I believe that the distinguished senior Senator from Michigan, who is a past-master at orderly procedure, will agree with me. However, I feel that I should state that the proponents and opponents have come to an agreement, but that does not mean that some Senator may not object to it.

The unanimous-consent agreement has not been proposed, and I feel that it should not be proposed until sufficient time has been given to conclude the speeches and the debate upon the pending measure. Already announcements have been made of those who expect to take part in the debate.

Mr. LUCAS. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr LUCAS. If I correctly understand the Senator, in the event of a motion being made to lay on the table before the debate has been concluded, we can rely on the Senator from Nebraska to help us to defeat that motion, can we not?

Mr. WHERRY. I would not say that I would help to defeat it, but as acting majority leader I would present the unanimous-consent request for the Senate to consider, and if it could not be worked out on that basis we would do the next best thing as to how and when to terminate the debate.

Mr. LUCAS. I think the Senator misunderstood me. Regardless of anything we may do in the way of a unanimous-consent agreement, it would not prevent some Senator from making a motion to lay on the table, would it?

Mr. WHERRY. No.

Mr. LUCAS. What I am asking the Senator is, if a motion of that kind be presented, will he help us to defeat the motion?

Mr. WHERRY. I shall not subscribe my aid in defeating the motion. The senior Senator from Nebraska has a right to make the motion tonight, but I think I am in duty bound to say that this agreement has been entered into, and if any promises or commitments have been made to Senators who have left, that should be borne in mind. I think we should protect the rights of all Senators. If such a motion is made I certainly shall ask unanimous consent to submit a unanimous-consent request and ask that it be adopted, in view of the fact that I feel that because of the discussion which has been engaged in relative to voting on the twenty-third, the Senate should subscribe to such unanimous-consent agreement. But that does not prevent someone from objecting to it. If that be done, any motion will be in order to do anything with the proposed legislation.

I am sure that the senior Senator from Nebraska had no thought of any sharp practice. I do not know what was in his mind. My feeling is that he felt, as I do, that possibly, since the matter has been debated, if we cannot work out some agreement we should dispose of the matter in some way. Inasmuch as there has been talk about Lincoln Day, Jefferson Day, and Jackson Day, and speeches here and there, I feel we should try to work out a unanimous-consent agreement when the time comes, because Senators have left under the impression that that would be done. But I think that is not the proper way to legislate. If I had known when I was on the steering committee that this measure was to be brought up and debated for 2 weeks and then set aside until February 23, I would have done my level best to bring up some other measure for the consideration of the Senate. We should debate the pending resolution and vote it either up or down. Of course, with the statements and the propositions which have been made on the floor and off the floor, even though the Senate has not adopted a unanimous-consent agreement, I feel the Senate should abide by such an agreement, if possible, and vote on the day agreed upon.

Mr. VANDENBERG. Mr. President, will the Senator yield?

Mr. WHERRY. I am glad to yield to the Senator from Michigan.

Mr. VANDENBERG. Of course I had no thought of suggesting any sharp practice on the part of the senior Senator from Nebraska in his discussion of a motion to lay on the table. I was simply raising a collateral question of fair play. I think the junior Senator from Nebraska has described the parliamentary situation accurately. It was my understanding that those in charge of the proposed legislation, of whom I am not one—and I am merely speaking by proxy in the absence of the rest of the Senators—had worked out an agreement. Whether it is a sound one or not is beside the point. But I understood that an agreement had been worked out for a definite program to vote, I think, on the 23d of February. It was also my understanding that the unanimous-consent agreement was being withheld deliberately and substantially at the request of the junior Senator from Nebraska, in order to see whether the debate would exhaust itself in the course of the balance of the week.

Mr. WHERRY. That is correct.

Mr. VANDENBERG. I know of several Senators who have left the city. Perhaps they should not have gone. Again we face a condition and not a theory. They have gone, relying on what they considered to be an unofficial agreement in respect to the ultimate program. All I am saying is that if the able senior Senator from Nebraska, who has a complete right to make a motion to lay upon the table now, tomorrow, or at any other time, proposes to do so, in fairness to his colleagues he should announce that purpose substantially in advance so that those who might desire to be registered upon that roll call might have an opportunity to return to do so.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. BUTLER. It is certainly not the intention of the senior Senator from Nebraska to resort to anything in the nature of an unfair practice. I would not be a party to anything of that sort. But to me it does seem very unusual to debate a measure for 2 weeks and then postpone voting on it for 3 weeks because a few Senators may be absent. There will undoubtedly be a few Senators absent on each side of the question on February 25 or February 26 when the matter is intended to be brought up for a vote. I think it is a very unusual proceeding to debate for 2 weeks and then to postpone a vote on the matter for 3 weeks. I think the proper thing to do is to vote when the debate is concluded. I do not at this time intend to make any such motion, but I am not sure what may happen when the debate is concluded.

Mr. VANDENBERG. Mr. President, will the Senator yield to me for one further word?

Mr. WHERRY. I yield.

Mr. VANDENBERG. The senior Senator from Nebraska says it is a very unusual procedure to arrange a postponed voting timetable such as that contemplated in the so-called unanimous-consent agreement which has been unofficially approved by those who are in charge of the proposed legislation. I agree with him. I am not arguing the validity of the arrangement which has been made, if it has been made, but I suggest to my able friend that it is a far more unusual procedure to undertake to dispose of a major piece of legislation by a motion to lay on the table. I doubt whether my able friend can find a precedent in the United States Senate for that sort of procedure within the last 20 years. It is for that reason I am saying, without challenging the Senator's right—I think he is completely within his right, and I do not think he has violated any obligation to his colleagues—that if he contemplates that sort of action within this present week I think he ought to so announce in advance, so that Senators can return to be present and vote.

Mr. WHERRY. Mr. President, I understand the senior Senator from Nebraska has already stated that he does not intend to make such a motion, at least until the debate is completely exhausted. I have a feeling that we shall still be debating this question at least up until Thursday. Prior to that time, possibly tomorrow night, when we can see how the debate is progressing, the unanimous-consent agreement which has been entered into by the proponents and opponents of the measure will be presented to the Senate. Many observations have been made as to who agreed to this and who agreed to that. The senior Senator from Nebraska spoke my sentiments when he said that when we have debated a bill for 2 weeks the final vote should not be delayed for 3 weeks. I think it is an unusual procedure, and I think it should not be indulged in in the United States Senate.

I state again that each evening I call attention to the fact that a unanimous-consent agreement has not been presented. If a Senator has left, he has left certainly with the full knowledge that he has not yet entered into a unanimous-consent agreement. In keeping with the observations which have been made, and apparently with the understandings which have been assumed, and certainly in keeping with the statement by the distinguished Senator from Michigan that Senators have left the city with the understanding that a unani-

mous-consent agreement would be entered into, or at least that there was a mutual agreement between the proponents and the opponents of the legislation, I felt it was only fair, in advance of the termination of the debate, to state that a unanimous-consent agreement had been entered into. The Senator has my assurance—I am speaking to the senior Senator from Michigan in reply to his observation—that certainly not later than Thursday night, or possibly tomorrow night, if the debate looks as though it were drawing to a conclusion at that time, the unanimous-consent request will be presented. Not only have the proponents and opponents agreed on the terms, but other Senators have given their assent to this unanimous-consent agreement. Therefore, I think everything has been done that can be done to accommodate all those Senators who are depending upon the mutual agreement between the proponents and opponents of the measure.

I want to say just a final word. I leave it to the distinguished Senator from Michigan, to my colleague, the senior Senator from Illinois, and I certainly leave it to the distinguished minority leader who has been the majority leader for many years, if it is not the correct procedure that when debate has been concluded on a major piece of legislation, such as is the St. Lawrence seaway joint resolution, it should be voted on as expeditiously as possible.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. WHERRY. I yield to the Senator from Kentucky.

Mr. BARKLEY. The statement of the Senator is true. The rule here from time immemorial has been that when debate has been exhausted on a measure, the Senate has voted. But this has been a peculiar situation growing out of advance information, days ago or even weeks ago, that no business of a serious nature would be transacted for a week, in order that Senators who might wish to leave over Lincoln's Birthday might be free to do so.

Mr. WHERRY. That is correct.

Mr. BARKLEY. So, based upon that suggestion, this arrangement was worked out and came to a definite gentlemen's understanding all around, with some reciprocal considerations which might attach to us a little later, or from time to time.

If there were any urgent legislation pending or ready for consideration, with which this arrangement would interfere, that would present another problem. But there is not. There is nothing urgent on the calendar.

If this motion were made tomorrow and were carried, nothing of importance would be done next week or perhaps the week after that.

Thus, no legislative time will be lost by the arrangement to which the Senator has referred; and, although not yet presented, it has been entertained informally and agreed to informally, so that Senators might have something to count on and might know what will be done in the meantime.

So, Mr. President, in any event I think nothing of great consequence would be done here during the next 2 weeks. I think that is a fair statement.

Mr. LUCAS. Mr. President, I should like to ask the Senator when the vote on this measure will be taken, if the unanimous-consent agreement is entered into.

Mr. WHERRY. I might just as well state the terms of the agreement now, if that is acceptable.

Mr. BARKLEY. Let me say, to answer the question, that I think it will be the 25th of February.

Mr. WHERRY. Yes; the 25th, the fourth week in February.

Mr. President, I do not mind giving the terms of the unanimous-consent agreement at this time. However, my feeling has been that if the unanimous-consent agreement is entered into, as the Senator from Illinois well knows and as the distinguished minority leader well knows, this debate will stop. That has been the usual procedure. Then, as the Senator has said, if we were to take up legislation which should be brought before the Senate, many Senators would have left the city.

Mr. BARKLEY. Of course the agreement contemplates that the St. Lawrence seaway joint resolution would still be the unfinished business during that entire period.

Mr. WHERRY. Yes; and any Senator could address himself to it.

Mr. BARKLEY. It could be set aside by unanimous-consent for the transaction of other business, if the Senate saw fit to do so. Certainly it is not contemplated that we would debate this question steadily until the 25th of February.

Mr. WHERRY. Oh, no. I understand that if the Senate decided to enter into the proposed unanimous-consent agreement, the Senate would vote on the St. Lawrence seaway joint resolution and all amendments thereto on the 25th of February. There are some conditions relative to that, which would have to be agreed to, of course. However, that is not the point.

Mr. President, I think I have been guilty of helping initiate unanimous-consent agreements about as much as any other Member of the Senate has, if the word "guilty" should be used in that connection. I think there are times when the sooner a vote can be obtained on a measure the better, and I believe there are times when such agreements help the work of the Senate. I agree that often such agreements help everyone. It simply seemed to me that it would be a long time between the time when debate on this measure would be discontinued and the time when the vote on it would be taken.

Personally, I think the proposed procedure is not the best one. I hope we do not have to act in that way on every piece of legislation.

However, in view of the apparent gentleman's agreement which has been entered into—and I think there is no misunderstanding about that; all of us have agreed to ease the work next week and the following week—I think it is only fair that the unanimous-consent agreement be presented. In view of the fact that now the terms have been more or less discussed and also the date has been discussed, I think the forthright thing to do would be to present the proposed agreement possibly late tomorrow evening; and if it can be entered into, then I would ask that the pending legislation be laid aside.

If that is done, I should like to state now at that time I believe three or four measures on the calendar should be brought before the Senate for consideration, if the Senate so agrees. One of them is Calendar No. 902, Senate Joint Resolution 173, a joint resolution to continue until July 1, 1949, the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes. I think that measure should be brought up possibly Thursday, if we can do so.

Also, during the recent call of the calendar when the able junior Senator from Connecticut [Mr. BALDWIN] asked that Calendar No. 696, Senate bill 1356, a bill providing for the incorporation of the Franco-American War Veterans be considered, and also two similar bills which follow it almost immediately on the calendar, it was stated at that time that when action on the St. Lawrence seaway legislation was concluded, the Senator from Connecticut would ask unanimous consent or would move that the Senate take up those three bills. I think possibly they should be considered following consideration of the Maritime Commission joint resolution.

Then there is the legislative budget, which may be here before we take a recess on Thursday or Friday.

Mr. LUCAS. Mr. President, will the Senator yield in order that I may propound a parliamentary inquiry?

Mr. WHERRY. I yield.

Mr. LUCAS. The Senator has discussed three bills on the calendar which he says will be taken up by unanimous consent.

Mr. WHERRY. I have said that might be done.

Mr. LUCAS. And the Senator has said that, instead, a motion to take up those bills might be made.

Mr. WHERRY. Yes.

Mr. LUCAS. I should like to ask this question: While the St. Lawrence seaway joint resolution is pending before the Senate, can any other business be taken up, other than by unanimous consent?

The PRESIDING OFFICER. The Chair rules that it would be in order to make a motion to that effect.

Mr. BARKLEY. Mr. President, I should like to propound a further parliamentary inquiry in that connection. Of course it is in order, is it not, during the pendency of any unfinished business to move to have the Senate take up some other business; but if such motion is carried it displaces the unfinished business, and it cannot be resumed except by another motion. Is not that correct?

So while it would be in order in the interim to move to have the Senate take up some other measure, if such motion were made and carried, that measure would displace the unfinished business

and would also displace any agreement made in regard thereto.

So, it seems to me, the only way to avoid that situation would be to proceed by unanimous consent.

Mr. WHERRY. Mr. President, possibly I misspoke myself. I meant to say that the junior Senator from Connecticut said he would move to have the Senate take up those bills after action on the St. Lawrence seaway legislation had been concluded. I did not mean that he was going to do what the Senator has suggested. I meant to say that anything done by unanimous consent would only temporarily displace the unfinished business, the legislation now at hand, until action on it is concluded.

The PRESIDING OFFICER. The Chair understands that if a unanimous-consent agreement to vote on the unfinished business were agreed to, and if later a unanimous-consent agreement as to the time to vote on another measure were agreed to, that would displace the business now before the Senate, until it was subsequently resumed, either by motion or by unanimous consent.

Mr. WHERRY. That is correct.

So if a motion to have the Senate consider other business were carried, that would automatically displace the present unfinished business. But if a unanimous-consent agreement of the sort described is presented and agreed to, when action on the subject of that agreement is concluded, the Senate will automatically resume consideration of the St. Lawrence seaway joint resolution.

The PRESIDING OFFICER. That is correct.

Mr. SMITH. Mr. President, it is my purpose to offer an amendment in the nature of a substitute. Would the unanimous-consent agreement to have consideration of the St. Lawrence seaway joint resolution go over until the 25th of February include the joint resolution and all amendments thereto, or would the amendments be taken up prior to that time?

Mr. WHERRY. I think that is a pertinent question, so I shall read the agreement. Here is the unanimous-consent agreement which has been entered into between the proponents, or the Senator in charge of the pending joint resolution, and the opponents—in other words, the Senator from Wisconsin [Mr. WILEY] and the Senator from Massachusetts [Mr. LODGE]:

Ordered, by unanimous consent,

That on the calendar day of Wednesday, February 25, 1948, at the hour of 4 o'clock p. m., the Senate proceed to vote without further debate upon:

(1) Any amendment that may be pending—

That would include the Senator's——

Mr. SMITH. I thank the Senator.

Mr. WHERRY. Certainly.

(2) Any amendment that may be proposed, subject to the provisions hereinafter named, following which the engrossment and third reading of the joint resolution shall be considered as ordered.

(3) The final passage of the joint resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin, with the exception of certain provisions thereof.

Ordered further, That after the adoption of this order, no amendment—

I ask all Senators please to give their attention to this, and I repeat a little of it—

Ordered further, That after the adoption of this order, no amendment that is not germane or relevant to the said joint resolution shall be received—

That is to say, after this unanimous-consent agreement has been entered into, but not before—

and that no amendment shall be received to said joint resolution which has not on or before said date of February 23, 1948, been submitted as an amendment intended to be proposed thereto, and ordered to lie on the table and be printed.

Mr. SMITH. Mr. President, will the Senator yield for a question?

Mr. WHERRY. I yield.

Mr. SMITH. The suggestion means, then, that if I can get the floor before the agreement is proposed, and get my amendment in, it will be taken care of?

Mr. WHERRY. Certainly.

Mr. SMITH. But if the agreement is made before I get my amendment in, by any chance, will it be too late for my amendment to be considered?

Mr. WHERRY. No; the Senator will still be protected. He may offer his amendment any time up until the date stated, February 23, 1948.

Mr. SMITH. I thank the Senator.

Mr. WHERRY. Am I correct in that statement, I inquire of the Senator from Massachusetts?

Mr. LODGE. I think the Senator is correct. Let me say that my position all along has been that the debate should not be unduly prolonged. When the debate was begun, the Senator from Wisconsin asked me to please agree with him not to drag it out, and I said I would agree not to drag it out. I call every Senator present to witness that I have not been one who has been trying to drag it out. I should be glad to vote on the joint resolution this week, Mr. President, or as soon as possible.

When it became apparent that the Senator was unwilling to have a vote this week, then of course I agreed to that, because it was the next best thing, and that has been the spirit in which I agreed. I think that there is much to be said for the contention that to put the whole matter off until February 25, and to spend 33 days on it when we have the Marshall plan and tax reduction and many other important issues confronting us, is distinctly out of line, and will be so viewed.

Mr. WHERRY. Mr. President, so there will be no misapprehension or misunderstanding about the provisions of the agreement, I interpret it to mean that all amendments which have been submitted or will be submitted will be voted upon not later than February 23, which is Monday.

Mr. BARKLEY. Mr. President, I think the Senator is wrong in that statement. They must be offered by the 23d, but they can be voted on between the 23d and the time of the final vote on the joint resolution, on the 25th.

Mr. WHERRY. That is correct. I accept the correction.

Mr. LODGE. But after the 23d no new amendment can be offered?

Mr. BARKLEY. That is correct.

Mr. WHERRY. Yes; that is correct.

Mr. LODGE. That is to protect every Member of the Senate, so that he will not have an amendment confronting him which he has never seen before.

Mr. WHERRY. Very well. I may say this is the first time I have seen the proposed agreement. After February 23 no amendments can be offered, and the Senate will vote on the final passage of the joint resolution on February 25 at 4 o'clock p. m. Is that correct?

Mr. VANDENBERG. That is correct.

Mr. WHERRY. I think we have now covered the matter rather thoroughly, and I hope there is no misunderstanding.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDING OFFICER (Mr. COOPER in the chair) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. WILEY, from the Committee on the Judiciary:

Albert M. Cristy, of Hawaii, to be second judge of the First Circuit, Circuit Courts, Territory of Hawaii;

John E. Parks, of Hawaii, to be third judge of the First Circuit, Circuit Courts, Territory of Hawaii;

Cable A. Wirtz, of Hawaii, to be circuit judge of the Second Circuit, Circuit Courts, Territory of Hawaii;

Percy C. Fountain, of Alabama, to be United States attorney for the southern district of Alabama, vice Albert J. Tully;

William W. Hart, of Illinois, to be United States attorney for the eastern district of Illinois;

Howard L. Doyle, of Illinois, to be United States attorney for the southern district of Illinois;

Felipe Sanchez y Baca, of New Mexico, to be United States marshal for the district of New Mexico;

Gerald K. Nellis, of New York, to be United States marshal for the northern district of New York;

Theodore B. Werner, of South Dakota, to be United States marshal for the District of South Dakota; and

Leland Stanford Finney, of Virginia, to be United States marshal for the western district of Virginia, vice John White Stuart.

RECESS

Mr. WHERRY. I move that the Senate take a recess until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 5 o'clock and 9 minutes p. m.) the Senate took a recess until tomorrow, Wednesday, February 4, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 3 (legislative day of February 2), 1948:

DIPLOMATIC AND FOREIGN SERVICE

Harry L. Smith, of Illinois, for appointment as a Foreign Service officer of class 3, a consul,

and a secretary in the diplomatic service of the United States of America.

Raymond G. Leddy, of New York, for appointment as a Foreign Service officer of class 4, a consul, and a secretary in the diplomatic service of the United States of America.

The following-named persons for appointment as Foreign Service officers of class 6, vice consuls of career, and secretaries in the diplomatic service of the United States of America:

Philip Axelrod, of Delaware.
Douglass K. Ballentine, of Texas.
Joseph V. Brès, of Louisiana.
Philip H. Chadbourn, Jr., of California.
Philip M. Dale, Jr., of New York.
Frank J. Devine, of New York.
Isidore Friedman, of New York.
Howard C. Goldsmith, of California.
Charles M. Hanson, Jr., of New York.
Miss Dorothy M. Jester, of California.
Alexander R. Kepler, of Ohio.
Frank E. Maestrone, of Connecticut.
Philip W. Manhard, of California.
Charles E. Paine, of California.
Chris G. Petrow, of Massachusetts.
Robert M. Phillips, of California.
Dwight E. Scarbrough, of Minnesota.
Lawrence W. Shenfield, of New York.
Wallace A. Sprague, of New Jersey.
Godfrey Harvey Summ, of New York.
John Patrick Walsh, of Illinois.
Milton C. Walstrom, of Hawaii.
William A. Wiedersheim, 3d, of Pennsylvania.
John W. Williams, of North Carolina.
Chalmers B. Wood, of the District of Columbia.

DISTRICT COURT OF THE UNITED STATES FOR THE DISTRICT OF COLUMBIA

Edward Allen Tamm, of the District of Columbia, to be an associate justice of the District Court of the United States for the District of Columbia, vice Hon. James M. Proctor, elevated.

HOUSE OF REPRESENTATIVES

TUESDAY, FEBRUARY 3, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Saviour of the world, by whose earthly life the ways of God are revealed, we would bare our hearts to the wondrous truth Thou dost impart. Forgive us the tasks we have neglected—the common duty and the commands of conscience. Inspire us with a larger claim that we may breathe the world-thought, feel its dire need, and thus become channels of broad understanding. Do Thou further us with Thy continued help, that unworthiness may be overcome and deliverance come to the scattered families of this sorry world. Thou who art sufficient for all things, enjoin us to pour courage and strength into the lives of the weak and helpless, and thus link ourselves with the kingdom of God upon earth. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 1634. An act to amend section 1, and provisions (6), (7), and (8) of section 3, and provision (3) of section 4 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," and to add sections 5a, 5b, and 5c thereto; and

H. R. 1826. An act making it a petty offense to enter any national-forest land while it is closed to the public.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill and joint resolution of the House of the following titles:

H. R. 2029. An act to provide for the free importation of synthetic-rubber scrap; and

H. J. Res. 231. Joint resolution providing for membership and participation by the United States in the Caribbean Commission and authorizing an appropriation therefor.

The message also announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 612. An act to amend section 35 of chapter III of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," as amended, and to repeal section 36 of said chapter III of said act, as amended, so as to permit certain additional investments;

S. 1195. An act to repeal the laws relating to the length of tours of duty of officers and enlisted men of the Army at certain foreign stations;

S. 1454. An act to amend the Public Health Service Act in regard to certain matters of personnel and administration, and for other purposes;

S. 1478. An act to authorize the transfer of lands in the Fort Wingate Military Reserve, N. Mex., from the Department of the Army to the Interior Department;

S. 1493. An act to amend section 19 of the Veterans' Preference Act of June 27, 1944 (48 Stat. 387), and for other purposes;

S. 1520. An act to amend section 3 of the act of August 24, 1912 (37 Stat. 554), as amended, so as to provide reimbursement to the Post Office Department by the Navy Department for shortages in postal accounts occurring while commissioned officers of the Navy and Marine Corps are designated custodians of postal effects;

S. 1528. An act to authorize the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, or the Secretary of the Treasury to accept and use gifts, devises, and bequests for schools, hospitals, libraries, cemeteries, and other institutions under the jurisdiction of the Department of the Army, the Department of the Navy, the Department of the Air Force, or the Department of the Treasury, respectively, and for other purposes;

S. 1605. An act to provide for the payment of a sum not to exceed $12,000,000 to the Swiss Government as partial compensation for damage inflicted on Swiss territory during World War II by United States armed forces in violation of neutral rights, and authorizing appropriations therefor; and

S. J. Res. 172. Joint resolution to authorize vessels of Canadian registry to transport iron ore between United States ports on the Great Lakes during 1948.

SPECIAL ORDER GRANTED

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that, after the disposition of matters on the Speaker's desk and the conclusion of special orders heretofore granted, the gentleman from Massachusetts [Mr. HESELTON] may be permitted to address the House for 15 minutes today.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

ORDER OF BUSINESS

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that it may be in order today for the Speaker to recognize Members to move to suspend the rules and pass certain bills.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. McCORMACK. Mr. Speaker, of course, I shall not object, but I reserve the right to object so that the gentleman from Indiana may advise us if there is any bill that he has in mind in making his request, so that we on this side may be informed.

Mr. HALLECK. Yes. The two bills that are proposed to be called up under suspension of the rules are the so-called subsistence bill for veterans in colleges and the on-the-job training bill.

Mr. McCORMACK. I thank the gentleman.

Mr. RANKIN. Mr. Speaker, reserving the right to object, does the gentleman from Indiana limit his request to these two bills?

Mr. HALLECK. Of course, the request is a general one, but those are the two bills particularly for which the request is being made.

The SPEAKER. The Chair will state that he will not recognize Members to move to suspend the rules on other than the two bills mentioned.

Is there objection to the request of the gentleman from Indiana?

There was no objection.

EXTENSION OF REMARKS

Mrs. SMITH of Maine (at the request of Mr. CANFIELD) was given permission to extend her remarks in the RECORD and include an editorial.

Mr. CANFIELD asked and was given permission to extend his remarks in the RECORD.

Mrs. ST. GEORGE asked and was given permission to extend her remarks in the RECORD and include a news letter by Samuel Pettengill.

Mr. DAVIS of Wisconsin asked and was granted permission to extend his remarks in the Appendix of the RECORD and include a letter from a constituent.

ARMY RECRUITMENT PROGRAM

Mr. DAVIS of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. DAVIS of Wisconsin. Mr. Speaker, I have just received word from some of my constituents complaining about the fact that the Army and the Army Air Force are using the Fred Waring program as a means of advertising their recruitment program.

I have just two comments to make on that. One is that we all know the Fred Waring program is not bought for peanuts. The other is that the program is being broadcast in my district at 9 o'clock in the morning. I do not know what the Army Air Force is doing trying to recruit the housewives of this country, because they are the only ones I can imagine who would be listening at that

time. It would seem to me that any legitimate prospect for recruitment would either be in school or at work at that time in the morning.

I have written a letter to the chairman of the Armed Services Committee of the House asking him to look into that situation, and I ask unanimous consent that the letter be included in these remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The letter is as follows:

FEBRUARY 3, 1948.

Mr. W. G. ANDREWS,
Chairman, Armed Services Committee,
House of Representatives,
Washington, D. C.

DEAR COLLEAGUE: It has come to my attention that the Fred Waring program is being used as a radio medium in support of the Army's recruiting program.

While the objective is legitimate, I seriously question the advisability of using an expensive program of this kind, which is broadcast in my district at 9 o'clock in the morning. It seems to me that any legitimate recruitment prospect would either be in school or at work at that time.

I believe this question is one that might well be inquired into by your committee and I am therefore calling it to your attention.

I would be personally interested in being informed as to just what kind of a contract the Army has entered into with Fred Waring.

With personal regards to you, I am

Very sincerely yours,

GLENN R. DAVIS,
Member of Congress.

EXTENSION OF REMARKS

Mr. ENGEL of Michigan. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include an extract from the Navy League Bulletin.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

RETIREMENT PAY OF ARMY OFFICERS

Mr. ENGEL of Michigan. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. ENGEL of Michigan. Mr. Speaker, when the War Department Subcommittee of the Appropriations Committee considers the Army budget, we are always told that this is an irreducible budget. I have before me an excerpt from the Navy League Bulletin for January 1948, which reads, in part, as follows:

Data collected for the Secretary of Defense reveals that 84.7 percent of the Army officers holding the rank of major and above, who were discharged since 1940, will receive disability pensions, whereas only 63.4 percent of Navy officers of comparable rank will receive the same.

I am today placing the complete quotation, which is short, in the Appendix of the RECORD.

EXTENSION OF REMARKS

Mr. JAVITS asked and was granted permission to extend his remarks in the RECORD in three instances and include editorials and letters.

TAX-REDUCTION LEGISLATION

Mr. CURTIS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. CURTIS. Mr. Speaker, by an overwhelming vote this House has sent to the other body a bill that carries tax relief for all the American people.

The other body has a choice of alternatives: One is to cut the President's budget, the other to alter the proposal we passed yesterday to the point where any tax relief for the American people is negligible. The choice is theirs.

ORDERLY REDUCTION OF THE NATIONAL DEBT

Mr. REEVES. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. REEVES. Mr. Speaker, now that this House has acted with such overwhelming unanimity on the subject of tax reduction, it seems to me to be exceedingly appropriate that we should act with equal decisiveness on the subject of reducing the tremendous national debt. I have just introduced a bill, H. R. 5229, designed to provide for orderly and regular payments on the national debt of nearly two hundred and sixty billion dollars. While we are reducing taxes, we ought to be providing at the same time for reduction of the national debt.

At the close of World War I we had what seemed to be a staggering Federal debt. During the Republican administrations in the 1920's we adopted and carried out a program of making regular annual payments on our national obligations. That program, if continued, would have completely paid off the national debt before the start of World War II, but the New Deal came along and we have been going steadily deeper in the hole ever since.

The bill which I have introduced would compel the Federal Government to reduce the principal of the national debt by at least $1,500,000,000 every year. This amount would be earmarked and set up in the budget every year for debt reduction—in both good years and bad years, through prosperous times and hard times. We must pay off part of the principal just as regularly as we pay the interest, and the interest on the national debt is always included as an item in the Federal budget. I want principal payments budgeted on exactly the same basis.

My bill provides that the Treasury shall pay every year on the national debt an amount not less than 10 percent of all personal income taxes collected, or $1,500,000,000, whichever is the larger. In prosperous times 10 percent of all personal income taxes will very probably exceed $1,500,000,000. Even if this is not the case, under my bill we will still pay off $1,500,000,000 of our debt.

This does not mean that we should not pay off more than this annual minimum amount when we can. It will be up to Congress and the administration each year to set aside additional money for debt reduction. But certainly we cannot continue to handle the national debt on the present hit-or-miss basis. It is simply poor business. I think all of our people will be better satisfied and much less uneasy about the situation if they know that the Federal Government is paying its debts in a regular and businesslike way, even if it takes a long time.

Of course, everybody owes part of the national debt and everybody will have to pay a part of it. We all know that the theory that we owe it to ourselves is double talk, pure and simple. Paying it off will be a long, hard job for everybody.

The average taxpayer would like to feel that part of every dollar he pays will be used directly to reduce the national debt. This bill gives him that assurance. It provides that every income taxpayer, in making out his tax return, shall himself set aside and earmark for debt reduction 10 percent of the total amount of the tax he pays. The bill requires that each income-tax return form shall identify this 10-percent item with the following explanatory words, in boldface type: "This is the minimum amount which you are paying this year to reduce the national debt."

All of us will be able to pay our taxes more cheerfully if we know that a substantial part is to be used to help get the Federal Government out of the red and will not be turned over to some Government bureau to squander.

This country will never be genuinely prosperous until it pays off its back bills—two-hundred and sixty thousand million dollars of them. We ought to face the job squarely and go to work on it. I think my bill provides for a sensible beginning and intend to ask the Ways and Means Committee to act on it immediately.

DEPORTATION OF ALIENS

Mr. McDOWELL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. McDOWELL. Mr. Speaker, I have been informed by the Department of Justice that America's No. 1 enemy, the German Communist, Gerhart Eisler, has been arrested and confined on Ellis Island. That is one down and several hundred more to go, of these aliens who are flocking into our country, Communists, Fascists, and Nazis, making a lot of money among the American people for the destruction of the American people.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. McDOWELL. I yield.

Mr. RANKIN. The gentleman said it is one down and several hundred to go. He means several hundred thousand to go.

PER CAPITA FEDERAL OBLIGATIONS OF THE RESIDENTS OF THE FIFTEENTH DISTRICT OF PENNSYLVANIA AS GIFTS

Mr. RICH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to extend my remarks by inserting therein a table in reference to the six counties of my district, and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. RICH. Mr. Speaker, this Congress has gone far enough in obligating the people of my district for Federal gratuities—gifts against their permission or will. I just want to show the Members what they have done.

Since the 1st of July 1945 up to June 30, 1947, you have obligated the people of my district for $44,827,707.06—this money to be given away to foreigners. Before the New Deal era such a thing was unheard of. Now you are talking about the Marshall plan, and you want to obligate the people of my district further for $34,956,000 more. That is their share of the seventeen billion in the Marshall plan.

I object to that.

This is $80,169,000 that you are taking from the people of my district to give away.

If I were to get behind the Rotary Club, Kiwanis Club, the Lions Club, and other clubs and fraternal organizations in the district and urge them to go out and collect money to give away to foreigners, I will bet a dollar they would not get any $80,000,000 as gifts to pay this bill. I am on committees raising much money, and it is not $80,000,000.

The sad part of it is that you are doing the same thing to your own districts. It is not right. It is not just. It is not the honorable thing to do, and I object to it. I want you to stop it. Read the report that I shall insert in my remarks at this point and just see how far you can go in your own districts. I give my counties, their population in 1940, the obligations for gifts, and what you propose in the Marshall plan.

County	1940 population	Foreign aid July 1, 1945, to June 30, 1947, peacetime assistance	Foreign aid proposed by Truman-Marshall plan now pending	Total foreign aid provided and proposed
Cameron	6,852	$1,254,121.56	$988,743.60	$2,242,865.16
Clinton	34,557	6,324,967.71	4,986,575.10	11,311,542.81
Lycoming	93,633	17,137,647.99	13,511,241.90	30,648,889.89
McKean	56,673	10,372,859.19	8,177,913.90	18,550,773.09
Potter	18,201	3,331,329.03	2,626,404.30	5,957,733.33
Tioga	35,004	6,406,782.12	5,051,077.20	11,457,859.32
Total	244,930	44,827,707.60	35,341,956.00	80,169,663.60

This does not include anything but gifts since July 1, 1945, to foreign countries, gratuities if you please. Besides this, think of our national debt. Think of our annual expenditures, think of their local and State taxes. The power to tax is the power to destroy. The tax-take of America—Federal, State, and local taxes are around $56,000,000,000 annually or 30 percent of the estimated national income for 1947.

Before World War II, State and local taxes collected twice as much as Federal taxes. Today in the third year of peace our Federal tax is four times as high as local and State taxes for 1947 or about $40,000,000,000. Is not that a travesty on justice or to our people? That shows what this administration is doing to your people at home—I want it stopped and I will stop it with my vote if I can. Stop giving America away. Stop this increasing my peoples' debt. Stop wrecking our country. This Marshall plan is a wasteful, extravagant proposal. Why give Britain $5,348,000,000 more? We gave them $4,400,000,000 to do the job—all it did was socialize them.

Why give Holland $2,436,000,000?

Why give Denmark $582,000,000?

Why give Ireland $497,000,000?

Why give Iceland $38,000,000?

Why give Norway $234,000,000?

Why give Portugal $150,000,000?

Why give Sweden and Switzerland $700,000,000?

Why give our enemies Germany, Italy, and Austria $7,000,000,000? This does not include China and other countries. Stop giving us away. Stop giving my district away—I object to it.

THE PRESIDENT'S MESSAGE

Mr. COX. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. COX. Mr. Speaker, I do not like to challenge any statement made by my President, but I would be a miserable slave to fear if I did not take exception to the recommendations made in his message of February 2.

When I read this message I wonder if, after all, Henry Wallace is such a bad man.

The President attacks the people of that section of the country whose support he must have if he is to hope to be reelected. The whole thing sickens me.

THE PRESIDENT'S MESSAGE

Mr. RIVERS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS. Mr. Speaker, President Truman's message, delivered to the House on yesterday, with respect to the State of the Union, is an interesting document.

In so many words, it gives Presidential backing and approval to the recent report issued by the Committee on Civil Rights, on which committee the South had no representation to amount to anything—save left-winger Frank Graham, of North Carolina, who saw to it that his State got a pat on the back, and that the rest of the South was held up to ridicule, hatred, and contempt to the Nation.

It is deplorably unfortunate that President Truman is always a conscious party to any concoction which brands the southern white people as inhuman, and devoid of any respect for law and order. It is getting increasingly unbearable to my people that the so-called Democrats now carrying the label of the party which we founded and whose life we kept alive in the darkest hours of our party's political adversity, feel so sure of our complacency that they can continue to use us as the Nation's whipping boy.

The Democratic Party started on a one-way road to destruction at the time Eleanor Roosevelt got free tenancy in the White House.

President Truman's masterpiece is significantly quiet on one of the most brazen attempts to subjugate one of our most sacred institutions, the wholesale stealing of votes in Kansas City, and the deprivation of the sacred right of citizens to cast their votes and have them counted.

President Truman's masterpiece is significantly quiet on the recent mass slaughter of citizens of Chicago by machine-gun-toting gangsters.

President Truman's masterpiece fails to make mention of the murder in cold blood in New York City of one Scottorigio, on election day. Evidently, murder in the big cities is less important than one or two lynchings in the vast part of our Nation known as the Southland.

President Truman's masterpiece does not tell the Nation that there are more unnoticed murders in New York or Chicago in 1 year than there are alleged lynchings in the rest of the Nation combined.

President Truman's committee, who compiled the report of 178 pages, did not call the Nation's attention to the difficult task the South has had over the years of stamping out lynching, and how courageously the southern law-enforcement officers have been combating this thing with encouraging success.

It being the political season of the year, I imagine that in order to attract the Negro vote of the North, it is appropriate for political concoctions in the nature of the President's request to be the order of the day. It also appears that the ideal to which many emancipators point their sights in this Nation is to bring forth a mongrel American.

It is a sad commentary to me that the right to live as we please in the privacy of our homes, and in our work, now becomes a mortal political sin. It is a sad commentary to me that President Truman will be a conscious party to that group of Americans who apologize for the pigment of their skin. The only Americans who have no spokesman in this Nation are the white people. It has

gotten to the sad sight of 13,000,000 tails wagging 130,000,000 dogs.

The solid South one of these days is going to rise up and surprise some of the solid-headed leaders who think that the South is still in the bag.

The SPEAKER. The time of the gentleman from South Carolina has expired.

THE PRESIDENT'S MESSAGE

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, time and time again I have said on this floor that Harry Truman never had a better friend in this House than I have been, but that message of yesterday was the most discouraging thing I have ever heard read.

Why should we go to Europe and spend $17,000,000,000 under the so-called Marshall plan, allegedly fighting communism, which means $6,000,000 for the overburdened taxpayers of every individual county I represent? Why should we go to that extent and then have a President of the United States under some pressure we cannot understand come in with that message and try to ram the platform of the Communist Party down the throats of the people of the United States?

Mr. Speaker, there is one way we can take care of ourselves. We can elect independent electors throughout the South; and it is about time we do that throughout the country; then let those electors decide who shall be President. When we do that, we will put a stop to these smearing Communists who creep into every bureau and every commission that is appointed and attempt to undermine and destroy everything our people have fought for and everything we hold dear.

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WILLIAMS. Mr. Speaker, I am a lifelong Democrat, a descendant of Democrats, representing the most Democratic State in the Union, and I also rise to protest this thing that the President is doing to the South.

If it were not for southern Democrats, Henry Wallace would be in the White House today instead of Harry Truman. Southern Democrats have always been the best friends that President Truman or the Democratic Party ever had. May I say, Mr. Speaker, that this is a mighty poor way for him to evince his gratitude.

I cannot of course in the brief space of a minute go into detail in discussing this latest attack on constitutional government and Jeffersonian Democracy.

But I will say in all sincerity that I had rather see the Democratic Party go down in honorable defeat standing on the time-honored principles of Thomas Jefferson than to see it win an empty victory by stabbing its best friends in the back.

UNIVERSAL MILITARY TRAINING

Mr. LARCADE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. LARCADE. Mr. Speaker, I endorse and subscribe to all that has been said by my colleagues who have preceded me.

Mr. Speaker, on January 12, I introduced a discharge petition for the so-called universal military training bill, and thereafter I found that I had been improperly advised on the number of the bill as well as the procedure. Therefore, on January 21, I introduced House Resolution 445 directing the House Rules Committee to report out H. R. 4278, under the rules of the House, which bill is the bill reported by the Armed Services Committee of the House, and upon which the Rules Committee had taken no action.

Under my House Resolution 445, and under the rules of the House, seven legislative days are required to give the Rules Committee time to consider the reporting the bill to the House for consideration, and failing to do so at the expiration of the seven legislative days, it is then in order under my resolution, and under the rules of the House that a discharge petition may then be directed against the Rules Committee which will require the consideration of H. R. 4278 upon the signing of the said discharge petition by 218 Members of the House.

Therefore, since the required number of legislative days have expired, and in view of the fact that the Rules Committee have failed to take any action on H. R. 4278, by the gentleman from New Jersey [Mr. TOWE], under the rules of the House I am today filing discharge petition No. 13 on the desk of the Clerk, and I ask that all Members who desire to sign the discharge petition do so at the earliest possible moment, otherwise, if the required number of signatures is not obtained at an early date, it may not be possible to have the bill considered and acted upon by the House and Senate before adjournment.

Mr. Speaker, the enactment of this bill for universal military training is, in my opinion, the first step in any program for the protection and preservation of our country, and further, recent events, in my opinion, make it necessary that this legislation be enacted without further delay.

THE PRESIDENT'S MESSAGE

Mr. GOSSETT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. GOSSETT. Mr. Speaker, like my colleagues I am saddened and disheartened by the President's message of yesterday. But I do not blame the President so much. It is a system to which he has succumbed. If a Republican, or some other Democrat, were in the White House he would probably send up a similar message. It is a form of political expediency or hypocrisy induced by the electoral-college system of choosing Presidents.

Under the archaic undemocratic system of electing Presidents we have, as a matter of fact, turned over the national politics of the country to two major cities—New York and Chicago. Both parties get down on their bellies and crawl in the dirt and kiss the feet of the organized minorities in the big pivotal States. The only way we are going to be absolved from this ignominious procedure is to abolish the archaic system under which we elect Presidents. The solid South has been used as a whipping boy by both parties. We are kicked around by the Democratic National Committee and also by our friends, the Republicans. It is a matter of political expediency. The best folks in the country, the real Democrats, have no actual voice in the election of a Chief Executive; so, blame the system rather than Mr. Truman, who has succumbed to it. Let us change this system. Let us remove the shackles that now bind both major parties, and let the President be elected by a democratic process. The present system accentuates, encourages, and aggravates religious, racial, and economic blocs to the detriment of our whole country.

Our Judiciary Committee has finished hearings on resolutions to abolish the electoral college and electors and to divide the electoral vote of each State in the exact ratio with the popular vote. The Congress should immediately pass such resolution. Then and then only will Presidents stop appealing to the minorities and quit appealing to their passions and prejudices for the sake of votes.

THE PRESIDENT'S MESSAGE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTEN. Mr. Speaker and Members of the House, the President's message of yesterday was most unfortunate. As has been pointed out by my colleague the gentleman from Texas [Mr. GOSSETT] much of it comes from our system of electing Presidents in which both parties set out to get votes of the racial minorities in the so-called pivotal States, apparently losing sight of all else, in order to obtain the electoral votes of those States.

A short time ago the Governor of my State, a great Governor of a great State, an outstanding lawyer and citizen, a temperate man, in his inaugural message to the State legislature served notice on the leaders of the National Democratic Party that in view of their efforts to pass measures aimed at the South they had better stop, look, and listen, if they hoped to have the unqualified support of the South. This we have been urging for some time, to no avail. Party leaders will not learn.

The President's message yesterday shows that these party leaders have neither stopped, looked, nor listened.

Mr. Speaker, the President's action yesterday is deplored. I believe his advisers have led him to make a serious mistake. There can be no question that such message comes as a result of the charges of the National Association for the Advancement of Colored People, the Communist Party, and various radical agitators, leveled against us in the South.

This message presumes that such charges are well founded, it takes for granted that Negroes are mistreated in the South. Such is not the truth.

For almost 9 years before coming here I was a district attorney in Mississippi. During that whole time, and since, I know that every official with whom I came in contact was wholly fair to the Negro; in fact, they not only protected him in his civil rights but if they erred it was in his favor. In practically every case where a Negro was charged with crime which came before me several good white citizens were there begging the officers to be lenient with him. In those few cases where, due to their atrocity, some few people might have liked to take the law in their hands, in all cases the defendant was protected by the sheriffs, the deputies, the court, and the people. Such is the general situation throughout the South where, according to the Tuskegee report, during 1947 there was only 1 lynching and 31 were prevented.

If the antilynch bill is passed so that an officer is personally responsible if something happens to the prisoner, it will not improve the present situation but will tend to cause officers to be less diligent in their efforts to go in and arrest the person believed to be guilty and protect him, because if the officer takes such person into custody, and his prisoner is taken from him, then the penalty applies.

No, Mr. Speaker, the President says his recommendations follow that of his committee which he appointed. The recommendations are the same but the President knew or should have known what his committee would bring in, for 8 of the 15 members of that committee are members of racial minorities in this country, and of the other 7, several are well known for their charges against the South. That kind of group started out to do just what the President has lent his aid to doing.

We have had a taste of having the Department of Justice send representatives into our State. We have learned what they will do, for on at least two occasions they went into my State, paid no attention whatever to the statements of the State officials, who are just as conscientious in the discharge of their duties as any Federal officer who ever lived, but accepted the false and untrue statements of racial minority radicals.

The tragedy of the situation is that both the Democratic and Republican Parties are trying to get the Negro and other racial minorities to support them in the November election. In their efforts to obtain that support they recommend the passage of the FEPC, whereby folks in Washington will tell every businessman in the country who he must employ. They recommend the passage of the antilynch bill, which would not improve the present situation, the repeal of the poll tax—in my State $2 each year, which all, white and black, must pay whether or not they vote, the money from which goes to the support of public schools for white and Negro. All would have been held unconstitutional by any Supreme Court which preceded the present Court.

Mr. Speaker, Negroes are protected in their rights, civil and otherwise, to a greater extent in the South than in any section of which I know and I have been over the United States. We understand them and their failings, and in fact they are not held as strictly accountable as are the white citizens.

No; what is desired by the Communist Party, who recommends these things, is unrest and trouble; that would certainly follow the passage of these measures.

What the various Negro organizations want is amalgamation of the races, they want to break down segregation; they do not want equal treatment but want social intermingling—which they believe would follow the passage of such measures.

What the Democratic Party and Republican Party, too, I might say, want is the votes of Negroes and other racial minority groups in Chicago and New York and other cities in the so-called pivotal States and thereby hope to win the next election.

To the Democratic leaders I say Governor Wright was right when he said they had best stop, look, and listen. He had reference to politics. I say both parties, Democratic and Republican, had best stop, look, and listen, or they are going to wreck this Nation by directing their platforms toward obtaining the Negro vote in the northern cities even if it calls for destroying State laws, State courts, and even State government.

They should leave such platforms to Henry Wallace and the Communist Party and devote themselves to the great majority of American citizens who, through State and local governments, are giving much better service and protection to all their people than would the Federal Government, operating thousands of miles away, who might at any time destroy the laws, the customs, take away the rights of the people of one section in order to obtain the votes of other more populous areas, such Federal Government being controlled by a Congress and an executive department, only a few members of which would either understand or know the local problems. To both the Democratic and Republican Parties I say you are on the road to an all-powerful state. Once you destroy State laws and State government you have taken away the greatest protection the American citizen has in his civil rights and in all others. Today more and more southern Democrats are seeking ways and means of correcting the present intolerable situation which threatens not only the South but also our great Nation. The President's message will tend to speed up that hunt for a way to save the South and the Nation.

EXTENSION OF REMARKS

Mr. WHITTINGTON asked and was given permission to extend his remarks in the RECORD and include an article.

Mr. PRICE of Illinois asked and was given permission to extend his remarks in the RECORD in two instances, to include in one an editorial and in the other a statement.

Mr. WALTER asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. LANE asked and was given permission to extend his remarks in the RECORD in two instances, to include in one an article and in the other an editorial.

Mr. COURTNEY asked and was given permission to extend his remarks in the RECORD and include resolutions adopted by an American Legion post.

Mr. BARTLETT asked and was given permission to extend his remarks in the RECORD and include an editorial appearing in the St. Louis Post-Dispatch.

THE PRESIDENT'S MESSAGE

Mr. DORN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN. Mr. Speaker, I would just like to say that I think my distinguished friend the gentleman from Texas [Mr. GOSSETT] has a good plan, that the people of this country should do something to take the elections of Presidents of the United States out of the hands of minorities and give them back to the people of this country where they belong. Gentlemen of the House, I may be wrong, but I think that the civil rights of the people in China and in Europe, as well as the rest of the people all over the world, who are being threatened by communism, should be the No. 1 objective of any administration sitting in the White House of this country today. Soil conservation and forestry and hydroelectric power, lowering the Social Security Act from 65 to 62 years, and things of that nature, should come first in this country, and not the kind of stuff that was brought before this House on yesterday. For all we know, the atomic bomb might fall some night on some of the cities of this country. I thought about that last night. I have seen bombs fall in Europe, and I know what I am talking about. We should do first things first in this country and not try to out-Wallace Henry A. Wallace.

EXTENSION OF REMARKS

Mr. NORBLAD asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. McGARVEY asked and was given permission to extend his remarks in the RECORD and include an editorial regarding the St. Lawrence waterway.

Mr. WIGGLESWORTH asked and was given permission to revise and extend the remarks he expects to make later today and include certain tables and correspondence.

Mr. CLASON asked and was given permission to extend his remarks in the RECORD.

Mr. SCHWABE of Missouri asked and was given permission to extend his remarks in the RECORD in three instances and include a newspaper article and other material.

Mr. HAND asked and was given permission to extend his remarks in the RECORD and include an editorial.

REDUCTION OF POSTAL RATES ON RELIEF SHIPMENTS OVERSEAS

Mr. KEATING. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KEATING. Mr. Speaker, I rise to answer an attack which has been made by a subcommittee of the Committee on Foreign Affairs consisting of the gentleman from Pennsylvania [Mr. FULTON] and the gentlemen from New York [Messrs. JAVITS and PFEIFER] upon the measures which have been introduced by a number of Members to reduce or eliminate the postage on shipments overseas of relief supplies—food, clothing, medical supplies, and necessaries.

I happen to be the author of H. R. 4616, introduced on December 2, 1947, to reduce such charges by one-half. A number of my colleagues have introduced other measures to the same general effect. In addition, there are large numbers from this body and the other body who have voiced their vigorous support of such legislation as embodying the most desirable form of foreign aid in the finest American tradition.

The report of this Subcommittee of Foreign Affairs, which has been made a House document, presents a labored argument to attempt to show that it is actually less expensive for the Government to buy relief supplies and pay the entire cost of shipping them than it is to grant a subsidy of a part of the cost of shipment to be charged to any European recovery program. They say that, given a certain number of dollars, the Government can make them go farther by buying food and paying all of the cost of sending it overseas than they can by paying simply the cost or a part of the cost of shipment of the item.

In the first place, this argument seems to me patently unsound arithmetic. How one can seriously argue that the Government saves money by buying a bag of sugar or a suit of clothes and paying the entire cost of shipping it, rather than by allowing one of my constituents to send it out of his own generosity and simply defraying a part of his postage costs is beyond my power to comprehend.

But this subcommittee says it should all be channeled through the Government. We ought not, they say, to encourage our people to help their relatives and friends overseas, to whom they have family or racial ties. It should all be done, they claim, by the scientifically cold and calculating hand of bureaucracy rather than out of the genuine warmth and affection of personalized generosity. To that viewpoint, I cannot subscribe.

Conceding the necessity of some governmental program of foreign aid, I feel certain from personal experiences related to me by my people that the thrill experienced by a family in Germany, Italy, Poland, or England in receiving a parcel from John or Mary Smith postmarked U. S. A. is incomparably greater than his experience in having those same relief supplies doled out by some governmental agency. Moreover, we should not lose sight of the value of such a gift to the giver, always more richly blessed than the receiver.

The people in my district, and I know the same holds true throughout the country, generous as they have been, want to do more, but when it costs over $3 to send a package abroad they are naturally restricted in the extent to which they are able to share with their less fortunate brothers and sisters across the seas. It is regrettable, indeed, that this subcommittee has seen fit to take a step which, if accepted by this Congress, will reverse rather than accelerate the trend toward voluntary assistance by our own people in the finest American tradition.

I have spoken out on this subject at this time in order to urge that the full Committee on Foreign Affairs may not follow the recommendation made by this subcommittee. Furthermore, it is submitted, with due deference, that this subcommittee has presumed to exercise jurisdiction over a matter which is entirely outside the scope of its legitimate activities and which has already properly been referred to the Committee on Post Office and Civil Service.

Upon the chairman and members of this committee I urge that an early hearing may be granted on my bill, H. R. 4616, and the other measures seeking similar relief which are sponsored by my colleagues.

COMMITTEE ON WAYS AND MEANS

Mr. GEARHART. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight tonight to file reports on H. R. 5052 and House Joint Resolution 296.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PERMISSION TO ADDRESS THE HOUSE

Mr. VAN ZANDT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks in the Appendix of the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

[Mr. VAN ZANDT addressed the House. His remarks appear in the Appendix.]

SPECIAL ORDER GRANTED

Mr. HILL. Mr. Speaker, I ask unanimous consent that tomorrow, following any special orders heretofore entered, I may be permitted to address the House for 45 minutes on the shipping of farm equipment to foreign countries.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

FUEL SHORTAGE

Mr. CLASON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CLASON. Mr. Speaker, the oil situation in western Massachusetts is becoming more serious day by day. According to a recent telegram I received from an independent dealer, it is possible that 1,500 families in one city may be out of oil and without opportunity to secure oil unless something drastic is done shortly. Director Max W. Ball of the Oil and Gas Division of the Department of the Interior prophesied that the fuel shortage which we are encountering this year may extend over the next 4 or 5 years. The only proposal that has come out of the Department of the Interior to take care of this situation is a proposal to spend $9,000,000,000 in order to make oil out of shale and coal. Everyone knows that that would take a period of years and is no remedy for the situation which actually faces this department as the oil industry is now run. It would appear that 17 major oil companies in the course of the next 3 or 4 years are going to be in the position of putting every independent oil dealer, distributor, and retailer out of business unless Congress does something shortly in order to remedy a situation which is slowly but surely becoming worse. I am advised that one or more independent dealers in my district are unable to secure fuel oil for their customers but a major oil company is prepared to deliver fuel oil to the independent dealer's customers directly. This, in my opinion, is a gross violation of the recommendation of representatives of the oil industry that a pool of fuel oil should be placed at the disposal of a State fuel coordinator to aid independent dealers in supplying their customers. There are nine investigations of the oil situation now under way by Congress. I trust at least one of them will provide an answer to such a situation as this independent dealer faces.

AMENDMENT OF CONTRACT SETTLEMENT ACT OF 1944

Mr. CARSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. CARSON. Mr. Speaker, on January 13, 1948, I introduced H. R. 4928, a bill to amend the Contract Settlement Act of 1944, so as to authorize, belatedly, the payment of fair compensation to persons contracting to deliver strategic or critical minerals and metals during the war. The amendment is based upon the repeatedly acknowledged obligation of the American people to provide fair compensation for all who contributed materials, services, or facilities for the prosecution of World War II and is, in substance, a reenactment of similar remedial legislation adopted by the Congress after World War I, expanded to include the minerals and metals designated by the Army and Navy Munitions Board as strategic or critical. The amendment serves to rationalize the payment of fair

compensation so that the war contractor who supplied critical minerals and metals is treated the same as any other supplier of materials, services, or facilities used in the prosecution of the war, and to correct presently existing discriminatory practices resulting from technically inconsistent or conflicting provisions of the act itself, whereby the claim of one producer is allowed and that of another is denied.

Commencing with the war-induced emergency, the President of the United States, the Congress, and hundreds of officers and representatives of wartime Government agencies repeatedly importuned the members of the mining fraternity, especially those who owned or operated marginal properties, to accelerate exploration, development, and production so that critical minerals and metals used in the manufacture of implements of war might be in maximum supply.

Pursuant to policies formulated by the War Production Board, the Metals Reserve Company, organized in June 1940 to act as a Government purchasing agent, created a special market for critical minerals and metals, and by press, by radio, and by personal appeal, sought to stimulate production by offering all sorts by inducements, such as loans, subsidies, and decentralized special services.

The miners' good-faith response to the Government's intense drive for increased production we cannot gainsay. Many of these loyal producers, especially from among those of small means, failed to recover the actual cost of their patriotic endeavor, due to natural hazards common to mining and over which the miner had no control.

That Congress intended to pay fair compensation to the wartime producer of critical minerals and metals is evidenced by the words of the Honorable James G. Scrugham, former Senator from Nevada, when he said to a group of miners on August 7, 1944, at Phoenix, Ariz., shortly after the adoption of the Contract Settlement Act:

> The Congress has included in the recently passed Contract Settlement Act authority for the Office of Contract Settlement to deal with quasi and informal contracts and make settlements therefor. It was the intent of the Congress under this act to give the agencies and the Office of Contract Settlement such authority that a war minerals relief bill would not be necessary. What the results will be depends upon the administration of the act as set up in the Office of Contract Settlement.
>
> There is no reason, ladies and gentlemen, why you of the mining industry and of other industries who did not wait or quibble about contracts before doing their best for the war effort should not be compensated. I know that I did not intend, and I now know that neither the Senate nor the House intended that we should have to wait 10, 15, or 20 years under some new war minerals relief act before those who may have some unrecovered wartime investment at the end of hostilities should be compensated therefor. This was the case after the last world war.

Unfortunately, history is repeated. Three and a half years after the passage of the Contract Settlement Act, the record reveals that the miner has been treated with a disregard equal to, or perhaps greater than, that displayed following World War I. Some producers whose claims for fair compensation have been successively denied by the contracting agencies and the Appeal Board of the Office of Contract Settlement, are now prosecuting an action de novo in various district courts of the United States, ranging from South Carolina to Montana, in a prolonged but determined effort to recover fair compensation. The record further shows that, in one instance where two producers furnished manganese ore to the same stock pile simultaneously under parallel conditions, the unrecovered costs of one have been paid, and a like claim of the other rejected. Just recently, I discovered that one of my own constituents, whose contract for the delivery of a specified number of tons of ore was terminated as the result of circumstances or natural causes impossible of apprehension or control, is precluded from recovering fair compensation on account of an irreconcilable conflict in the provisions of the Contract Settlement Act itself, thus defeating its very intent.

The afore-mentioned record of confusion and frustration is sufficient to convince me that we must act promptly to eliminate the discrimination which, by our own slothfulness, we have too long allowed to prevail between classes of war contractors and between members of the same class. It is obvious to me that the act, which is based upon the fundamental principle that war contractors shall be paid speedily the fair compensation due them for the termination of their war contracts, must be amended if we are to keep faith with the wartime producers of strategic and critical minerals and metals. To that end, I have introduced H. R. 4928, and earnestly seek its speedy adoption.

We can ill afford, at this critcal period in our Nation's existence, to consciously permit depletion in the resources of those upon whom we must depend for our supply of critcal minerals and metals. I say, and I think we will all agree, that we may again need their wholehearted and unreserved aid and assistance. What response do we have a right to expect in the face of the shabby treatment which I have just called to your attention.

In endeavoring to decide whether we should spend billions of dollars in an attempt to prove to the disillusioned people of western Europe the superiority of our democratic processes and so-called way of life and induce them to make it their first choice, I find many fellow Members of Congress suggesting that we insist on acquiring, from those European countries, as part consideration for our bounty, readily available supplies of critical minerals and metals, to be here stock-piled for possible future emergency. Before we do that, before we send billions abroad, I respectfully suggest and urge that we pay our duly acknowledged debt, at best but a few millions, to our own loyal and proven producers of these necessary materials. With me they come first.

EXTENSION OF REMARKS

Mr. NIXON asked and was given permission to extend his remarks in the RECORD.

PARCEL-POST SHIPMENTS ABROAD

Mr. JAVITS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. JAVITS. Mr. Speaker, my distinguished colleague from New York [Mr. KEATING] has called attention to a report on the question of voluntary foreign aid affecting parcel-post shipments. I am very happy to straighten that point out for the gentleman from New York [Mr. KEATING], as well as for the gentleman from Michigan [Mr. YOUNGBLOOD], the gentleman from New York [Mr. POTTS], and the gentleman from Wisconsin [Mr. KERSTEN], and perhaps other Members who have introduced similar bills. The only thing we intended to say in our report is that on a purely financial basis, the idea of taking money out of funds appropriated for foreign relief for the purpose of compensating for free parcel post did not pay in dollars and cents. Now, the question of policy or the question of humanitarianism or the question of whether we should encourage in an affirmative way the sending of these parcels, because it is a good thing like the Voice of America program or a similar policy approach, is not at all dealt with and is entirely within the realm of discretion. All we do is analyze the purely financial aspects of the operation. I hope that will clarify the matter for my colleagues. I would feel perfectly free myself to vote for a suitable bill on this subject. Our report is not intended to be and is not an obstruction on the road for the consideration of these bills entirely on their merits.

Mr. POTTS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POTTS. Mr. Speaker, I echo the sentiments of the gentleman from New York [Mr. KEATING] on the legislation which has been introduced to reduce or eliminate the postage on shipments of gift packages sent abroad. As I understand it, the study which was made by the special subcommittee of the House Committee on Foreign Affairs held no hearings on the question. Therefore the special subcommittee's opposition represents no more than their own viewpoint. I do not think it is the prerogative of a special subcommittee of one House committee to labor the points of legislation presently pending before another committee, in this case the Committee on Post Office and Civil Service. I think if the views of the special subcommittee are carried out it is going to discourage this very urgent, immediate, humane, and charitable aid of sending gifts of food to deserving people abroad. We know that no donee abroad gets the food unless the donor here knows that he is deserving of it. We know also that this private

aid eases tremendously the public burden to give succor to deserving souls abroad. I trust that the Committee on Post Office and Civil Service will rely on its own study.

PERMISSION TO ADDRESS THE HOUSE

Mr. BREHM. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

[Mr. BREHM addressed the House. His remarks appear in the Appendix.]

REDUCED PARCEL-POST RATES

Mr. KERSTEN of Wisconsin. Mr. Speaker, I ask unanimous consent to proceed for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. KERSTEN of Wisconsin. Mr. Speaker, I also wish to lend my wholehearted support to the proposition of reducing the postal rates to foreign countries so that private individuals may be more encouraged to send their contributions to foreign countries where there is great need.

There is one aspect of this program, a bill for which I have also introduced, that has not been sufficiently stressed, in my opinion. It is this, that by reducing the postal rates we thereby encourage private individuals to send aid to those countries where there is great need and we are thereby engaging the interest of a much larger number of our citizens in aiding Europe and in the fight against communism. The rank-and-file citizen of the United States is by this measure encouraged to send aid and he thereby personally participates in the aid program. This is not just a Government program to aid the people of these foreign countries. This is a program in which the rank-and-file citizens of the United States have a vital interest, and by reducing the postage rates we are thereby engaging their direct interest. The loss sustained in postal revenue is gained tenfold in the private contributions thus increased. Hundreds of thousands, yes, millions, of private citizens will be encouraged to send aid and thereby participate in the ERP. The more private contributions, the less burden on the Government. Private contributions create a closer bond between citizens of the United States and the needy in foreign lands. There is less of the political and more of the human in this kind of aid. There is something much more heart warming in a gift from an individual, as contrasted with a gift from a government. I heartily support this measure.

The SPEAKER. The time of the gentleman from Wisconsin has expired.

THE LATE ORVILLE WRIGHT

Mr. BONNER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include as a part of my remarks an editorial from the News and Observer of Raleigh, N. C., The Dream Still Flies.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. BONNER. Mr. Speaker, on Friday last there passed away one of America's great pioneers, the last of the Wright brothers, Orville Wright. During the 3 years he spent on the coast of North Carolina he endeared himself to the people of my State—and particularly those living in Dare County. There he made lifelong friends. Also, this is true of Wilbur Wright, who passed on years ago.

On the same day that Mr. Wright passed away there entered the hospital at Norfolk, Va., Capt. John T. Daniels. He passed away the succeeding day. Thus closed the active life of the men who participated in the first flight to conquer the air. All have gone on to their reward. At Kitty Hawk stands the Wright Memorial, which commemorates the first flight of an airplane and forevermore will inspire the youth of the world.

DIES AT NORFOLK

NORFOLK, VA., February 1.—Capt. John T. Daniels, 74, of Manteo, N. C., who assisted the Wright brothers in the first successful airplane flight at Kill Devil Hill 44 years ago, died last night in a local hospital.

Daniels was brought to the hospital suffering from a heart ailment Friday shortly before the death of Orville Wright at Dayton, Ohio.

It was Daniels who held down one of the wings of the Wright plane on December 17, 1903, until the proper time for the craft to be freed for flight. He was the last survivor of three coast guardsmen who assisted in the historic take-off.

Daniels retired from the Coast Guard in 1918 due to disability. Subsequently he was the master of several inland waterway vessels. He was a cousin of the late Josephus Daniels, former Navy Secretary and Raleigh publisher who died recently.

THE DREAM STILL FLIES

When Capt. John T. Daniels of Manteo died a few hours after the death of Orville Wright, the last of those young men who participated in man's first flight was gone and aviation became not an invention of our time but of our past. The little moments of uncertain flying above the Carolina dunes seemed very remote as these two old gentlemen died. And in an age which counts aviation as a principal part of power, it is difficult to remember that even as young men, both of them, the Carolina coast guardsman and the Ohio mechanic, were the gentlest sort of human beings. What they launched was a long desired part of man's hope, and both of them as they grew older were appalled by the deadly results which followed the fulfillment of that dream.

The world knew Orville Wright much better than it did Capt. John T. Daniels. It knew him as a very retiring inventor, almost forgotten as he grew older among the roar of the militant voices of those who seized upon aviation as the most deadly weapon man has yet contrived. Orville Wright himself spoke in dismay of the awful use made of the invention he and his brother had created.

In a remarkable way Captain Daniels was a man of the same sort of gentle and reticent spirit. He was a strong, brave man who gave his life to saving the lives of the shipwrecked in the seas above Hatteras. At that first flight, of course, he represented not the inventive genius of man but the spirit of the ordinary American of good will, ready in courage to take the adventurous chance. In such a way both Orville Wright and Captain Daniels symbolized the decent expectant world in which men escaped the bonds of old earth—and somehow felt in the process that man could rise above the past as well as the earth.

There is more than an ordinary element of tragedy in the death of these two men—and also in the lives of those of us who remain—in the fact that the principal note at the time of their passing should be sounded by military men. The thanks they gave was that from that first flight "America will be empowered to maintain world peace." Orville Wright and John T. Daniels were as patriotic as any Americans of their time. It is to be doubted, however, that either dreamed of aviation as an American weapon for an American maintained peace.

Across the 44 years of flight before they died, they heard men speak of the possibilities that aviation might pull the hearts of men together in a smaller, better world. Indeed, the development of aviation coincided with the development of plans by which men and nations working together might secure peace and order for all, not by a weapon in the hands of one nation but by rising intelligence and decency among all nations.

Sometimes today such plans for a world rising above the ruins of the endless varieties of peace by power in the past may sometimes seem as fragile and as awkward as that kite crate which flew so uncertainly across the Carolina dunes in 1903. The League of Nations did not rise. The United Nations falters. The soldiers still are those who talk as the possessors of the best creativeness and courage of man. But the world needs desperately to remember at the death of these two old gentlemen who were such gallant young men that man still looks up in hope, in genius, in courage and in faith. He will not be forever bound to a bloody earth nor always permit primitive distortion of his soaring dream.

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first bill on the Private Calendar.

CAFFEY ROBERTSON-SMITH, INC.

The Clerk called the first bill on the Private Calendar (H. R. 350) for the relief of Caffey Robertson-Smith, Inc.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of Agriculture be, and he is hereby, authorized and directed to pay, out of any funds available for carrying out the provisions of section 32 of the act entitled "An act to amend the Agricultural Adjustment Act, and for other purposes," approved August 24, 1935, as amended, the sum of $9,448.86, to Caffey Robertson-Smith, Inc., of Memphis, Tenn., in full satisfaction of its claims against the United States for payments for the exportation of certain quantities of cotton at the rates in effect at the time of the sales thereof for export, notices of such sales having been given prior to December 6, 1939, but the payments therefor having been withheld for the reason that the said Caffey Robertson-Smith, Inc., did not promptly file a bond supporting the agreement of compliance, dated August 1, 1939, which it entered into in connection with the cotton and cotton products export program of the Department of Agriculture for the fiscal year 1940: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwith-

standing. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RELIEF OF E. W. EATON COAL CO.

The Clerk called the bill (H. R. 2697) for the relief of E. W. Eaton Coal Co.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $1,103.24, to E. W. Eaton Coal Co., of Belfast, Maine, in full settlement of all claims against the United States for reimbursement of transportation cost in excess of normal rates of transportation prevailing prior to January 1, 1942, on coal received on and after April 1, 1944, to December 31, 1944, in and around New York Harbor area and in New England, which period was not included in the regulations of the Office of Price Administration on bituminous coal from district No. 3 in northern West Virginia: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, strike out all of line 2 and the words "of Price Administration" in line 3.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CHARLES E. CROOK

The Clerk called the bill (H. R. 2268) for the relief of Charles E. Crook.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States is authorized and directed to credit the account of Charles E. Crook, postmaster, of Vicksburg, Miss., in the sum of $677.30, and that B. L. Fielder, assistant postmaster, of Vicksburg, Miss., is hereby relieved from any liability to refund or to pay to the United States said sum of $677.30, such sum being the amount of increased salary paid to the assistant postmaster from December 1, 1942, to January 31, 1946, and disallowed by the General Accounting Office due to misunderstanding, by the Vicksburg postmaster, of section 9, paragraph Z, of Public Law 134, of the Seventy-ninth Congress.

With the following committee amendments:

Page 2, line 1, strike out the remainder of the bill and insert in lieu thereof "to a mistake of facts upon the part of the postmaster, Vicksburg, Miss., and the Post Office Department in applying section 92 of title 39, United States Code, and section 9 (z) of Public Law 134 of the Seventy-ninth Congress (title 39 U. S. C., 1940 ed., sec. 859 (z)).

"SEC. 2. The Postmaster General is authorized to pay to B. L. Fielder from the appropriation made for the fiscal year 1947 for the service involved such sum as he may have repaid as a result of the condition set forth in section 1 of this act and the Comptroller General shall allow the same."

The committee amendments were agreed to.

Mr. SMITH of Wisconsin. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SMITH of Wisconsin:

On page 1, line 5, strike out "$677.30" and insert "$699.15."

Page 1, line 8 strike out "$677.30" and insert in lieu thereof "$699.15."

Page 2, line 2, strike out "January 31" and insert in lieu thereof "August 12."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Charles E. Crook and B. L. Fielder."

A motion to reconsider was laid on the table.

MR. AND MRS. EDWARD H. ISENHART

The Clerk called the bill (S. 664) for the relief of Mr. and Mrs. Edward H. Isenhart.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mr. and Mrs. Edward H. Isenhart, of Kemmerer, Wyo., the sum of $662.82, in full satisfaction of their claim against the United States for the sums of $475.20, representing the 6 months' death gratuity, and $187.62, representing arrears of pay, which would be payable to them in the case of their foster son, Harold Emmett Isenhart (service No. [redacted]), late a seaman first class, United States Naval Reserve, except for the fact that they were not his natural parents: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

PETER BEDNAR ET AL.

The Clerk called the bill (H. R. 1022) for the relief of Peter Bednar, Francisca Bednar, Ruth Eva Bednar, Peter Walter Bednar, and William Joseph Bednar.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws the Attorney General is hereby authorized and directed to dismiss the deportation proceedings now pending against Peter Bednar, and that he shall, upon the payment of the required head tax, be considered, for the purposes of the immigration and naturalization laws, to have been lawfully admitted to the United States, notwithstanding the fact that he arrived without proper immigration documentation. Upon the enactment of this act the Secretary of State shall instruct the proper quota-control officer to deduct one number from the Rumanian quota of the first year that the same Rumanian quota is available.

The Attorney General is further authorized to record lawful admission for permanent residence into the United States of Francisca Bednar, Ruth Eva Bednar, Peter Walter Bednar, and William Joseph Bednar as of the date of their last entry into the United States.

With the following committee amendments:

Page 1, line 9, after the words "United States", add "on May 26, 1942."

Page 2, line 7, strike out the name "Ruth Eva Bednar."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Peter Bednar, Francisca Bednar, Peter Walter Bednar, and William Joseph Bednar."

A motion to reconsider was laid on the table.

WILLIE RUTH CHAPMAN

The Clerk called the bill (S. 1411) for the relief of Willie Ruth Chapman.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Willie Ruth Chapman, of Ethridge, Tenn., the sum of $5,000, in full satisfaction of her claim against the United States for compensation for personal injuries and loss of earnings sustained by her as a result of an accident which occurred on December 2, 1944, in Lawrenceburg, Tenn., when the automobile driven by her was struck by a United States Army vehicle: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EDWARD L. BARRERAS

The Clerk called the bill (H. R. 380) for the relief of Edward L. Barreras.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Edward L. Barreras, Canoga Park, Calif., the sum of $10,000. The payment of such sum shall be in full settlement of all claims of the said Edward L. Barreras against the United States on account of personal injuries received by him on March 3, 1944, as a result of a collision between the car in which he was riding and a United States Army vehicle at the intersection of Manchester and Avalon Streets, Los Angeles, Calif.: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services

rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 1, line 6, strike out "$10,000" and insert "$6,100."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. ESSIE N. FANNIN ET AL.

The Clerk called the bill (H. R. 697) for the relief of Mrs. Essie N. Fannin, Miss Helen Hicks, Miss Marie Hicks, Miss Frances Fannin, William O. Thompson, and Mrs. W. D. Thompson.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mrs. Essie N. Fannin, of Moneta, Va., the sum of $15,000; Miss Helen Hicks, of Moneta, Va., the sum of $10,000; Miss Marie Hicks, of Moneta, Va., the sum of $5,000; Miss Frances Fannin, of Moneta, Va., the sum of $5,000; William O. Thompson, of Moneta, Va., the sum of $1,000; and Mrs. W. D. Thompson, of Moneta, Va., the sum of $1,000. The payment of such sums shall be in full settlement of all claims against the United States for personal injuries sustained, hospital and medical expenses, and loss of earnings incurred by each of the above-named persons, as a result of an accident involving a vehicle operated by the Civilian Conservation Corps, War Department, on route 122, near Moneta, Va., on November 1, 1941: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

Page 1, line 6, strike out "$15,000" and insert in lieu thereof "$5,430.30."

Page 1, line 7, strike out "$10,000" and insert in lieu thereof "$1,533.96."

Page 1, line 8, strike out "$5,000" and insert in lieu thereof "$2,573."

Page 1, line 9, strike out "$5,000" and insert in lieu thereof "$1,116.25."

Page 1, line 10, strike out "$1,000" and insert in lieu thereof "$226.10."

Page 2, line 1, strike out "$1,000" and insert in lieu thereof "$211.35."

The committee amendments were agreed to.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DAVE HOUGARDY

The Clerk called the bill (H. R. 2214) for the relief of Dave Hougardy.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Dave Hougardy, Renton, Wash., the sum of $2,000. The payment of such sum shall be in full settlement of all claims against the United States for damages arising out of the death by drowning of Teddy Hougardy, 8-year-old son of the said Dave Hougardy, on August 5, 1938, when he fell from an unprotected foot log built by employees of the Forest Service of the Department of Agriculture in the Dalles campground of the Snoqualmie National Forest, Washington: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HASSLER-PONDER TOY MANUFACTURING CO., INC.

The Clerk called the bill (H. R. 2914) for the relief of the Hassler-Ponder Toy Manufacturing Co., Inc.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Hassler-Ponder Toy Manufacturing Co., Inc., of Birmingham, Ala., the sum of $10,000, in full satisfaction of all claims against the United States for damages sustained by the Hassler-Ponder Toy Manufacturing Co., Inc., by a fire which destroyed its plant and equipment on November 16, 1938, while being occupied and used by the Works Progress Administration: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MISSISSIPPI CENTRAL RAILROAD CO.

The Clerk called the bill (H. R. 3089) for the relief of Mississippi Central Railroad Co.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $10,750, to the Mississippi Central Railroad Co., of Hattiesburg, Miss., in full settlement of all claims against the United States as reimbursement for the death of C. L. Hensarling, sustained as a result of an accident at Camp Shelby, Miss., on June 2, 1943: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LEBANON WOOLEN MILLS, INC.

The Clerk called the bill (H. R. 3425) for the relief of Lebanon Woolen Mills, Inc.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the Lebanon Woolen Mills, Inc., of Lebanon, Tenn., the sum of $9,292.99, in full satisfaction of all claims of such company against the United States for remission of liquidated damages assessed against such company under the provisions of a contract with the United States, acting by the War Department, Quartermaster Corps, of date August 12, 1935, with execution completed on September 26, 1935, and the executed copy sent to the contractor on October 1, 1935, for manufacture and delivery of a quantity of blankets to the War Department: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. MARY H. OVERALL AND THOMAS I. BAKER

The Clerk called the bill (H. R. 3427) for the relief of Mrs. Mary H. Overall and Thomas I. Baker.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mrs. Mary H. Overall, Murfreesboro, Tenn., the sum of $1,500, and to Thomas I. Baker, Murfreesboro, Tenn., the sum of $1,500. The payment of such sum of $1,500 to the said Mrs. Mary H. Overall shall be in full settlement of all claims of the said Mrs. Mary H. Overall against the United States arising out of the loss of a barn and its contents as a result of fire caused by military personnel during Army maneuvers in Tennessee in 1944. The payment of such sum of $1,500 to the said Thomas I. Baker shall be in full settlement of all claims of the said Thomas I. Baker against the United States for the loss of a Fordson tractor which was in such barn at the time of the fire and damaged beyond repair: *Provided*, That no part of either of the sums appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney

on account of services rendered in connection with the claim settled by the payment of such sum, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

Page 1, line 6, strike out "$1,500" and insert "$1,280."

Page 1, line 8, strike out "$1,500" and insert "$1,280."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EDWIN OSGOOD COGAN ET AL.

The Clerk called the bill (H. R. 1929) for the relief of Edwin Osgood Cogan, his wife Helen Olga Cogan, and his daughter Isabel Joan Cogan.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws the Attorney General be, and he is hereby, authorized and directed to record the lawful admission for permanent residence of Edwin Osgood Cogan, his wife Helen Olga Cogan, and his daughter Isabel John Cogan, as of May 2, 1945, the date they were admitted temporarily to the United States. Upon the enactment of this act the Secretary of State shall instruct the proper quota-control officer to deduct two numbers from the Philippine quota of the first year that the Philippine quota is available and one number from the quota for India of the first year the said Indian quota is available.

With the following committee amendment:

Page 1, line 7, strike out "John" and insert "Joan."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JOSE CABRAL LORENZO

The Clerk called the bill (H. R. 2427) for the relief of Jose Cabral Lorenzo.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws the Attorney General is hereby authorized and directed to record the lawful admission for permanent residence of Jose Cabral Lorenzo, as of April 29, 1937, the date on which he was temporarily admitted to the United States, if he is found to be otherwise admissible under the provisions of the immigration laws other than the second class of section 3 of the act of February 5, 1917 (39 Stat. 875, U. S. C., title 8, sec. 136 (a)).

With the following committee amendment:

Page 2, after line 1, insert "Upon the enactment of this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the Spanish quota for the first year that the Spanish quota is available."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

OLIVE IRENE MILLOGLAV

The Clerk called the bill (H. R. 3968) for the relief of Olive Irene Milloglav.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, in the administration of the immigration laws relating to the issuance of immigration visas for admission to the United States, for permanent residence and relating to admission at ports of entry of aliens as immigrants for permanent residence in the United States, the provisions of section 3 of the Immigration Act of 1917 (39 Stat. 875), as amended (U. S. C., title 8, sec. 136 (c)), which exclude from admission into the United States persons who have been convicted of or admit having committed a felony, or other crime or misdemeanor involving moral turpitude, shall not hereafter be held to apply to Olive Irene Milloglav, who is the wife of George E. Milloglav, an American citizen and veteran of World War II, on account of an offense alleged to have been committed abroad while she was about 18 years of age during her legal infancy and prior to her marriage in Australia to George E. Milloglav. If she is found otherwise admissible under the immigration laws an immigration visa may be issued and admission granted to Olive Irene Milloglav under this act upon application hereafter filed.

With the following committee amendment:

Strike out all after the enacting clause and insert the following: "That, notwithstanding the provisions of the eleventh category of section 3 of the Immigration Act of 1917 (8 U. S. C. 136 (e)), Olive Irene Milloglav, the wife of a citizen of the United States who served honorably in the armed forces of the United States during World War II, may be admitted to the United States for permanent residence under the act approved December 28, 1945 (Public Law 271, 79th Cong.), if she is found otherwise admissible under the provisions of the immigration laws."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JACOB COHEN

The Clerk called the bill (H. R. 4443) for the relief of Jacob Cohen.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That for the purposes of the immigration and naturalization laws, the alien Jacob Cohen, San Francisco, Calif., a Rumanian national who entered the United States in September 1946, for a temporary stay (and whose son, Kurt Cohen, a naturalized citizen of the United States, died in France on February 6, 1945, as a result of wounds received in action while a member of the military forces of the United States) shall be held and considered to have been lawfully admitted to the United States for permanent residence, as of September 1, 1946. Upon the enactment of this act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the Rumanian quota for the first year that such quota is available.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EZRA BUTLER EDDY, JR., AND WIFE, MARIE CLAIRE LORD EDDY

The Clerk called the bill (H. R. 1915) for the relief of Ezra Butler Eddy, Jr., and wife, Marie Claire Lord Eddy.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the immigration and naturalization laws the Attorney General be, and he is hereby, authorized and directed to record the lawful admission for permanent residence of Ezra Butler Eddy, Jr., and his wife, Marie Claire Lord Eddy, as of February 3, 1945, the date upon which they were admitted temporarily to the United States.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JACOB A. JOHNSON

The Clerk called the bill (H. R. 332) for the relief of Jacob A. Johnson.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Jacob A. Johnson, of Kodiak, Alaska, the sum of $26,669, in full settlement of all claims against the Government of the United States for the loss of 235 fox pups in the year 1941, for the loss of 230 fox pups in the year 1942, for the loss of 77 fox pups in the year 1943, and for the loss of 84 fox pups in the year 1944, caused by the flight of United States Army and Navy airplanes over his fox farm located on Crooked Island approximately 2 miles from the city of Kodiak, Alaska: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

On page 1, line 6, after the words "sum of", strike out the balance of the line and all of lines 7 to 10, inclusive, and, on page 2, strike out lines 1 to 4, inclusive, and insert the following: "$15,103.94, in full settlement of all claims against the United States for losses heretofore sustained, or which may hereafter be sustained, by the said Jacob A. Johnson, on account of damages heretofore caused, or which may hereafter be caused, to his fox farm, located on Crooked Island, Alaska, by military, naval, and air force activity in that area."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

G. C. HEDRICK

The Clerk called the bill (H. R. 1733) for the relief of G. C. Hedrick.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $318.22, to G. C. Hedrick, of Beckley, W. Va., in full settlement of all claims against the United States, for property damage sustained as the result of a fire caused by a patient, Donald Benjamin Nichols, from the Veterans' Administration Hospital, Roanoke, Va., on March 21, 1945: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CANNON VALLEY MILLING CO.

The Clerk called the bill (H. R. 1780) for the relief of the Cannon Valley Milling Co.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the Cannon Valley Milling Co., Cannon Falls, Minn., the sum of $2,543.26. Such sum represents the amount paid by such company to the United States in settlement of a claim against such company made by the Office of Price Administration on account of certain sales by such company of mill feed at prices in excess of those permitted by Revised Maximum Price Regulation 173. Each such overcharge resulted solely from the fact that a shipment of mill feed was made by such company under a bill of lading taken in the name of such company, so that title remained in such company until the feed reached its point of destination, and, therefore, under the language of such regulation the selling price had to be computed on the basis of the sale taking place at such point. Such regulation was amended, effective January 29, 1945, to permit the use of such bill of lading without the necessity of computing the selling price on such basis. Following the promulgation of such amendment to Revised Maximum Price Regulation 173, suits against other feed mills for similar violations of such regulation were dismissed by the Office of Price Administration without payment of any settlement, thus leaving the said Cannon Valley Milling Co. in the position of being the only feed mill to suffer a penalty for such violations.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. MARTHA W. JOHNSON

The Clerk called the bill (H. R. 2136) for the relief of Mrs. Martha W. Johnson.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. DOLLIVER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

JOSEPH DESOUZA, JR.

The Clerk called the bill (H. R. 2433) for the relief of the legal guardian of Joseph DeSouza, Jr.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $15,000 to the legal guardian of Joseph DeSouza, Jr., of 630 Enloe Street, El Monte, Calif., formerly of Honolulu, T. H., in full settlement of all claims against the United States for personal injuries, and medical and hospital expenses incident thereto, sustained as the result of an accident involving a United States Army airplane on Billingham Boulevard, Honolulu, T. H., on June 8, 1944: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, line 1, strike out "Billingham" and insert "Dillingham."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BEN GRUNSTEIN

The Clerk called the bill (H. R. 4400) for the relief of Ben Grunstein.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Comptroller General of the United States is hereby authorized and directed to credit the account of Ben Grunstein, Hudson County, N. J., in the sum of $1,500, such sum being the balance of a judgment on a forfeited bail bond of Ruben Finn, on which Ben Grunstein was surety, which judgment in the sum of $2,500 was entered against the said Ben Grunstein in the United States District Court for the District of New Jersey, as of record December 6, 1940, and on which judgment the sum of $1,000 has already been paid to the United States. The said Ruben Finn was subsequently located and arrested in Houston, Tex., in January 1942, removed to the southern district of Indiana, where he pleaded guilty and was sentenced to a term of imprisonment for 3 years.

With the following committee amendments:

Page 1, strike out lines 3, 4, and 5 down to and including the word "of" in line 6, and insert "That there is hereby remitted the unpaid balance of $1,500 upon."

Page 2, line 3, after the words "United States", insert "and the United States Attorney is authorized and directed to enter satisfaction of the judgment."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. That completes the call of the Private Calendar.

EXTENSION OF REMARKS

Mr. DEVITT (at the request of Mr. KEATING) was given permission to extend his remarks in the RECORD and include an article.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the first bill on the Consent Calendar.

FILLING VACANCY IN OFFICE OF DISTRICT JUDGE

The Clerk called the bill (H. R. 1436) to repeal the prohibition against the filling of a vacancy in the office of district judge in the southern district of New York.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN, Mr. CHENOWETH, and Mr. ROCKWELL objected.

ESTABLISHING A FISH HATCHERY AT ROGERS CITY, MICH.

The Clerk called the bill (H. R. 210) to establish rearing ponds and a fish hatchery at or near Rogers City, Mich.

The SPEAKER. Is there objection to the present consideration of the bill.

Mr. KEAN, Mr. RICH, and Mr. BONNER objected.

ESTABLISHING A FISH HATCHERY AT ST. IGNACE, MICH.

The Clerk called the bill (H. R. 214) to establish rearing ponds and a fish hatchery at or near St. Ignace, Mich.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN, Mr. BARDEN, and Mr. DEANE objected.

FISH HATCHERY, CHARLEVOIX, MICH.

The Clerk called the bill (H. R. 215) to establish rearing ponds and a fish hatchery at or near Charlevoix, Mich.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN, Mr. DEANE, and Mr. BONNER objected.

UNITED STATES GEOLOGICAL SURVEY

The Clerk called the bill (H. R. 3106) to reenact and amend the Organic Act of the United States Geological Survey by incorporating therein substantive provisions confirming the exercise of long-continued duties and functions and by redefining their geographic scope.

Mr. KILDAY. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

SYNTHETIC LIQUID FUELS

The Clerk called the bill (H. R. 2161) to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil, shales, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190).

Mr. KEAN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

BRAINERD WAR DEAD NATIONAL MEMORIAL

The Clerk called the bill (H. R. 3614) to provide for the establishment of the Brainerd War Dead National Memorial.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. SMITH of Ohio, Mr. RICH, and Mr. BUCK objected.

INTERPARLIAMENTARY UNION

The Clerk called the bill (S. 1005) to amend the Act of June 28, 1935, entitled "An act to authorize participation by the United States in the Interparliamentary Union."

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. SMITH of Ohio. I object, Mr. Speaker.

Mr. SMITH of Wisconsin. Mr. Speaker, will the gentleman from Ohio withhold his objection for a moment? I should like to know why he objects.

Mr. SMITH of Ohio. The gentleman asks why I object. Because it is a waste of money.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. SMITH of Ohio. I object, Mr. Speaker.

The SPEAKER. Three objections are required.

There being no further objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 1, the act of June 28, 1935 (49 Stat. 425; 22 U. S. C. 276), is hereby amended to read as follows:

"An appropriation of $30,000 annually is hereby authorized, $15,000 of which shall be for the annual contribution of the United States toward the maintenance of the Bureau of the Interparliamentary Union for the promotion of international arbitration; and $15,000, or so much thereof as may be necessary, to assist in meeting the expenses of the American group of the Interparliamentary Union for each fiscal year for which an appropriation is made, such appropriation to be disbursed on vouchers to be approved by the President and the executive secretary of the American group."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PANAMA CANAL

The Clerk called the bill (H. R. 2273) to amend the act of May 29, 1944, providing for the recognition of the services of the civilian officials and employees, citizens of the United States, engaged in and about the construction of the Panama Canal.

Mr. KEAN. Mr. Speaker, I understand a rule has been requested on this bill. Therefore, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

MISSISSIPPI RIVER PARKWAY

The Clerk called the bill (H. R. 1710) to authorize the survey of a proposed Mississippi River Parkway for the purpose of determining the feasibility of such a national parkway, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. RICH, Mr. KEAN, Mr. SMITH of Ohio, and Mr. CHENOWETH objected.

PARKER RIVER NATIONAL WILDLIFE REFUGE

The Clerk called the bill (H. R. 4108) to reduce in area the Parker River National Wildlife Refuge in Essex County, Mass., and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN, Mr. BONNER, Mr. DEANE, Mr. CHADWICK, and Mr. HUGH D. SCOTT, JR., objected.

RETIREMENT OF REGULAR ARMY PERSONNEL

The Clerk called the bill (H. R. 2744) to provide for the selection for elimination and retirement of officers of the Regular Army, for the equalization of retirement benefits for members of the Army of the United States, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, I understand a rule has been requested on this bill. Therefore, I object.

Mr. CHENOWETH. I object, Mr. Speaker.

Mr. ROCKWELL. I object, Mr. Speaker.

PUBLIC AIRPORT IN ALASKA

The Clerk called the bill (H. R. 3510) to authorize the construction, protection, operation, and maintenance of a public airport in the Territory of Alaska.

Mr. KEAN. Mr. Speaker, a rule has been requested on this bill. Therefore, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AIRPORT FOR CITY OF FAIRBANKS, ALASKA

The Clerk called the bill (H. R. 3509) to authorize the construction of a class IV airport for the city of Fairbanks, Alaska, and a public highway or bridge from the city of Fairbanks to the location of the airport.

Mr. KEAN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice. A rule has been requested on this bill.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

TORNEY HOSPITAL, PALM SPRINGS, CALIF.

The Clerk called the next business, House Concurrent Resolution 57 regarding disposal of Torney Hospital property in Palm Springs, Riverside County, Calif.

Mr. KEAN. Mr. Speaker, I ask unanimous consent that the concurrent resolution be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AMENDING PUBLIC HEALTH SERVICE ACT

The Clerk called the bill (H. R. 3924) to amend the Public Health Service Act in regard to certain matters of personnel and administration, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. SMITH of Ohio. Mr. Speaker, reserving the right to object, I think we ought to have an explanation of this bill.

Mr. DOLLIVER. Mr. Speaker, the gentleman from Ohio has asked for an explanation of the bill. The bill is rather technical. It is designed to amend the Public Health Service Act to bring it into conformity with the promotion and classification bill which was passed with respect to the Army in the first session of the Eightieth Congress.

The gentleman will perhaps recall that we had a very lengthy debate on that bill to set up the classifications in the Army and the number of officers and grades and so forth. From the very beginning the Public Health Service has conformed with respect to its classifications with the classifications in the medical service of the Army. That is what this bill is designed to do.

Mr. SMITH of Ohio. The bill deals with nothing except classifications?

Mr. DOLLIVER. That is correct, generally speaking. There is a provision that the Public Health Service can put certain people in schools for further training. That is a very minor matter.

I am informed by the Service that they estimate the cost the first year will be $275,000 and following that the cost will be $75,000 per year. I might say that this bill is a bill of the Public Health Service and if passed I shall ask unanimous consent that a Senate bill which was passed yesterday be substituted for the House bill.

Mr. WALTER. Mr. Speaker, reserving the right to object, was the Senate bill debated?

Mr. DOLLIVER. Yes; I understand it was. I was not present, but I am so informed.

Mr. WALTER. Does not the gentleman feel that this matter is of sufficient importance to consider it on another calendar?

Mr. DOLLIVER. The gentleman asks my opinion on that. I feel it has been given very thorough study by the Committee on Interstate and Foreign Commerce. It is a good bill and really should not take the time of the entire House because it is noncontroversial.

Mr. HUGH D. SCOTT, JR. Mr. Speaker, if the gentleman will yield, I would like to point out what the gentleman has already said that the bill has been extremely carefully considered already and has had the closest attention of the Committee on Interstate and Foreign Commerce.

Mr. JUDD. Mr. Speaker, I have been trying to get a copy of this bill because it was called to my attention this morning. In the absence of a copy of it, I

ask unanimous consent that the bill be passed over without prejudice. I have been trying to get it for 20 minutes and I cannot get one.

Mr. DOLLIVER. May I ask the gentleman to withhold his request. Our committee tried to get this bill before the House last summer but due to the exigencies of time, it was impossible to do so. Surely the gentleman has some confidence in the committee that considered this bill.

I assure the gentleman from Minnesota that it is not controversial in nature and ought to be passed for the benefit of this very important service of our Government. Of course, we cannot control the gentleman. I recognize that.

Mr. JUDD. Mr. Speaker, much as I regret to be in divergence with my esteemed colleague, I have to ask unanimous consent that the bill go over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

RATING FOR SERVICE-CONNECTED ARRESTED TUBERCULOSIS

The Clerk called the bill (H. R. 4243) to provide minimum ratings for service-connected arrested tuberculosis.

Mr. KEAN, Mr. CHENOWETH, and Mr. ROCKWELL objected.

DEATH-PENSION BENEFITS TO WIDOWS AND CHILDREN OF VETERANS

The Clerk called the bill (H. R. 4242) to amend the income limitation governing the granting of pension to veterans and death-pension benefits to widows and children of veterans, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. For the same reason, Mr. Speaker, I object.

Mr. CHENOWETH and Mr. ROCKWELL objected, and the bill was stricken from the calendar.

SERVICEMEN'S READJUSTMENT ACT, 1944

The Clerk called the bill (H. R. 4309) to amend title III of the Servicemen's Readjustment Act of 1944 (GI bill of rights) pertaining to "loans for the purchase or construction of homes, farms, and business property," so as to provide more adequate and effective farm-loan benefits.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. PACE. Mr. Speaker, reserving the right to object, I would like to state that this bill is identical, practically word for word, with present law. We now have a law making farm loans to veterans, administered by the Farm Loan Administration. A reading of the bill shows that this bill was taken almost identically from present law. All it does is to set up a similar program under the Farm Credit Administration. We would therefore be faced with two identical laws, doing identically the same thing, one under the Farm Loan Administration and the other under the Farm Credit Administration.

Not only that, but it involves many millions of dollars. Therefore, I object to the bill.

The SPEAKER. The Clerk will call the next bill.

Mr. PACE. I wanted the bill stricken from the calendar, Mr. Speaker. I objected to its consideration.

The SPEAKER. The bill cannot be stricken from the calendar until 2 weeks from today when three objections are required. It will be called again in 2 weeks; and then, if there are three objections, it will be stricken from the calendar.

The Clerk will call the next bill.

AUTHORITY TO SEND MILITARY AND NAVAL MISSIONS TO FOREIGN GOVERNMENTS

The Clerk called the bill (H. R. 2313) to amend the act of May 19, 1926 (44 Stat. 565), as amended by the acts of May 14, 1935 (49 Stat. 218), and of October 1, 1942 (56 Stat. 763), providing for the detail of United States military and naval missions to foreign governments.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. FOLGER. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

Mr. ANDREWS of New York. Mr. Speaker, reserving the right to object, it is my understanding that the gentleman from Georgia [Mr. VINSON] and the gentleman from Texas [Mr. RAYBURN] had spoken to the gentleman and that he had agreed to an amendment which we will offer as a committee amendment to this bill.

Mr. FOLGER. Mr. Speaker, there is some misunderstanding about that. The gentleman from Georgia [Mr. VINSON] asked me if I had objection to it upon the ground that it might permit combatant forces, and I said, "Yes; that is an objection to it"; and he said they expected to amend it. I do not know anything about it.

Mr. ANDREWS of New York. The committee amendment is on the desk. Will the gentleman withhold his request until he hears the amendment?

Mr. FOLGER. I would not want to pass upon that amendment right now.

Mr. SHORT. Mr. Speaker, will the gentleman yield?

Mr. FOLGER. I yield.

Mr. SHORT. I trust the gentleman from North Carolina will not press his request that it be passed over. When this bill was first presented to our Committee on Armed Services, I was strongly inclined to oppose it, but after further hearings and more mature deliberation, the bill was unanimously reported by our committee. Especially since I have had the privilege of visiting our military and naval missions in some of the foreign countries, I am convinced that this legislation is quite necessary at this time to protect our interests.

Mr. VINSON. Mr. Speaker, will the gentleman yield?

Mr. SHORT. I yield.

Mr. FOLGER. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

Mr. VINSON. Mr. Speaker, I object.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. FOLGER. Mr. Speaker, I object.

RESERVE OFFICERS' TRAINING CORPS

The Clerk called the bill (H. R. 4143) to provide for the effective operation and expansion of the Reserve Officers' Training Corps, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, at the request of the author of the bill, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

REGIONAL AGRICULTURAL CREDIT CORPORATION OF WASHINGTON, D. C.

The Clerk called House Joint Resolution 275, to authorize the Regional Agricultural Credit Corporation of Washington, D. C., to make loans to fur farmers, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. KEAN. Mr. Speaker, I understand that a rule has been requested on this bill. I therefore ask unanimous consent that the bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

RESERVED MINERAL INTERESTS

The Clerk called the bill (H. R. 4856) to delay the liquidation of mineral interests reserved to the United States, as required by the Farmers' Home Administration Act of 1946, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That, notwithstanding any other provision of law, no mineral interests reserved to the United States which are required to be liquidated under the terms of the Farmers' Home Administration Act of 1946 shall be sold by the Secretary of Agriculture or transferred by him to appropriate agencies of the United States for disposition as surplus property of the United States until hereafter authorized by law.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING PURCHASE OF POST-OFFICE SITE AT OMAHA, NEBR.

The Clerk called the bill (H. R. 4836) to authorize the purchase of a new post-office site at Omaha, Nebr.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Federal Works Administrator is authorized and directed to acquire by purchase, condemnation, or otherwise, a suitable site in Omaha, Nebr., for the purpose of erecting thereon a building for the use and accommodation of the United States post office at Omaha.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ACQUISITION OF SITE FOR NEW FEDERAL BUILDING IN HUNTINGTON, W. VA.

The Clerk called the bill (H. R. 3506) to provide for the acquisition of a site for a new Federal building in Huntington, W. Va., adjoining existing Federal buildings there, as an economy measure, before land values have increased as a result of improvements.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Federal Works Administrator is authorized and directed to acquire, by purchase, condemnation, or otherwise, a plot of land 200 feet long and 90 feet wide, together with all improvements thereon, situated at the southeast corner of Fifth Avenue and Eighth Street, in the city of Huntington, W. Va., for use as a site for the erection of a new Federal building. Such plot of land is more particularly described as follows:

Beginning at a point where the south line of Fifth Avenue intersects with the east line of Eighth Street; thence along the line of Eighth Street 200 feet to an alley; thence in an easterly direction and with the north line of said alley to a point; thence in a northerly direction and parallel with the line of Eighth Street 200 feet to a point in the south line of Fifth Avenue; thence in a westerly direction and with the south line of Fifth Avenue 90 feet to the place of beginning.

With the following committee amendments:

Page 1, line 5, after the word "land", insert the word "approximately."

Page 1, line 6, after the word "and", insert the word "approximately."

Page 2, line 6, after the word "Street", insert the word "approximately."

Page 2, line 9, after the word "Street", insert the word "approximately."

Page 2, line 12, after the word "Avenue", insert the word "approximately."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NEW POSTAL BUILDING IN PORTLAND, OREG.

The Clerk called the bill (H. R. 4967) to provide for the acquisition of a site and preparation of plans and specifications for a new postal building and for remodeling of the existing main post-office building in Portland, Oreg., and for other purposes.

There being no objection the Clerk read the bill, as follows:

Be it enacted, etc., That the Federal Works Administrator is authorized and directed to acquire by purchase, condemnation, or otherwise, a suitable site in Portland, Oreg., and to prepare or cause to be prepared plans and specifications for a new building to be located on such site and for the remodeling of the existing main post office all to provide additional postal facilities in said city. The cost of such plans and specifications and the acquisition of the site shall not exceed $300,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

RESTORATION OF THE FRIGATE "CONSTELLATION"

The Clerk called the bill (H. R. 4505) to provide for the preservation of the frigate *Constellation* and to authorize the disposition of certain replaced parts of such vessel as souvenirs, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. KEAN. Mr. Speaker, I ask unanimous consent that a similar Senate bill (S. 1796) to provide for the preservation of the frigate *Constellation* and to authorize the disposition of certain replaced parts of such vessel as souvenirs, and for other purposes, be considered in lieu of the House bill.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the present consideration of the Senate bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Navy is hereby authorized to repair, equip, and restore the frigate *Constellation,* as far as may be practicable, to her original condition, but not for active service, and to accept and use any donations or contributions which may be offered for the aforesaid purpose. All costs of repairing, equipping, and restoring such frigate, other than the pay and allowances of naval officers and enlisted men engaged in such work, shall be defrayed from a fund consisting of such donations or contributions and the net proceeds of the sales made pursuant to section 2 of this act.

SEC. 2. The Secretary of the Navy is hereby further authorized to give or to sell, under such regulations as he may prescribe, such parts or pieces, including rigging, of the frigate *Constellation,* as are suitable for use as relics, souvenirs, or mementos, and which cannot profitably or advantageously be used in restoring this vessel to original condition, to clubs, associations, or individuals making donations or contributions for the restoration of the frigate *Constellation.* The cost of converting the aforesaid material into relics, souvenirs, or mementos shall be charged against, and the proceeds of such sales shall be added to, the fund created by authority of this act.

Mr. ANDREWS of New York. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDREWS of New York: Strike out all after the enacting clause and insert the provisions of the House bill as follows: "That the Secretary of the Navy is hereby authorized to repair, equip, and restore the frigate *Constellation,* as far as may be practicable, to her original condition, but not for active service, and to accept and use any donations or contributions which may be offered for the aforesaid purpose.

"SEC. 2. The Secretary of the Navy is hereby further authorized to give or to sell, under such regulations as he may prescribe, such parts or pieces, including rigging, of the frigate *Constellation,* as are suitable for use as relics, souvenirs, or mementos, and which cannot profitably or advantageously be used in restoring this vessel to original condition, to clubs, associations, or individuals making donations or contributions for the restoration of the frigate *Constellation.* The cost of converting the aforesaid material into relics, souvenirs, or mementos shall be charged against, and the proceeds of such sales shall be added to, the fund created by authority of this act."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H. R. 4505) was laid on the table.

EXTENDING PERIOD OF VALIDITY OF THE ACT TO FACILITATE THE ADMISSION INTO THE UNITED STATES OF ALIEN FIANCÉES OR FIANCÉS OF MEMBERS OF THE ARMED FORCES OF THE UNITED STATES

The Clerk called the bill (H. R. 4838) to extend the period of validity of the act to facilitate the admission into the United States of the alien fiancées or fiancés of members of the armed forces of the United States.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. JAVITS. Mr. Speaker, reserving the right to object, I conferred with the author of this bill and there is a serious question with respect to the admission of German fiancées who are now being admitted on a permanent visa, so there is no check as to whether they are actually married.

Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New York?

Mr. MARCANTONIO. Mr. Speaker, reserving the right to object, this bill is very necessary to the welfare of ex-GI's. Their fiancées are being taken to Ellis Island when they come in and I do not think the gentleman should take it out on the GI's.

Mr. JAVITS. Mr. Speaker, will the gentleman yield?

Mr. MARCANTONIO. I yield to the gentleman from New York.

Mr. JAVITS. I investigated this matter in Germany. There is a section in the bill now which says that the visas shall be issued for 90 days in the event that the quota of the particular country from which the fiancée comes is oversubscribed; therefore, when the girl comes here and does not marry she may be sent back after 90 days. That does not apply where the quota is not oversubscribed. The German quota is not oversubscribed. As I stated, I investigated this personally. Quite a few hundred visas have been issued to German girls, but they are permanent visas. They have come over here. There is no check-up as to whether or not they have actually married and the thing has become subject to much abuse. The only thing that is needed is to amend the bill to strike out that particular provision which brings about this condition. It will not affect the matter that the gentleman wants to accomplish and what I want to accomplish; that is, the admission of these fiancées only for purposes of marriage to Americans.

Mr. MARCANTONIO. May I say to the gentleman that what he has pointed out may be cured administratively.

Mr. JAVITS. I have taken it up with the State Department and I am advised it cannot be cured administratively. It is right in the law.

Mr. MARCANTONIO. These girls to whom you refer come in under a quota which has not been exhausted. That is a matter for the American consul to administer. As to those other girls who come in here as fiancées of GI's and do not marry the GI's, they are sent right back. What is happening now to bona fide fiancées of ex-servicemen? They are being taken to Ellis Island and detained there. They are released only on bond.

These are fiancées of GI's, the men who served over there and who met these girls over there. Therefore, I do not think that the gentleman should hold up the passage of this bill especially when he has an opportunity to offer an amendment to correct the situation to which he objects. If consideration of the bill is not objected to, the gentleman can offer an amendment to cure the situation he describes. Otherwise, by objecting he is doing a tremendous injury to these ex-servicemen.

Mr. JAVITS. The gentleman will do a great injury if this bill is passed in this form.

The SPEAKER. Is there objection to the request of the gentleman from New York?

Mr. MARCANTONIO. Mr. Speaker, I object to the bill being passed over.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. JAVITS. Mr. Speaker, I object.

BASIC AUTHORITY FOR CERTAIN FUNCTIONS AND ACTIVITIES OF THE WEATHER BUREAU

The Clerk called the bill (H. R. 4426) to provide basic authority for certain functions and activities of the Weather Bureau, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That appropriations now or hereafter provided for the Weather Bureau shall be available for (a) furnishing food and shelter, without repayment therefor, to employees of the Government assigned to Arctic stations; (b) equipment and maintenance of meteorological offices and stations, and maintenance and operation of meteorological facilities outside the United States by contract or otherwise; (c) repairing, altering, and improving of buildings occupied by the Bureau, and care and preservation of grounds, including the construction of necessary outbuildings and sidewalks on public streets abutting Weather Bureau grounds; and (d) arranging for communication services at rates to be fixed by the Secretary of Commerce by agreement with the companies performing the services when determined to be advantageous to the Government.

SEC. 2. When so specified in appropriation acts, the Weather Bureau is authorized to (a) make contribution of the United States share of the cost of the Office of the Secretariat of the International Meteorological Committee; and (b) maintain a printing office in the city of Washington for the printing of weather maps, bulletins, circulars, forms, and other publications: *Provided*, That no printing shall be done by the Weather Bureau which could be done at the Government Printing Office without impairing the service of said Bureau.

SEC. 3. The Weather Bureau is hereby authorized to (a) grant extra compensation to employees of other Government agencies for taking and transmitting meteorological observations, and (b) appoint employees for the conduct of meteorological investigations in the Arctic region without regard to the civil-service and classification laws and titles II and III of the Federal Employees Pay Act of 1945, both at base rates which shall not exceed such maximum rates as may be specified from time to time in the appropriation concerned.

SEC. 4. Subject to approval of the Bureau of the Budget, and without charge to the Weather Bureau, the Secretary of War and the Secretary of the Navy are authorized to transfer to the Weather Bureau (a) equipment and supplies for upper air soundings, and (b) equipment and supplies which are surplus to the needs of the War or Navy Department and necessary for the establishment, maintenance, and operation of Arctic weather stations.

With the following committee amendments:

Page 2, line 2, strike out "and", and in line 6 before the period insert the following: "; and (e) purchasing tabulating cards and continuous form tabulating paper."

Page 2, line 8, strike out the following: "(a) make contribution of the United States share of the cost of the Office of the Secretariat of the International Meteorological Committee; and (b)."

Page 3, line 5, strike out "war" and insert in lieu thereof "the Army, the Secretary of the Air Force."

Page 3, line 6, strike out "(a) equipment and supplies for upper air soundings, and (b)."

Page 3, line 8, strike out "the War or Navy Department" and insert in lieu thereof "their respective Departments.".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JEFFERSONVILLE FLOOD-CONTROL DISTRICT, INDIANA

The Clerk called the bill (H. R. 2000) for the relief of Jeffersonville Flood-Control District, Jeffersonville, Ind., a municipal corporation.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That upon written notice from the Secretary of the Navy that the Jeffersonville Flood-Control District has complied with the provisions of section 2 of this act, the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Jeffersonville Flood-Control District, Jeffersonville, Ind., a municipal corporation, the sum of $53,099.56. Such sum represents the cost of acquiring an alternate right-of-way for the construction of flood-protection works, the original right-of-way acquired by such district having been taken by the United States for the use of the Department of the Navy, and the Department of the Navy having imposed restrictions making it impossible to construct flood-protection works upon a right-of-way which, pursuant to a stipulation, the Department of the Navy agreed to convey to such district as compensation for the right-of-way taken by the United States. The payment of such sum to such district shall be in full settlement of all claims of such district against the United States on account of complying with the provisions of section 2 of this act and on account of the taking of such original right-of-way by the United States in proceedings in the United States District Court for the Southern District of Indiana, New Albany Division, entitled "United States of America against 27.02 acres of land, in Jeffersonville, Clark County, Ind., Howard Shipyards & Dock Co. et al., Civil No. 80," and entitled "United States of America against 15.77 acres of land, more or less, in Jeffersonville, Clark County, Ind., Dollie Hoffman et al., Civil No. 92."

SEC. 2. The Secretary of the Navy shall give written notice to the Secretary of the Treasury that the Jeffersonville Flood-Control District has complied with the provisions of this section whenever such district has, in such manner as is satisfactory to the Secretary of the Navy, conveyed to the United States all right, title, and interest which it may have in and to the naval property in Jeffersonville, Clark County, Ind., particularly described in a proposed grant of easement signed on the 13th day of August 1943, by which the United States proposed to grant and convey to Jeffersonville Flood-Control Commission, Jeffersonville, Ind., its successors and assigns, a perpetual easement to construct, operate, and maintain, a flood-protective system on the two sections of naval property described in such proposed grant of easement.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

BACK COPIES OF UNITED STATES PATENTS TO PUBLIC LIBRARIES

The Clerk called the bill (H. R. 3366) to amend section 4934 of the Revised Statutes (U. S. C., title 35, sec. 78), as amended, to permit public libraries of the United States to acquire back copies of United States letters patent, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 4934 of the Revised Statutes, as amended (U. S. C., title 35, sec. 78), be amended by changing the period at the end of paragraph 9 to a colon and adding the following: *"Provided further*, That the Commissioner of Patents may supply such copies for $50 per annum to any public library that has failed to pay such amount for any one or more years on the payment of such fee for said year or years."

With the following committee amendment:

Page 1, line 8, after the word "library", insert "approved by the Commissioner."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMEND IMMIGRATION LAWS

The Clerk called the bill (H. R. 1878) to amend the immigration laws to deny admission to the United States of persons who may be coming here for the purpose of engaging in activities which will endanger the public safety of the United States.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. HUGH D. SCOTT, JR. Mr. Speaker, reserving the right to object, may we have an explanation of the bill?

Mr. FELLOWS. As the law stands today, as soon as anybody passes the consular agent overseas, he comes in permanently. This gives the Attorney General the right to check up on the application and things that come up after that.

Mr. HUGH D. SCOTT, JR. Does the Attorney General have to make any ac-

counting or any public explanation of his reasons for refusing?

Mr. FELLOWS. Of course, the Attorney General has a record, but this gives the Attorney General a chance to check on the actions overseas by the consul or the consular agent who have passed this man in the first instance. As it stands now, if he is passed by them, no matter what the situation was, he is in here permanently, and the Department of Justice has nothing to say about it.

Mr. HUGH D. SCOTT, JR. The gentleman is satisfied then that this act has no effect such as to give the Justice Department any superpowers or opportunity to abuse his present powers.

Mr. FELLOWS. No; except if he finds something has been overlooked, or if he finds that this man is not the man who should come in, he still has the power to say no. As it stands today, he has to sit by and let him come in.

Mr. HUGH D. SCOTT, JR. I withdraw my reservation of objection, Mr. Speaker.

Mr. KLEIN. Mr. Speaker, further reserving the right to object, may I ask the chairman of the subcommittee, the gentleman from Maine [Mr. FELLOWS], does this bill require the Attorney General to give his reasons for the exclusion?

Mr. FELLOWS. I do not have a copy of the bill before me.

Mr. CASE of South Dakota. Mr. Speaker, will the gentleman yield?

Mr. FELLOWS. I yield to the gentleman from South Dakota.

Mr. CASE of South Dakota. The bill proposes to amend the act by adding to the subparagraph which says "aliens who are anarchists" these words: "or persons who the Attorney General knows or has reason to believe seek to enter the United States for the purpose of engaging in activities which will endanger the public safety of the United States."

As for me, I think it is much better to prevent these people coming in than to let them in and have the Attorney General try to get them out, like Harry Bridges.

Mr. KLEIN. That is true, but I would like to repeat my question: Does the gentleman know whether administratively the Attorney General must give his reasons for excluding these people from entering the country?

Mr. FELLOWS. I do not think he needs to give his reasons.

Mr. KLEIN. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That section 3 of the act of February 5, 1917 (39 Stat. 875), as amended, is further amended by inserting the following clause before the clause, "anarchists, or persons who believe in or advocate the overthrow by force or violence of the Government of the United States, or of all forms of law, or who disbelieve in or are opposed to organized government, or who advocate the assassination of public officials or who advocate or teach the unlawful destruction of property;": "persons who the Attorney General knows or has reason to believe seek to enter the United States for the purpose of engaging in activities which will endanger the public safety of the United States."

With the following committee amendment:

Strike out all after the enacting clause, and insert "That section 1 (a) of the act of October 16, 1918, as amended (40 Stat. 1012; 41 Stat. 1008–9; 54 Stat. 673; 8 U. S. C., 137), is further amended by inserting the following clause immediately after the clause 'Aliens who are anarchists;': 'or persons who the Attorney General knows or has reason to believe seek to enter the United States for the purpose of engaging in activities which will endanger the public safety of the United States.'"

The committee amendment was agreed to.

The bill was ordered to be engrossd and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REQUESTING INFORMATION FROM THE SECRETARY OF THE INTERIOR

The Clerk called the resolution (H. Res. 385) requesting information from the Secretary of the Interior concerning fuel oil, gasoline, petroleum products, and coal, and what steps the Government should take to make the proper and necessary supply available.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. KEAN. I object, Mr. Speaker.

AUTHORITY FOR COMMERCE DEPARTMENT ACTIVITIES

The Clerk called the bill (H. R. 4427) to provide basic authority for the performance of certain functions and activities of the Department of Commerce, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That appropriations now or hereafter provided for the Department of Commerce shall be available for—

(a) furnishing to employees of the Department of Commerce and other Federal agencies (including military and naval personnel), and their dependents, in Alaska and other points outside continental United States, free emergency medical services by contract or otherwise and free emergency medical supplies, where in the judgment of the Secretary furnishing of such supplies and services is necessary;

(b) purchasing, transporting, storing, and distributing food and other subsistence supplies for resale to employees of the Department of Commerce and other Federal agencies (including military and naval personnel), and their dependents, in Alaska and other points outside the continental United States at a reasonable value as determined by the Secretary of Commerce, the proceeds from such resales to be credited to the appropriation from which the expenditure was made: *Provided*, That a report of such transactions shall be made to Congress annually showing the total expenditures made for such supplies and the total proceeds from such resales;

(c) establishment, maintenance, and operation of messing facilities, in Alaska and other points outside the continental United States where suitable family facilities are not available, such service to be furnished to employees of the Department of Commerce and other Federal agencies (including military and naval personnel), and their dependents, in accordance with regulations established by the Secretary of Commerce, and at a reasonable value determined in accordance therewith, the proceeds from the furnishing of such services to be credited to the appropriation from which the expenditures are made: *Provided*, That a report of such transactions shall be made to Congress annually showing the total expenditures made for such services and the total proceeds therefrom;

(d) reimbursement, under regulations prescribed by the Secretary, of officers and employees in or under the Department of Commerce, for food, clothing, medicines, and other supplies furnished by them for the temporary relief of distressed persons in remote localities;

(e) providing motion-picture equipment and film for recreation of crews of vessels, for recreation of employees in remote localities where such facilities are not available, and for training purposes;

(f) erecting, altering, repairing, equipping, furnishing, and maintaining, such living and working quarters and other public improvements as may be necessary to carry out its authorized work at remote localities not on foreign soil where such living and working accommodations are not otherwise available: *Provided*, That the National Bureau of Standards is hereby authorized to perform the functions listed in this subsection without regard to the limitation concerning foreign soil when establishing and maintaining ionosphere observation stations.

With the following committee amendments:

Page 1, lines 3 and 4, strike out "now or hereafter provided for the Department of Commerce shall be available for—" and insert "are hereby authorized for the following activities of the Department of Commerce."

Page 1, lines 6 and 7, strike out "military and naval personnel" and insert "Army, Navy, and Air Force personnel where Army, Navy, or Air Force facilities or supplies are not available and upon request of the service concerned."

Page 1, line 8, after "outside", insert "the."

Page 2, line 3, after "(b)", insert "when deemed necessary by the Secretary of Commerce."

Page 2, lines 6 and 7, strike out "military and naval personnel" and insert "Army, Navy, and Air Force personnel where Army, Navy, or Air Force facilities or supplies are not available and upon request of the service concerned."

Page 2, line 16, after "(c)", insert "when deemed necessary by the Secretary of Commerce."

Page 2, line 17, after "facilities", insert ", by contract or otherwise."

Page 2, line 21, strike out "military and naval personnel" and insert "Army, Navy, and Air Force personnel where Army, Navy, or Air Force facilities are not available and upon request of the service concerned."

Page 3, line 9, after "them", insert "in emergencies."

Page 3, line 12, after "vessels" and before the comma, insert "of the Coast and Geodetic Survey."

Page 3, line 16, after "maintaining", insert ", by contract or otherwise."

Page 3, line 17, strike out "other public improvements" and insert "facilities."

Page 3, lines 18 and 19, strike out "not on foreign soil"; and strike out beginning with the colon in line 20 down through "stations", in line 25.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ADMISSION OF ALIEN FIANCÉES OR FIANCÉS

Mr. WALTER. Mr. Speaker, I ask unanimous consent to return for immediate consideration to Consent Calendar No. 392, the bill (H. R. 4838) to extend the period of validity of the act to facilitate the admission into the United States of the alien fiancées or fiancés of members of the armed forces of the United States.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the authority conferred upon the Secretary of State and the Attorney General under the provisions of the act approved June 29, 1946 (60 Stat. 339), shall be extended to June 30, 1948, midnight.

With the following committee amendments:

Page 1, line 6, strike out "June 30" and insert "December 31."

Line 7, insert the following: "Sec. 2. This Act shall be regarded as having become effective from and after December 31, 1947."

The committee amendments were agreed to.

Mr. JAVITS. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JAVITS: On page 1, after line 8, insert the following:

"SEC. 3. That subsection (b) of section 1 of the act approved June 29, 1946 (60 Stat. 339) is hereby repealed."

Mr. RANKIN. Mr. Speaker, a point of order.

The SPEAKER. The gentleman will state it.

Mr. RANKIN. Mr. Speaker, I make the point of order that an amendment to repeal a provision of permanent law is not in order unless the provision of the law is stated. It is a violation of the Ramseyer rule and of all the other rules of the House I know anything about. We are supposed to know what we are repealing when we vote on anything. Therefore, I make the point of order that the amendment is not in order.

The SPEAKER. The point of order made by the gentleman from Mississippi is not good, because the Ramseyer rule does not apply to amendments offered on the floor.

Mr. RANKIN. Mr. Speaker, I make the further point of order that it is out of order to offer an amendment to repeal a section of law without including that section of law to let the House know what it is we are trying to repeal, and I should like to be heard on the point of order.

The SPEAKER. The Chair will hear the gentleman from Mississippi on the point of order.

Mr. RANKIN. If I am wrong, then we might repeal any law in the statute books without the Congress even knowing what they are voting on. I do not know what we are being asked to vote on, and I daresay that 99 percent of the membership of the House do not know. I submit this is going far afield from what I understand the rules of the House to be, to permit a Member to offer an amendment repealing a provision of law which now exists on the statute books without including the provisions of that law in his amendment.

The SPEAKER. The amendment is in order provided it is germane to the subject matter under consideration.

Mr. RANKIN. I understand, Mr. Speaker, but a Member has no right to offer an amendment unless he states the provision of law that he is trying to repeal. If such procedure is followed, we will have the entire House voting on the repeal of a provision after 5 minutes debate on each side when 99 percent of the membership do not know what it contains. If we are to establish that precedent, Mr. Speaker, then from this time on, in this way, we might repeal any law on the statute books without any discussion and without the provision being read, and without the membership of the House knowing what they are voting on.

The SPEAKER. The Chair reminds the gentleman from Mississippi that a Member is entirely within his rights in offering an amendment as long as his amendment is germane. Of course, such an amendment would not be germane if it repealed a provision of law which was not being considered in the pending bill. As long as the amendment is germane the Chair holds that it is in order.

Mr. RANKIN. Mr. Speaker, I do not question the germaneness of the amendment provided it contains the provision of law which it attempts to repeal; but for a Member to rise and offer an amendment repealing a certain section of the law without including it in the amendment and without letting the House know what it is, I submit is certainly poor policy, and in my opinion, is subject to a point of order.

The SPEAKER. The Chair holds that the amendment is not subject to the point of order on the grounds that the gentleman from Mississippi has advanced.

Mr. MILLER of Nebraska. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MILLER of Nebraska. Mr. Speaker, would it be in order to have the section read which the gentleman proposes to repeal? I would like to have it read, because I note that he is proposing to repeal a certain section of law which I understand has been in full force and effect since 1929.

The SPEAKER. Of course, the gentleman from New York has the floor and he can read it in his own time.

Mr. JAVITS. Mr. Speaker, the section which is proposed to be deleted from this act which it is proposed to extend, which as we all know is an act to permit fiancées to come into the United States free of any quota restrictions if they have actually been engaged to a member of the armed forces and are coming here for the purpose of marriage, is one of the provisos which conditions the use of this whole statute. Those provisos are three, and the particular one which I am proposing by my amendment to delete, which incidentally has been consented to by the author of the bill, the gentleman from Rhode Island [Mr. FORAND] and by the gentleman with whom I had the discussion when the bill was up on the Consent Calendar, reads as follows:

The nonpreference portion of that quota to which the alien would be chargeable is exhausted at the time the alien applies for a visa.

What that means is that under the provisions of this particular statute heretofore when the fiancée applied for a visa, she got the temporary 90-day visa provided for in the act only if the regular quota of the country of which she was a national had actually become oversubscribed. Where that quota was not oversubscribed, therefore, the Department of State said that it must give her a visa under the regular quota of that country because it had not been oversubscribed. What happened in the case of girls who were German nationals was that these fiancées were preferred above other German nationals, and above nationals of countries which were our allies, not our enemies, and who could not get regular visas but came over to this country under a 90-day temporary basis and could be sent back if they did not marry. The German fiancées, however, went into the mainstream of American life and remained permanent residents here whether or not they married. Hence the statute was being abused. When I consulted with consul after consul in Germany, it was clear that the statute was subject to abuse and that frauleins could just make these arrangements for the purpose of coming into the United States without any intention whatever of marrying when they got here. By my amendment, with the proviso out, the State Department advised me that they would give only a 90-day visa to all fiancées regardless of what country they are nationals of and whether or not the quota of that country is open or is actually oversubscribed. The whole purpose of my amendment is simply to avoid the misuse of this law for purposes for which it was never intended.

Mr. CELLER. Mr. Speaker, will the gentleman yield?

Mr. JAVITS. I yield.

Mr. CELLER. The gentleman of course probably did not go so far in his investigation to know that any German, whether he or she is engaged to be married or not, if she can get out of Germany and go to Zurich or London or Paris where there is an American consul, he or she can get a visa and come in under the German quota whether she marries or not.

Mr. JAVITS. The fact is that I recollect, in our Munich consulate an important part of all visas granted were these to German fiancées. I was told that regular visas were being granted to these German fiancées and that others who were to get visas were being held up because the work of the consulate was so taken up with granting these general visas to these German girls.

Mr. CELLER. Mr. Speaker, will the gentleman yield?

Mr. JAVITS. I yield.

Mr. CELLER. All that will happen, if your amendment is agreed to, is that

the German girl will simply leave the country and go across the Swiss border to Zurich or Chaux des Fonds, or any one of a half dozen other places. It is a simple matter to cross the Swiss border and at any of the Swiss cities where resides an American consul she can get her visa and come here. So your amendment will be thoroughly aborted.

Mr. JAVITS. The military authorities are not permitting such departures, I believe, besides that argument is begging the question. In the case of fiancées, the 90-day limitation will protect us against the fact that when a person gets a visa it will be used for that purpose only. I see no objection to the amendment. Even if what the gentleman says is true, there will be no change in the situation, but if what the gentleman says is not true, at least the situation will be changed for the better.

The SPEAKER. The time of the gentleman has expired.

Mr. WALTER. Mr. Speaker, I rise in opposition to the amendment.

For the first time since this legislation has been under consideration by the Committee on the Judiciary, I have heard there was an investigation made that we know nothing about. It seems to me that our committee inquired as carefully into this proposed legislation as the facts justified, and we unanimously reached the conclusion that the benefits heretofore extended to the fiancées of GI's should be considered in order to relieve some of the serious cases in ports of entry in this country. The amendment that was offered by the gentleman from New York [Mr. JAVITS] is an ill-disguised attempt to extend the German quota, and nothing else, because these people who are able to come to the United States from Germany can come in under the quota. Whether or not the fact that they are brides or fiancées of American servicemen and are interfering with the speedy processing of other cases, I think is entirely immaterial. Of course our Consular Service is very busy, but what difference does that make? These Germans who want to come to the United States can come in right now, because the quota is not oversubscribed.

Mr. FELLOWS. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield.

Mr. FELLOWS. Is it not true, just as the gentleman from New York [Mr. CELLER] stated, that this is not accomplishing a single thing? It does not close the borders. It does not control anything. It is really an administrative matter if it is anything at all, and the matter will not help either the fiancée or the man who is going to marry her. It does not change the number that will come in. It does not control it in any shape, sense, or manner.

Mr. WALTER. That is exactly the situation, and I think it would be very unfortunate if we would repeal an old statute with just 10 minutes' debate, and on a matter that is as important as this is. I see no reason for it. Nothing can be accomplished. I do not care if the gentleman was in embassies in many German cities. I do not think he has offered anything by his amendment that would justify our taking the very drastic step that he is urging us to take.

Mr. JAVITS. Mr. Speaker, will the gentleman yield?

Mr. WALTER. I yield.

Mr. JAVITS. Is it not a fact that these fiancées will get their visas under my amendment, and the only thing I seek to accomplish is that they shall get these temporary visas so that the visa is conditioned upon their actually being married when they get here. In other words, that good faith is being carried out; not whether the fiancées shall come in at all. I do not see how this can possibly be said to extend the German quota; on the contrary I am trying to protect us against its being improperly extended.

I am for the bill, I do not object to it; I would not object to it but for this point. All that happens under my amendment is that we are positive that these German fiancées, like French, Italian, or any other fiancées, get only the 90-day temporary visa and not a permanent visa so they cannot become permanent residents here unless they marry here as arranged.

Mr. WALTER. I do not know whether that has happened but the attention of the Judiciary Committee has not been called to a single case, if it has. I do not believe that what the gentleman proposes will accomplish anything.

Mr. McCORMACK. Mr. Speaker, this is of course a most unusual situation for the House to find itself in on Consent Calendar day, a day on which we know from experience that amendments are usually perfecting in nature and have been well thought out and taken up with the members of the committee having jurisdiction of the legislation and with the objectors' committee. It is most unusual when we find ourselves in the situation where an amendment is offered the significance of which, or what it will accomplish, seemingly is not known by any member except the gentleman from New York himself who has offered it. I have no doubt but what everything the gentleman from New York says is correct, but I do not know; the chairman of the Subcommittee on the Judiciary who reported out the bill does not know. Another distinguished member of the Committee on the Judiciary in whom we all have confidence has taken the floor and said he does not know.

When this bill was called originally it was objected to. By unanimous consent the House agreed to return to the bill for consideration and it is now before us. The gentleman from New York is perfectly within his rights in offering the amendment. On the other hand, we are perfectly within our rights in this uncertain situation in saying without any disparagement whatever of the gentleman from New York that we cannot agree with him.

Inasmuch as the bill must go to the other body of Congress and the Members of the other body will have the benefit of what little has been said on this amendment, it seems to me that with the Judiciary Committee opposing it—am I right?

Mr. FELLOWS. The gentleman is right.

Mr. McCORMACK. With the gentleman from Pennsylvania opposing it, and all the committee members on the floor now opposing it, it seems to me we would exercise wise judgment and it would be no reflection upon the gentleman from New York [Mr. JAVITS] if we voted the amendment down and allowed the Members of the other branch of Congress to consider the gentleman's amendment.

Mr. RANKIN. Mr. Speaker, I move to strike out the last word.

Mr. HALLECK. Mr. Speaker, will the gentleman yield for a consent request?

Mr. RANKIN. I yield.

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that all debate on this amendment and all amendments thereto close at the expiration of the statement by the gentleman from Mississippi.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. RANKIN. Mr. Speaker, without regard to the merits involved, I can think of nothing more ridiculous than for the Congress of the United States to adopt an amendment under this motion the meaning of which no one can tell by looking at it, and without having had read to us a word of the permanent law it attempts to repeal. If we are going into that kind of ridiculous procedure we might as well close the book of rules and fold up.

I submit, therefore, that the best thing the House can do is to vote this amendment down by about 99 to 1—that is the percentage of us who do not know what it covers.

Mr. FORAND. I hope the gentleman does not mean to vote the bill down.

Mr. RANKIN. No; I mean this amendment.

The SPEAKER. The question is on the amendment offered by the gentleman from New York [Mr. JAVITS].

The amendment was rejected.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This completes the call of the Consent Calendar.

EXTENSION OF REMARKS

Mr. JOHNSON of Texas asked and was given permission to extend his remarks in the RECORD and include some letters.

TO RAISE THE CEILINGS AND ALLOWANCES PAYABLE TO VETERANS UNDERGOING TRAINING ON THE JOB

Mrs. ROGERS of Massachusetts. Mr. Speaker, I move to suspend the rules and pass the bill (S. 1393) to raise the ceilings on wages and allowances payable to veterans undergoing training on the job, and for other purposes, with an amendment, which I send to the desk.

The Clerk read the bill, as follows:

Be it enacted, etc., That paragraph 6 of part VIII of Veterans' Regulation No. 1 (a)

as amended, is hereby amended to read as follows:

"6. While enrolled in and pursuing a course under this part, such person, upon application to the Administrator, shall be paid a subsistence allowance of $65 per month, if without a dependent or dependents, or $90 per month, if he has a dependent or dependents, including regular holidays and leave not exceeding 30 days in a calendar year. Such person attending a course on a part-time basis, and such person receiving compensation for productive labor whether performed as part of their apprentice or other training on the job at institutions, business, or other establishments, or otherwise, shall be entitled to receive such lesser sums, if any, as subsistence or dependence allowances, as may be determined by the Administrator: *Provided*, That in no event shall the rate of such allowance plus the compensation received exceed $250 per month for a veteran without a dependent, or $325 per month for a veteran with one dependent, or $350 for a veteran with two or more dependents: *Provided further*, That only so much of the compensation as is derived from productive labor based on the standard workweek for the particular trade or industry, exclusive of overtime, shall be considered in computing the rate of allowances payable under this paragraph."

SEC. 2. Subsection (b) 2 e of paragraph 11 of part VIII of Veterans' Regulation No. 1 (a) is hereby amended to read as follows:

"e. The job customarily requires a period of training of not less than 3 months and not more than 4 years of full-time training."

The SPEAKER. Is a second demanded?

Mr. RANKIN. Mr. Speaker, I demand a second and ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RANKIN. Mr. Speaker, what is the number of the bill we are now considering?

The SPEAKER. Senate 1393, as amended. The gentlewoman from Massachusetts is recognized for 20 minutes and the gentleman from Mississippi [Mr. RANKIN] is recognized for 20 minutes.

Mrs. ROGERS of Massachusetts. Mr. Speaker, the Kearney bill was reported out of the Committee on Veterans' Affairs unanimously early in the last session of the Congress and it is a pleasure to the committee that the bill is now coming up for action. I hope it will pass unanimously. The gentleman from New York [Mr. KEARNEY], the ranking Republican member of our committee, deserves a great deal of credit for the valiant work he has done in this matter. I therefore yield 10 minutes to the gentleman from New York [Mr. KEARNEY].

Mr. KEARNEY. Mr. Speaker, I rise in support of the motion by the chairman of the House Committee on Veterans' Affairs to amend S. 1393 by substituting certain provisions of H. R. 246, a bill to accomplish a similar purpose and which was reported favorably by the House Committee on Veterans' Affairs on February 24, 1947, after several weeks of hearings and testimony.

The amendment is desirable and should be accepted because it offers a more realistic approach to the problem and is in accordance with the needs as determined by exhaustive studies which have been made by Members of Congress, veteran organizations, and student associations.

The history of ceilings affecting veterans taking on-the-job training and the efforts to revise those ceilings is familiar to all Members of the Congress. There is no question in my mind and I doubt if there is any question in the minds of my colleagues that the existing ceilings as imposed by Public Law 679, Seventy-ninth Congress, are too low and should be revised upward.

The primary purpose of on-the-job training as established in the Servicemen's Readjustment Act of 1944, as amended, was to provide our returning veterans with an opportunity to obtain the most direct and best training available so as to equip them for suitable employment and to become useful and productive citizens. The legislation was designed to permit veterans to acquire a particular skill, through training, and at the same time enable said veteran to support himself and, in many instances a family, while receiving training. The fact that most of our returning veterans would, because of their military service, be in an age group older than those who ordinarily enter apprentice training, with the low rates of pay, was taken into consideration and monetary allowances to augment earnings while in training were provided.

The payment of a subsistence allowance during the period of training was designed to aid the veteran to carry on with his current obligations until such time as his skill reached the place where he would be capable of producing enough work to permit the employer to consider him as a qualified employee and pay him the wages of an experienced and fully trained employee. I believe every Member of this House will agree that the program as intended was fair and reasonable and in accordance with our Nation's historic policy in dealing with our veterans.

It was unfortunate, and to be regretted, that in the operation of the on-the-job training program certain weaknesses and abuses were permitted to creep in and led to a general demand for correction. Inadequate supervision on the part of some States, lack of knowledge on the part of employers as to what was expected of them, and an insufficient number of training officers in the Veterans' Administration to investigate and correct the abuses hastened the need for something to be done. In the closing days of the Seventy-ninth Congress, at the request of Gen. Omar N. Bradley, Administrator of Veterans' Affairs, the Congress hurriedly and with too little consideration enacted legislation to impose ceilings which became Public Law 679.

This law placed a ceiling on the combined wages and subsistence affecting veterans receiving on-the-job training under the Servicemen's Readjustment Act of 1944. Under Public Law 679, veterans without dependents come under a ceiling of $175 per month while those with one or more dependents come under a ceiling of $200 per month. There is much misunderstanding over the application of ceilings. There are some who believe that under Public Law 679 a veteran with no dependents may not earn more than $175 per month and those with dependents may not earn more than $200 per month. There are others who have the impression that if a single veteran receives more than $175 per month he may continue to receive subsistence allowances but reduced in an amount equal to wages received in excess of $175 and that the same principle applies to the married veteran under the $200 ceiling. Neither is correct.

The facts are a veteran is not limited in the amount of wages which the employer may pay him per month. The ceilings as provided under Public Law 679 establish maximum monthly rates of pay beyond which the Government will not add subsistence allowances. For example, under existing law if a veteran without dependents taking on-the-job training receives $150 per month from his employer the Government will allow him $25 per month in subsistence allowances, which makes a total of $175 per month, or the ceiling imposed by law. If the same veteran's earnings from his employer reaches or exceeds $175 per month the ceiling has been reached and the Government will no longer grant subsistence allowances. The same principle applies to a married veteran who comes under a ceiling of $200 per month.

Experience, since the enactment of Public Law 679 in August 1946, conclusively proves that the ceilings imposed at that time were ill-considered and entirely too low. It is the purpose of the legislation pending before the House to revise those ceilings upward, and it is the purpose of the amendment offered to increase the ceilings beyond those which were approved by the Senate in Senate bill 1393. Without the amendment as proposed by the chairman of the House Veterans' Committee a single veteran would be denied subsistence allowances after his wages reach $200 per month, while a veteran with one or more dependents would be denied subsistence allowances after his wages had reached $250 per month. I believe, and I hope the other Members of the House will agree with me, that ceilings of $200 for single veterans and $250 for married veterans are still too low and should be increased to the amounts which have been proposed in the amendment, namely, $250 for a veteran without dependents, $325 for a veteran with one dependent, and $350 for a veteran with more than one dependent.

Mr. RAMEY. Mr. Speaker, will the gentleman yield?

Mr. KEARNEY. I yield to the gentleman from Ohio.

Mr. RAMEY. I believe the testimony shows that the cost of living for the veterans has increased 29.2 percent since that time.

Mr. KEARNEY. I was coming to that statement.

The latter figures are more realistic in accordance with today's cost of living

and take into consideration the extra needs of veterans who have more than one dependent.

Under the proposed amendment, which I urge the House to accept, a veteran with no dependents would be permitted to earn up to $250 per month before being denied any assistance from the Government, while the veteran with one dependent would be permitted to earn up to $325 per month before being denied any allowances, and a veteran with more than one dependent would be able to receive in wages up to $350 per month before being shut off entirely from subsistence allowances.

A recent survey on the cost of living in 34 typical American cities by the Bureau of Labor Statistics reveals that an income in excess of $3,600 per annum is necessary to support a family of four under the minimum American standard of living. This estimated income does not take into consideration any savings. Thus you will note that the ceilings proposed in the amendment are not out of line with the income estimate made by the Bureau of Labor Statistics.

Let us examine the effect of the present ceilings as imposed under Public Law 679 with respect to the encouragement offered our veterans under the Servicemen's Readjustment Act of 1944 and the future of our national economy. Thousands upon thousands of veterans accepted in good faith the opportunity offered under the Servicemen's Readjustment Act and took up on-the-job training in the belief that the wages they received while in training, plus the subsistence allowances provided by the Government, would permit them to acquire a useful skill and at the same time to meet the obligations required of adult citizens with family responsibilities. Plans were made and economic obligations incurred which would permit them to undergo training at the customary apprentice wages and yet not be forced to exist entirely upon the wages paid by the employer. Like a bolt out of the blue came Public Law 679 with its ceilings of $175 and $200 per month. The immediate effect was obvious and protests began to reach the Congress and the veteran organizations. Those protests have continued to swell in volume but in the absence of congressional action thousands upon thousands of these veteran trainees have been forced to abandon their training and seek full-time employment, thereby denying themselves the acquisition of a special skill which would enable them to earn a larger income in the future. Other thousands have sacrificed their meager savings and possessions and in many cases the savings of their parents in order to continue their training under the ceilings.

Mr. HARNESS of Indiana. Mr. Speaker, will the gentleman yield?

Mr. KEARNEY. I am very glad to yield to the gentleman.

Mr. HARNESS of Indiana. How long is this program of on-the-job training going to run?

Mr. KEARNEY. The veteran must initiate his course not later than 4 years after either the date of his discharge or the termination of the present war, whichever is the later and further no such training shall be afforded beyond 9 years after the termination of the present war.

Mr. HARNESS of Indiana. For how many more years will it run?

Mr. KEARNEY. From 1944 on through the 9-year period.

Statistics prepared by the Veterans' Administration vividly portray the disaster which has struck at the hopes and the futures of thousands of these veterans. It is significant to note a comparison of the increase and decrease of veteran trainees between those taking training under Public Law 16 and Public Law 346. Trainees under Public Law 16 were not affected by the ceilings imposed under Public Law 679. Records reveal that up until the effect of the ceilings' law became evident there was a steady proportionate increase in the number of veterans taking training under both laws. Thereafter the number taking training under Public Law 346 sharply declined while those under Public Law 16 maintained the average increase.

The records stand as mute evidence of the damage done by the low ceilings imposed under Public Law 679. Instead of a continuing increase in the number of veterans who would acquire a useful and productive skill under the training program, a decrease set in which resulted in a net loss of approximately 90,000 trainees between the end of 1946 and the end of 1947. As of December 31, 1946 some 629,157 veterans were taking training under Public Law 346, but on December 31, 1947, the number had declined to some 513,000. During the same period trainees under Public Law 16 increased from 83,642 to 108,706.

Consequently, surveys made by Members of Congress and veteran organizations clearly reveal that the reduction in the number of veterans taking training between December 1946 and December 1947 under Public Law 346 can be placed squarely at the door of Public Law 679, not to mention other thousands of veterans who would have engaged in training had it not been for the unreasonably low ceilings.

Every major veteran organization has demanded either an outright repeal of Public Law 679, or a substantial upward revision of the ceilings. After weeks of consideration and listening to testimony from every angle of the problem, the House Committee on Veterans' Affairs reached the conclusion that while some ceilings should be retained they should be liberalized above existing ceilings. Consequently the committee revised and unanimously reported H. R. 246 as the bill which they felt would be equitable and realistic for veteran trainees but which would prevent a recurrence of the abuses which conceived the hasty and illy considered Public Law 679.

The suggestion has recently been made that certain types of training programs are useless and should be discontinued. I am not attempting to condone or defend loose administration in approving questionable training programs. I am concerned with the welfare of hundreds of thousands of veterans and the future of my country, and I sincerely believe this Congress and the President should correct an injustice which was done our veterans in the Seventy-ninth Congress through Public Law 679.

I am, therefore, appealing to my colleagues in the House of Representatives to correct the injustice and resolve this question by supporting the amendment to S. 1393 which was offered by the gentlewoman from Massachusetts and chairman of our Committee on Veterans' Affairs.

Mr. TABER. How many veterans are involved in this training?

Mr. KEARNEY. The latest figure that I have been able to get from the Veterans' Administration, which is as of December 31, 1947, is that possibly 513,000 veterans are involved.

Mr. RANKIN. Mr. Speaker, I am not sure that it is necessary to take any time discussing this matter further.

Mr. TABER. Mr. Speaker, will the gentleman yield for a question?

Mr. RANKIN. I yield.

Mr. TABER. I wonder if the gentleman would be able to inform the House as to how much additional funds this would require.

Mr. RANKIN. I could not give the entire amount, because I doubt if that can be given at this time. It will vary from time to time. In the first place, the number of students that are taking this training varies from time to time. I do not know whether that exact figure has been given to the committee. Probably the lady from Massachusetts, chairman of the committee, can give you the answer.

Mrs. ROGERS of Massachusetts. Last year it was estimated this bill would cost $149,000,000, but many, many fewer people are taking on-the-job training at this time, so I think the cost would be very much less than that. It is not a continuing cost. It will not be for very long.

Mr. KEARNEY. Mr. Speaker, will the gentleman yield?

Mr. RANKIN. I yield.

Mr. KEARNEY. That figure of $149,000,000 was of June 30, 1947. In talking with the Veterans' Administration the other day, they say that of necessity they had to revise their figures downward; but they can give us no approximate cost, due to the fact that over 90,000 veterans have left this training because they could not afford to carry on.

Mr. RANKIN. Mr. Speaker, this on-the-job training and these educational advantages by legislation passed in 1944 have been of great assistance to the servicemen, not only the ones who want to complete their education but for those who are taking on-the-job training. I insisted on the on-the-job training at the time. That was my provision, because for a hundred years we have been educating our children, sending them to college and teaching them how to make a living without working, and have overlooked the man who has to do the work. So I insisted on this on-the-job training. From my viewpoint it is having a splendid effect.

There was a splendid ordnance plant at Prairie in the district I have the honor to represent. It contained some splendid buildings and machine shops. They

wanted to tear down those buildings and scatter the machinery about the country. Instead of that, I got it transformed into a training school and today seven or eight hundred servicemen are there taking training, preparing themselves for the kind of work they are going to do through life.

Now, they talk about $140,000,000. When you get below billions, you are getting back to the United States. When you talk about billions you are getting out of the United States. You are talking about something for somebody else. But these are men who fought the battles of this Nation in time of war and who are to sustain our institutions in time of peace. I am not only for helping them to continue their education and training, but I am also for compensating the ones who came back and went to work and did not ask for anything.

Mr. MILLER of Nebraska. Mr. Speaker, will the gentleman yield?

Mr. RANKIN. I yield.

Mr. MILLER of Nebraska. Under the present law the States approve certain projects for on-the-job training?

Mr. RANKIN. That is true.

Mr. MILLER of Nebraska. Does the Veterans' Administration have any control over that on-the-job training?

Mr. RANKIN. This law does not change that.

Mr. MILLER of Nebraska. The reason I asked, there has come to my attention recently that in the State of Pennsylvania there are several barber schools that have been set up; sort of fly-by-night schools, that are taking in a great many veterans. They are not getting any training that will do them any good, yet they are making a racket out of the training of these veterans that apparently will not do them much good after they are through. I am wondering if there is any supervision of that type of work among the States and other special groups that might want to set up that type of training.

Mr. RAMEY. Mr. Speaker, will the gentleman yield that I may ask a question of the gentleman from Nebraska?

Mr. RANKIN. I yield.

Mr. RAMEY. I may say to the gentleman from Nebraska that a witness from his State testified before our subcommittee the other day. That matter is regulated, of course, by the department of education of each of the States. Unfortunately the effort of the education department in some States has not been so good, but that matter has been corrected by the Veterans' Administration. We are holding hearings at this time. I might add for the benefit of the gentleman from Nebraska that less than 3 percent of all these training institutions in the United States of America have been bad; 97 percent have been good.

Mr. MILLER of Nebraska. As the gentleman knows, I have always been in favor of on-the-job training, but I have viewed with some alarm the sort of upsurge of these fly-by-night schools which claim to give training to the veterans, but which training is worthless to them. I want to see them get something substantial for their effort and expenditure.

Mr. RAMEY. I can assure the distinguished gentleman from Nebraska that the situation is being corrected. Our committee is grateful to the gentleman for having that witness appear before us the other day.

Mr. RANKIN. Much of the criticism of the law passed during the last Congress came about as a result of the very condition of which the gentleman from Nebraska [Mr. MILLER] complains.

Mr. ANGELL. Mr. Speaker, will the gentleman yield?

Mr. RANKIN. I yield.

Mr. ANGELL. I wish to compliment the committee for bringing the bill out. My only regret is that it was not brought out sooner. I have had many letters and telegrams, and I know other Members have, from veterans in my own district. Many of them are having difficulty in staying in school; as a matter of fact, some have had to leave because the amounts they were receiving were insufficient. I believe we are on solid ground in endeavoring to keep these men who are veterans in school, particularly those who have been separated by several years of service from an opportunity to carry forward their education.

Mr. RANKIN. Let me say to the gentleman from Oregon that this continued inflation of the currency through the Federal Reserve System is causing a rise in prices that has diminished the purchasing power of the amount originally allotted to these veterans. That is the justification for this increase in the allowance.

Mr. BROOKS. Mr. Speaker, will the gentleman yield?

Mr. RANKIN. I yield.

Mr. BROOKS. As I understand, the next bill to come up will increase the allowance itself. I have received a great many letters from veterans asking about increasing the allowance. We made a definite mistake in not passing that bill last year because those men and women receiving this training are not rich and they are demanding this allowance.

Mr. RANKIN. Mr. Speaker, I presume there is very little or no opposition to this measure. Therefore I reserve the balance of my time.

The SPEAKER. The gentleman from Mississippi has consumed 9 minutes.

Mr. RANKIN. Mr. Speaker, I yield 5 minutes to the gentlewoman from New Mexico [Mrs. LUSK].

Mrs. LUSK. Mr. Speaker, I am very glad we are, at last, having an opportunity to consider this bill. Our committee just a year ago gave unanimous approval to the provisions included in the bill, but due to the inflationary condition of living costs at this time, I think it is just as necessary today to consider the amendments to the bill as it was a year ago to take up the original bill.

Young men engaged in on-the-job training have been caught in a squeeze between the employer on the one hand and the limitation of subsistence on the other. As a consequence, I think the subsistence has paid the price and these men have worked at lower wage rates than they would have worked if they had been allowed to earn a normal wage rate for the kind of work done.

I do not believe it is necessary to go into a detailed discussion because I think we all understand that the Government has an obligation to help these men readjust themselves to this training program. I hope you will approve the amendment.

Mr. RAMEY. Mr. Speaker, will the gentlewoman yield?

Mrs. LUSK. I yield to the gentleman from Ohio.

Mr. RAMEY. In all of our hearings I believe you will find there have been none of the so-called or what has been published as racket situations in existence. Better than 90 percent of these training situations have been sincere, and most of the State boards of education have cooperated.

Mrs. LUSK. Yes; I appreciate that.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Illinois [Mr. PRICE].

Mr. PRICE of Illinois. Mr. Speaker, this legislation is long overdue and I shall give it my full support.

This measure, which raises the ceilings on wages and allowances payable to veterans undergoing training on the job, was introduced in the House on January 3, 1947, by the gentleman from New York [Mr. KEARNEY], and was promptly favorably considered by the Committee on Veterans' Affairs, of which I was a member.

Representatives of all veterans' organizations appeared before our committee in support of the legislation, and after careful examination of all the evidence offered in support of the bill it was the unanimous decision of our group that this was worthy of immediate and favorable action on the part of the Congress. It was accordingly favorably reported to the House on February 26, 1947.

I am sorry that somewhere along the line it landed in a pigeonhole and it required much effort on the part of those of us who recognize the importance of this legislation to so many veterans to bring it before the House for final action this afternoon.

The on-the-job-training program has meant much to thousands of veterans. It has given them the start they needed in civilian life to learn a trade through which they can earn their livelihood in years to come. It has been a very successful program—well received, not only on the part of the veteran but also on the part of the various industries and business establishments which have cooperated so well in making it work.

I am very happy, therefore, to see the House taking this action this afternoon and I am confident there will be very, very few votes against suspending the rules and passing this bill.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from California [Mr. HOLIFIELD].

Mr. HOLIFIELD. Mr. Speaker, I am heartily in favor of the provisions of the two bills which will be presented today. The great reduction in purchasing power of the veterans' allowance makes it necessary, in order to obtain a decent standard of living, that they have a raise in their wage ceilings. The present bill will cover this point adequately. The second bill will raise the subsistence allowance from $90 per month for a married veteran to $105 per month, with an additional $15 per month for each dependent.

The raises provided for in this bill will not compensate for the loss in purchasing power of the original allowance. It is a corrective step, and I will vote for these two bills as the best solution offered us for legislative action.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Louisiana [Mr. ALLEN].

Mr. ALLEN of Louisiana. Mr. Speaker, this bill has been before our committee for some time. The committee has worked long and very hard on it and we think this is a fair bill. The law which was passed placing a ceiling on earnings was a mistake. That bill went through the Congress at the end of a session in a hurry. Probably not sufficient consideration was given to it at that time. I did not give it my approval.

This bill we are considering today is an attempt to rectify and correct the mistake which was made then, and I hope there will not be a single voice raised against it.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Georgia [Mr. PACE].

Mr. PACE. Mr. Speaker, it has taken us a long, long time to get this measure before the House and I am truly delighted that we finally have an opportunity to correct a serious mistake made on the closing day of the 1946 session of the Congress.

On that day the present limits of $175 per month for a veteran without a dependent and $200 for a veteran with a dependent or dependents was fixed as the maximum earnings a veteran could enjoy under the on-the-job-training program in order to receive a subsistence allowance. Such limitation was ill-advised and improper.

On the first day of the next session of Congress, that is, on January 3, 1947, I introduced a bill, H. R. 133, to raise the limits to $250 per month for a veteran without a dependent and $350 for a veteran with a dependent or dependents.

That the Committee on Veterans' Affairs realized the injustice of the 1946 act is evidenced by the fact that they opened hearings on this question on January 28, 1947. I was invited to appear before the committee and did so on February 20, 1947, in support of my bill, which reads as follows:

Be it enacted, etc., That the proviso in paragraph 6 of part VIII of Veterans Regulation No. 1 (a), as amended, is amended to read as follows: "*Provided*, That in no event shall the rate of such allowance plus the compensation received exceed $250 per month for a veteran without a dependent or $350 per month if he has a dependent or dependents."

On February 26, 1947, the committee reported out H. R. 246, by the gentleman from New York, General KEARNEY, a member of the committee. It will be observed that the only difference between my bill and the bill reported by the committee is that the committee bill provides $325 per month limit for the veterans with only one dependent. Both bills provide $350 per month for veterans with more than one dependent.

Since the bill was reported out in February 1947, many of us have been laboring to get the bill called up for consideration. We have had many disappointments but finally it is before us and I hope it will receive the support and vote of every Member of the House.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Georgia [Mr. DAVIS].

Mr. DAVIS of Georgia. Mr. Speaker, I favor this legislation, and I also favor suspension of the rules, in accordance with the motion of the gentlewoman from Massachusetts, so that it can be taken up and passed today.

I have never seen any justification for imposing a ceiling or limitation of $200 a month on veterans who are taking on-the-job training. It has worked hardship on many veterans and their families. I feel that this ceiling has not resulted in any saving to the Government. The amount of the Government contribution has remained the same, because the employer who paid the veteran $110 per month is not going to increase that salary when he knows that for every dollar he adds to the veteran's salary, the Government is going to cut its contribution a dollar. For instance, where a veteran was receiving $250 a month salary while taking on-the-job training, the Government paid $90 of this, if the veteran had a family, and the employer paid $160. When this ceiling or limit of $200 was imposed, it meant that for every dollar the employer paid in excess of $110 per month, the Government cut off $1 of its portion. Under this arrangement the only way the veteran trainee can receive $250 per month is for the employer to pay every dollar of it.

A veteran with a family is hard put in this time of high prices to make ends meet on $200 a month. Many veterans would like to buy homes on monthly payment plans; they cannot do it with a salary limit of $200 a month. Many employers would gladly pay more than $110 a month if the increase goes to the veteran and not to the Government. Let us increase this ceiling so the employers can increase their payments to on-the-job trainees.

And while we are at it, let us also suspend the rules and increase the amount of subsistence payments to veterans who are attending college. Every month hundreds of veterans are leaving college because they cannot exist on the subsistence allowances they are now getting.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Kentucky [Mr. ROBSION].

Mr. ROBSION. Mr. Speaker, I arise to support the motion of the gentlewoman from Massachusetts [Mrs. ROGERS], chairman of the Veterans' Affairs Committee, to suspend the rules and pass H. R. 246 to raise the ceilings on wages and allowances payable to veterans undergoing training on the job, and for other purposes.

I was present and helped to pass the original bill granting subsistence allowances to veterans of World War II who were taking on-the-job training. At that time the Veterans' Affairs Committee recommended subsistence allowances of $65 per month if the veteran had no dependent or dependents and $90 per month if the veteran had a dependent or dependents.

Since the passage of the original act the cost of living has increased almost 30 percent and it has been pointed out by those who had control and direction of this great program that the subsistence allowance was too low, and an increase has been urged by the American Legion, Veterans of Foreign Wars, and other veterans' organizations, as well as those who have made a very careful study of this problem. The Members of the House, of course, will understand that these veterans take employment in learning the various trades and, of course, they are not fully trained and skilled in the work they have chosen and for which they are given additional training, and cannot receive such wages that are usually paid to those who are fully trained and skilled, and these benefits are added to the wages that they receive and bring their pay up to the standard. This will continue until they do become thoroughly skilled and trained. If they are persons without dependents their total pay and subsistence cannot exceed $250. If the veteran has dependents these cannot exceed $350.

We are informed there are now approximately 150,000 young men and young women of World War II taking this training, and the over-all picture is they are making the most of their opportunities. When this program is finished it will turn into productive activity a real army of well-trained young men and young women who can and will be very useful to themselves and to their families and to our country. We are also informed that the majority of these trainees have families and they must meet the problem of the high cost of living. It will mean a great deal to our country in peacetime, and perhaps more in war, to have these veterans trained as skilled machinists, mechanics, engineers, and in every field of activity of this Nation, and many of them are being trained in agriculture and its various branches.

These veterans were taken from their homes, their families, and from opportunities for training to enter the service of our country in the greatest war of all times. They served our Nation courageously and patriotically, and the people of this great Nation, in this measure, expresses to them, in a measure, their debt of gratitude.

After World War I, I was a member of the committee in the House that passed an act to give subsistence benefits to disabled veterans to give them vocational training as well as educational training. It was a real pleasure to me then, in the early twenties, to express our gratitude to the veterans of World War I, and we now have the signal pleasure of aiding along the same lines veterans of World War II, inasmuch as we gave sixty billions to other nations during the present war, and we have given to them more than twenty-four billions since the shooting war stopped, and it is proposed to give to other countries additional billions. I am very glad, indeed, to have an opportunity to do something for our own veterans in this bill and in a bill that is coming up this afternoon—H. R. 4212, by the gentleman from Kentucky [Mr.

MEADE], a member of the Veterans' Affairs Committee of the House—to increase the subsistence benefits to veterans of World War II in taking educational and other training in schools, colleges, and universities in this country, and I intend to speak and vote for that bill. It, too, offers splendid opportunities to nearly 2,000,000 young men and young women who served our country, and they are taking full advantage of these opportunities, according to all reports. This will prove a blessing to them and promote the general welfare of our country. I am expressing the hope that the bill before us, H. R. 246, will be passed without a dissenting vote.

I commend the gentlewoman from Massachusetts [Mrs. ROGERS] and members of the Veterans' Affairs Committee for bringing this bill out and giving us an opportunity to vote on it.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Alabama [Mr. GRANT].

Mr. GRANT of Alabama. Mr. Speaker, I congratulate the Committee on Veterans' Affairs for bringing this bill up for consideration at this time.

This bill amends the present law and S. 1393 by substituting certain provisions of House bill 246, which bill was reported favorably by the House Committee on Veterans' Affairs. This bill and the proposed amendment provide that the veteran with no dependents would be permitted to earn up to $250 per month before being denied any assistance from the Government; while the veteran with one dependent would be permitted to earn up to $325 per month before being denied any allowances; and the veteran with more than one dependent would be able to receive in wages up to $350 per month before being prohibited entirely from receiving subsistence allowances.

Inasmuch as it may be impossible for me to secure sufficient time to speak on S. 1394, which bill will be taken up by the House immediately following disposal of this bill, and which bill provides for increased subsistence allowances to veterans pursuing certain courses under the Servicemen's Readjustment Act of 1944, as amended, I will also discuss this bill within the time allowed me.

At the time provisions were enacted allowing on-the-job training and subsistence allowances to veterans attending school, it was realized that Congress could not by the mere payment of money reimburse one for their service in time of war. However, it was an honest effort by Congress to place the young men and women of this country, who had responded to the call of their Nation, insofar as could be done in the position that they would have occupied had it not been for the war.

Some months ago there was a great deal of criticism about the on-the-job training program. It seems that investigations by the Veterans' Administration had brought out many cases where the program was being abused. I do not doubt but that many such cases did exist. However, that was not the fault of the program, but in its administration.

Last fall, during the recess of Congress, I took the opportunity to make an investigation and study of this matter. I visited some of the night classes being conducted and talked with many of the veterans attending these classes and also visited with them while they were on the job. I found that by far the rank and file of these veterans were doing good work and that they were appreciative of this opportunity being given by their Government for them to undergo this training. I also learned that in many cases where the training was being abused that corrections were being made. After all, the individual trainee should not be penalized for something beyond his control. Where cases of abuse exist they should be rooted out and properly dealt with.

I also took the opportunity to visit some of the schools and colleges where institutional training is being given to our veterans. I talked with many of the veterans, both single and married, undergoing this training, and I was firmly convinced that, on the whole, this program is working satisfactorily.

It has been charged that some of the veterans were taking this training only in order to draw their subsistence. There might be a few isolated cases of this nature, however, on the whole I challenge this statement because I found the veterans to be doing hard and conscientious work. The majority of them are attending schools that are overcrowded and living under conditions which are all but satisfactory. Many of them are living in overcrowded quarters, in trailers, and in other places which are not conducive to good living. I do not think that anyone would put up with the conditions under which many of these fellows are having to live unless they were seriously interested in securing an education.

While I found that many of the single veterans were making a sacrifice to attend school, their sacrifices could not be compared with those of married veterans and, especially with those who have children. The passage of this bill will not correct many of these conditions because there are simply not enough houses in which to live. However, we all know that the subsistence allowance now being received is much too small. I have received several letters from veterans pursuing this training. Some months ago I received one from a young man in my district which is typical. This was from a single veteran and he wrote in part as follows:

> I am greatly in favor of seeing the married veterans get a raise in allotment. I have very close friends here in school who are married veterans and I can speak authoritatively when I say they deserve it. I know you are doing all you can to help these boys and their wives and, I might add, their children. Believe me, they are having a heck of a time making ends meet with their small allotment. One friend of mine works across the street at a drug store trying to provide for his wife and three children. His grades are good, but you can imagine the strain on him and to make an A or B here is many times as hard as before the war. With eight to ten thousands students enrolled, I am sure you understand that a loafer cannot stay in school long. There are many others in this boy's position and that is my reason for writing you. I know firsthand how badly these boys need more financial aid.
>
> Now for the single veterans—yes; we would all like to have a raise in our allotment. If I denied that fact you and I would both know I am not telling the truth. But I feel free to speak for the majority of single veterans when I say that if our howl to get a raise also would lessen the chances of the married veterans getting a raise, then we won't let out a peep. It seems to me that a little foresight should see that if this could be done separately, the results might prove more fruitful. But let the married veterans have the first nip.
>
> Single veterans, as well as the married veterans, find jobs to help out. However, there are not really enough jobs to go around here and I might add, more time is needed for study here than before the war. Those in premed, engineering, accounting, etc., are spending much time by the lamp. Of course, I have financial help from home, but for those who are not so lucky, let me brief you on some expenditures:
>
> My house bill last month was over $60. This does not include laundry, dry cleaning, insurance, cigarettes, haircuts, church offerings, an occasional movie, etc. Those who do not have help from home have to stretch that $65 with a job, but this keeps him from his books.

The high grades being made by the veteran is an answer to those who oppose this program. The bill provides that the present minimum of $65 for single veterans is increased to $75; $105 per month if he has one dependent, or $120 per month if he has more than one dependent. I believe that it is a wise provision to increase the extra amount of $15 for those who have more than one dependent. I trust that the passage of this bill will make it possible for many who were going to have to drop out of school to now complete their education.

Some may question the cost of this increased allowance for on-the-job training and subsistence allowance to those pursuing institutional training. It is true that it will cost more money; however, this cannot be charged to the veterans. In wartime they had a job to do and they did it well. Since the original bill was enacted, living costs have steadily mounted. Some groups in our Nation have been compensated either in whole, or in part, by increased wages for this increased cost of living. Not so with the veteran who is undergoing training. He must accept what is allowed him by Congress. I have no fear but that this bill will be passed and signed by the President. It is fair and just.

In discussing the problems of veterans undergoing training under the GI bill of rights, we must not lose sight of the fact that there are many other benefits which Congress has enacted for the veterans. I recently read a statement to the effect that 45 percent of our veterans, who are entitled to such benefits, are not claiming them. The supposition was advanced that they were not properly informed concerning such laws. In an effort to rectify this condition, I believe that we should do everything that we possibly can to inform our veterans of their rights. These men were taken out of their homes and schools and businesses and sent away, many to foreign lands, to fight for this Nation, and fight they did—gloriously and successfully. Believing now, just as I did when I voted for this legislation, that our veterans gloriously earned the

benefits provided for them under the law, I am listing here most of those benefits in the hope that additional publicity will be given this whole matter to the end that our veterans and the widows and dependents of veterans may obtain the rights and benefits which are theirs under the law:

LIST OF VETERANS' BENEFITS

Eligibility for compensation for disability of both World War I and II: The veteran must have completed 90 days' active duty, with a discharge other than dishonorable, or discharged for disability. Compensation is payable for disabilities incurred in or aggravated by service. Compensation for a non-service-connected disability must be permanent and total in nature. The Veterans' Administration does not forbid any veteran from filing a claim if he feels the claim is justified.

Entitlement to VA hospitalization is available to (1) veterans needing hospitalization for service-connected disability; (2) veterans needing hospitalization for a non-service-connected disability; (3) any veteran needing emergency hospitalization; and (4) peacetime veterans eligible with a service-connected disability. Wives, children, and dependents are not eligible for VA hospitalization.

Out-patient treatment is available to those veterans with a service-connected disability for treatment of the disability by a VA authorized doctor or dentist.

Prosthetic appliances such as limbs, eyes, hearing aids, oral aids, and cars are available to disabled veterans.

National service life insurance is available to veterans who served after September 16, 1940, and carried or applied for NSLI during their service. The maximum amount that can be carried is $10,000.

College and/or high-school education and training is authorized up to 4 years under Public Law 16 and Public 346, as amended. Those veterans training under Public, 16, are limited to 4 years unless it is determined more time is needed for their rehabilitation.

The VA will guarantee up to $4,000 or not more than 50 percent of a home loan, farm loan, or $2,000 or not greater than 50 percent of a business loan. The VA does not loan the money to the veteran. It is the responsibility of the veteran to find a lending institution who will grant him the loan.

Unremarried widows and minor children are eligible for a pension if the veteran died of a service-connected death. Parents must prove dependency before becoming eligible. Unremarried widows and minor children of World War I veterans are eligible for pension if the veteran's death was not due to service. Unremarried widows and minor children of World War II veterans are eligible only if veteran had a service-connected disability. Income limitations are a big factor in these pensions—annual income for a widow with no dependents cannot exceed $1,000; widows with dependents, annual income cannot exceed $2,500 to be eligible for pension.

Burial allowance of $150 is provided for the burial of a veteran and may be claimed any time within 2 years after burial. An American flag to drape the casket is authorized. Application for flag should be made to the nearest VA regional office or post office. Headstone or grave marker is available for any and all veterans' graves, except to those holding a dishonorable discharge.

The service officer of any of our veterans' organizations, the county service commissioner, the State service commissioner, and the nearest Veterans' Administration service officer will be glad to furnish further and more detailed information regarding the above, or any other benefits which are available.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Mississippi [Mr. WINSTEAD].

Mr. WINSTEAD. Mr. Speaker, I rise in support of this legislation which I consider long overdue. In fact, there never should have been such a low minimum set. Regardless of the intention of the legislation it tended to penalize many of our returned veterans who were aggressive and who had the initiative to press for promotion. Of course, this legislation has been abused in some cases, but the abuses should have been corrected instead of imposing such a low minimum on the veterans.

I am sure there is no opposition to this legislation and I wish to commend the committee for giving us the opportunity to vote on it—even at this late date.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Texas [Mr. BECKWORTH].

Mr. BECKWORTH. Mr. Speaker, about a year ago I introduced H. R. 772, to remove the monthly maximum placed on the income of veterans receiving both compensation for productive labor and subsistence allowance for education. I am glad Congress is considering this legislation today. Our veterans and their dependents badly need this raise. That which is fair and just will be done when we pass the legislation today.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. VAN ZANDT].

Mr. VAN ZANDT. Mr. Speaker, for the first time in this session I am presented an opportunity to support the veterans of World War II who are taking advantage of the on-the-job training privileges under the GI bill of rights. It is unusual and refreshing to have the privilege of supporting legislation for American citizens since we have been occupied for months with the problems of foreign nations.

While this legislation affects all World War II veterans receiving on-the-job benefits I am principally concerned with several hundred apprentice employees in the Altoona shops of the Pennsylvania Railroad Co., in Altoona, Pa., as well as the hundreds of other World War II veterans in my congressional district employed in various industries.

When I appeared before the House Committee on Veterans' Affairs in behalf of the legislation now under consideration I read the following letter from Mr. Richard M. Bell, president of the Apprentice Club of the Altoona Works and Middle Division of the Pennsylvania Railroad:

ALTOONA, PA., *January 2, 1947.*

The Honorable JAMES E. VAN ZANDT,
House of Representatives.

DEAR SIR: The unanimous vote of the 200 members of the Apprentice Club of the Altoona Works and Middle Division of the Pennsylvania Railroad was to send you the objections of the members of the club to Public Law No. 679, passed August 8, 1946, by the Seventy-ninth Congress.

Section 3 of Law 679 provided that a veteran under the program of on-the-job training could not, if he is single, receive any benefits of the act if he earns $175 or more per month; if married, $200 per month. Section 3 also provided that a full-time training period was limited to not more than 2 years.

At the regular meeting of the Apprentice Club of the Altoona Works and Middle Division, held in the Altoona YMCA, on December 6, the following objections were stated:

1. The limit set on wages cuts the initiative of veterans, and retards their ability to compete with the efforts of others. The stimulation of competition is of benefit to both employers and employees; to limit the individual in industry, diligence, and initiative is un-American.

2. The limit on wages makes it impossible for a veteran and his family to live up to the demands of the higher standard of living and its increased costs.

3. The limit set on the training period to not more than 2 years is unfair to both the veteran and the employer; it prevents a veteran from serving an apprenticeship for a vocation which requires more than a 2-year training period.

4. The enactment is not on a par in merit with the legislation which concerns the veterans. It was discussed and passed hastily at the close of the congressional session.

We solicit your vote and aid for the amendment of Public Law 679.

Respectfully,

RICHARD M. BELL, *President.*

President Bell's letter indicates strong concern regarding ceiling on earnings and the limitation of 2 years as the period of training. My reasons for supporting this bill are that the legislation raises the ceilings on earnings and extends the period of training to 4 years. The extension of the period of training benefits a railroad apprentice since a railroad apprenticeship is for a 4-year period. I want to commend the gentleman from New York, Representative KEARNEY, for his sponsorship of this legislation and the various veterans' organizations that joined with him in emphasizing the merits of this legislation.

News of the passage of this legislation by the Congress of the United States will bring unbounded joy to many a veteran and his family who are striving to exist in the face of the present high cost of living.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from New York [Mr. MARCANTONIO].

Mr. MARCANTONIO. Mr. Speaker, I have consistently supported this legislation and I am very pleased to see that it is now up for consideration by the House. However, I must state that this bill and the one for ex-GI students are long over due. Further, in view of the increasing cost of living, both bills are inadequate. I shall vote for these bills, and shall join others in the fight to obtain increased payments commensurate with living costs.

Mr. RANKIN. Mr. Speaker, I ask unanimous consent that all Members may have five legislative days in which to extend their remarks in the RECORD on the pending bill, and that all Members who care to do so may extend their remarks in the RECORD at this point.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

AN AMERICAN STANDARD OF LIVING FOR GI TRAINEES

Mr. KLEIN. Mr. Speaker, I shall be brief, for it seems to me that there is only

one logical and proper course open to us on this measure, and that is to pass the House bill.

In the time of national need we took these young men from their schools, their shops, their offices. We took them away from their normal expectation of getting a job and starting a family.

We taught them to kill and be killed.

We promised them that if they would risk their lives—and there are 600,000 who not only risked but gave their lives—in defense of our country, we would try to make up to them for the hell we sent them to.

They came back, ready to continue to serve their country in peace as in war; and, in accordance with the promises we made them, the young men who will benefit by this bill sought the kind of jobs where they would learn a trade or a vocation on the job.

These are grown men. Many of them had young families when they left; others acquired families during or after the war. Whether as wives or as sweethearts, their women served no less than the men.

A grateful country undertook to pay these men the difference between the cost of living and the wages they could earn while learning. In good faith, they enrolled in the program.

Meanwhile, the value of money was cut in half.

The 1948 dollar will buy only 50 cents' worth of food even by 1945 standards. These are the men who served our country in her mortal need; and it seems to me the simplest kind of justice that we should now serve them in their need by passing this bill and raising the payments to the on-the-job trainees to a figure which will actually enable them to live according to American standards.

Mr. BLATNIK. Mr. Speaker, I want to go on record as being in full support of H. R. 246—a bill to raise income limitations for on-the-job training from $175 to $250 per month for single veterans; and from $200 to $325 per month for married veterans, with an additional $25 in income allowed for married veterans with children.

In my opinion, this measure is necessary to remove certain inequities in the operation of the apprenticeship and on-the-job training program. Apprenticeship wages in industry are set according to standards agreed upon by management and labor through collective-bargaining arrangements. In many instances, however, apprenticeship wage levels are higher than the $175 and $200 per month wage ceilings established by the GI bill.

What happens under such circumstances? When apprenticeship wages are above the level set by the GI bill, the veteran is penalized by having his wages reduced to the ceiling level. There are some 600,000 veterans now taking on-the-job training in industry, and about 40 percent of them have had their wages cut as a result of the present law. This is most unfair to the veteran apprentice, and many of them have withdrawn from the program to seek employment in other industries.

The present income ceilings are also unfair to the nonveterans because they tend to depress wage levels in industry. With wage ceilings established by law for the veteran apprentice; the tendency has been for employers to reduce all apprenticeship wages to the levels established by the GI bill. This has had the effect of driving nonveterans from the field.

This measure, which will substantially increase the income levels for apprenticeship training, will remedy the situation which causes veterans to lose part of their wages, and at the same time will help stabilize apprenticeship wages in industry.

I also want to make special mention of that provision of the bill which extends the time limit for on-the-job training from 2 to 4 years, in line with the original provisions of the GI bill. A number of veterans from my district now enrolled for on-the-job farm training have called my attention to the injustice done them by the enactment of the 2-year limitation. These veterans had made commitments for purchase or rental of farms and farm machinery with the expectation that the program would last 4 years. The effect of the 2-year amendment was, therefore, a source of difficulty and in many cases real hardship to many GI's. This change in the law in favor of the 4-year time limit is most desirable, and it has my complete approval.

In conclusion, let me again state that I am wholeheartedly in support of this measure, and urge the House to act favorably on it.

Mr. BATTLE. Mr. Speaker, I have introduced legislation similar to the bill under consideration at the present time. As a veteran of World War II, I am in deep sympathy with the problems of readjustment which are being faced by my comrades at this time. I have supported this measure with the realization that we must do everything possible for those who gave so much for our great Nation.

Mr. KEFAUVER. Mr. Speaker, the two bills we are considering today are of great importance to veterans and their families. H. R. 246 raises the ceiling on wages and allowances to veterans undergoing training on the job. As the law now stands, a veteran may receive subsistence allowance only when he is enrolled in and pursuing a course of education or training. He may earn as much as he can. But when the trainee with no dependents earns $175 or more per month, the Government ceases to contribute subsistence allowance. The same is true when a veteran with dependents earns $200 or more per month.

Where the veteran's earnings are less than the foregoing amounts, the Federal Government will pay him subsistence allowance but not to exceed $65 a month if he has no dependent or $90 a month if he has a dependent or dependents.

This bill would change the existing law to increase the amounts from $175 to $250 per month for a veteran without a dependent, from $200 to $325 per month for a veteran with one dependent, and from $200 to $350 per month for a veteran with two or more dependents. The bill would further enact into law that the standard workweek for the particular trade, exclusive of overtime, shall be considered in computing the rate of allowance.

Section 2 of the bill would amend paragraph 11 (b) 2e to increase the allowable period of training for on-the-job training not apprenticeable in character from 2 years to 4 years.

H. R. 4214 provides for an increase in subsistence allowances to veterans who are in school under the Servicemen's Readjustment Act. The bill increases the allowance from $65 a month to $75 for a veteran without dependents and from $90 per month for a veteran with dependents to $105 per month if he has one dependent and to $120 per month for a veteran with more than one dependent.

These two bills provide substantially the same benefits as contained in H. R. 4828 which I filed in December. The allowance in H. R. 4828 is a little more generous.

The passage of the bills is fully justified. The existing ceilings are considered so restrictive as to cause a number of veterans to refrain from entering on courses of education and on-the-job training. Some who have started a course in education or who have taken on-the-job training assignment have been forced to discontinue such courses because of the insufficiency of the allowance they have received.

All of us have been told by veterans of their inability to subsist on the small allowance made at this time. The rising cost of living justifies even a higher increase than the one granted. I am glad though that Congress is giving some measure of relief at this time.

Mr. McCOWEN. Mr. Speaker, at this point in the RECORD, I desire to say that I am very much in favor of H. R. 246, to raise the ceilings on wages and allowances payable to veterans undergoing training on the job, and for other purposes. This bill is of great importance to the veterans at this time.

I intend to vote for the bill and urge its immediate passage.

Mr. DONOHUE. Mr. Speaker, I think that all of you well know that the original bill providing an on-the-job-training program for our veterans was hastily passed in the closing days of the Seventy-ninth Congress and the bill we are presently considering is designed to repair some of the admitted deficiencies of the present legislation.

It has been tried since that time, and it has been found to be, as I think the hearings before the Veterans' Affairs Committee will show conclusively, wanting.

The bill we are now considering provides a plan which will prevent the abuses that developed under the old system and at the same time will extend a greater measure of justice to all veterans.

There has been a change in the cost of living since the action was taken before and I think more veterans ought to be brought into this program and I believe more veterans will be brought into the program under this bill.

Although it perhaps should go a lot further than it does, it provides a more equitable adjustment in the present on-the-job-training program; I submit that it is deserved legislation, decidedly in the interest of the veteran and of the public welfare, and I urge my colleagues to vote favorably upon it.

Mr. RANKIN. Mr. Speaker, I reserve the balance of my time.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois [Mr. ALLEN].

Mr. ALLEN of Illinois. Mr. Speaker, the pending bill would raise the ceilings on subsistence payments in on-the-job training programs and would increase the subsistence payments for veterans pursuing institutional training.

In order to keep the record straight, may I say I talked to nearly all of the members of the Rules Committee in reference to this bill, and everyone with whom I have spoken is in favor of this legislation. They favor this method of legislating under suspension of the rules, because the members of the Committee on Rules that I talked to feel that this will insure the quickest method of dealing with this extremely important legislation. It is their feeling and my feeling that if this legislation were not brought up under suspension of the rules it would make for less rapid consideration, and there would also be the possibility of emasculation, which we want to avert, because that would defeat the very purpose of this bill.

So, again, I want to say that the Committee on Rules is in agreement. The committee did not object to considering it under suspension of the rules, and I hope that these bills will be passed unanimously. As we know, the Senate last year passed these without a record vote. The Committee on Rules, I am sure, would have acted sooner on this legislation but for the fact that the committee must consider the over-all picture for veterans.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. RAMEY], chairman of the Subcommittee on Education and Training, who did a tremendous amount of work on this on-the-job training program.

Mr. RAMEY. Mr. Speaker, I wish to state that before hearings on this program by the subcommittee were begun, invitations were sent out to employers and employees as well as to the veterans throughout the land. Despite the fact that there was some resistance to it at first—reports of use of program as a racket—there was found to be irregularity in less than 3 percent of cases. In the program throughout the United States each State had a separate educational system, but in spite of this fact there were very few instances where the opportunity was given to a subterfuge. I trust that this legislation will pass unanimously.

Mr. RANKIN. Mr. Speaker, I yield myself 1 minute to say, in response to what the gentleman from Illinois [Mr. ALLEN], the chairman of the Committee on Rules, had to say, that this policy of passing veterans' legislation under suspension of the rules was adopted when Royal Johnson was chairman of the committee 24 years ago.

We found that that policy worked remarkably well, and during the time I was chairman of the committee I followed it as best I could. I think it is a wise policy now when the administration and the committee can agree on legislation to pass it under suspension of the rules in order not to have it destroyed by unreasonable amendments offered from the floor.

Mr. Speaker, I now yield such time as he may desire to the gentleman from Florida [Mr. ROGERS].

Mr. ROGERS of Florida. Mr. Speaker, I just want to make one remark and that is this: There is nothing too good for our veterans. I favor this bill.

Mr. RANKIN. I thought the gentleman from Florida would be for us.

Mr. RICH. Mr. Speaker, will the gentleman yield?

Mr. RANKIN. I yield to the gentleman from Pennsylvania.

Mr. RICH. How can you give this country away to foreign countries and then think you are going to be able to take care of the veterans? If you pass the Marshall plan and give away $17,000,000,000 besides the $22,000,000,000 we have already given away, and then think you are going to take care of the veterans, I tell you you are only fooling the veterans. The thing for us to do is stop squandering money and take care of the veterans.

Mr. RANKIN. Let not the gentleman from Pennsylvania shake his gory locks at me. I am not responsible for that situation. He should talk to the leaders on his own side of the House and Senate.

The SPEAKER. The time of the gentleman from Mississippi has expired.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I yield 1 minute to the gentleman from New Jersey [Mr. MATHEWS].

Mr. MATHEWS. Mr. Speaker, as a member of the committee which reported this bill out favorably, I am very, very much in favor of its passage, because I believe it will allow those men who have so well served their country to become better economic assets for themselves, for their families, and for their Nation.

Mr. Speaker, in view of the fact that I do not believe there is serious opposition to this bill, I shall not burden the House with further remarks.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I yield such time as he may desire to the gentleman from Tennessee [Mr. PHILLIPS].

Mr. PHILLIPS of Tennessee. Mr. Speaker, as a member of the Committee on Veterans' Affairs, I am supporting H. R. 246, a bill to raise the ceilings on wages and allowances payable to veterans undergoing training on the job. This bill would change the existing law to increase the amounts from $175 to $250 per month for a veteran without a dependent, from $200 to $325 per month for a veteran with one dependent, and from $200 to $350 per month for a veteran with two or more dependents. The bill would further enact into law that the standard workweek for the particular trade, exclusive of overtime, shall be considered in computing the rate of allowance. The original law would be amended to require a period of training of not less than 3 months and not more than 4 years of full-time training.

Extensive hearings were held, and representatives of the American Legion, the Veterans of Foreign Wars, the American Veterans of World War II, the Regular Veterans' Association, Members of Congress, and the Administrator of Veterans' Affairs expressed their views on the subject.

Experience has proved that existing ceilings are considered so restricted as to cause a great number of veterans to refrain from entering upon a course of education, or on-the-job training, or to discontinue such courses altogether. It is believed that the bill before us will tend to encourage beneficiaries to engage in self-help and self-development and will encourage initiative. The increased ceilings will permit the veteran training under this program to earn additional money, which will partially help to tide him over so as to meet the high cost of living.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I yield such time as he may desire to the gentleman from New York [Mr. EDWIN ARTHUR HALL].

Mr. EDWIN ARTHUR HALL. Mr. Speaker, the bills we pass here today which provide increases for veterans' allowances and compensation embody the proposals I made at the beginning of this Congress, over a year ago.

At that time, I introduced H. R. 866, a bill entitled to increase the monthly maximum allowed to veterans receiving both compensation for productive labor and subsistence allowances for education.

I went a bit farther, perhaps, than do the provisions we are discussing. I asked for a doubling of the existing allowances for education and on-the-job training.

Everybody knows veterans have been crying for these increases for over 2 years. In my opinion, action is long overdue, and I think our leadership is wise indeed to allow the passage of these remedial measures now.

In fixing ceilings on earning capacity to on-the-job trainees, a stop was put to abusing privileges originally given to veterans in the GI bill. There were many violations of good judgment and ethics, even, which forced the Veterans' Administration to advocate a limit.

For instance, it came to my notice that colonels were maneuvering to understudy generals and consequently receiving near equivalents to the latters' salaries.

In these instances no one will argue against the wisdom of placing limits upon earning capacity. But too many toes have been stepped on. The ceilings are too low. Therefore a readjustment such as we are proposing here is by all means reasonable.

From now on the average veteran taking on-the-job training will be able to meet more easily the high cost of living. His preparation for a better job will not be impeded. Employers of such veterans will likewise benefit, because such training will remain attractive.

From the standpoint of education under the GI bill, students who are veterans have found it well nigh impossible to live on subsistence allowances. I remember talking to a group of veterans attending one of the several colleges in my district a few months ago.

One and all of these young veterans had the burning desire to regain their

lost years by taking advantage of the higher learning offered them. But, tragically enough, they were up against rising food costs and other mounting expenses. They asked me when Congress would wake up to their dire circumstances and give them a helping hand. They said frankly many of them would find it necessary to leave school unless we come to their rescue.

As one who proposed universal college education of the GI several months prior to its inclusion in the original GI bill, I am anxious to see veterans opportunities in the field of higher learning increased, not decreased. Perhaps there are some who mockingly refer to this as a noble experiment. But the experiment is working and working well.

I believe the time will come when government will assume the responsibility of opening the avenue to college and university training for all our citizens just as today it guarantees our children primary and secondary education.

Certainly, a poor boy or girl who meets the scholastic qualifications of a university ought to have the same chance of improving the mind a person who is more fortunate financially has.

At any rate, the GI bill has opened a burning question, puts it on a working basis, and proves that all Americans, regardless of race, creed, or color, can be treated equally when it comes to opportunity to go to college.

Therefore, lest this educational feature of the GI bill be scuttled and countless veterans be compelled to leave important studies they are now pursuing, I strongly urge the House to vote these increases of subsistence allowances to veterans immediately.

I likewise recommend that we improve the on-the-job training program by raising the ceilings, now too low, so that the private initiative of each veteran manifests itself more forcefully.

The SPEAKER. All time has expired.

The question is on suspending the rules and passing the bill.

Mr. RANKIN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 373, nays 5, not voting 52, as follows:

Hope	Owens	
Jenkins, Ohio	Poage	

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The Clerk announced the following pairs:

General pairs until further notice:

Mrs. Smith of Maine with Mrs. Norton.

Mr. Simpson of Pennsylvania with Mr. Zimmerman.

Mr. Chiperfield with Mr. Hedrick.

Mr. Bakewell with Mr. Johnson of Oklahoma.

Mr. Bender with Mr. Morrison.

Mr. Cole of New York with Mr. Lucas.

Mr. Coudert with Mr. Kirwan.

Mr. Cunningham with Mr. Byrne of New York.

Mr. Jenkins of Ohio with Mr. Camp.

Mr. Bennett of Missouri with Mr. Doughton.

Mr. Gross with Mr. Bloom.

Mr. Martin of Iowa with Mr. Poage.

Mr. Knutson with Mr. Buckley.

Mr. Scoblick with Mr. Morgan.

Mr. Owens with Mr. Powell.

Mr. Talle with Mr. Bulwinkle.

Mr. Thomas of New Jersey with Mr. Hays.

Mr. Youngblood with Mr. West.

Mr. Gwinn of New York with Mr. Whitten.

Mr. Kilburn with Mr. Whittington.

The result of the vote was announced as above recorded.

The title was amended so as to read: "To raise the ceilings on wages and allowances payable to veterans undergoing training on the job, and for other purposes."

A motion to reconsider was laid on the table.

COMMITTEE ON THE JUDICIARY

Mr. CASE of New Jersey. Mr. Speaker, I ask unanimous consent that on tomorrow Subcommittee No. 4 of the House Committee on the Judiciary may be permitted to sit during general debate.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

COMMITTEE ON WAYS AND MEANS

Mr. EBERHARTER. Mr. Speaker, I ask unanimous consent that the minority members of the Committee on Ways and Means may have until midnight tonight to file minority views on House Joint Resolution 296.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

EXTENSION OF REMARKS

Mr. HARVEY asked and was given permission to extend his remarks in the RECORD.

Mr. MULTER asked and was given permission to extend his remarks in the RECORD and include an article from the Brooklyn Eagle.

Mr. HOLIFIELD asked and was given permission to include in the remarks he expects to make later today a newspaper article.

Mr. PHILBIN asked and was given permission to extend his remarks in the RECORD in three instances and include certain excerpts.

SUBSISTENCE ALLOWANCE TO VETERANS PURSUING CERTAIN COURSES

Mrs. ROGERS of Massachusetts. Mr. Speaker, I move to suspend the rules and pass the bill (S. 1394) to provide increased subsistence allowance to veterans pursuing certain courses under the Servicemen's Readjustment Act of 1944, as amended, and for other purposes.

The Clerk read the bill, as follows:

Be it enacted, etc., That so much of paragraph 6 of part VIII of Veterans Regulation No. 1 (a), as amended, as precedes the proviso, is hereby amended to read as follows:

"6. While enrolled in and pursuing a course under this part such person, upon application to the Administrator, shall be paid a subsistence allowance of $65 per month, if without a dependent or dependents, or $90 per month, if he has a dependent or dependents, including regular holidays and leave not exceeding 30 days in a calendar year: Except, That while enrolled in and pursuing a course of full-time institutional training under this part, such person, upon application to the Administrator, shall be paid a subsistence allowance of $75 per month, if without a dependent or dependents, or $105 per month if he has one dependent, or $120 per month if he has more than one dependent, including regular holidays and leave not exceeding 30 days in a calendar year. Such person attending a course on a part-time basis, and such person receiving compensation for productive labor whether performed as part of his apprentice or other training on the job at institutions, business or other establishments, or otherwise, shall be entitled to receive such lesser sums, if any, as subsistence or dependency allowances as may be determined by the Administration."

SEC. 2. So much of paragraph 3 of part VII of Veterans Regulation No. 1 (a), as amended, as precedes the first proviso, is hereby amended to read as follows:

"3. While pursuing training prescribed herein, and for 2 months after his employability is determined, each veteran pursuing a course under this part, shall be paid a subsistence allowance of $65 per month if without a dependent or dependents, or $90 per month if he has a dependent or dependents: Except, That each veteran pursuing a full-time institutional course under this part shall be paid a subsistence allowance of $75 per month if without a dependent or dependents, or $105 per month if he has one dependent, or $120 per month if he has more than one dependent:".

SEC. 3. This act shall take effect on the first day of the second calendar month next succeeding its enactment.

The SPEAKER. Is a second demanded?

Mr. RANKIN. Mr. Speaker, I demand a second, and ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER. Under the rules, the gentlewoman from Massachusetts [Mrs. ROGERS] is recognized for 20 minutes and the gentleman from Mississippi [Mr. RANKIN] is recognized for 20 minutes.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I yield myself such time as I may desire.

Mr. Speaker, I should like to make a brief statement before yielding to the gentleman from Kentucky [Mr. MEADE], the author of the Meade bill, to explain why the chairman of the Committee on Veterans' Affairs has asked to have the Senate bill considered rather than the Meade bill, which is exactly the same as the Senate bill.

May I state that the gentleman from Kentucky [Mr. MEADE], the author of the bill, has made a most exhaustive study of institutional training for the GI's. I wish the House could pass his bill, although the bill that is being considered now is really his bill. Paying his own expenses, he traveled for a long time visiting various institutions and talking with GI's. He deserves the greatest commendation for his work as a member of the Subcommittee on Education, Training, and Rehabilitation. In fact, the chairman of the Committee on Veterans' Affairs has nothing but the highest praise for Members on both sides of the aisle for their cooperation in securing the passage of legislation for veterans.

Mr. Speaker, I yield 10 minutes to the gentleman from Kentucky [Mr. MEADE].

Mr. MEADE of Kentucky. Mr. Speaker, to me this is a great day. When the GI bill of rights was passed, I was serving in the Pacific. I was a college graduate. I was serving with a number of young men who had not had an opportunity to complete their education due to the fact that the great majority of them had volunteered their services to their country. The war in which they were then serving was a long war. During the time that many were in service, for 3, 4, and 5 years, they grew out from under the apron strings of their mothers and the purse strings of their fathers. They were on the pay roll of the Government. Most of them became independent and reached the age of legal manhood during that period. Many married and had children and practically all of them had had their education interrupted by their war service. I wondered at the time what effect the disruption of the education of the young people of this country would have on the future of this country.

When the GI bill of rights was passed I was highly gratified because of the provision for a subsistence allowance to compensate for the expenses of living in the amount of $50 for single veterans and $75 for married veterans. Subsequent to the original passage of that legislation the Congress increased that amount because of the rising cost of living to the present amount of $65 for single veterans and $90 for married veterans. The cost of living, as we all so well recognize, has continued to rise and was called to my attention as a member of the subcommittee, the so-called Ramey Subcommittee on Education and Training of the Committee on Veterans' Affairs.

Mr. RAMEY. Mr. Speaker, will the gentleman yield?

Mr. MEADE of Kentucky. I yield.

Mr. RAMEY. Mr. Speaker, as chairman of that subcommittee, I want at this time to pay unusual praise to the gentleman from Kentucky and to say that at his own expense he covered the whole State of Kentucky, a State that was neither east nor west nor north nor south. He covered the colleges where the wealthy attended, and covered those like Berea College, where the students work their way through. I believe that your survey discovered that the increase in the cost of living for the veteran was 29.3 percent. Was that not correct?

Mr. MEADE of Kentucky. That is correct.

Mr. RAMEY. And you found, furthermore, that the veterans led their classes and I believe as a result of your painstaking efforts in visiting these colleges you have records of the high five and the low five in standing in the classes? Is that not correct?

Mr. MEADE of Kentucky. That is correct.

Mr. JAVITS. Mr. Speaker, will the gentleman yield?

Mr. MEADE of Kentucky. I yield.

Mr. JAVITS. I congratulate the gentleman on this bill. There are five outstanding colleges in my district. I have talked with hundreds of men and girls who go to these colleges and who get the GI bill of rights allowance. They just cannot live on the allowances they get and pursue their studies. This is an enormous boon to them and is really a most constructive piece of legislation and a public service. I congratulate the gentleman.

Mr. MEADE of Kentucky. I thank the gentleman very much. May I say to the gentleman from New York that I appreciate his continued interest in this and his interest in student veterans pursuing their education under the GI bill of rights.

When visiting these colleges, as the gentleman from Ohio [Mr. RAMEY] has pointed out, I found that married veterans were encountering more sacrifices, regardless of the subsistence allowance being allowed, especially those with children. Of course, the more mouths to feed the more difficult it was to try to make ends meet. Survey after survey has been made, not only by me, but by other individuals and various veterans' organizations. All of them show that the subsistence allowance is too meager to enable those who have been deprived of their education to be able to complete it.

Mr. DEVITT. Mr. Speaker, will the gentleman yield?

Mr. MEADE of Kentucky. I yield.

Mr. DEVITT. What did the gentleman find with reference to the single veterans? How are they getting along?

Mr. MEADE of Kentucky. Of course, the single veteran does not have the responsibility of a family. His plight is not as bad as the married veteran or the married veteran with children. However, the most recent survey on that shows that the single veteran is short $42.12 each and every month. Of course, even this bill will not compensate for that amount.

Mrs. ROGERS of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. MEADE of Kentucky. I yield.

Mrs. ROGERS of Massachusetts. The gentleman from Kentucky had another bill covering somewhat the same conditions. He would like to have had that bill passed because that provided a higher amount for men with dependents. We have called up this bill because this bill has passed the Senate, and as soon as it passes the House it will be on its way to the White House, and perhaps this money can be provided for the next semester. The gentleman is very unselfish in allowing this bill to be called up.

Mr. MEADE of Kentucky. I appreciate that from the gentlewoman from Massachusetts.

Mr. ROBSION. Mr. Speaker, will the gentleman yield?

Mr. MEADE of Kentucky. I yield.

Mr. ROBSION. I wish to commend my colleague from Kentucky for his good work in bringing out this bill, and for what he has done in bringing these facts before the Congress. There is a college in my town in which there are many veterans. They all seem to be very earnest young men and are doing a fine job. I know from my talks with them that this legislation is very necessary.

Mr. MEADE of Kentucky. I appreciate the observation of the gentleman from Kentucky. I might say at that point that the student veterans all over the country are making by far the greatest record that has ever been made by any group ever to attend our institutions. Every college president, professor, or dean of an institution will say that this is the greatest boon to higher education this country has ever experienced.

Mr. WHEELER. Mr. Speaker, will the gentleman yield?

Mr. MEADE of Kentucky. I yield.

Mr. WHEELER. There has been some question raised, in light of the language used in the report on this bill, as to whether or not student veterans in institutional on-the-farm training programs would be included. Would the gentleman give me the benefit of his views as author of the bill, as to whether or not it was his intention and whether or not it was his understanding as to the intention of the committee, that these men enrolled in institutional on-the-farm training should be included.

Mr. MEADE of Kentucky. As author of this bill, it was my intention to include the on-the-farm training trainees as a part of this increased subsistence allowance. I might say it was the intention of the subcommittee of which the gentleman from Georgia [Mr. WHEELER] is also a member, to include the on-the-farm trainees. As far as I am concerned, if this statement will have any bearing, it should be made definite now, once and for all, that the on-the-farm trainees are included in this bill.

Mr. WHEELER. It was my feeling, in light of Public Law 377, enacted last summer, that the question was solved, but in view of some of the statements made in this report, I just wanted that clarifying statement from the author of the bill.

Mr. MEADE of Kentucky. There should be no misunderstanding about it now.

Mr. ANGELL. Mr. Speaker, will the gentleman yield?

Mr. MEADE of Kentucky. I yield.

Mr. ANGELL. I want to commend the gentleman for his fine work in connection with this matter. I want to say that we made a mistake in not bringing it up earlier. I feel it should have been brought up before we adjourned in the special session. In my own district there are hundreds of veterans, as I assume there are in other districts, who have found insufficient the present allotment in order to permit them to maintain their courses. Some of them have actually left school because they could not get by on the amount we are allowing.

I think on account of the increased cost of maintenance that faces these veterans, if for no other reason, we should pass the legislation. Certainly it is very meritorious.

Mr. ALLEN of Louisiana. Mr. Speaker, will the gentleman yield?

Mr. MEADE of Kentucky. I yield.

Mr ALLEN of Louisiana. Just a moment ago the gentleman stated it was the intention of the subcommittee, of which the gentleman from Kentucky was chairman, to include on-the-farm trainees in this bill. Could not the gentleman also say that it was the intention of the entire Veterans' Committee to include on-the-farm trainees in this bill?

Mr. MEADE of Kentucky. If it were not said then I think it should have been and I will say it now.

The SPEAKER. The time of the gentleman from Kentucky has expired.

Mr. RANKIN. Mr. Speaker, I yield 5 minutes to the gentleman from Louisiana [Mr. ALLEN].

Mr. ALLEN of Louisiana. Mr. Speaker, as one who was on the Veterans' Affairs Committee when the original GI bill was under consideration and as one who worked on that bill for about 6 months, I was most interested in title II on education. I still think it is the best part of the bill. Millions of young men and women have taken advantage of the educational features of that bill and we have by that act been able to give these young men who came back from the war and whose education was interrupted, the greatest opportunity of life.

After the bill began to work we soon found, however, that a great many veterans could not continue in school on the subsistence allowance provided in the original bill. Soon thereafter I introduced a bill increasing the subsistence allowance from $50 to $75 for single men and from $75 to $100 for those having dependents. We were not able to get that much but in conference the conferees agreed on $65 and $90, and that is the amount the veterans are now receiving.

We have found by actual experience and by actual contact with thousands of veterans over the country that with increasing prices it has been almost impossible for many of them to stay in school; so the very objective which we had in the original GI bill of giving these veterans a greater chance in life is being defeated. We have found that many young men who were taking full-time college work were not able to get out and do other things to earn a little additional money to supplement the amount we gave them and which they needed to be able to stay in college. So, Mr. Speaker, the lack of action, the inaction on this matter, has been the cause, I am afraid, of some veterans having to withdraw from college and having to get out in life and abandon their chance and their hope of getting an education.

Long ago, early in this Congress, many of us, both on the committee and other Members, presented bills further to increase the subsistence allowance. I have presented my bill and constantly pushed for favorable action.

We bring to you today this bill which increases the amounts the veterans receive. It is similar to the bill which the committee voted out. In the case of those getting $65 it is increased to $75; in the case of those now getting $90 it is increased to $105. We have also adopted in this bill a principle which I think is sound, very sound, of giving some special consideration to men trying to go to school who have a wife and children. I think it was back in the Seventy-ninth Congress that I introduced a bill giving this special consideration to married couples having children. So we have included in this bill an extra amount of $15 for those who have dependents. I think that is a very wise provision. Frankly speaking, a great many of these men having been in the Army several years, they are getting along in life and when they got out and got married they wanted to start families, which was the proper thing for them to do. However, the rearing of families has resulted in some of them not being able to go to school, therefore it is right and proper for the Congress to take cognizance of that fact and give recognition to these men by paying something more to them.

Mr. Speaker, I do not see how anyone could oppose this bill. To my mind it is one of the most meritorious pieces of legislation that has come before the House or will come before the House during the Eightieth Congress.

The SPEAKER. The time of the gentleman from Louisiana has expired.

Mr. RANKIN. Mr. Speaker, I yield the gentleman one additional minute.

Mr. ALLEN of Louisiana. Mr. Speaker, I hope when the roll is called, and I trust there will be a roll call, that there will not be a dissenting vote. I want the veterans to know that we are interested in their going to school and continuing their work with a new heart, a new hope, as they will be better able to feed and care for their families while they are going to school.

Mr. CHELF. Mr. Speaker, will the gentleman yield?

Mr. ALLEN of Louisiana. I yield to the gentleman from Kentucky.

Mr. CHELF. What is the estimated cost of this particular bill?

Mr. ALLEN of Louisiana. I understand the cost of this bill for 1948 will be about $207,000,000, but it is money well spent.

Mr. RANKIN. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, it has been my privilege to visit some of the schools where these men are taking this training and I have

never seen a more alert, more enthusiastic group of young men in my life. As the gentleman from Louisiana said, I doubt that there will be any opposition at all to this measure.

Mr. Speaker, I reserve the balance of my time, and at this point yield such time as he may desire to the gentleman from Georgia [Mr. PACE].

Mr. PACE. Mr. Speaker, I am delighted to give this bill my support, and I am particularly pleased to have the assurance from the author of the bill that it was his intention in drafting the bill and the intention of the committee in reporting the bill that this increase in the subsistence allowance will be for the benefit of those veterans now receiving an education under the institutional on-the-farm training as well as those veterans attending the established educational institutions.

I have listened with interest to the report of the survey made by the committee and certainly it demonstrates the urgent need for increasing this subsistence allowance. I made some individual investigation on this question and reached the same conclusion. In fact, anyone acquainted with the enormous increase in the cost of living since this program was originally set up in 1944 realizes that the present allowance is not adequate to meet the veterans' bare necessities of life.

It has taken us a long time to get this bill on the floor for consideration. This legislation is long past due and I sincerely hope it will have the unanimous approval of the House.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Mississippi [Mr. ABERNETHY].

Mr. ABERNETHY. Mr. Speaker, just a few minutes ago the House passed a bill raising the income ceiling for on-the-job trainees. This was a worthy bill, and I am glad to have had the privilege of supporting it.

We have before us now another worthy measure which will raise the subsistence pay for veterans pursuing their education under the GI bill. I regret that the Republican leadership, which by virtue of its majority in the House controls the legislative program, has not brought it before us sooner. It is long overdue. The Senate passed such a bill before the Congress recessed last July, and there was no reason why the House could not have taken similar action had the majority party seen fit to bring the bill to the floor for a vote. By special call we returned here in November, and at that time it could have been considered. Nevertheless, I am grateful for the privilege afforded the House to consider the measure even though it comes at a late date.

I was a member of the Committee on World War Veterans' Legislation which reported out the original GI bill. I believe that was back in 1944. The subsistence allowances then fixed in the bill were reasonable. But since that date there has been a continuous upward trend in the cost of living, which necessitates increases in subsistence allowances. Scores of veterans in the colleges of my State have written me in support of the bill. They are struggling to remain in college under the present high cost of living. It is my opinion that the educational benefits offered in the GI bill constitute the best part of the bill. Scholastically, student veterans are leading their classes. The benefits afforded have been a boon to education, and the country stands to reap great dividends from the educational advantages offered to and accepted by thousands of worthy veterans.

The bill has the endorsements of all of the veterans' organizations and of the general public. I trust that it will pass the House unanimously.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Kentucky [Mr. CHELF].

Mr. CHELF. Mr. Speaker, I have just been informed that in answer to the question I just asked of the gentleman from Louisiana [Mr. ALLEN], the approximate cost involved in this bill will be in the neighborhood of some $217,144,000. May I say that is a relatively small amount of money considering the billions of dollars that this Congress will be called upon to appropriate for the relief of Europe. I think our ex-GI's are entitled to this consideration. They fought to release the Old World from bondage and in our haste to further aid Europe in her desperate condition we do not want to overlook or slight those who were greatly responsible for her freedom. There is no argument but that both our GI's and Europe need immediate help. Let us give it to them, but let us also remember—"Charity begins at home." Give succor to the friendless, the homeless, the hungry—all of our good neighbors who are in distress; yes—but like the prudent man of his household—if a choice must come in due time by reason of financial complications or adversity—let us care for those members of our family residing under our own roof, first.

Mr. Speaker, I am very much in favor of this bill and shall vote for it so as to increase the student GI's subsistence allowance while at college.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Illinois [Mr. PRICE].

Mr. PRICE of Illinois. Mr. Speaker, I join my colleagues in giving my wholehearted support to this legislation to increase subsistence allowances for veterans now taking advantage of the educational program under the GI bill of rights.

As a member of the Committee on Veterans' Affairs I worked for approval of this legislation and I was proud of the support which the members of that committee under the chairmanship of the gentlewoman from Massachusetts [Mrs. ROGERS] gave to the program.

Had the recommendations of our committee been followed this legislation would have been approved by Congress almost a year ago and many more veterans would have been benefited by its provisions. It has taken an election year to smoke it out of the Rules Committee pigeonhole. Notwithstanding, I compliment the Rules Committee for giving its belated blessing to this important measure through the statement made earlier in the afternoon by the committee chairman.

Many veterans were forced to drop out of college because of failure to act more expeditiously on this bill. Our action in suspending the rules and passing the legislation this afternoon, will, I hope, make it possible for many hundred young men and women participating in the program to continue on and complete their education. Without the increased subsistence allowance which this bill provides I am certain a very large number of veterans would have had to follow the course forced upon the many hundreds of their comrades who last year were unable to carry on.

So, I say, it is better late than never and if the shadow of a coming election has accomplished this good thing for the veterans I am thankful—but I would have been much better pleased had this Congress considered the bill on its merit a year ago and held out its helping hand to so many who at that time were struggling against heavy odds to continue their education.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Indiana [Mr. MADDEN].

Mr. MADDEN. Mr. Speaker, 2 weeks ago I called the attention of the Members of Congress to the dire need of immediate action for legislation to give veterans an increased subsistence allowance so as to enable them to complete their education.

The Veterans' Committee of the House is to be congratulated on their work in holding hearings on this legislation and also on H. R. 246, which is substituted for Senate bill 1393 which provides ceiling provisions on job training. That bill, as well as House bill 4212, which is substituted for the identical Senate bill 1394, should receive the overwhelming support of the Members of the House.

During the past several months, especially when I was home during the Christmas holidays, I received numerous complaints from veterans and their wives regarding the struggle which they were enduring to successfully take advantage of the insufficient allocations under the GI bill of rights.

The cost of living was exceedingly high in June 1946, when price control was discontinued, but since that date, the cost of living has gone up 23 percent on the average, and for some food items and other necessities of life, it has more than doubled.

These two pieces of legislation will bring the veteran far-overdue aid to enable him to take advantage of his educational opportunities to which he is so justly entitled.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from South Carolina [Mr. BRYSON].

Mr. BRYSON. Mr. Speaker, I am wholeheartedly in favor of this measure.

Mr. Speaker, after too long a delay, I am delighted that the House is today suspending the rules and is considering two bills which are of vital interest to our veterans.

The original intent of the Congress in putting a ceiling upon the sums that

veterans could earn while receiving benefits under the veterans' laws was good. I believe that the purposes for this ceiling or restriction on incomes for veterans have been accomplished. If there were those who would take advantage of the liberal provisions of law, they have been weeded out. I know of veterans who are willing and able to earn far more than the sum proposed in the pending bill. Veterans, generally, would rather earn all of their income than to have any portion thereof given to them by the Government.

The modest sum to which the amendment raises the amount which a veteran may earn and receive from the Government certainly is not excessive. I am glad to find that Members of the House, generally, are in accord with the views I herein express and I am happy to know that the bill evidently will pass by a handsome majority.

The second bill which we are considering today, allowing increases in subsistence money to veterans, both single and married, is certainly in order. I am sure that Members of the House are personally acquainted with veterans, as I am, who are making great sacrifice to carry on their studies. The cost of living, not luxuries but mere necessities, is very high. Veterans are living on a very narrow margin. Many of the wives and children of these veterans are not receiving necessities to which they are entitled, to say nothing of luxuries, because of the zeal and determination of veterans to pursue their studies.

One of the most amazing revelations I have discovered is that the reports I receive from school and college officials in my district show that veterans are taking nearly all of the scholastic honors. Normally, the youngsters from 18 to 22 would be making the highest grades. Not so now. These veterans who have, many of them, been in actual combat now fully realize the great need for an education. Most of the higher grades come to veterans and in a great many instances, to married veterans with children. Many a youngster goes off to school in the morning along with his dad. It will be a great heritage to remember that veterans and sons or daughters left their humble places of abode in the early morning to pursue their studies.

There can be no criticism in the passage of either of these bills.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from North Carolina [Mr. JONES].

Mr. JONES of North Carolina. Mr. Speaker, I am heartily in favor of this legislation, which our veterans have needed for some time, as will be seen by my statement under extension of remarks.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to the gentleman from Minnesota [Mr. DEVITT].

Mr. DEVITT. Mr. Speaker, I have grave doubts as to the wisdom of enacting this bill in its present form. It is regrettable that this bill did not come up on a regular rule so as to permit of offering of amendments. I favor increasing the subsistence allowance for married veterans taking full-time institutional training. I do not believe that an increase should be given to single veterans, and I have doubts as to either the necessity or wisdom of giving it to married veterans without children.

The president of the University of Minnesota sent me the results of a survey conducted at that institution last year. It reflected the fact that married veterans with children just could not exist on the present allowance, but that single veterans were breaking even. It appears to me that married veterans without children are free to work part time, and their spouses normally have the same opportunity.

Yesterday this House passed a bill providing for a cut in taxes of about six and a half billion dollars. This Congress has its sights set on reducing the budget in order to accommodate such a huge tax cut. Our action today belies our expressed intention and conduct of yesterday.

My good friend from Florida, the Honorable DWIGHT ROGERS, has just said "there is nothing too good for our veterans." With that statement I agree, but the fact remains that we just do not have enough in our Treasury to compensate the veteran for all he has done for us. We must make our partial payment to him on a wise and deserving basis. The veterans taking institutional training constitute only a small percentage of the 15,000,000 veterans of the late war. How is this Government going to compensate the some eleven and a half million veterans who have not accepted any educational or other benefits under the present law? Should not some comparable recompense flow to them?

I counsel that we exercise our best judgment in parceling out such as we can afford for the veterans in the interest of equality of treatment.

This Congress can never give enough to the combat-disabled veteran or to the widows and children of our war dead. It is to these classes that we owe the most. Why do we not increase the disability allowances of the some two and a quarter million disabled veterans of the late war? Are they not more deserving than the able-bodied veterans taking advantage of the educational benefits of the present laws without having suffered any disability incident to the war? In my judgment they are. The money you are authorizing to be appropriated today for single veterans and married veterans without children should, with greater justice and equality, go to the disabled veteran.

Within a few short years we veterans and the members of our families will constitute almost half the total population of this country. We are so numerous that we have almost lost our identity as a group. In my judgment, this is as it should be. We are citizens first and veterans second, and in considering the enactment of laws for the benefit of veterans, this thought should be uppermost in our minds.

I shall vote for this legislation because it increases the subsistence allowance of married veterans with children. They are deserving. It is not possible under the parliamentary procedure now prevailing to offer an amendment to alter this bill so as to limit the provisions to that class of veterans.

I hope that in the consideration of future veterans' legislation we will be governed by principles of equality and justice for all classes of veterans and be guided by the tenet that we veterans are citizens first and veterans second.

Mr. RANKIN. Mr. Speaker, I yield such time as he may desire to my distinguished colleague from Mississippi [Mr. WINSTEAD].

Mr. WINSTEAD. Mr. Speaker, I am whole-heartedly in favor of this legislation. I feel that a great number of our young veterans have taken advantage of this part of the GI bill of rights to further their education. I have had an opportunity to visit many of our junior colleges and State institutions and, after making a careful check, have learned that in all cases these veterans have returned to school in all seriousness and are making the most of their opportunities.

With inflation and the cost of living as it is today, many of these veterans would not be able to continue in school without this increase. Certainly, with the billions of dollars being spent at home and abroad, this small increase should be granted to our own veterans to whom the future of this country must look. We all agree that through proper education of our people we can hope for a greater America.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I yield 1 minute to the gentleman from Illinois [Mr. BUSBEY], one of the authors of the GI bill of rights.

Mr. BUSBEY. Mr. Speaker, H. R. 246, a bill to raise ceilings on wages and allowances payable to veterans undergoing training on the job, and H. R. 4212, providing increased subsistence allowance to veterans pursuing certain courses under the Servicemen's Readjustment Act of 1944, as amended, deserves the support and vote of every Member of the House of Representatives.

For 27 years I have been intensely interested in all legislation pertaining to veterans, particularly the disabled, and I feel that the increases provided for in these two bills are indeed very, very small when considering the cost of living has gone up over 65 percent. If this Congress can vote billions and billions of dollars to perpetuate socialistic governments in power in Europe, it would be a shameful day in the history of this country if we did not vote this small increase which means so much to veterans in America.

The Seventy-ninth Congress, of which I was not a Member, hastily passed legislation to which a rider was attached restricting the earnings of our veterans. During my visits with veterans throughout the district I have discovered that legal interpretations made by the Veterans' Administration, particularly on the overtime phase, have caused discrimination and brought complaints from both the GI's and their employers against the Government fumble of the job-training program. Veterans entered into contracts with employers and assumed obligations for homes with the promise that their income would be maintained at a substantial level. Then

they found themselves without sufficient income to meet their obligations.

Their initiative was stifled. It would be far more sensible to trim down the tremendous number of Federal employees and duplication of effort in the agencies rather than break our promises to honest GI's and honest employers.

Mr. Speaker, I was one of the members of the Veterans' Committee who worked on the original GI bill of rights and I support this legislation 100 percent.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent that all Members who desire to do so may extend their remarks at this point in the RECORD on this bill, and that all Members may have five legislative days in which to extend their remarks in the RECORD on this bill.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mr. MATHEWS. Mr. Speaker, I rise in support of these bills, H. R. 4212 and S. 1394, to increase subsistence allowance rates for World War II veterans pursuing full time institutional training.

Under existing circumstances there would seem to be no substantial objection to this bill except on the matter of cost, which is estimated to be $217,144,000 for the coming year. After that the cost should greatly decrease each year and should become almost negligible in about 4 years.

Prices of everything have risen considerably since the original rates were fixed, so that veterans who took advantage of the privileges extended them by the Congress, now find themselves in a much more difficult position than they had anticipated. Of course, Congress did not guarantee every veteran who wanted it, a college education wholly free of cost to himself, but gave him a substantial aid in obtaining that education, provided he augmented his income by his own efforts.

There are many thousands of independent and self-reliant veterans who have not complained about the situation which has since arisen, but have been thankful for the help they have received, even though they are much more handicapped now than they anticipated when they undertook their courses.

Having been induced to make this undertaking, and conditions having changed as I have pointed out, these veterans are entitled to the consideration proposed to be given them by the pending legislation, and since I further believe that a large number of them will be better citizens and able to contribute more to the Nation at large, it appears to me the money is well invested.

Furthermore, veterans deserve this consideration, as they are certainly in a different category from all other citizens in this respect.

There are many places for the Government of the United States to economize instead of at the expense of those citizens whose heroic efforts in large measure preserved the existence of that very Government.

THEY CAME BACK MEN

Mr. KLEIN. Mr. Speaker, I have already expressed my views in favor of the bill to increase to an American living standard the allowance to the former servicemen enrolled in the on-the-job training program, which we just passed.

The same arguments apply to the measure now pending before us, which will increase the allowance to veteran students enrolled in colleges and universities under the Servicemen's Readjustment Act.

Naturally, I support and will vote for this bill.

Time is of the essence; the new terms are opening this month in most colleges and universities, and without some increase thousands will have to drop out.

My only criticism is that the increases provided in this bill are not enough to enable a man to support himself and his dependents.

Mr. Speaker, when our country was imperiled by the Nazi aggressor we took these young men out of the classrooms. With brief training, we sent them into battle. They went to war beardless boys; they returned to peace as grown men. They acquired wives and inevitably babies.

These men were good soldiers, and their wives are good soldiers; otherwise they would never have stuck out the grueling life of a veteran student, living in barracks, in trailers, in kitchenette apartments, or made-over houses, destitute of modern conveniences, and subsisting on an allowance which, at present inflated prices, will not buy sufficient food, let alone clothes; which has no room for doctor bills or special baby diets or a permanent wave.

The increases we are offering them today, if not insulting, at least are not comforting; they merely assure these million or so young men that if they—and their wives and children—are willing to continue to struggle along on a pittance for the sake of a degree they can do so. This bill will provide no luxuries, Mr. Speaker, I assure you. If prices continue to rise, it will not buy all the necessities.

Nevertheless, because of the urgency, I shall vote for passage, while expressing the devout hope that the majority leadership will entertain new legislation further increasing the allowances in the near future.

GI SUBSISTENCE INCREASE VITAL

Mr. BLATNIK. Mr. Speaker, I am giving full support to H. R. 4212, which would increase subsistence payments for veterans attending school under the GI bill of rights. This measure is long overdue and is absolutely necessary to offset the present cost of living and to carry out the will of Congress.

Congress enacted the Servicemen's Readjustment and Education Act of 1944 to guarantee education to all veterans who wish to attend school, and several million have taken advantage of this chance to improve themselves by attending college. Today, however, the whole education program is being jeopardized by the ever-rising cost of living.

Few except the veterans themselves seem to realize that at the present time single veterans receive only $65 per month, and married veterans, regardless of the number of their dependents, only $90 monthly. Since these payments were fixed, the cost of living has increased about 35 percent, and it is clear that few veterans are able to stay in school on these amounts without outside financial help.

The present bill is not overgenerous. The veteran without dependents will receive only $75. The married veteran receives an additional $15 or $105 monthly, and if he has two or more dependents, this will be upped to $120.

Let me mention a few facts and figures to demonstrate how serious the situation is regarding GI education, and how the whole purpose of the program has been threatened by inflation. According to recent studies the average monthly living expenses for single veterans attending college amount to $121. Married veterans can get by on $198.

These figures speak for themselves. Present subsistence checks are completely inadequate, and the increase we are considering here today, while long overdue, will not solve the problem. The truth is, we have not kept faith with the veteran by striking at the real cause of his difficulties and enacting a wise inflation-control program, a sound housing program, and a program to provide needed medical care.

In the meantime, and while this bill has been pending in committee, some half a million veterans have been forced to leave school, and it is estimated that at least half of these have left for financial reasons. I propose that passage of this needed legislation be but the first step in a real program to keep our wartime promises to the veteran and to his fellow citizens.

Mr. SARBACHER. Mr. Speaker, as a member of the House Committee on Veterans' Affairs, I am extremely pleased that the House of Representatives will consider and, I am sure, pass this much needed veterans' legislation. Both the on-the-job training and the increase of GI subsistence bills are not only timely but vital at this time.

Although the President, in his recent message to Congress, stated his opposition to this legislation, I do hope a reconsideration will be made, allowing this to become law as soon as possible. With a relief program to almost the whole world, it is amazing that there should be any possibility of a Presidential veto on legislation for the men who gave so much to the very preservation of this country; it would, indeed, be a sad, ironical twist.

Mr. PHILLIPS of Tennessee. Mr. Speaker, I rise in support of H. R. 4212, which is identical with S. 1394, which was passed by the Senate during the first session of the Eightieth Congress. It has been recognized for many months that increased subsistence allowance to veterans pursuing courses under the Servicemen's Readjustment Act of 1944, is necessary. A number of factors has created a situation that merits an increase in subsistence to young men and women attending schools and colleges under the Servicemen's Readjustment Act of 1944. High rents, high taxes, and the general high cost of living, which applies to clothing, food, and shelter, makes it necessary for an increase in subsistence. The House bill, H. R. 4212,

and the Senate bill 1394 provide an allowance of $75 per month without a dependent or $105 per month with one dependent, or $120 per month with more than one dependent.

The Veterans' Affairs Committee in the House has conducted extensive hearings on the above measure. Many educators, including public-school men, presidents of colleges and universities, as well as instructors and students, testified before the House Committee on Veterans' Affairs, of which I am a member. The committee made a thorough study of the whole problem, and recommended this bill after careful consideration. The legislation under consideration has the support of the veterans' organizations of this country.

The records show that veterans who are receiving training under this program are sincere, conscientious, and efficient in their studies as evidenced by the fact that they rank in the upper high percentage with reference to grades in our schools and colleges. It is estimated that more than 2,000,000 fine young men and women are availing themselves of the benefits and opportunities offered under the provisions of the Servicemen's Readjustment Act, which sets up an educational program. It is remarkable how well schools, colleges, and universities have responded to the needs of these ex-service men and women, and have expanded their facilities to accommodate students for enrollment. This bill recognizes the truth that many veterans served for long periods of time, ranging from 3 to 5 years, and that their education was interrupted. The present bill acknowledges that the American family is the foundation of our Republic, and therefore, gives additional encouragement and aid for the support of dependent children. The present increase will be a great boost to public education, and make it possible for both single and married veterans to remain in school and finish their education.

Mr. DONOHUE. Mr. Speaker, I look upon this type of legislation as a duty which the Congress owes to the men who served in the armed forces, who, by reason of having been called into the service a..d required to remain for various periods of time, some of them for 5 or 6 years, were deprived of an education. I think it is unfortunate that we are not giving them sufficient to enable them to receive an education without having to look about for a part-time job in order that they may thereby earn money to supplement the allowance which the Government gives them for that purpose. I think it is very unfortunate, because these boys gave unstintingly of their time and services to their Government during the worst war this country or any other country has ever experienced.

From the standpoint of emotional feeling, the men who made that sacrifice ought to be given full consideration. We should see to it that their needs are met and their opportunities restored to as great an extent as possible.

From the practical, economic side, these men become far better citizens when they are given a full education. They make a greater contribution to their Government. Economically, the investment is wise.

Also, the Government owes them a debt of gratitude. It owes it; it is not a matter of making a contribution; it is not a matter of making a gift to a man who answered the call of his country in time of war. He ought to be given sufficient money to enable him to acquire an education. The Government took away from him his opportunity to obtain an education, because it kept him in the armed forces—perhaps a part of the time overseas—during the very period of life when he would otherwise have been in school.

I am told by many educators that the best students in the schools today are those who have returned from 3 or 4 years' service in the armed forces and are taking advantage of the GI bill of rights, under which they are undertaking to complete their education.

They know that the period of youth, in which they must acquire an education, is now upon them and is rapidly slipping away, and they are eagerly seizing upon the opportunity to go to school and receive the education of which the war deprived them. They are the best students in the universities of our land.

If we have money to scatter like seed in the wind in Europe and elsewhere in the world, why can we not also at least give freely to our own men who fought under our flag for their country during a time when they were much needed? Why require them to seek part-time employment and become part-time workers and part-time students? They were not part-time soldiers while the war was being fought.

I urge my fellow Members to vote favorably on this bill.

Mrs. ROGERS of Massachusetts. Mr. Speaker, several Members have asked about the estimated cost of this bill. I think even the Veterans' Administration estimate is high. The outside total would be $217,144,000, a lower estimate than the House membership realizes.

Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. Ross].

Mr. ROSS. Mr. Speaker, the House Committee on Veterans' Affairs on July 23 of last year reported favorably H. R. 4212, a measure comparable to the Senate bill we now have under discussion. The committee approved this measure to carry out what it felt was the intent of the Congress when it enacted the Servicemen's Readjustment Act. It reported this bill favorably only after extensive hearings by the Veterans' Subcommittee on Education and Training, of which I am a member.

Mr. Speaker, we had before our subcommittee college registrars and deans and student veterans from all over the United States. Representatives from every veterans' organization appeared before the subcommittee. We had submitted for our consideration tables showing the rising cost of living. We also had submitted to us figures showing the great number of veterans who found it necessary to drop out of school because of the inadequacy of the subsistence allowance they were receiving. After weeks of studying this question the subcommittee reported this measure unanimously. Every veterans' organization has recommended its passage.

The cost of living has risen constantly since last July. In order to help these student veterans complete their education, it is imperative that we provide additional subsistence allowance. I hope this bill will pass the House unanimously.

Mr. RANKIN. Mr. Speaker, I yield 5 minutes to the gentlewoman from New Mexico [Mrs. LUSK].

Mrs. LUSK. Mr. Speaker, a few moments ago we heard our colleague the gentleman from Kentucky [Mr. MEADE] open the discussion of this bill by stressing the sincerity and the fine ability of the veterans who are training under this program. I should like to go further and say that just before the holidays I had a number of calls from young men who were considering whether or not they would be able to continue their education, in view of the fact that they expected this bill to be considered in time to help them with their expenses through the second semester of this year. Of course, I did not have any definite information at the time, but in talking with those men I was very much impressed with their anxiety over whether or not they would be able to continue their college work to graduation. I am glad to say that with the action we anticipate here today those men will be able to graduate and will be able to go out into the different professions and fields of activity they have planned for themselves, and I am sure the entire country will join with us in real appreciation of the fair consideration this body is giving student veterans today.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio [Mr. RAMEY].

Mr. RAMEY. Mr. Speaker, a great many hearings were had on this bill before the subcommittee of which I had the honor to be chairman. Every dean, and every president, as well as all veteran students, were invited to be present. Most of the colleges sent teachers and students. Day after day of testimony was had. Thank God the Rules Committee has released this bill to the floor, which we have urged since the hearings. I hope all have read the hearings.

A grateful Nation today is making sure that each veteran, married or single, is equipped for life.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. POTTS].

Mr. POTTS. Mr. Speaker, the President in his state of the Nation message told Congress that he thought everything had been done for the veteran which ought to be done. The House will today have an opportunity to voice its dissent, in which I shall join.

I have often said that a benefit conferred on a veteran is not actually a benefit unless the veteran can avail himself of it. In many cases he could not.

We shall have two opportunities today to show our gratitude to those who lost so many years of their lives in the preservation of ours. We shall vote to extend the provisions of the on-the-job training and veterans' subsistence programs. I shall vote for them.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I yield such time as he may desire to the gentleman from Kentucky [Mr. ROBSION].

Mr. ROBSION. Mr. Speaker, I arise in support of H. R. 4212, which provides for increased subsistence allowance to veterans pursuing certain courses under the Servicemen's Readjustment Act of 1944, as amended.

I wish to commend my colleague from Kentucky [Mr. MEADE], who is a member of the Veterans' Affairs Committee of the House, for having introduced this meritorious legislation and also commend that committee for having given this bill favorable consideration and for having brought it to the House and thereby affording myself and other Members an opportunity to urge its passage and to vote for it.

Approximately 2,000,000 veterans of World War II—young men and young women—are attending schools, colleges, and universities of our country and are pursuing courses of study that they and their advisers have suggested to them. A majority of these young men and women had their education arrested in order to enter the service in defense of our country. I was present and helped to pass the original law which fixed the subsistence allowance of single veterans at $65 a month who did not have a dependent or dependents, and fixed the allowance at $90 a month for those who had a dependent or dependents. Since that law was passed, the cost of room, board, and so forth, has increased nearly 30 percent and many of the school authorities throughout the country, the veterans' organizations, and the veterans themselves pointed out that a great many of these young men and women who had entered upon their courses of study could not continue in school without additional allowance. In fact, hundreds and hundreds of them were forced to leave their school because the amount provided did not cover their actual and necessary subsistence requirements, and these various groups, including the veterans' organizations—the American Legion, the Veterans of Foreign Wars, and others—have insisted that this should be increased to $75 a month for the veterans without dependents and to $105 a month to the veteran who has one dependent and $120 a month for the veteran who has more than one dependent.

I have personally talked to scores and scores of veterans who are attending high schools and colleges in my own district, and I am thoroughly convinced that this increase is necessary and therefore I am happy to have the opportunity today to urge the passage of this bill and to vote for it. Many of us have been urging for several months that this bill be brought up and be adopted. Section III of the bill also provides that veterans may receive subsistence for 2 months after his employability is determined. That, I am sure, is to bridge him over from the time he has finished his course until he can secure employment.

I have been greatly and most favorably impressed with the character of these young men and women and their very great desire to make the most of the opportunities that have been extended to them. It is one of the greatest programs ever put on by the United States Government in the aid of education. It will result in great benefit to the veterans themselves and to our country as a whole. A bloody and terrible war came on without any fault of these young people. Their educational training was rudely interrupted by this war. They left their homes, their families, their friends and contributed their full share in winning the bloodiest and greatest war in all history. This great Republic owes to them a debt of gratitude which cannot be fully repaid by this or any other act of Congress. My only regret is that this measure was not passed last fall or during the regular session of Congress, but other matters of national and world-wide concern prevented earlier action.

These young men and young women—veterans of World War II—also receive their tuition and books. I know that they will continue to make the most of these opportunities and that these will prove a great blessing to them and they will enrich in service this great Nation.

There will be some who will complain of our action but let us not forget that we gave to other countries free during the war nearly $60,000,000,000 and since the war, our country has contributed more than $24,000,000,000. Our first duty is to be of service to the people of our own country and especially to its defenders and their dependents and we should not at any time become overgenerous with the peoples of other countries and neglect our own.

It was a pleasure to me to have the opportunity to rise and support H. R. 246 to raise the ceilings on wages and allowances of World War II veterans undergoing training on the job, and for other purposes. I was happy to support that bill and to observe that the House passed it by an almost unanimous vote.

I sincerely trust the bill before us—H. R. 4212—will receive the unanimous vote of the Members of the House.

The SPEAKER. The question is on suspending the rules and passing the bill.

Mr. RANKIN. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The Clerk called the roll; and there were—yeas 372, nays 6, answered "present" 1, not voting 51, as follows:

[Roll No. 11]

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The Clerk announced the following pairs:

Additional general pairs:

Mr. Bakewell with Mr. Hedrick.
Mr. Bennett of Missouri with Mr. Morgan.
Mr. Chiperfield with Mr. Lucas.
Mr. Cole of New York with Mr. Camp.
Mr. Gross with Mr. Fernandez.
Mr. Kilburn with Mr. Hays.
Mr. Jenkins of Ohio with Mr. Sabath.
Mr. Bender with Mr. West.
Mr. Hartley with Mr. Powell.
Mr. Chadwick with Mr. Buckley.
Mr. Coudert with Mr. Heffernan.
Mr. Martin of Iowa with Mr. Morrison.
Mr. Knutson with Mr. Bulwinkle.
Mr. Jones of Washington with Mr. Fallon.
Mr. Hope with Mr. Pfeifer.
Mr. Cunningham with Mr. Harless of Arizona.
Mr. Simpson of Pennsylvania with Mr. Johnson of Oklahoma.
Mr. Scoblick with Mr. Bloom.
Mrs. Smith of Maine with Mr. Poage.
Mr. Talle with Mr. Dawson of Illinois.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mrs. NORTON. Mr. Speaker, I was present during all the debate on the bill just passed and during part of the roll call, but unfortunately was called from the floor during the roll call and missed the opportunity to vote. Had I been present, I would have voted in favor of the bill.

REGULATING BUSINESS OF LIFE INSURANCE IN THE DISTRICT OF COLUMBIA

Mr. DIRKSEN. Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 146) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That the Clerk of the House of Representatives, in the enrollment of the bill (H. R. 1634) to amend section 1, and provisions (6), (7), and (8) of section 3, and provision (3) of section 4 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia", and to add sections 5a, 5b, and 5c thereto, is authorized and directed to make the following corrections in the House engrossed bill:

Page 8, line 3, after "one" insert the following: "per centum."

Page 13, line 20, strike out "5" and insert in lieu thereof the following: "5b."

Page 13, line 20, strike out "in" and insert in lieu thereof the following: "In."

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. YOUNGBLOOD. Mr. Speaker, due to unfortunate circumstances, it was impossible for me to be present to vote on the passage of the bill just passed. I ask unanimous consent that I may be recorded as having voted in favor of the bill.

Mr. RAYBURN. Reserving the right to object, Mr. Speaker, that has never been done in the House. A Member can rise and say how he would have voted, but we cannot start the practice of what the gentleman seeks to do. It is not that I want to deprive the gentleman of anything, but I must object to the request.

Mr. YOUNGBLOOD. Then, Mr. Speaker, may I state that although I should have liked to be recorded as being in favor of the bill, the rules of the House prevent me doing so, so I repeat that, due to unfortunate circumstances, it was impossible for me to be present while the vote was being taken on the passage of the bill; and had I been present, I would have voted in favor of the bill.

EXTENSION OF REMARKS

Mr. SMITH of Wisconsin asked and was given permission to extend his remarks in the RECORD and include extraneous matter.

Mr. CELLER asked and was given permission to extend his remarks in the RECORD in two instances.

Mr. KEFAUVER asked and was given permission to extend his remarks in the RECORD in two instances.

Mr. BLATNIK asked and was given permission to extend his remarks in the RECORD and include an article.

THE PRESIDENT'S CIVIL-RIGHTS MESSAGE

Mr. WINSTEAD. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WINSTEAD. Mr. Speaker, I deeply regret that our President has seen fit to send down such a message as he did on yesterday. It follows the recommendation of his so-called Civil Rights Committee, a committee the majority of which are members of racial minority groups and most of the others of known radical views. Such program would destroy the laws of the Southern States. The entire message is built on the premise that we mistreat Negroes in the South and that the civil rights of the Negroes are not protected. This I deny. We understand the Negro. If anything, southern officers are more lenient on the Negro who violates the law.

The President in this message advocates the passage of an antilynching bill. No one is any more opposed to lynching than I am. However, lynching has never been as prevalent in the South as gangster killings in the North and no one advocates making gangster killings a Federal offense. Oh, no, there they are willing to leave such prosecutions in the hands of the State.

There is no question but what lynchings are no longer, you might say, in the South. I quote from the Meridian Star, of Meridian, Miss.:

> To the great credit of the South, lynchings declined from six in 1946 to one in 1947, according to the annual report by the Tuskegee Institute (a Negro institution). * * * If the happier trend of 1947 is projected into the current year the United States will have no lynching in 1948. One other encouraging factor in the report is the prevention of lynchings in 31 different cases.

Thus we see that there is no serious need to make such crime a Federal offense in order to break it up. In fact if the antilynching bills now pending are passed they might well be termed the lynching bills because they would have tended to encourage lynching in the 31 cases which the Tuskegee Institute reports were prevented. For if an officer is to be personally responsible if a prisoner is taken from him and lynched it might in some cases tend to make him a little slower to arrest and protect the defendant in those crimes so atrocious as to make a few want to take the law in their own hands. Certainly such bills would not improve a situation where there was only 1 lynching and 31 prevented by the State officers.

We must come to the conclusion that the President's advisers are not trying to prevent crime but are in reality trying to obtain the support of the Negro vote in the Northern States, and if they can get those votes by passing an antilynching bill apparently they would say, What of it, if a few more Negroes lose their lives?

What makes the matter more serious, Mr. Speaker, is that the Republican Party is trying to outdo the President in urging the passing of such legislation in an effort to get the same Negro vote in the North. Both parties seem to lose sight of the great body of American citizens who believe in States' rights, who in their State courts and in the State legislatures are busy taking care of the rights of all their citizens much better than could possibly be done by the Federal Government from Washington.

Take the FEPC, does anyone believe that either party would sponsor such an un-American bill as this under the terms of which every businessman in the United States would be told from Washington who to employ and who to fire, if it were not for their desire to obtain the votes of the radical groups who sponsor such measure including the Communists?

In the past the Republican Party has sponsored such legislation as is recommended by the President, and true, they were sponsored by certain Democrats but always heretofore they have stopped just short of losing the support of the Southern States. Now it appears that they go further than ever before. President Roosevelt never went so far.

A short time ago Governor Wright of Mississippi, a fine Governor, one not given to intemperate speech making, in

addressing the State legislature, called attention to the seriousness of the situation. He knew that conditions were good in our State and that all citizens were protected in the State courts and our conditions compared favorably with conditions in any State in the Union. He stated then that if certain Democrats did not quit trying to needlessly attack the South, her State laws and institutions under which the people of two races had lived peaceably for generations that it would probably become necessary for the Democrats to take action to break away from those who attack us for support in other areas.

Such a course is not easy for a southern Democrat, whose father before him was a Democrat. The question arises, Where can the southern Democrats go? That is a serious question. Just now I do not know the answer, but more and more Democrats of the South are seeking some way to divorce themselves from those who call themselves Democrats but who in no way reflect the principles of Jefferson, and who are willing, it seems, to destroy the laws of the Southern States, end segregation, and make of the people of this Nation a mongrel race.

It seems to me that the leadership of the major parties, both Democrat and Republican, in this country could devote themselves to constructive legislation and thereby appeal for support and votes instead of stooping so low as to sponsor the FEPC, the antilynching bill, and the anti-poll-tax bill, all lifted from the program of the Communist Party, in their effort to secure the votes of the radical minorities in this Nation.

EXTENSION OF REMARKS

Mr. DAWSON of Utah asked and was given permission to extend his remarks in the RECORD and include a statement.

PERSONAL ANNOUNCEMENT

Mr. BYRNE of New York. Mr. Speaker, I was inadvertently absent during roll call No. 10. If I had been here, I would have voted "aye."

INDEPENDENT OFFICES APPROPRIATION ACT, 1949

Mr. WIGGLESWORTH. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 5214) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1949, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that debate continue throughout today and not to exceed 2 hours tomorrow, the time to be equally divided between the gentleman from Florida [Mr. HENDRICKS] and myself.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. HENDRICKS. Mr. Speaker, the gentleman from Alabama [Mr. ANDREWS] will have charge of the time for the minority on this bill.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from Massachusetts [Mr. WIGGLESWORTH].

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 5214, with Mr. LEONARD W. HALL in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. WIGGLESWORTH. Mr. Chairman, I yield myself 20 minutes.

Mr. Chairman, the independent offices appropriation bill is the first appropriation bill under the Presidential budget calling for the expenditure of $39,700,000,000 in the fiscal year 1949—the largest peacetime budget in history—recommended to the Congress in spite of mounting prices, the threat of devastating inflation, and the administration's lip service to retrenchment and economy.

This is the first part of the independent offices appropriation bill, dealing with some 30 agencies or items and with a billion dollars' worth of estimates. It will be followed later by part 2, dealing with three agencies, namely: Atomic Energy Commission, Maritime Commission, and Veterans' Administration, with estimates calling for the expenditure of about $6,000,000,000.

Of the $1,000,000,000 estimates, only about $265,000,000 are open to reduction. As is indicated on page 2 of its committee report, the Congress has no control over the balance which comprises more or less fixed estimates.

Of the $265,000,000, your committee recommends a reduction to the extent of $56,000,000, or approximately 21 percent. In addition, it recommends rescissions to the extent of $3,000,000, giving an overall total reduction of $59,000,000.

It is true that the bill carries $196,000,000 more than was appropriated for the current fiscal year for the same activities. Attention is called to the fact, however, that of this total increase, over $195,000,000 is in respect to a single item for postwar highway projects, over which your committee has no control.

Details of the action recommended will be found in the committee report. The report is practically unanimous. It is unanimous with the possible exception of one item, and I want to express my appreciation to the minority members of the subcommittee in charge of this bill for their help and cooperation in its preparation. It has been a pleasure to work with them.

As a matter of policy, your committee has attempted to hold requests, wherever possible, to or below current levels, to postpone requests for new functions, and to allow increases only where they are obviously justified. This policy seems imperative in view of inflationary conditions at home and of the tremendous demands both at home and abroad.

It will be noted that no agency estimate submitted to your committee by the Bureau of the Budget, with the approval of the President, reflects a decrease over the current fiscal year except that for the General Accounting Office. As a matter of fact, almost every item reflects an increase.

THE WHITE HOUSE

The White House, Mr. Chairman, is no exception to this rule. For the White House Office, there is requested over $969,000 compared with something over $952,000 in the current fiscal year, and with about $302,000 in the spending days of 1944.

For the Executive Mansion and grounds there is requested over $230,000 compared with some $202,000 in the current year—the largest request ever made in this connection—including provision for additional personnel eliminated from the rolls of the Federal Works Agency as the result of reduced appropriations for that agency.

In addition, through the so-called emergency fund for the President, there is requested some $226,000 for additional personnel for Mr. Steelman, Mr. Clifford, and for liaison work with the advertising and motion-picture industries of the country.

There is no indication here of a desire for economy in governmental spending. On the contrary, the example is set by the White House for all agencies to request increased appropriations in spite of the condition confronting the Nation at this time.

There are three agencies, Mr. Chairman, in this bill whose activities pretty much affect the entire Government.

Their testimony is of especial interest. I refer to the Bureau of the Budget, the Civil Service Commission, and the General Accounting Office.

BUREAU OF THE BUDGET

The testimony of this agency, Mr. Chairman, reflects a direct national debt of over $256,800,000,000, together with contingent liabilities and other obligations of about $163,500,000,000, or a grand total debt and contingent liabilities of over $420,300,000,000, or roughly, $3,000 for every man, woman, and child in the United States.

Under leave to extend my remarks I insert in the RECORD at this point a table summarizing this indebtedness.

The public debt and contingent liabilities

[Source: Bureau of the Budget]

Direct public debt	$256,899,844,854.11
Contingent liabilities	26,936,089,014.24
Unliquidated obligations	13,787,000,000.00
Guaranteed loans	6,473,673,957.18
Insurance in force	116,273,397,804.00
Total	420,370,005,629.53

This testimony also indicates estimates of personnel on the Federal pay rolls on July 1, 1948, within continental United States, of 1,750,000; outside the United

States 242,896; and as of July 1, 1949, inside the United States 1,750,000 and outside the United States 243,742.

In other words, looking ahead to the end of fiscal year 1949, the Bureau of the Budget sees an actual increase of about 1,000 outside the United States and no decrease whatsoever inside the United States. This is in striking contrast with representations made by the Administration through its vast propaganda machine.

Moreover, the estimate within the Nation is based upon the assumption that no part of the new legislation called for by the President requiring $5,700,000,000 of expenditure will, in fact, be enacted into law. If any part of that program is put into effect, obviously the personnel within the country will increase correspondingly.

The total on the rolls as of July 1, 1949, of approximately 2,000,000 compares with the total of some 719,000 at June 30, 1935, and 920,000 at June 30, 1939.

There appears, Mr. Chairman, to be no adequate standardization by the Bureau of the Budget in such fields as budget work, accounting, personnel work, publicity, the ratio of highly paid to low-paid personnel, and other matters common to all agencies. Let us take one example. Let us consider the number of employees engaged in personnel work.

In 1938 the total number of such employees was 4,197; in 1948 it amounted to 25,191, or an increase of over 600 percent. The ratio of persons engaged in that work to the total number of personnel on the Federal pay rolls varies from a maximum of 1 to 18 to a minimum of 1 to 121, an average of about 1 to every 85 persons on the pay rolls.

Inquiries of leading business organizations of this country, such as railroads, steel companies, manufacturing and business machine establishments, reflect a ratio of a maximum of 1 to 200 and a minimum of 1 to 3,500 employees.

In July, last year, your committee requested the Bureau of the Budget to make a survey and report on this matter with a view of standardizing and reducing the number of persons engaged in personnel work. Four months later, in November, the Budget Bureau reported that it would take four people a year to obtain the necessary information on which to base any recommendations. In other words, the Bureau of the Budget, by its own confession, has been authorizing these tremendous increases in this field of work year after year without adequate information on which to base intelligent action.

It is believed that this is but one example of a similar lack of proper information on the part of this agency.

The Bureau of the Budget is apparently adopting the practice of attempting to interpret the will of the Congress for the agencies of Government to the extent of controlling the expenditure of appropriations according to its own ideas.

In one recent instance an interpretation contrary to that of the agency resulted in largely disturbing the shipping and ship-building industry of the country. The interpretation of the Bureau of the Budget was wholly without justification, and was made without consulting either the Senate or House Committee which wrote the legislation involved.

It is because of this interpretation that the committee has inserted the language on page 2 of the report under the heading, "United States Maritime Commission."

It is to my mind extremely doubtful if the Bureau of the Budget has any authority in the field of statutory interpretation. That would seem to be a matter primarily for the General Accounting Office. If, however, the jurisdiction exists, surely it is not too much to ask that the appropriate committees of Congress be contacted before interpretations are made which are clearly contrary to the will of the Congress.

The Bureau of the Budget has also apparently developed the practice of instructing agencies to include in appropriations for any current year supplemental or deficiency requests, even where those requests have never been submitted to the Congress.

In one recent instance the Civil Service Commission was instructed to include a supplemental request of $2,500,000 which it appears may never be submitted for consideration by the Congress. It was included for purposes of comparison between 1948 and 1949 appropriations requests.

Obviously a practice of this kind presents an entirely false picture of the facts. It must be discontinued.

It would further appear, Mr. Chairman, that the Bureau of the Budget has been guilty of recommending transfers or expenditures for purposes which are unauthorized by substantive law.

Recently, a transfer of $500,000 was recommended from funds appropriated for relief in European devastated areas, to defray the expenses of the so-called Luckman food committee. The only excuse given was that both agencies were dealing with food.

There seems to be a growing tendency to apply appropriated funds to purposes never contemplated or authorized by the Congress.

The Bureau of the Budget has failed in eight instances to supply detailed information requested for inclusion in these hearings. It would seem that much of this requested material should have been readily available if this agency were concentrating on the duties for which it is primarily responsible.

The fundamental difficulty with the Bureau of the Budget today, in my judgment, is that it serves as a mouthpiece and adviser to the President, and not as an independent agency serving the President and the Congress alike in the effort to attain economy. A radical change is required, if efficient government at a minimum cost is to be assured, and annual raids on the taxpayers' money halted.

Mr. PHILLIPS of California. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from California.

Mr. PHILLIPS of California. Should it not also be said that in several instances in this subcommittee and also in another subcommittee on which I serve, the Bureau of the Budget has taken upon itself to determine where reductions shall be applied and to make reductions in respect to items which involve a matter of policy that should be decided by the Congress, not proportionate reductions or ordinary reductions such as have been made in previous years, but such marked changes in the requests of the departments that in effect the Bureau of the Budget has supplanted the Congress itself in connection with policy decision.

Mr. WIGGLESWORTH. I thank the gentleman for his contribution. It is clear, I think, that the Bureau has been reaching out beyond the functions that it was originally set up to exercise.

CIVIL SERVICE COMMISSION

Mr. Chairman, a fundamental change in the operations of the Civil Service Commission would also seem to be called for, if a competent service on a merit basis is to be restored. Numerous complaints have been received as to the operations of this Commission. I have personally been told on various occasions, both by officials within the Government, and by others, that, in their opinion, present operations are destroying, rather than maintaining, the merit system.

Particularly disastrous to efficient and economical government is the widely held belief that rating and pay are largely dependent upon the number of personnel under the supervision of any individual. The emphasis should be exactly the reverse. The man who can do an efficient job with the fewest assistants should win the promotion. This, of course, is not in keeping with bureaucratic operations.

During the hearings, representatives of two agencies told your committee that they were handicapped in the operations of their agencies to the extent of 15 to 20 percent of efficiency by the complex rules, regulations, and red tape of the Civil Service Commission.

When asked how he could get rid of an inefficient employee, one official replied, and I quote: "By having a hearing and then being proved wrong myself and then he"—the employee—"stays on in defiance of me."

Another official added, "If you discharge a man for misconduct, his superiors, who recommend such action, are likely to be put immediately on the defensive with countercharges."

The Civil Service Commission states that anyone except a veteran may be discharged after an opportunity to reply in writing, and that his only recourse is to appeal to the Commission for reinstatement for appointment, not in the same but in some other agency.

The Commission also states that the State Department, under special legislation, can discharge anyone, anywhere, at any time, with or without cause.

Experience does not seem to square with these statements.

The Commission, Mr. Chairman, requested a very large increase in appropriations for the loyalty program, under Executive order of March 27, 1947.

This committee, of course, desires to see the necessary loyalty work completed at the earliest possible moment.

On the other hand, the procedure called for appears to be so involved and

complicated as to be likely to defeat the very purpose of the program.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. WIGGLESWORTH. Mr. Chairman, I yield myself 10 additional minutes.

The procedure involves investigation by the Civil Service Commission and the Federal Bureau of Investigation; it involves action by agency boards; it involves possible appeals to agency heads or to regional loyalty boards; it involves possible appeals to the Loyalty Review Board; it involves counsel and witnesses for the accused, all along the line.

It appears that months, even years, may be involved in ridding the service of a given individual, who may perhaps remain on the pay roll of the Government throughout the entire proceedings.

The fact that over $17,000,000 is suggested as necessary in 2 years for the elimination of disloyal persons from the Federal pay roll is, of course, eloquent testimony on the part of the Civil Service Commission of a dismal failure to do the job that should have been done in the years which have passed.

Commissioner Flemming very frankly admits that, if the work had been done during those years when some of us were demanding that the personnel of the OWI and other agencies be investigated and cleared or removed from office, the money now requested for the loyalty program would not be needed at this time.

The record discloses 1,126 vacancies as compared with the number of positions now authorized for the Commission. The committee believes that this authorized personnel, in adidtion to 586 persons now engaged on the loyalty program is sufficient for the time being for the work in prospect, particularly in view of the present authority vested in Government agencies to discharge personnel, and of the fact that the Commission has delegated 50 percent of its work in the field of examinations, qualifications, and appointments, and that it has a reserve to its credit at the moment of about $29,000.

The record indicates that 1,319 persons have been rated ineligible with the question of loyalty involved in the fiscal years 1940 to 1947, and that there are in the so-called bar files of the Commission today, 7,806 cases, and in the Commission's so-called flag files 93,206 cases.

GENERAL ACCOUNTING OFFICE

The General Accounting Office, Mr. Chairman, which takes a voluntary reduction for the second consecutive year, is the agent of the Congress. As such, its transactions are of special interest.

The testimony discloses during fiscal year 1947 exceptions taken to expenditures to the extent of $548,000,000; reports of waste and extravagance to the number of 30; and reports of failure to protect the Government interest to the number of 366.

The testimony also refers to shortcomings of various agencies, including Federal Works Administration, Maritime Commission, and War Assets Administration.

Particularly amazing is the testimony in reference to the Maritime Commission. It shows four cases involving losses to the United States of many millions of dollars.

It shows that the accounting system which the General Accounting Office has sought to have installed since 1937 has not as yet been installed.

"Ten years of frustration," says the Comptroller General, "in our dealings with the Commission in this and many other matters have just about exhausted our patience."

It shows, in the field of just compensation cases, letters addressed by the Comptroller General to the Maritime Commission dated August 29 and October 13, 1947, with no reply whatsoever to the date of the testimony (December 11, 1947), and, on the contrary, a resolution apparently adopted by a 3–2 vote of the Maritime Commission, defying the rulings of the Comptroller General.

Under leave to extend my remarks, I insert in the RECORD at this point the letters addressed by the Comptroller General to the Maritime Commission:

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, August 29, 1947.

CHAIRMAN, UNITED STATES MARITIME COMMISSION.

MY DEAR ADMIRAL SMITH: Reference is made to the provision in the Second Supplemental Appropriation Act, 1948, Public Law 299, approved July 31, 1947, involving the future payment of certain obligations against War Shipping Administration funds. Said provision reads as follows:

"The Secretary of the Treasury is hereby authorized and directed to withdraw from the accounts of the United States Maritime Commission 15 days after the date of enactment hereof the unexpended balance of the War Shipping Administration funds received by the United States Maritime Commission pursuant to section 202 of the Naval Appropriation Act, 1947 (60 Stat. 501), and to carry such unexpended balance to the surplus fund to be covered into the Treasury, and 'there is hereby appropriated to the Secretary of the Treasury such amount as may be necessary (not to exceed $200,000,000) to liquidate such obligations as may be found by the General Accounting Office as having been properly incurred against such funds prior to January 1, 1947:' *Provided*, That the appropriation herein for liquidation of obligations shall be available only until March 31, 1948: *Provided further*, That moneys received by agent operators of the Maritime Commission on account of operations prior to September 1, 1946, under the War Shipping Administration revolving fund may be applied against necessary expenses of such agent operators in connection with liquidation of obligations incurred under such fund prior to January 1, 1947: *Provided further*, That hereafter all moneys accruing to the Maritime Commission from operations under the War Shipping Administration revolving fund prior to September 1, 1946 (including moneys received from agent operators after deduction of necessary expenses of such agent operators), shall be covered into the Treasury as miscellaneous receipts." [Single quotations supplied.]

The purpose of this letter is to advise you of the views of this office with respect to the function which the Congress intended would be performed by the General Accounting Office under said provision and to outline briefly the procedure by which such function will be carried out. In this connection, I am informed that a conference already has been held, attended by representatives of the Maritime Commission, the Treasury Department, and the General Accounting Office, at which the details of the procedure to be followed have been tentatively agreed upon.

I do not regard the provision as requiring that the General Accounting Office examine into the merits of each item submitted for payment. That is to say, the language is not construed as making it mandatory for each item to receive a preaudit approval before payment can properly be made by the Treasury Department. Rather, the examination to be made will be confined to ascertaining (1) that under the facts and supporting documents the proposed payment is in satisfaction of an obligation actually incurred against War Shipping Administration funds prior to January 1, 1947, and (2) that, on its face, the item is of the general nature and type chargeable to such funds. And, of course, it will be essential to such an examination and determination that there be made available by proper personnel of the Maritime Commission data and supporting documents sufficient to establish the propriety of each expenditure to the extent indicated above.

Thus, the finding of the General Accounting Office in advance of payment that an item constitutes an obligation "properly incurred" against War Shipping Administration funds prior to January 1, 1947, should in no sense be construed as a final and complete approbation of the expenditure. All payments will continue to be the subject of a postaudit as heretofore. In other words, the function imposed upon the General Accounting Office by said provision of law is to be considered as in addition to and entirely independent of the functions and duties imposed by previously existing legislation.

It is my understanding that the supporting documents for most of the payments to be made are located in Washington, New York, New Orleans, and San Francisco. In order to expedite the handling of such payments I have approved the recommendation that certain personnel of the Audit Division, General Accounting Office, stationed in the cities named above be designated to perform the function involved. Where, after examination along the lines indicated, an item is found to represent an obligation properly incurred against the funds in question prior to January 1, 1947, the voucher proposing payment will be stamped as follows:

"Approved to the extent required by Public Law 299, Eightieth Congress, approved July 31, 1947.

"COMPTROLLER GENERAL OF THE UNITED STATES.
"By —— ——."

The auditor marking the examination will affix his signature and the date, and the voucher will then be forwarded to the chief disbursing officer, if in Washington, or to the regional disbursing officer, if in the field.

Respectfully,

LINDSAY C. WARREN,
Comptroller General of the United States.

Mr. WARREN. I shall now read my letter of October 13, 1947.

"MY DEAR ADMIRAL SMITH: Under date of August 29, 1947, I addressed a letter to you setting forth my views as to what function the Congress intended the General Accounting Office to perform under the provision in Public Law 299, approved July 31, 1947, involving the future payment of certain obligations against War Shipping Administration funds. That provision, as you know, appropriated to the Secretary of the Treasury not in excess of $200,000,000 for the payment of such War Shipping Administration obligations "as may be found by the General Accounting Office as having been properly incurred against such funds prior to January 1, 1947." In my said letter of August 29, 1947, I stated that, in my opinion, said provision did not contemplate that the General Accounting Office would inquire into the merits of each item submitted for payment but that

it required this Office to do two things: First, determine and find that the payment was in satisfaction of an obligation actually incurred against War Shipping Administration funds prior to January 1, 1947, and, second, determine and find that the item was of the general nature and type chargeable to such funds.

"Insofar as concerns items generally proposed to be paid from such funds, I still adhere to the views expressed in that letter, and the approval of such items by the General Accounting Office prior to payment will be along the lines indicated. However, in view of the action recently taken by the Commission with respect to just compensation payments, which I shall refer to more specifically below, I deem it my duty as Comptroller General of the United States to take steps to insure that public funds will not be expended in violation of applicable provisions of law.

"There have been forwarded to this Office copies of memoranda prepared by various officials of the Maritime Commission on the subject of just compensation for requisitioned vessels, particularly with respect to the enhancement prohibition in section 902 of the Merchant Marine Act, 1936, as amended. It appears that the Commission has had under consideration during the past few months the question of whether, as a matter of policy in the determination of just compensation, it would follow the formulas set by the War Shipping Administration, which were based on rules laid down by the Advisory Board on Just Compensation, or whether it would follow the applicable decisions of this Office. My examination of these memorandums and papers leads me to believe that rates and valuations fixed in accordance with the formulas contained in WSA General Order 37 may be substantially in excess of the amounts properly payable if due regard were given to the decision of November 28, 1942 (22 Comp. Gen. 497).

"I have been advised that on July 24, 1947, the Maritime Commission adopted a resolution reaffirming the policies followed by the War Shipping Administration in fixing just compensation. As I read that resolution, the Commission has put itself on record as having decided to make just-compensation payments in clear and recognized violation of the law as construed by the accounting officers of the Government. Under such circumstances, I have no alternative but to use every power at my command to prevent payments being made in open defiance of the law.

"Were support for my position in this matter necessary, I have only to invite your attention to the following language in the report of the House Committee on Appropriations in connection with the act making funds available for just-compensation payments:

"'* * * One of the most serious phases of the matter is the settlement of the so-called just-compensation cases involving settlement for ships requisitioned by the Government under section 902a of the Merchant Marine Act of 1936, as amended. The Comptroller General rendered a decision interpreting certain phases of this section early in the war, but the Commission so far has failed to consummate the settlement. These payments bear interest from the date of requisition of a vessel until the date of settlement, and it is the committee's desire that these claims be processed with all practicable speed and with due regard to the decision of the Comptroller General. * * *'

"Accordingly, I am constrained to insist that all vouchers representing payments of just compensation must contain a certification to the effect that the amount to be paid is consistent with the principles of applicable decisions of this Office. Moreover, I am instructing the Audit Division of the General Accounting Office that, with respect to this class of payments only, a full and complete audit should be made prior to approval of the vouchers."

Now, I might say that on data furnished the General Accounting Office by two of the five members of the Maritime Commission the vote of the Commission was three to two not to follow the decision of the Office. I am informed that vote was taken on the very day this committee issued its report on the appropriation bill, from which I have just read, and I am not advised of any later action by the Commission to reverse the vote.

(The Comptroller General.)

A few comments, Mr. Chairman, on other agencies dealt with in the bill:

EMERGENCY FUNDS FOR THE PRESIDENT

Before the war there were no such funds. During and since the war funds have been made available on a decreasing basis.

For the current year the amount provided was $500,000. The request for fiscal year 1949 is $1,000,000. Your committee has allowed $700,000, an increase of $200,000 over the current fiscal year.

These funds have always been, and are intended to be used for real emergencies affecting the national interest or security. Nevertheless, year after year your committee has been forced to criticize the use and application of these funds as contrary to the will of the Congress.

Under leave to extend my remarks, I insert in the RECORD at this point a statement showing the application of the funds for the fiscal year 1948. With one or two exceptions, no item included can be fairly classified as an emergency item. Almost every item included could and should have been submitted to the Congress for approval.

There is no reason why under the guise of emergency funds the President should set aside a sizable back-room kitty.

Allocations from the emergency fund for the President, 1948, as of Jan. 14, 1948

Appropriated in the Independent Offices Appropriation Act, 1948	$500,000
Allocations:	
Executive Office of the President:	
President's Amnesty Board	40,000
President's Committee on Civil Rights	50,000
President's Commission on Higher Education	64,000
Advisory Commission on the Merchant Marine	8,700
Office of Coordinator of Emergency Export Program and Secretary of the Cabinet Committee on World Food Programs	45,000
Additional staff of the White House	103,528
	311,228
Department of Commerce:	
For Special Committee on Foreign Aid	41,850
Department of the Interior:	
For international scientific conference on the conservation and utilization of natural resources	10,000
Department of Justice:	
For President's Amnesty Board	11,000
Department of the Army:	
For rehabilitation of hurricane damage on Mississippi Gulf coast	50,000
Total allocations as of Jan. 14, 1948	424,078
Balance available for future allocation	75,922

COUNCIL OF ECONOMIC ADVISERS

The testimony of this agency was lamentably weak. There was strong sentiment in the committee for the complete elimination of all funds for the agency.

It is admittedly not a fact-finding agency. It merely uses the findings of other agencies which, it would seem, could be made available directly to the President or the Congress by the originating agencies.

There is little evidence of any important results from its work of interpretation, and it takes the position that its views and recommendations are confidential except as to the President, unless released by him.

In respect to its report on foreign aid, which was publicly released, it would appear that it made no specific recommendations as to inflation, as to employment of idle plants, or as to specific commodities such as steel, fertilizer, and grain substitutes.

Asked to provide a break-down in terms of commodities, showing estimated availability, and estimated demands against that availability in terms of domestic consumption, normal exports, requirements for existing foreign-aid programs, and requirements for pending programs, the agency replied that it would be impossible for it to supply the desired information.

Its recommendation to the President would appear to have been in general terms only and to the effect that what is requested can be done as we did more in the war years, provided our domestic consumption is sufficiently controlled.

Continued operation on a reduced basis is recommended only in the light of present conditions, and the fact that the agency is new.

FEDERAL COMMUNICATIONS COMMISSION

The testimony of the Federal Communications Commission gives little indication of fundamental improvement in the operations of this agency.

Transfers of stations, with Commission approval, for considerations far in excess of cost or replacement value continue.

Action or inaction in respect to assignment of frequencies, including the so-called Bulova stations, the New York News case, the Cur-Nan Co. case, and certain stations in Kentucky, suggests continuance of operation on the basis of political favoritism.

The testimony of Commissioner Durr in respect to his altercation with the FBI, including his statement as to Communist ownership of stations, in which he apparently regards Communist applicants in much the same light as Catholic, Protestant or Jewish applicants; and in which he indicates that he does not know that Communists advocate the overthrow of this Government, is startling.

Fear of the Commission by radio licensees still is manifest.

Mr. Chairman, freedom of the air, to the end that the people may have both sides of important questions, fully and fairly presented, is imperative to our form of government. It is vital that the FCC operate as an impartial quasi-judicial agency rather than as the political puppet of any administration that happens to be in the White House.

I do not know what has become of the resolution to investigate this agency which was filed during the last session. If the Committee on Foreign and Interstate Commerce is not in a position to conduct an investigation, it should be conducted without further delay by a select committee.

FEDERAL TRADE COMMISSION

The Federal Trade Commission requests an increase of $1,000,000, or 33⅓ percent more than it has for 1948.

The committee recommends an increase of $58,000 for in-grade promotions and $348,000 for antimonopoly work, disallowing all other items, including proposed funds for work in insurance, work on additional joint financial reports, and work on administered price matters.

This, with certain transfers, will make available for antimonopoly work $1,364,181. If properly applied, this should be helpful to the consuming public.

The committee feels that the over-all amount allowed should be ample, particularly in the light of the fact that there are 65 vacancies compared with authorized positions, and that several divisions appear to be overstaffed, in the light of the work load during the past 2 years.

FEDERAL WORKS AGENCY

The record indicates that the Reconstruction Finance Corporation has made no accounting to Federal Works Agency for securities of the Public Works Administration sold by the RFC, many at handsome prices. A request for a statement showing the total amount of securities sold, the amounts realized, and the disposition of the proceeds resulted in the first instance in a response from the RFC to the effect that it would cost $20,000 to produce the desired information.

This is almost unbelievable. I understand the RFC has now agreed to furnish the desired information.

Let me call your attention to the enormous cost of operating Federal buildings. For the maintenance and operation of the Department of Agriculture's South Building there is requested for the fiscal year 1949, $1,028,990; the figure for the Pentagon Building is $4,039,470.

The largest uncontrollable item in the bill, Mr. Chairman, is for postwar highways and the elimination of grade crossings, $459,588,854—more than one-half of the total carried in the bill.

Under present law, the Commissioner of Public Roads and the President provide the funds for this purpose. Contracts with the States are approved in advance and become binding commitments. Congress is completely without control over funds required for construction, as well as over the administrative expenses of the agency.

I appreciate that road construction is popular. It is possible the Congress might approve, in full, the request carried in this bill. In principle, however, I submit that it is absolutely unsound for the Congress to be deprived of control over these appropriations from year to year, particularly under the conditions confronting America today.

Attention is invited in this connection to the enormous cost of road construction. The record indicates that primary roads have cost $42,900 per mile average, with a maximum of $309,400 per mile; and that secondary roads have cost an average of $15,900 per mile, with a maximum of $106,700 per mile.

Under leave to extend my remarks, I insert at this point in the record a table showing those costs:

AVERAGE COSTS PER MILE FOR RURAL ROAD PROJECTS APPROVED FOR CONSTRUCTION TO OCTOBER 1, 1947, FINANCED FROM POSTWAR FEDERAL-AID FUNDS

Construction costs for approved projects financed from postwar funds average $42,900 per mile for primary rural roads and $13,900 per mile for secondary rural roads, exclusive of costs for bridges. These average costs per mile include both Federal funds and State matching funds.

Per-mile construction costs do not represent entire costs for finished roads in cases where only a portion of the construction is completed under the current projects, such as grading projects preliminary to subsequent surfacing projects or current surfacing projects for which the grading work was completed under previous projects. Character and density of traffic influence type and width of surface and foundation construction and width of grade, and hence occasion differences in per-mile construction costs. Topographic conditions and geographic location also account for variations in per-mile construction costs.

Average per-mile construction costs for primary and secondary rural roads approved for construction utilizing postwar funds are shown for each State in the following tabulation:

Average cost per mile for rural road projects approved for construction to Oct. 1, 1947, financed from postwar Federal-aid funds

State	Primary roads		Secondary roads	
	Miles	Average cost per mile	Miles	Average cost per mile
Alabama	170.8	$44,700	556.6	$18,200
Arizona	104.5	61,300	228.7	22,300
Arkansas	289.6	30,400	504.5	16,800
California	276.5	114,500	299.2	31,700
Colorado	145.0	53,900	193.6	24,600
Connecticut	27.2	147,300	10.6	106,700
Delaware	28.4	42,300	8.7	31,100
Florida	123.8	39,900	170.5	29,300
Georgia	326.4	31,500	363.9	16,700
Idaho	102.5	54,100	234.9	14,400

Total	10,262.3	42,900	19,442.0	13,900

SECURITIES AND EXCHANGE COMMISSION

An attempt to locate the responsibility for the recent disposal of the Big Inch and Little Inch pipe lines as surplus property, from Federal Power Commission, in the light of newspaper allegations that large promoters' profits had been realized, with governmental cooperation, resulted in the usual alleged division of responsibility between agencies—this time between War Assets Administration, Federal Power Commission, and Securities and Exchange Commission. War Assets Administration apparently made the sale of the pipe lines, Federal Power Commission issued essential certificates of public convenience and necessity, and Securities and Exchange Commission gave tacit approval of the financial scheme.

Correspondence between Federal Power Commission and Securities and Exchange Commission indicates clearly that both agencies possessed the facts in the case.

Under leave to extend my remarks, I insert in the RECORD at this point the correspondence in question, which speaks for itself:

SECURITIES AND EXCHANGE COMMISSION,
Philadelphia, Pa., October 20, 1947.

Mr. LEON M. FUQUAY,
Secretary, Federal Power Commission,
Washington, D. C.

DEAR MR. FUQUAY: Texas Eastern Transmission Corp. proposes to file a registration statement with this Commission with respect to the public offering of preferred and common stock, within the next few days. At our suggestion they are sending you three preliminary copies of the proposed registration statement. In view of the fact that the company is under the jurisdiction of your Commission, it will be appreciated if you will have the statement reviewed by member of your staff and afford us the benefit of your comments. As you know, this Commission is particularly interested in the accuracy of facts stated in the prospectus, as well as the possible omission of any facts which should be disclosed in connection with an offering of securities to the public.

Since the time schedule of this office is prescribed by statute, it would be appreciated if you could forward your comments at an early date.

Very truly yours,

HARRY HELLER,
Assistant Director,
Corporation Finance Division.

SECURITIES AND EXCHANGE COMMISSION,
Philadelphia, Pa., October 31, 1947.

Mr. CHARLES SMITH,
Chief of Bureau of Accounts,
Federal Power Commission,
Washington, D. C.

DEAR MR. SMITH: I am enclosing herewith a copy of Amendment No. 1 to the registration statement of Texas Eastern Transmission Corp. which was filed on October 31, 1947.

Particular reference is made to the revised material under the caption "Estimated revenues and expenses" on page 10 and the relocation in the prospectus of the information regarding the organization and promotion of the registrant to page 4.

The registrant has requested acceleration of the effective date of the registration statement to November 12, 1947, and accordingly we must complete our examination during the week. I would appreciate it if you could review the enclosed amendment and give me any comments you may have with respect thereto. I will telephone you on our

Washington line on Monday afternoon, November 3, 1947.

Very truly yours,

HARRY HELLER,
Assistant Director,
Corporation Finance Division.

NOVEMBER 4, 1947.

Hon. JAMES J. CAFFREY,
Chairman, Securities and
Exchange Commission,
Philadelphia, Pa.

DEAR MR. CHAIRMAN: The Commission is in receipt of a letter dated October 20, 1947, from Mr. Harry Heller, Assistant Director of your Corporation Finance Division, requesting a review of a draft of registration statement filed with your Commission by Texas Eastern Transmission Corp. In addition, the Commission has been furnished copies of the actual registration statement filed under date of October 24 and amendment No. 1 thereto.

The registration statement has been examined and, except for the fact that details as to equity financing were not submitted on the record before this Commission, the representations contained therein are in accord generally with the testimony presented to this Commission in the course of hearings on the company's application for a certificate of public convenience and necessity.

As stated in the registration statement, the Federal Power Commission, on October 11, 1947, issued a certificate of public convenience and necessity under section 7 of the Natural Gas Act to Texas Eastern Transmission Corp. The certificate becomes effective upon acquisition by the corporation from War Assets Administration of what are familiarly known as Big Inch and Little Big Inch pipe-line facilities.

From the detailed financial information contained in the registration statement, it appears that the original stockholders, who had purchased 150,000 shares for an initial investment of $150,000, will reclassify their 150,000 shares of $1 par stock into 1,200,000 shares without par value. It is noted that the resulting 1,200,000 shares will have, share for share, the same voting power, book value, and claim upon earnings as the 3,400,000 shares, more or less, which it is proposed to sell to the public at a maximum price of $12.

It should be noted that the Federal Power Commission has no jurisdiction over securities of natural-gas companies. The Commission, therefore, has not approved the issuance of any securities by Texas Eastern Transmission Corp. The main inquiry in certificate proceedings as to financial matters goes to the feasibility of the financial plan; that is, the ability of the applicant to raise the necessary funds at reasonable cost.

We wish to make this clear, because the Commission, in its opinion No. 157, relating to the issuance of the certificate of public convenience and necessity, stated that the company's financial plan as testified to in the record is adequate and reasonable. As the opinion shows, this statement applies only to the feasibility of raising money by the issuance of bonds and stock in the total amounts set forth on the record and not to the details of equity financing. As a matter of fact, financial witnesses for the company, during the hearing late in August, stated that they were not able to supply details as to equity financing and that such details had not been formulated and could not be decided upon so far in advance of the actual financing.

We would further call attention to the statement on page 10 of amendment No. 1 to the registration statement that the company anticipates earning approximately $1,500,000 more than the 6 percent usually allowed by this Commission in gas-rate cases. Members of our staff have checked the estimate of earnings and have found it substantially correct on the basis of the negotiated rates in the company's sales contracts. It should be emphasized, however, that such rates are subject to review and regulation by the Federal Power Commission.

This Commission trusts that these comments will be of assistance to you.

By direction of the Commission.

Sincerely yours,

NELSON LEE SMITH,
Chairman.

(Copies to Mr. John R. Steelman, Assistant to the President, the White House; Gen. Robert M. Littlejohn, War Assets Administration; Mr. R. H. Hargrove, president of the Texas Eastern Transmission Corp.; Mr. J. Ross Gamble, 719 Fifteenth Street NW., Washington, D. C.)

SECURITIES AND EXCHANGE COMMISSION,
Philadelphia, Pa., November 10, 1947.

Mr. NELSON LEE SMITH, Jr.
Chairman, Federal Power Commission,
Washington, D. C.

DEAR MR. CHAIRMAN: Receipt is acknowledged of your letter of November 4, 1947, in connection with the registration statement of Texas Eastern Transmission Corp.

I wish to thank you for having your staff review the registration statement and for sending your comments in connection therewith.

Sincerely your.,

JAMES J. CAFFREY,
Chairman.

It is impossible, Mr. Chairman, to develop all points of importance in hearings covering so many diversified governmental operations and functions in the time available. The details of committee recommendations are covered in the report and the appended tables. Unless there are further questions, I will reserve further discussion for others under general debate and under the 5-minute rule.

Mr. HESELTON. Mr. Chairman, will the gentleman yield for a comment on the appropriation for the Federal Works Agency?

Mr. WIGGLESWORTH. I yield.

Mr. HESELTON. As the gentleman knows, he has cooperated with me in an attempt to quickly analyze some figures sent up from the Federal Works Agency yesterday at the chairman's request, having to do with a report made under date of December 30, 1947. It is my understanding the report is from the Public Buildings Administration to the Federal Works Agency. I called the chairman's attention and the attention of the staff to the fact that within recent days Mr. Steelman has sent a report to me in behalf of a New England delegation subcommittee, which was charged with the responsibility of working out certain developments along conservation lines. That letter, with the accompanying letter from General Fleming, is as follows:

JANUARY 29, 1948.

Hon. JOHN W. HESELTON,
House of Representatives,
Washington, D. C.

MY DEAR MR. HESELTON: This is in further reference to our past correspondence regarding the possible conversion from oil to coal in Government buildings.

Enclosed herewith is a copy of the report of January 27, 1948, on this subject from General Fleming, Federal Works Administrator.

It would appear from this report that there are some Government buildings in which conversion from oil to coal could be made at an early date and with relatively small expense; and General Fleming has been asked to arrange with the several departments and agencies concerned, for corrective action in this respect where such action is feasible and will produce results during the present heating season.

As you doubtless know, the President's order of January 17, 1948, for conservation of fuel oil, gasoline, and gas (copy attached) contains the following paragraph with respect to future installations of fuel oil or gas-burning equipment:

"4. No equipment shall be installed for burning fuel oil or gas or liquefied petroleum gas, and no permanent building or establishment shall be converted to these fuels, without the prior approval of the Bureau of Mines, except where firm commitments for such installations or conversions have already been made."

Sincerely,

JOHN R. STEELMAN.

FEDERAL WORKS AGENCY,
Washington, January 27, 1948.

Hon. JOHN R. STEELMAN,
Assistant to the President,
The White House.

MY DEAR MR. STEELMAN: Further reference is made to your letter of December 19 requesting that an investigation be made as to the practicability of converting Government buildings from the use of oil to the use of coal. As you were advised, a meeting was held in this office on December 30 and those present were requested to have final data in our hands by January 2 on which to base a complete report to you.

We have now received a mass of information from the majority of those who were present at the meeting, included in which are figures to show the buildings which cannot be changed over for various reasons, as well as those which are susceptible of being changed and under what conditions. Briefly the information developed consists of the following:

1. Before the date of our meeting, some of the agencies had already issued to their field offices instructions to suspend any further conversions from coal to oil.

2. The Justice Department reported the partial conversion of one plant using 400,000 gallons of fuel oil per year to the use of coal; Public Health Service reported the recent conversion of one small plant burning 15,000 gallons of oil per year to the use of other fuel; and Public Buildings Administration reported the partial cancellation of a contract which had been entered into for converting a building to the use of oil. The contract had been partially completed and would have produced a plant which would burn 370,000 gallons per year.

3. The agencies reporting that conversion from oil to coal is practicable stated that to accomplish this would require the expenditure of a substantial sum, which funds had not been included in the budget estimates and that it would therefore be necessary for them to obtain the additional funds before proceeding with the work. They also reported that the oil-burning plants that are now in operation are in many cases automatically controlled. If converted to the use of coal, it would be necessary to employ firemen to operate them, requiring the necessity of additional funds. I am enclosing two of the reports that were received as samples so that you may see the care that was exercised by the agencies in gathering the desired information. It will be noted that the Department of Agriculture report shows a possible saving of 888,690 gallons of oil per year but that the cost of making the necessary changes would amount to $129,539 and that there would be an increase in operating costs of $70,065 per year. An analysis of the report of the Public Buildings Administration shows that it is considered practicable to convert 35 of the buildings but that this work would cost $414,220. This figure does not include the

cost of any additional employees who might be required as firemen.

4. Apparently the situation existing in the Navy Department, which was reported in our letter of January 16, is the only one reflecting a major saving at this time. They can immediately begin the use of coal in certain of their plants previously operated by oil and thereby save at the rate of 1,420,000 barrels of oil per year.

Since the Executive order calling for conservation of fuel oil was issued January 17, 1948, which covers all phases of conservation and also regulates the installation of additional oil-burning equipment, it is doubtful if much more can be done in the interest of saving oil at the present time. It would seem that since the agencies are now acquainted with the existing situation and know that the prospects for the next few years are but little brighter, they will cooperate in every way possible, including the conversion of equipment where practicable, in order to ease the effects of the present fuel-oil shortage.

Sincerely yours,

PHILIP B. FLEMING,
Major General, United States Army,
Administrator.

Returning to the analysis which I have attempted to make hurriedly this afternoon, these figures deal only with buildings, as I understand it, operated by the Public Buildings Administration. They do not deal with a vast amount of buildings and building space that is leased, such as the chairman of the subcommittee and I know about—more than one entire building last year used by the Veterans' Administration in Boston. They certainly do not deal with the Navy buildings at Norfolk and the Naval Station at Norfolk, or the Naval Air Station, or the Boston Naval Shipyard Annex—where conversion from fuel oil to what is known as pulverized bituminous, which will result in a saving of 1,420,000 barrels of that much-needed type of fuel oil, has been promised by the Navy.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WIGGLESWORTH. I yield myself 5 additional minutes.

Mr. HESELTON. I want to bring out this point now. My analysis shows that there are 22 buildings being operated, as reported, in the District of Columbia and adjacent areas. If my mathematics is correct, we have in this report buildings amounting to 60 outside the District. That makes 82 buildings involved in this appropriation bill. In many instances, the report is that the conversion is not feasible. In other words, the report is startling. The total over-all expenditure that is estimated if they would convert from heat by fuel oil and heat by natural gas back to heat by coal, would be $414,220. That is verified by the staff of the committee.

I do not know whether the committee would accept an amendment authorizing the additional amount of $414,220. I would be the last person to advocate the addition of a single dollar for the purpose of any unnecessary expenditure. I am one who believes that we must confine ourselves to absolute necessities if we are going to bring down the cost of living, which is vitally affected by the amount of funds taken from the American taxpayers to operate the Federal Government. Yet, I may still submit such an amendment to the committee, in the hope it will consider it favorably as a capital expenditure. I have in mind the testimony of such qualified witnesses as Secretary Forrestal, Secretary Krug, Director Max Ball, and many others, indicating their convictions that this is not a temporary shortage but one which will be with us at least for 5 years. If their dire predictions are accurate, then we shall have expended for a period of 5 years an annual sum of $82,844, even though we do have to invest it now in one lump sum in order to force these Government agencies to take the lead in conservation of this much-needed fuel oil. I call your attention to the fact that the tabulation shows a total savings could be made annually of 6,668,155 gallons of fuel oil. Even allowing for the fact that some of these conversions cannot be completed for a period of from 4 to 6 months, and one apparently not for 300 days, most of them can be rapidly completed and many of them at a nominal sum. The saving in 5 years would amount to 33,440,775 gallons. Let us be conservative about it and say that we could only save from between 25 and 30 million gallons in this 5-year period. Would it not be worth the expenditure of $82,844 annually on that basis alone?

In this connection, let me read a telegram to one of my colleagues from Detroit:

Detroit Housing Commission down to 14 days' supply of fuel oil for 250 veterans' families living in veterans' housing project; 30,000 gallons would carry us through until April. All local suppliers refuse us.

What do those veterans think about burning up 6,668,155 gallons yearly, when 30,000 gallons would carry them through until April? I do not find any building in Michigan listed, but let us get oil to this group of veterans rather than, for instance, the Sloan Building on Twelfth Street, where 58,000 gallons will be used this year, or the Arlington Building at 705 Columbia Pike, where 34,000 gallons will be burned this year. At least, if the 14 days' cancellation privilege was exercised, from either of these sources more than enough fuel oil would be saved to supply these veterans' needs, and my guess is that they would be glad to pay for the hire of sufficient trucks to come on here to take the oil and put it in their storage tanks.

There is another reason I urge you to consider. It is our understanding that the oil industry is now reverting to the wartime, uneconomic practice of running the solid fuel tankcar trains from Texas to New England. I do not have the figures at the moment, but I hope to have them by tomorrow. It is my impression that the cost of this sort of an operation, instead of tanker carriage, practically doubles the price of oil. During the war the Government paid that bill. Now the industry must absorb it, or they must pass it on to the consumer and, judging from the reports of increasing prices, I am confident they are passing it on to the consumer. Which is better, that we should spend $414,220 of the taxpayers' money to save 6,668,155 gallons of oil, or that we should load him with the necessity of paying certainly that extra amount on his bills for fuel oil and kerosene?

A third point might be stressed. If this is done we shall have these savings indefinitely into the future until the time comes when we hope we may be able to develop synthetics or new fields to the point where we again have a surplus.

It seems to me that even those who are understandably interested in the sale of oil and natural gas should join with us in this limitation for the fiscal year of 1949, even though they cannot see their way clear in voting the extra appropriation. Certainly there is an immediate market for every gill of fuel oil and kerosene now being produced in this country and every cubic foot of natural gas being offered. I do not think anyone would care to assert that in either of these fields, before July 1, 1949, we will have a surplus.

I have broken that down again. I have not worked out the consumption in gallons. There are four buildings in this group where the conversion would run from $15 to $100; a total of $165.

The second group that I worked out ran from $100 to $1,000. There are seven of them. Five are under $1,000 and none over $500. The period of time required would be from 15 to 120 days. That is $3,550.

May I remark that the New England subcommittee raised this question in December. More than 30 days have elapsed, so that most of these conversions that could have been undertaken at that time would have been completed now, and the fuel oil would have been saved.

There is another group of $1,001 to $5,000. It would take from 40 to 180 days to complete the conversion. The total amount is $26,408.

Another group from $5,000 to $25,000, only one of them being over $18,000. It would take 60 to 180 days and would cost $59,000.

There is one which would take 120 days and cost $26,500. Another would take 300 days and cost $90,000. Another would take 120 days and cost $125,000.

I raise this question at this time but I shall put in the entire tabulation under permission which I shall ask when we get back in the House because I think this is going to throw a lot of light on a motion I expect to offer tomorrow, which I have submitted to the Chairman and which addresses itself to one phase of this problem. The motion would be a restriction. It would be at page 29 of the bill, line 25, a new paragraph to read as follows:

No part of the foregoing appropriations to the Federal Works Agency shall be used for the purpose of converting any existing coal-heating units to oil or natural gas.

I have added natural gas because of the fact that in Detroit, in parts of New England, New York, and even here in the District of Columbia the supply of natural gas is not sufficient, although it is not a matter of direct and immediate interest to us in New England for, so far as I know, we have very little, if any, natural gas there; consequently I understand that in these other areas they have to manufacture additional gas from

this limited supply of fuel oil and they are putting on the individual consumer the prime burden of carrying out this conservation program.

Natural gas in any federally owned or rented buildings in or outside the District of Columbia.

I have put in rented buildings because it is only fair to anticipate that the landlords of those buildings who are getting big rentals, paid on the dot, should be willing to go along in this program of conservation.

One final comment and then I will not trespass further on the gentleman's time. I want to call the Committee's attention to one particular problem posed by this report. The report indicates buildings currently being converted to oil under contract. This will be interesting, I believe, to the membership of the House. One of these buildings is the Sloan Building, located at 711 Twelfth Street NW., stated to be under the veterans' group. It will consume 58,000 gallons of oil every year. I find a notation here that it would be possible to convert in 14 days for $1,500. I do not know what that means, unless it is that they have the legal right to cancel the order for oil equipment on 14 days' notice. Here they have protected themselves and us and we can stop this conversion right here in the District of Columbia.

The CHAIRMAN. The time of the gentleman from Massachusetts has again expired.

Mr. WIGGLESWORTH. Mr. Chairman, I yield myself three additional minutes.

Mr. HESELTON. I appreciate the gentleman's consideration very much.

Another one is in Suitland, Md. The answer is:

"Yes; 180 days."

That covers film-storage vaults 1, 2, and 3 at Suitland.

Next, the Marine Hospital at Boston. They say they could convert; that it would take 120 days.

The next one is at Arlington, Va., 705 Columbia Pike. They will use 34,000 gallons of oil a year. Here again they can cancel the contract for oil equipment on 14 days' notice. In other words, if they exercise that right today, then in 2 weeks' time we would have canceled that equipment and saved 34,000 gallons a year. If they had exercised that right shortly after December 13, none of this precious fluid would have been burned in January. That use is at the rate of 2,833 gallons a month.

Mr. Chairman, I will try to illustrate the picture a little more clearly when I revise and extend my remarks, but I do not want this moment to go by without expressing my deep conviction that if the Federal Government is asking individuals, is asking State, county, and local governments to conserve, the Federal Government itself has the responsibility in the first instance to convert wherever it can, just as the Navy has done; and the Navy is the only department which thus far has made an effective effort to do anything.

I thank the gentleman.

The tabulation to which I referred is on the stationery of the Federal Works Agency, dated December 30, 1947.

[1] Indicates buildings currently being converted to oil under contract.

The foregoing list includes (1) buildings which Public Buildings Administration operates and for which it purchases fuel oil; (2) Government-owned post offices for which fuel oil is purchased by Post Office Department; (3) Government-owned National Institute of Health buildings for which fuel oil is purchased by National Institute of Health. Buildings in (2) and (3) are listed, as the maintenance is under control of Public Buildings Administration and any conversion from fuel oil to other fuel will be done by Public Buildings Administration. Total gallons per year for Government-owned buildings, 5,950,555; total gallons per year for Government leased buildings (Government buys oil), 717,600; total gallons per year for all Government buildings, 6,668,155.

The tabulation with reference to the possible conversions of the Navy is as follows:

Possible conversions in the Navy Department

Field activity	Annual consumption, bunker C fuel oil	Equivalent consumption, bituminous coal
	Barrels	*Tons*
Norfolk Naval Shipyard, Portsmouth, Va.	590,000	135,000
Naval Station, Norfolk, Va.	610,000	140,000
Naval Air Station, Quonset Point, R. I.	210,000	48,000
Boston Naval Shipyard Annex, South Boston, Mass.	10,000	2,300
Total	1,420,000	325,300

No estimate has been submitted as to the attendant costs if conversion from fuel oil to coal are effected.

No estimate as to the time of conversion has been submitted, since such conversion is dependent upon adequate supplies of coal.

The letter from Under Secretary of the Navy, W. John Kenney, to General Fleming, dated January 9, 1948, is as follows:

Gen. PHILIP B. FLEMING,
Administrator, Federal Works Agency.

MY DEAR GENERAL FLEMING: The Navy Department was represented at the conference held December 30, 1947, in the Federal Works Agency on the subject of converting from fuel oil to coal in Government buildings, both in Washington and in the field. All agencies represented at the conference were requested to conduct surveys and to submit reports to the Administrator of the Federal Works Agency of reductions in fuel-oil consumption possible within available appropriations.

The information required for the report desired is available in the Navy Department obviating the necessity of conducting a survey of field activities. The Navy Department has taken positive steps as a routine procedure to conserve all utilities, including fuel oil, directly and indirectly. Reports received from the field indicate the fuel-conservation program is being administered effectively through special attention to temperature control and avoiding wasteful practices. It is believed this program has no effect on the present fuel-oil situation, since the conservation of all utilities is the continuing objective of the Department as a matter of economy without regard to availability of fuel.

A substantial reduction in the present rate of fuel-oil consumption can be made by the Navy Department at certain shore establishments presently equipped to burn either fuel oil or pulverized coal. The activities and the estimated quantities of coal and fuel oil involved in this category are listed below:

Field activity	Annual consumption, bunker C fuel oil	Equivalent consumption, bituminous coal
	Barrels	*Tons*
Norfolk naval shipyard, Portsmouth, Va.	590,000	135,000
Naval Station, Norfolk, Va.	610,000	140,000
Naval Air Station, Quonset Point, R. I.	210,000	48,000
Boston Naval Shipyard Annex, South Boston, Mass.	10,000	2,300
	1,420,000	325,300

The change can be accomplished as soon as adequate coal supplies are provided, and should result in a substantial reduction in fuel-oil consumption during the current heating season.

Further reduction in the consumption of fuel oil in succeeding years would result if certain facilities presently equipped to burn only fuel oil were equipped to burn also pulverized coal or gas. Funds are not presently available for projects in this category.

Sincerely yours,

W. JOHN KENNEY,
Acting Secretary of the Navy.

I understand the gentleman from Massachusetts intends to offer an amendment placing a limitation on funds for this agency so that they shall not be used for conversion from coal to oil. I want to give that amendment further study and to take it up with the other members of the committee; but offhand I am inclined to be sympathetic to it.

I yield back the balance of my time.

Mr. ANDREWS of Alabama. Mr. Chairman, I yield myself 15 minutes.

Mr. Chairman, first of all I want to take this opportunity of thanking the chairman of our subcommittee for the consideration shown the minority members of the committee. It was a pleasure to work with the members of the subcommittee, the gentleman from California [Mr. PHILLIPS], the gentleman from North Dakota [Mr. ROBERTSON], and the gentleman from New York [Mr. COUDERT]. I do not know of any harder-working Member of Congress than my esteemed friend and distinguished colleague who is chairman of this subcommittee, the gentleman from Massachusetts [Mr. WIGGLESWORTH].

I did not particularly like what he had to say about the Budget Bureau, however, because I am of the opinion that the Bureau of the Budget has done, in connection with this bill, a good job as well as with all other agencies where I have had the opportunity to examine their work. In support of that statement I would like to submit the figures shown in this bill.

The Bureau of the Budget requested for the 27 agencies represented in the bill for the fiscal year 1949 a total of $1,047,798,864. The committee allowed $991,583,551, reducing the budget request $56,215,313, which is roughly about 6 percent. So I say that I think the Director of the Bureau of the Budget, Mr. Webb, and his able assistant, Mr. Lawton, have done a good job in connection with the requests submitted for the 27 agencies represented in this bill.

I think this is the first time that the independent offices bill has been broken into two sections, so to speak. The subcommittee of the independent offices handles appropriations for 31 independent agencies. Represented in this bill are appropriations for 27 independent agencies. I think it is a good plan for the committee to break this bill in two. Later we will hold hearings on four other independent agencies, which are the big independent agencies, namely, the Veterans' Administration, the Atomic Energy Commission, the Maritime Commission, and the War Assets Administration.

This bill comes before the Committee almost unanimously. The only item that was not in agreement had to do with the emergency fund for the President. In fiscal 1948 we appropriated $500,000 for that fund. The budget request for this year was for $1,000,000. The bill provides for $700,000 which is an increase of $200,000 over the 1948 appropriation. Those of us of the minority on this committee took the position that certainly the President of these United States has a right to say how much he needs for an emergency fund, and we think that the dignity of his office requires that the Congress grant that amount. With few exceptions most every State in the Union provides an emergency fund for the Governor. It is not for us to say as Members of Congress what the President's needs are. If he requests any amount that is within the bounds of reason, then we think the Congress should go along with him. That money is appropriated for the purpose of enabling the President to use in case of an emergency, and it is for him to say what that emergency is and whether or not emergency funds should be spent. If we lack faith in his judgment to use that money judiciously, then we should not allow him one dollar. Certainly I think that the facts bear out that the President will use this money discreetly and in situations where in his judgment he deems an emergency to exist.

I like to call attention to the fact, Mr. Chairman, that in this bill every dollar requested by Mr. MacDonald, the Public Roads Administrator, has been granted for the purpose of postwar highway construction. The amount contained in the bill for that purpose is $452,288,854. As you will recall, in 1944, the Congress passed the Highway Act providing for a postwar program of road construction to be undertaken. In that bill there was an authorization for the Federal Government to spend $1,500,000,000, which was to be matched by the States, during a 3-year period. That authorization was for $500,000,000 for each of the postwar years, for 3 years.

The testimony before us was that the 1944 highway construction bill went into effect and operations were begun under that bill on October 5, 1945. That was the fiscal year 1946. Congress passed a resolution starting the work under the 1944 highway bill. So we have had since that time the fiscal year 1946, the fiscal year 1947, and the fiscal year 1948, and at present we are dealing with the fiscal year 1949—4 years.

Some criticism will be found in the RECORD there as to the charge that Mr. MacDonald has been too reckless in the expenditure of this money. I cite you the fact that when this appropriation for fiscal 1949 of $452,288,854 is added to the appropriations that have been made for the past four fiscal years, the total amount expended by the Public Roads Administration will be found to be slightly over $800,000,000, as against the authorization of $1,500,000,000 for the first three postwar years.

I should like to say a word about the attitude of this committee with reference to the loyalty investigation on the part of the Civil Service Commission. It is the desire of this committee that the work in that regard be carried on with expedition by the Civil Service Commission. We did not grant all requested in the budget by the Civil Service Commission, but we do feel that with the funds appropriated in this bill, in addition to

the unexpended funds held by the Commission, there will be ample funds to do that job.

Now a word about the Federal Trade Commission. You will notice there has been an over-all increase in the appropriation for the Federal Trade Commission of $384,000 for antimonopoly work and $58,000 for in-grade promotions. Evidence was submitted before our committee to the effect that with this money earmarked, so to speak, for antimonopoly work, the Federal Trade Commission would be in position to make an investigation and bring about prosecutions for monopolistic practices which we feel have made their share of contribution to the high cost of living. The testimony came to us not only from members of the Federal Trade Commission, but members of the small-business associations in this country.

I want to say a word about the General Accounting Office under the Comptroller General, Hon. Lindsay Warren, a former Member of the House. I think this is the third consecutive year that he has come before our committee voluntarily requesting a decrease in his funds. I do not think there is any finer, harder-working officer in the Government than Lindsay Warren. The committee granted his request with very few questions being asked.

In closing, may I say that with one exception, namely, the President's Emergency Fund, this bill comes to you almost unanimously. The bill provides for appropriations for 27 independent agencies. In 1948, the appropriations for these 27 agencies amounted to $1,188,270,525. The total amount appropriated for these 27 agencies was $794,896,577. The budget estimates for 1949 were $1,047,798,864. Recommended in this bill for the 27 agencies is $991,583,551, showing an increase over the 1948 appropriations of $196,686,974, a reduction from the budget request of $56,215,313, or approximately 6 percent.

Mr. WIGGLESWORTH. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. LEONARD W. HALL, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 5214) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1949, and for other purposes, had come to no resolution thereon.

EXTENSION OF REMARKS

Mr. PHILLIPS of California. Mr. Speaker, during the discussion in the Committee of the Whole, the gentleman from Massachusetts [Mr. HESELTON] wished to insert in his remarks certain tables. I ask unanimous consent that he may be permitted to make whatever insertion he desires.

The SPEAKER. Is there objection to the request of the gentleman from California?

SPECIAL ORDER GRANTED

Mr. HESELTON. Mr. Speaker, I ask unanimous consent that the special order granted me today be canceled and transferred to tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

EXTENSION OF REMARKS

Mr. BYRNE of New York asked and was granted permission to extend his remarks in the RECORD and include an editorial from the American Journal of Public Health.

Mr. HOLIFIELD asked and was granted permission to extend his remarks in the RECORD and include a newspaper article by Lowell Mellett.

SPECIAL ORDER GRANTED

Mr. BUCHANAN. Mr. Speaker, I ask unanimous consent that on tomorrow, after the disposition of business on the Speaker's desk and following any other special orders heretofore granted, I may address the House for 20 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. JENKINS of Pennsylvania, for February 4, 5, and 6, on account of official business.

The SPEAKER. Under special order heretofore entered, the gentleman from Wisconsin [Mr. MURRAY] is recognized

OLEO

Mr. MURRAY of Wisconsin. Mr. Speaker, I asked for this time to discuss the oleo propaganda that is becoming so vociferous here on the floor, as well as elsewhere.

To begin with I wish to discuss this oleo subject in keeping with nutritional facts, scientific facts, and economic facts, and in the light of what is for the best interest of the people of America as a whole.

You may say that I am a prejudiced witness coming from a State that produces one-eighth of the milk of the Nation. Yes, a State that produces twice as much milk as any State in the Union except one. Yes, one out of every hundred cows in America can be found in the district I have the honor to represent. Surely 80 to 90 percent of the farm income in Wisconsin comes from the sales of livestock and livestock products. Surely I have a livestock and dairy district. Assuredly, I try to look after the interests of the farmers and all groups in my district the same as I know you do. This abundance of milk production does not alter scientific or nutritional facts.

I wish to keep this discussion on a high plane. I hope you will allow me to do so. Let us consider an approach on which there should not be any disagreement.

First. If one takes 100 pounds of milk and drinks the milk, certain food and nutritional values are derived.

Second. If one takes this 100 pounds of milk and converts it into 5 pounds of butter and 8 pounds of powdered skim milk, an equal amount of food and nutritional values are derived.

Third. If one converts the 100 pounds of milk into 10 pounds of cheese and recovers the byproduct, the same amount of food and nutritional values are obtained.

Fourth. If the 100 pounds of milk is converted into evaporated milk, once again we find that the nutritional value and the food value of the original 100 pounds of fluid milk is obtained.

Fifth. If one converts the 100 pounds of milk into powdered whole milk, all the nutritive values of the original milk are obtained. Incidentally some cream is powdered for fancy candies but this is of small volume.

Before the war a very large percentage of the milk produced in the Nation was made into butter. It was the end product. Some 42 out of every 100 pounds of milk produced in the United States were made into butter, 29 pounds were sold as fluid milk and cream, 5 to 6 percent made into cheese, 5 to 6 percent made into evaporated milk and 5 to 6 percent made into ice cream and fountain use, and the remainder fed to calves and used on farms.

During and since the war a new relationship in regard to milk uses have been effectuated.

Butter production has been reduced from an annual production in 1940 of 1,800,000,000 pounds of creamery butter and 400,000,000 pounds of farm butter or a total of 2,200,000,000 pounds of butter to an estimated 1,300,000,000 pounds of creamery butter and an estimated 300,000,000 pounds of farm butter or a total of 1,600,000,000 pounds in 1947.

Oleo production increased from 343,000,000 pounds in 1940 to 738,000,000 pounds in 1947.

Dried whole milk production increased from 29,000,000 pounds in 1940 to 217,000,000 pounds in 1945, 188,000,000 in 1946, and an estimate of 160,000,000 pounds in 1947.

American cheese increased from 603,000,000 in 1940 to 956,000,000 pounds in 1947.

Evaporated milk increased from 2,464,000,000 pounds in 1940 to a high of 3,777,000,000 pounds in 1945 and 3,162,000,000 pounds in 1947.

It is, therefore, evident that there has been a great diversion of milk from butter to these other manufactured dairy products, and also, an increase in cream and milk consumption. If it takes 20 pounds of milk to produce a pound of butter, the 20 times 1,600,000,000 pounds of butter produced in 1947 would indicate that about 32,000,000,000 pounds of milk was used in the manufacture of butter in 1947. This, then, would also indicate that 26 percent of the milk produced in the United States in 1947 found its final home as butter.

The total milk production in the United States has been over a billion pounds ever since 1930. In 1940 it was 110,000,000,000 pounds and in 1947 it was 120,000,000,000 pounds.

While there has been an increase in total milk production, it has not been large, and never 10 percent more any one

year. Neither was 1947 production of milk 10 percent above the 1946 production. The use of milk in 1947 for creamery and farm butter has evidently then been from 25 to 30 pounds out of total milk production instead of the 42 pounds previous to the war. The milk formerly used in larger quantities for butter has found a new home in increased production in evaporated milk, cheese, bottled milk and cream and in dried whole milk as stated above.

The complaint is made that butter prices have gone out of bounds. But have they gone up in relation to other foods?

Please ask yourselves a few questions:

First. Do you wish to ruin the dairy industry?

Second. Can you name any dairy product where the consumer can purchase a pound of butterfat as cheaply as in a pound of butter?

Third. If you cannot answer this question affirmatively, how are you justified in complaining on the price angle so long as it is the cheapest form in which butterfat can be purchased?

Fourth. How much are you paying for a pound of butterfat up in New York when you pay 23 cents a quart for milk? Did you ever figure that one out? If you did you would be a little reticent to be complaining about the price of butterfat in butter in comparison.

Fifth. Who has the power and the authority to really fix the price of butter?

Sixth. Why has not the support price on milk been announced?

Seventh. Why is the support price of dried skim milk only 9 and 10 cents per pound?

There are two views in connection with this price angle that are worthy of discussion at this time.

First. Was it not the United States Department of Agriculture that placed the 9-cent support on roller dried skim milk and a 10-cents-a-pound floor on the processed skim milk? Did not this floor yield the farmer only 25 cents a hundred pounds for the skim milk? Even the OPA has a 14½-cents-a-pound ceiling on sprayed process skim milk. Why was not the support price for the skim milk in keeping with the spirit of the Steagall amendment, and in relation to food value in comparison to the butterfat content of the milk? If the powdered skim had a support price in keeping with its food value with its 35.6 percent digestible protein, would not the price of butter have been less all these months, and would it not be considerably less right at this hour? One trouble in the butter business is that people for 10 years had this product for much less than it cost to produce it. In 1940, the eighth year of the more abundant life, it was only 28 cents a pound on 92-score grade A butter in Chicago. According to the Bureau of Agricultural Economics, cottonseed oil was 5.26 cents a pound in 1940 and is more than five times that at the present time, while the price of butter was only 70.6 cents a pound in Chicago in 1947.

Of course, if we are going to be led off into a discussion of prices and what has taken place since last August, this administration must surely assume its share of responsibility. They have the power, the authority, and the money, and have had. If the price of a vegetable oil has increased from 18½ cents in August to 26.6 cents in November and to 29 cents on the 16th of January 1948, is there anything surprising that the wholesale price of butter should advance from 74.8 cents a pound to 82.6 cents a pound during the week ending January 23, 1948? If vegetable oil has increased in price 50 percent, why all this complaining of an increase of a little over 10 percent in butter?

Prices of butter, soybeans, and cottonseed oil at specified markets

Calendar year	Butter, Chicago, grade A (92-score) per pound	Cottonseed oil, crude, in tanks f. o. b. Southeastern mills	Crop year, October to September	Soybeans for crushing, Chicago, per bushel of 60 pounds
	Cents	*Cents per pound*		
1940	28.7	5.27	1939-40	$0.96

Jan. 16	84.1	29.0		4.34
Jan. 23	82.6			

Bureau of Agricultural Economics, Division of Dairy Statistics.

This might be a good time to ask who put the 165 percent of parity under flaxseed last year, which reflects 25 to 30 cents a pound under this vegetable oil? This cannot be put on the doorstep of the National Manufacturers' Association because this was done long after the OPA was dead and buried. What influence do you think a 25- to 30-cent floor on linseed oil has had on the price of not only other grains, but also the price of other vegetable oils? Do you care to contend that this act stabilized prices, or are you willing to admit that they increased prices? While Mr. Parron might have shown that we could produce all the linseed oil we need in this country, just exactly how much do you think this demonstration has cost the consumers of America.

Now let us take a few minutes and discuss this oleomargarine. How is oleo manufactured? Is it not composed of 15.6 percent of the cheapest form of dairy products? At least that is what the Oleomargarine Institute states. They are the ones that incorporate the skim milk into it when it is manufactured. Why is there anything surprising about it having the odor and taste of butter? The question that I would like to have every oleo lover answer is, How are you going to make this product if you do not have dairy products in order to manufacture it?

This leads up to the next product, and that is filled milk. It is the same as oleo, except that the proportions of vegetable oil and dairy products are different. This particular product is known as Milnot. This is oleo's girl friend. It is made by taking evaporated skim milk, and squirting in some cottonseed oil, and selling it as a substitute for evaporated milk made out of normal cows' milk. Do you support this product? If you subscribe to the oleo thesis you do not have to change your thinking much to be an advocate of this ersatz product. Of course, the question arises, how will you get the skim milk after the dairy cows are hanging in the coolers of the packing plants? However, this does not seem to worry some people.

Now it happens to be against the Federal law to ship filled milk interstate. It is pretty difficult for anyone to take the position and glibly say "I am for oleo" and not say "I am for his girl friend, Miss Milnot" at the same time. If the oleo group have their way, you can be sure that the next step will be to repeal the Federal law and allow this filled milk to be shipped interstate and sold in place of evaporated milk. There is a question involved, much larger than just a discussion of ¼-cent a pound tax on oleomargarine. It might interest you to know that there is a greater Federal tax on milk going to butter factories and that there is a higher Federal tax on butter per pound than on oleo before the milk ever gets to the factory. The purpose of Federal legislation in connection with oleomargarine could not be stated any plainer than was stated by Mr. Fred Brenchman, who for many years has been the Washington reporter of the National Grange. He has an article in the December issue of the National Grange Monthly and I ask unanimous consent to include it in the RECORD.

[From the National Grange Monthly]

OLEO LAWS ARE NECESSARY

(A handful of manufacturers seeks relaxing of oleomargarine controls—but let the public not be fooled by their promise of lower prices.)

(By Fred Brenckman, Washington correspondent for the National Grange Monthly)

The prevailing Nation-wide unrest about the high cost of all sorts of commodities, including butter, has furnished the manufacturers of oleomargarine with a plausible pretext in launching a new and intensified campaign for the repeal of all Federal taxes on their product.

The argument used by the manufacturers of oleomargarine, of whom there are only about two dozen in the whole United States, is that if Federal taxes were repealed it would be possible to reduce the price of this "healthful and nutritious" article of diet, thus relieving the strain on the budget of families in the low-income brackets throughout the country. This argument, of course, is supported by the dealers in the product, together with many consumers who have not taken the trouble to familiarize themselves with the facts in the case.

FUNDS FOR ENFORCEMENT

It should be clearly kept in mind that Federal taxes on oleomargarine are not levied for the primary purpose of raising revenue in

the common sense of the term, but to provide funds for administering the oleomargarine laws and to prevent fraud and deception in the manufacture and sale of the product. These laws have a twofold purpose: They protect the dairy industry against unfair competition on the part of a low-cost imitation product, and they protect the consuming public as well.

The experience of three-quarters of a century has furnished overwhelming evidence that the oleomargarine industry is one that requires proper supervision and regulation if the interests of the public are to be safeguarded. This being true, it is only fair and just that those who are engaged in the industry should pay the taxes necessary to raise the revenue required for proper supervision and inspection.

Assuming that there is not a single manufacturer of oleomargarine who is dishonest, the fact remains that when the product finds its way into the channels of trade and distribution, it falls into the hands of all kinds of people, many of whom are thoroughly unscrupulous and who are willing to take all kinds of risks for the sake of ill-gotten gain. That has been true in the past, and it is just as true today.

In the combined annual reports of the Federal Food and Drug Administration for the period from July 1, 1941, to June 30, 1943, the following occurs:

OLEOMARGARINE "MOONSHINERS"

"One of the most flagrant cases of spurious butter encountered concerned an individual known to have made at least $15,000 in the 10-month period prior to fat rationing through buying oleomargarine at 16 to 22 cents a pound, coloring it, wrapping it in quarter-pound sticks, and selling it as country butter at 45 cents a pound to small retailers, who sold it at 60 to 65 cents a pound.

"These operations entirely local in scope, resulted in actions by both the State where the fraudulent butter was packaged and marketed and the United States Treasury Department, which charged evasion of the oleomargarine tax regulations." That case occurred in Louisiana.

Up in Massachusetts, some years ago, an oleomargarine moonshiner, who had served a term in Federal prison, flooded Boston and a large part of New England with 375,000 pounds of oleomargarine, which was sold as butter. He sometimes colored 10,000 pounds of oleomargarine in semblance of butter in a single day. But the Federal agents finally caught up with him in California, where he was tried and sentenced to Federal prison for a term of 2 years.

Within recent years, the Baltimore Sun, one of the most reputable newspapers in the country, reported that 50 agents of the Bureau of Internal Revenue raided 30 homes and places of business in the Baltimore area. In one man's cellar they found 4,442 pounds of colored oleomargarine and 10,000 pounds of white oleomargarine. They also found coloring matter and equipment for coloring. For a period of 2 years the guilty individual who did business in this cellar had sold oleomargarine as butter, victimizing small restaurants, groceries, and housewives.

Abandoned barns and even caves in the woods have sometimes been used by oleomargarine moonshiners in conducting their illicit business.

This recital is not intended as a reflection on the honesty and integrity of reputable manufacturers and dealers, who constitute the big majority.

LAWS NOT OBSOLETE

It does prove, however, that our oleomargarine laws are by no means obsolete, as is often claimed by those who regard them as a hindrance in accumulating unearned profits. These laws are needed just as much today as they were in the beginning, because human nature is the same now as it was 50 or 75 years ago. If the oleomargarine moonshiners are willing to take such risks under our present laws as those which have here been briefly sketched at random, we may well ask what conditions would be like if these laws were repealed.

Surely, both the dairy industry and the consumer are entitled to protection against such lawless and reckless characters. Further than that, the oleomargarine industry itself would suffer if the laws in this connection were repealed. Such action would speedily be followed by fraud and deception on a colossal scale, and the industry would fall into disrepute in a very short time. This would be followed by an irresistible demand for the reenactment of the very laws which had unwisely been repealed.

SUMMARIZING THE FACTS

In summarizing what would happen if Federal taxation and State restrictions against the sale of yellow oleomargarine were removed, Charles W. Holman, secretary of the National Cooperative Milk Producers' Federation, well says:

1. Consumers would have no adequate protection against deception and misrepresentation. They would have no adequate way of knowing what they get when they ask for butter.

2. No control would be left to the Federal Government over intrastate production and sale of oleomargarine, because the Federal Pure Food and Drugs Act does not apply to its intrastate production and sale.

3. Profits of the two-dozen-odd oleomargarine manufacturers would swell and overflow their coffers. Repeal of Federal taxation and State prohibitions on colored oleomargarine would see the disappearance of white oleomargarine, which serves as an important price governor on the colored product. As the white product would disappear, prices of colored oleomargarine would gradually be increased in each State, and each price increase would be almost entirely profit. On the basis of a billion pounds national production, and only a 5 cents a pound rise in price, this small group of manufacturers would be able to annually divide among themselves a $50,000,000 profit.

4. With no Federal control over the interstate production and sale of colored oleomargarine, butter prices would be depressed, because of the yellow oleo competition. While temporarily lower prices for butter might appeal to consumers, the eventual result would be the slaughter of from 1,500,000 to 2,000,000 dairy cows. In addition to forcing thousands of dairymen out of business, it would mean a scarcity of milk solids, and less, rather than more, dairy products for consumers.

A firm grasp of the facts involved in this situation is all that is needed to disclose the specious reasoning that underlies the campaign of propaganda conducted by the oleomargarine interests for the repeal of existing legislation on this important subject.

One paragraph in this article which I wish to particularly call to your attention is:

The experience of three-quarters of a century has furnished overwhelming evidence that the oleomargarine industry is one that requires proper supervision and regulation if the interests of the public are to be safeguarded. This being true, it is only fair and just that those who are engaged in the industry should pay the taxes necessary to raise the revenue required for proper supervision and inspection.

Did you ever ship a load of potatoes interstate? Who paid for the inspection? The point I wish to make at this time is, just because some individual might sell milk as fluid milk or the milk happens to go to an evaporated milk factory or happens to be made into cheese or into powdered whole milk, he does not want to assume that he does not have any interest as to where oleo displaces butter. As I have said before, there is a much bigger question so far as American agriculture is involved here today than just as a matter of whether or not someone is to pay one-fourth of a cent a pound tax in the manufacture of oleo. The big question is, do you want to help ruin the dairy industry of this country and to deprive the American people of an opportunity of obtaining one of the greatest protective foods that has ever been discovered by the scientists of our country.

At this point in the record I wish to call your attention to the fact that there is a greater increase in the demand for skim milk as a byproduct from the manufacture of butter. This is indicated by the fact that the annual production of powdered skim milk before the war of 200,000,000 pounds has been increased threefold and is now over 600,000,000 pounds a year. Also at this point I wish to include a short table showing the increase in the production in the condensed sweetened skim milk and the bulk condensed skim milk.

Condensed-milk production—United States

[Million pounds]

Year	Sweetened condensed skim milk	Bulk condensed skim milk
1936–40 average	159	222
1941	174	327
1942	226	318
1943	307	326
1944	375	364
1945	520	454
1946	815	486
1947 [1]	555	400

[1] Estimated.

Source: Bureau of Agricultural Economics, U. S. Department of Agriculture.

You will note as you read the table that the 5-year average from 1936 to 1940 was 159,000,000 pounds of sweetened skim milk made in our country and that this has gradually increased up to 1946 when 815,000,000 pounds were made, and in 1947 an estimate of 555,000,000 pounds. I am not going to take your time to enumerate the many ways in which this splendid product is used in candy making, ice cream manufacture, and such. You might be interested in knowing that in 1946 when we still had the OPA that the reason why this product had such a tremendous increase in production was that it was one of the ways to buy sugar.

In addition I wish to call your attention to the increased production and diversion of bulk condensed skim milk. The 5-year average from 1936 to 1940 was 122,000,000 pounds; 1945, 1946, and 1947 show that the production of this good product has doubled in production. This product has many uses, and there is no doubt but that in many places this unsweetened bulk condensed milk has been used by reconstituting it with frozen cream and selling it in the form of bottled milk. The point I wish to make at this time is that if there is not going to be a satisfactory home for the butterfat in the form of butter, how are you going to obtain the skim milk and its

products? Innumerable markets have been found for these skim-milk products which also include cottage cheese with over 19 percent digestible protein.

There is enough happening to the dairy industry today without starting all this talk about oleomargarine and in complaining about a ¼-cent-a-pound tax. If some of these oleo people would go into some cities and start a milk business they would find that they had a tax to pay before they could get started in the business.

My contention, Mr. Speaker, is that although I have followed all the experiments that are supposed to prove the wonders of oleomargarine, there are not any of them that have ever proven too much. What makes these experiments appear worthless is the fact that as everyone knows the oleomargarine contains enough dairy products to make the rats show somewhere near the same response to oleo feeding that they do to butter feeding. Why is not an experiment made that is not in part a dairy product and see how the experiment ends up? I wish that some of these pseudo-scientists would make that experiment, and then see what story they would have to tell.

Mr. Speaker, my contention is that the United States of America is a full milk country. That the dairy cow is a most efficient producer of human food on the face of this earth. In support of this contention, I ask unanimous consent at this point in the RECORD to include a short table from page 44, table 36 of Feed Consumption by Livestock, Circular No. 670, United States Department of Agriculture:

	Unit	Feed converted into human food by—						
		Hogs	Milk cows	Beef cattle	Sheep and lambs	Poultry		
						Laying flocks	Chickens raised	Turkeys raised
Human food produced by 10 feed units of all feed, except pasture:								
Calories	Calorie	3,629	4,627	837	1,880	1,260	958	1,522
Protein	Pound	0.14	0.52	0.121	0.21	0.23	0.22	0.26
Calorie plus protein index.		1.16	2.54	.56	1.04	.99	.92	1.14

This table proves that the dairy cow when provided a given amount of feed will produce twice as much human food as any other farm animal, and four times as much as some farm animals. I do not subscribe to a system of life, nor to a system of agriculture based on the thesis of cream for the few and skim milk to the many. If the dairy cow is, and I have just proven that she is, the most efficient livestock producing animal in the world, I ask any fair-minded man why try to tear her down in her efforts to feed the people of this Nation?

I have here today a plastic cow. As you will notice she is about a foot high and 2 feet long. Her name is Rebecca. I keep her in my office so that I will never forgot the great benefits she represents in furnishing food for the human race. I also realize that she is a symbol, and in fact, she is "the foster mother of the human race." I do not have the time to enumerate all the products that are made from the products of this great animal. I do, however, at this point ask unanimous consent to include some milk facts obtained from the Milk Industry Foundation's 1947–48 edition.

[From Milk Facts, 1947–48 edition]

VALUE OF MILK IN THE DIET

Federal Security Agency, United States Public Health Service: "Of all the factors of man's environment, none is more important to his welfare than food. Of all foods, none is more important than milk."

United States Department of Agriculture: "Milk does more for the body than any other food. It provides high-quality protein, calcium, and vitamins A and G cheaply."

Dr. Charles H. Mayo, late distinguished surgeon, Mayo Clinic: "Every person, young or old, should drink milk. Milk contains a large variety of nutritional constituents and, considering its cost per pound, more food for the money than any other food material available."

Dr. H. C. Sherman, professor of chemistry, Columbia University: "Increasing the proportion of milk in the diet should add to the length of life."

Dr. E. V. McCollum, professor of biochemistry, Johns Hopkins University: "The people who have achieved, who have become large, strong, vigorous people, who have reduced their infant mortality, who have the best trades in the world, who have an appreciation of art, literature, and music, who are progressive in science and in every activity of the human intellect, are the people who have used liberal amounts of milk and its products."

GENERAL INFORMATION

Historical food

Milk is one of the oldest known foods. Records exist of cows being milked in 9000 B. C. The Bible contains many references to milk, one of the best remembered from Exodus 3: 8—"milk and honey." Sanskrit writings 6,000 years old tell how milk is one of the most essential of all foods. Hippocrates recommended milk as a medicine five centuries before Christ. In Ur of the Chaldees a frieze depicts a dairy scene in 3500 B. C. showing milk containers and strainers.

First United States cows

The Pilgrims made the mistake of not bringing cows and lack of milk was said to have had a bearing on the high death rate, particularly of children. Cows were required to be brought on later ships.

When the frontier moved westward, the covered wagons were accompanied by cows.

River of milk

Enough milk is produced annually in America to fill a river 3,000 miles long, 40 feet wide, and 3 feet deep. If all of the milk produced in the United States in 1946 had been put in quart bottles side by side, the bottles would extend almost 140 times around the earth.

Nutritive value

A quart of milk—four glasses—supplies approximately these percentages of the daily nutritive requirements of an average man: Calcium, 100 percent plus; riboflavin (vitamin G), 82 percent; phosphorus, 67 percent; protein, 49 percent; vitamin A, 30 percent; thiamin (vitamin B_1), 22 percent; calories, 22 percent; vitamin C, 19 percent; niacin, 6 percent; iron, 3 percent.

Economy of milk

There is no waste in milk as every drop can be used and the cost is very low in proportion to food value. Milk is one of the best food investments at any price. Families on low-cost diets need a generous allowance of milk as diets are limited in variety and lack vital essentials. Milk can make up that deficit at low cost.

Government nutritionists say that in terms of money value from one-fifth to one-third of the allowance for food should be spent for milk and its products. Dr. Henry C. Sherman, Columbia University, recommends that regardless of the amount expended for food, as much should be spent for milk and dairy products as for meat, poultry, and fish.

Pasteurization

A process named for Louis Pasteur, scientist, by which every particle of milk is heated to not lower than 143° F. for not less than 30 minutes and promptly cooled to 50° F. or lower to destroy any harmful bacteria that may be present without affecting flavor and food value. Another method raises the temperature of milk quickly to at least 160° F. for not less than 15 seconds, followed by rapid cooling.

The first compulsory pasteurization law was enacted in 1908 in Chicago. All milk for our armed forces and 88 percent of the fluid milk supply in United States cities of over 10,000 population is pasteurized. The United States Public Health Service says: "The public health value of pasteurization is unanimously agreed upon by health officials. Pasteurization is the only measure known which if properly applied to all milk will prevent all milk-borne disease."

Grading

Milk is often graded A, B, etc., according to local regulations based on conditions under which it is produced and handled from the standpoint of bacteria count, quality, cleanliness, etc.

Certified milk

A milk produced under standards of the American Association of Medical Milk Commissions.

Homogenized milk

Milk in which butterfat has been mechanically broken up and dispersed evenly throughout the milk. There is no cream line as the fat globules are held in suspension producing a uniform flavor and softer curd.

Vitamin D milk

Milk that is fortified with vitamin D, the vitamin with the special property of preventing rickets. Vitamin D is added by any one of three methods—exposure of milk to ultraviolet light, adding a vitamin D concentrate, or feeding cows irradiated yeast.

Conversions

One quart of milk weighs 2.15 pounds. To make a pound of butter 9.77 quarts of milk are required, 4.65 quarts for a pound of cheese. One quart of milk is required for a pound of evaporated milk, 3.72 quarts for a pound of whole milk powder.

Milk equivalent

Figures on utilization of milk are generally in terms of the equivalent of milk containing

3.5 percent butterfat. Where cream is included, the figures also have been converted to milk of 3.5 percent butterfat content; i. e. to include 1 quart of cream of 19 percent butterfat content in a tabulation of milk figures, the cream must be converted mathematically to the equivalent of milk of 3.5 percent butterfat content.

Milk in industry

In more and more industries milk is being used to improve employees' health and counteract fatigue. Reductions in accidents with an improvement in safety, less absenteeism due to illness, increased production during hours of fatigue low points, are reported where milk is being served between meals or added to diets.

Industrial uses

Milk is used in a wide variety of industrial products such as plastics, textiles, paper coating, paint, glue, films, pharmaceuticals, insulation, fertilizer, insecticides, penicillin, plaster, dyes, animal feed, preservatives, explosives, electroplates.

Workers

Estimated workers employed in processing and delivering dairy products total 250,000.

Motortruck transport

More motor vehicles are used in the distribution of milk than any other commodity. There are approximately 190,000 trucks used in delivering milk and dairy products from farms to plants and from plants to consumers.

A statement in this report by Dr. E. V. McCollum, professor of biochemistry at Johns Hopkins University, to which I would like to call your attention is as follows:

The people who have achieved, who have become large, strong, vigorous people, who have reduced their infant mortality, who have the best trades in the world, who have an appreciation of art, literature, and music, who are progressive in science and in every activity of the human intellect, are the people who have used liberal amounts of milk and its products.

I had the privilege of being a student at the University of Wisconsin when Dr. McCollum was doing his pioneering work in vitamins. I remember at that time they did not call them vitamins. What is now known as vitamin A was then known as fat soluble A. I am sure that everyone of you are acquainted with the world-wide fame that has been accorded this great chemist. Dr. McCollum; Dr. E. H. Farrington, uncle of our distinguished colleague from Hawaii; Dr. E. B. Hart; Dr. Babcock; and ex-Governor Hooad, of Wisconsin, have done more to prove to the people of this world that milk is the greatest single food ever known to man than any other living Americans.

SOIL CONSERVATION

Another angle of this dairy industry must be viewed in the light of conservation of the soil of our Nation. Livestock farming, as you know, is the system of farming that is conductive to soil conservation. At this point in the RECORD, Mr. Speaker, I wish to include a short article from the February 1948 Farm Journal, page 85, by Ray Anderson, in which he calls attention to the fact that a State that has mostly livestock farming raises what they feed and feed what they raise, maintain the fertility of their soil and the tilth of their soil.

The article is as follows:

[From the Farm Journal of February 1948]

RAY'S RAMBLINGS

(By Ray Anderson)

I heard a Wisconsin man kid an Illinoisan yesterday because the corn crop in Wisconsin was higher in average yield and better in quality than Illinois grew in 1947.

And I heard the Illinois man retort that "if we grew corn only in the hollers we could have had high yields, too."

It was a fair come-back, but not strictly accurate. Wisconsin had a better average corn crop in 1947 than Illinois, Iowa, Indiana, or Ohio, simply because most of the corn in Wisconsin goes on sod ground. Last season was one that demonstrated clearly that corn on soil of good tilth, like after alfalfa or sweetclover, does a whole lot better. And last season also made clear the important fact that commercial fertilizers, or the best of hybrid seed, will not by themselves produce a good crop. It takes active living soil besides.

And Wisconsin has soil of that sort, made that way by deep-rooted legumes. Oh, sure, so does Illinois, and Iowa, and other Corn Belt States, but look at the record and you will find that Illinois grows 16 acres of corn to 1 acre of alfalfa or sweetclover. The ratio is about the same in Iowa, not quite as wide in Indiana and Ohio, but in Wisconsin the ratio is 2.9 acres of corn to 1 acre of alfalfa and sweetclover. (Dr. G. N. Hoffer of La Fayette, Ind., put me on to that one.)

In this connection I include an article from the Country Gentleman of February 1948, entitled "The Best Risk in Agriculture":

THE BEST RISK IN AGRICULTURE

This country is facing a really serious livestock situation. Cattle numbers have undergone another sharp reduction, a spring-pig crop below last year's total has been forecast, and sheep are close to the lowest point since the 1860's.

All of this decrease in the sources of supply comes at a time when the demand for meat is the highest on record. With the Nation's population 12,000,000 larger than in 1940 and increasing at a rate of over 2,000,000 a year, there is a market for much more instead of less livestock production. Moreover, our agricultural system, with its large outlay of grass, hay, roughage, and feed grains, requires an extensive livestock production if it is to remain sound and prosperous.

These facts give a gravity to the situation and raise the question of when and how the downward trend in livestock can be reversed. That it must be reversed, if the national welfare is to be served, is plain.

For various reasons, particularly the use of grass and forage that would otherwise not be utilized and the growing food preference of consumers, cattle are the most important factor in the case. For 3 years slaughter and normal losses have exceeded the annual calf crops. The heavy movement of cattle to market in 1946 and 1947 drew heavily on the reserves of replacement and future marketing for it included more cows and calves than usual. This excludes any hope of an early expansion in beef cattle. In fact, Charles A. Burmeister, of the United States Department of Agriculture, and regarded by many as the ablest analyst of the livestock industry, figures 1951 as the nearest date to look for an increase in cattle numbers.

The main influence in this downward trend in the cattle cycle is different from those of the past, which were usually low prices, bad times, or drought on the range. Cattlemen this time are marketing their herds more closely because of high prices and the uncertainty of how long these prices will last. So long as this is the chief consideration the downward trend will continue. It can be reversed only when stockmen feel enough confidence in the future to start holding back breeding stock and marketing fewer animals than the number of calves raised. This will mean less meat on the market temporarily, but it will be to the consumers' long-time advantage—a fact of which they should be fully informed.

Stockmen should be able to find good reasons for this confidence in the future. With higher average incomes people have demonstrated that they want more meat in their diet. While pork has been called "the poor man's meat," a preference for beef has been indicated ever since the war boosted wages. Not even last year's heavy marketings satisfied the demand. To supply consumers with as much beef and veal as in 1947 and maintain the cattle inventory, observers say it would be necessary to increase cattle numbers to well over 90,000,000 head. They are now down to about 76,000,000 head.

Full utilization of our pasture, hay, and roughage resources, as well as good land use, warrants an increase in cattle production. Since the First World War the number of horses and mules has gone down about 17,000,000. In terms of hay and pasture required this is equivalent to about 20,000,000 cattle and calves. Most of this slack has been taken up by them. But a further reduction in work stock is anticipated and a decline of 18,000,000 head of sheep since 1942 is equal to the grazing requirements for another 2,000,000 head of cattle. A national land policy, certain within the next decade and furthering the use of land for grass and legume crops, will increase the grazing and forage facilities available for cattle. The prospects of outside competition are less than formerly. Since early in the war, Canada has imposed a virtual embargo on exports of beef cattle to this country in order to meet its commitments to Great Britain and to protect its own economy. The presence of the foot-and-mouth disease in Mexico will hold down, if not cut off entirely, all imports from that country. Our livestock growers have the market to themselves.

There is another point that should cause cattle producers to think hard. A meat supply, below consumer demands and high priced, is likely to cause public resentment and to make meat a political target. It provides a handy argument for those who want price controls, rationing, and other Government interference. That these would obstruct rather than encourage an increase in livestock production is beside the point. Their threat is real.

But the opportunity is likewise real. The facts of the situation—our increasing population, the demand for meat, higher labor income, the lack of import competition, the sound financial condition of the range—all add up to one of the most favorable prospects cattle raisers ever had. In fact, livestock generally looks like the No. 1 best risk in agriculture.

Inauguration of grass farming, which goes along with livestock production, is a conservation practice that most assuredly will be evident and benefit the present as well as the future generation.

In the State of Wisconsin we have 626 dairy products cooperatives and 1 of these marketing cooperatives has a membership of 13,000. I ask unanimous consent to include at this point a list by States of the co-ops of the Nation.

1944–45

Total farmers' marketing and purchasing associations, by States

	Associations listed	Estimated membership	Estimated business
			In thousands of dollars
Minnesota	1,362	420,000	461,980
Wisconsin	1,030	272,800	273,660
Iowa	739	298,730	309,900
Illinois	614	411,780	416,870

At this point I wish to call your attention to excerpts of an article by Mr. Charles D. Hysong, of Cambridge, Mass.:

[From the New York Times]

CONSUMPTION OF MEAT—EFFECT OF TEMPORARY REDUCTION ON FOOD PRICES POINTED OUT

(The writer of the following letter is an instructor in the Graduate School of Public Administration at Harvard.)

To the EDITOR OF THE NEW YORK TIMES:

The current focusing of attention on meat prices as an avenue of approach to the solution of inflation is both logical and within the realm of possibility. However, both the nature and the effectiveness of the solution that may eventually be reached depends not only on the definition of the problem, but also on a thorough awareness of how and why meat occupies a key position.

It is generally recognized that meat is the balance wheel in our use of grain. High meat prices siphon off grains that might be used as human food as well as grain for industrial uses and the production of other livestock products such as milk and eggs. The higher meat prices are, the higher the other uses must bid to secure the necessary grain to maintain production. Obviously, if grain were in adequate supply, there would be no such pyramiding to inflate the price of meat. However, grain supplies today are short of demand, and future outlook does not promise a quick easing of this situation. A further complication is the relatively short supply of meat.

Nutritionists have pointed out that the direct consumption of grain by human beings is the most efficient use of a short supply, and that grain converted into meat is one of the least efficient. The simple solution might, then, seem to be to reduce the amount of meat consumed. Such a course, unfortunately, does not recognize the fact that meat and livestock in general are part of a general pattern of use of our agricultural resources.

UTILIZING TOTAL RESOURCES

One of these resources is grass, a crop of comparable importance to grain. Cattle, and to a lesser extent hogs, are our only means of converting this grass into human food. Furthermore livestock can convert this grass efficiently only if optimum amounts of grain are fed at the same time. In other words, the net gain or loss from producing livestock must be calculated in terms of the total resource utilization rather than the simple comparison of conversion of calories from grain into human food. Of lesser, but not insignificant importance, is the production of hides, medicinal products, fertilizer and other byproducts made possible by livestock. And finally there is the question of soil fertility. The drain on our soil resources by grain is considerably greater than the net loss from the raising of livestock.

This is not to say that there should be no shifting in livestock production. There is, for instance, a considerable difference in the efficiency of various types of livestock in producing human food, with the dairy cow and the hog near the top of the list and beef at the bottom. On the other hand, without the beef herds the grasslands of the Western Plains would not be converted into human food. This suggests that the problem is not simply one of cutting meat consumption but rather one of changing the consumption pattern to maintain the highest net return from our agricultural resources. In the last analysis this becomes a problem for the livestock raiser and Government agricultural policy.

It is a patent oversimplification, however, to conceive of the problem of meat prices and inflation as beginning and ending with the cow, the hog, and the hen. Of equal weight is the question of consumer income and expenditure. The solution to the meat and the related inflation problem demands that the solution be integrated on all levels from the producer to the consumer.

Mr. Speaker, my contention is: First, that this is a poor time to be adding any burdens to the dairy farmers of this Nation. December of 1947 showed the smallest milk production since 1940, and you must remember that we have had an increase in United States population of 11,000,000 in numbers. Second, I also contend, and I do not think anyone will dispute this statement as fact, that as soon as the fever gets out of some of these price situations, that there will be a gradual decrease in the amount of oleomargarine manufactured, and that they are becoming particularly vociferous at this time due to a temporary situation. If you would look up the production last spring when the price of milk went down, in many sections of the United States the milk returns were only $2.70 to $2.80 a hundred pounds to the producer, or 30 cents a hundred pounds below the legal lawful price, and the production of oleomargarine dropped from 41,000,000 pounds in May 1946 to 37,000,000 in 1947. For all the propaganda that we hear about this oleomargarine, remember that the American people in 1947 consumed twice as much butter as oleo. When people really obtain the facts about dried skim, butter prices will be lower.

Third, I again ask if you believe in oleo, do you believe in filled cheese and filled milk? I had not intended to bring up another angle of this price situation, but there are so many people talking about the housewife that I feel I should spend a few minutes on this angle. She can save herself some money and provide herself with a most acceptable dairy product. As I said before, I believe that this is a whole-fluid-milk country, and I think that in the school-lunch program whole milk should be used instead of skim milk, although I realize and do appreciate the fact that it is very fortunate that even the skim milk can be used in the school-lunch program. The product that I want to call to your attention is dried whole milk. This particular sample comes from the Badger Cooperative, which is a rather strong dairy cooperative and one of the largest of the 626 dairy cooperatives in the State of Wisconsin. In a letter of transmittal Mr. George Rupple, president and general manager of the Consolidated Badger Cooperative, states as follows:

We are forwarding to you today four 1-pound cans of dry, whole-milk powder, gas paced, and each can will make a gallon of milk, or in other words, it takes approximately 4 ounces of this product with enough water added to make 1 quart of milk. But I must say that care should be taken in making this mixture. It should be mixed and held in the ice box at least 12 hours before used, and be sure to mix only with cold water. Serve only when it is very cold, do not let it warm up.

I will attempt to give you a few figures as to the cost of this product which could be very misleading if not properly presented, because the costs that I will give you are what we could sell it for in the respective size package, but jobbers' and retailers' profits would have to be added which I will leave to you, but later in this letter I will indicate the approximate price it is now being sold at off the grocery shelf, which I think is a little out of line, too high.

At the present price of milk which is approximately $4.25 per hundred delivered at our plant for 3.5-percent milk, 1-pound tin of this product would cost, f. o. b. our plant, about 55 cents. If the milk was $3 per hundred, the same product and package would cost about 44 cents. Now to this you must add retail and wholesale profits, which I am going to suggest as 10 to 15 cents per pound, because today throughout the grocery stores in this country, our competitors are selling a 1-pound can all the way from 60 to 75 cents a pound.

This same product packed in 200-pound barrels delivered Washington, D. C., today sells for approximately 46 cents a pound and if milk was selling for $3 a hundred, delivered plant for 3.5-percent milk, the price for the same size barrel would be 35½ cents per pound, delivered, Washington, D. C.

We are shipping to you under separate cover four 1-pound cans without a label. We are leaving the label off intentionally so that there is no chance of you being accused of advertising. If you need additional samples let us know. I hope that this information will be helpful to you.

Now let us stop and analyze this situation for our New York friends who do not like to pay 23 cents a quart for milk in New York City. Some of our New York

milk producers of fluid milk appear to give aid and comfort to our enemies so far as oleo is concerned. It will be well to spend a few minutes in discussing where a housewife can really make a saving so far as dairy products are concerned. This product can be purchased for 60 cents a pound, so milk can be made at 15 cents a quart. A housewife can save between $25 and $30 a year on every quart of milk she buys. I just mention this so that some of the fluid milk producers will not get so anxious to get lined up with the oleomargarine crowd. You cannot get any of the scientists to make any derogatory remarks about this dried whole-milk product. It is a very high quality product. To begin with, it is pasteurized before it is dried. It has been in use for over a quarter of a century, and although only twenty-five to thirty million pounds were produced before the war, during the war it had a production of around 200,000,000 pounds a year, which is an indication of a new field for dairy products. Remember when you are buying this product you are not buying a substitute for milk, you are buying milk itself, and when you are buying oleomargarine you are not buying a substitute for butter, you are buying something in place of butter that is used no doubt because it has enough dairy products in it to make it usable. To keep this discussion on a scientific basis, it may be well to call your attention to the fact that you can make the same product as oleo out of coal. That is, another form of vegetable oil.

In conclusion allow me to say that if you want some vitamin A there is nothing to stop you from going to the corner drug store and buy them, and if you eat oleo long enough you may need all the vitamins, so that you may need to purchase the one-a-day brand.

At this point I ask to include a letter to Dr. Thomas Parran, of the United States Health Service, and his answer thereto:

SEPTEMBER 26, 1945.

Dr. THOMAS PARRAN,
Surgeon General, United States Public Health Service, Washington, D. C.

DEAR DR. PARRAN: In reading various newspaper articles all during the war I noted in many instances the stress placed on foods with a high vitamin A content as part of a pilot's diet.

Pilots have told me that they have always had plenty of butter and that they used it freely.

I have never heard mentioned in my conversations with pilots nor have I read in the newspaper articles any reference to the consumption of oleomargarine.

Would you be kind enough to give me the information as to whether oleomargarine was prescribed as part of the diet for pilots at any time during the war.

Sincerely yours,

REID F. MURRAY,
Member of Congress.

FEDERAL SECURITY AGENCY,
UNITED STATES PUBLIC HEALTH SERVICE,
Washington, September 28, 1945.

DEAR MR. MURRAY: Your letter of September 26, concerning the use of oleomargarine by pilots, has been received.

I am informed by the Surgeon General's Office of the Army that oleomargarine was not prescribed as part of the diet for pilots at any time during the war.

Very sincerely yours,

THOMAS PARRAN,
Surgeon General.

There are two facts that are very apparent. One is that the more the people talk about rationing meat the less meat the people are liable to obtain, and second, the more we hear about this oleo business the less milk will be produced in the United States and the less dairy products the people of this Nation will be able to purchase.

Mr. Speaker, at this point I wish to include a memorandum from Mr. Charles W. Holman, secretary of the National Cooperative Milk Producers Federation, in which he calls my attention to certain inaccuracies made in the comments by my distinguished colleague and friend the gentleman from Texas [Mr. POAGE]. I call your attention to the last sentence, which reads as follows:

Oleomargarine never used more than 18.8 percent of the soybean oil supply in any year and in the first 9 months of 1947 used only 15.8 percent of the total quantities of soybean oil disposed of in that period.

THE NATIONAL COOPERATIVE MILK PRODUCERS FEDERATION,
Washington, D. C., January 29, 1948.

Hon. REID F. MURRAY,
New House Office Building, Washington, D. C.

DEAR REID: Here is a memo concerning certain errors in the talk by Representative POAGE which was printed in the CONGRESSIONAL RECORD. In some way the memo got lost on my desk or I would have sent it to you earlier.

Sincerely yours,

CHARLES W. HOLMAN,
Secretary, The National Cooperative Milk Producers Federation.

MEMORANDUM

To: Mr. Holman.
From: L. F. Herrmann.
Date: January 20, 1948.
Subject: Comment on W. R. POAGE address on oleomargarine.

This speech by Mr. POAGE contains a number of errors of statistics and logic. I have a number of comments to make on these, referring to the page numbers in the mimeograph copy of the address at which the various points appear.

On page 19 appears this statement which contains several statistical errors: "To achieve this health goal, 657 pounds of milk or its equivalent per capita are required compared to the estimated 1947 supply of 430 pounds (of which 403 pounds is fluid milk or cream). To fill the gap of 227 pounds per capita, approximately 5,820,000 additional dairy cows would be needed at the 1946 high rate of production per cow."

The first error is that the 1947 supply of milk or its equivalent is 578 pounds rather than 430 pounds. In the October-December National Food Situation published by the Bureau of Agricultural Economics, it is estimated that total milk for human consumption was 811 pounds per capita. This figure includes the milk equivalent of butter, which is not a product to be compared with the "657 pounds of milk or its equivalent." The milk equivalent of butter included in the 911 pounds amounts to 233 pounds, leaving a balance of 578 pounds to be compared with the 657 rather than 430. Thus the gap is only 79 pounds per capita instead of 227 pounds per capita. Seventy-nine pounds per capita for 143,200,000 people in the civilian population amounts to 11,300,000,000 pounds of milk. The 1946 rate of production per cow is 4,891 pounds per cow indicating 2,320,000 cows instead of 5,800,000 cows. It is probable that the latter figure still would achieve substantially the same effect that Mr. POAGE attempted to accomplish with his erroneous statistics. The detectable error, however, sheds a modicum of doubt upon other statements which are not so readily verifiable.

Farther down on page 19, Mr. POAGE makes the following statement: "The average price paid for milk sold as fluid milk or cream during the 10-year period 1936–46 was about 74 cents per pound; for butterfat, about 37 cents per pound. The prices paid for milk for use in ice cream, cheese, and other products fell between the two levels." This statement is accurate, but it is followed by another statement which is erroneous: "In other words it was twice as profitable during this period for the dairy farmers to sell this milk for whole milk as it was for him to divert it to butter manufacture." This is erroneous because the dairy farmer selling whole milk has higher expenses than the dairy farmer selling butterfat in the form of separated cream. The dairy farmer selling whole milk must pay a greater hauling charge per pound of butterfat sold. He must also meet more exacting requirements as to equipment, materials, and methods used in the production of his product. The farmer selling farm-separated cream retains his skim milk on the farm where it is used as an extremely valuable protein supplement in the ration of his hogs and poultry.

On page 20, it is possible to admit that the percentage of the Nation's milk production going into butter production has dwindled without admitting the unwarranted inference that a further decline in the quantity of butter which consumers stand ready to take at a given price would be of no significance to dairymen. What has hurt dairymen is that consumers are willing to pay only about two-thirds of an industrial worker's hourly wage for a pound of butter and buy only 11 pounds of butter per capita per year currently while in the 1920's consumers would pay a full hour's wage and buy 16 to 18 pounds per capita.

The statement on page 21 that the feeding of skim milk to animals was a loss both to consumers and dairymen is erroneous. The feeding of skim milk to livestock is definitely an economic practice under certain conditions. Small dairy herds and herds at a distance from plants able to receive whole milk could not have had their dairy herds at all if the productive use of skim milk in livestock feeding were not possible. As a result of salvaging their skim milk in this way there were more active dairymen at the outset of the war than would otherwise have been the case, which made possible the vast expansion of supplies of whole milk for human consumption which occurred with the onset of World War II.

The paragraphs comparing farm receipts from sale of soybeans and dairy products on page 24 contain a number of errors. In the first instance the speech refers to "Cash receipts for soybeans produced in 1946." The source of these statistics is the Farm Income Situation for May 1947, published by the Bureau of Agricultural Economics, and the exact data taken by Mr. POAGE are the cash receipts for soybeans sold in 1946. It includes the value of that part of the 1945 crop which was sold in 1946 and of that part of the 1946 crop which was marketed before the end of the year. The same error in terminology is made at other places in this part of the speech.

A more serious error occurs in the paragraph citing the statistics for Illinois. This paragraph gives the cash receipts from dairy products in 1946 as $146,022,000. Mr. POAGE

has committed the error of citing the 1945 figure for receipts from dairy products. The correct 1946 figure is $175,726,000, plus dairy-production payments of $19,192,000, or a total of $194,918,000. Mr. POAGE said the value of the soybean crop was $37,000,000 greater than the value of dairy products, but the corrected statistics show that the value of the soybean crop was $12,000,000 less than the value of dairy products in 1946.

On page 25 it is stated that 1 pound of soybean meal will replace from 3 to 4 pounds of corn in the livestock ration. That is true only when the comparative protein content of soybean meal and corn are considered. Corn, however, is not fed primarily for its protein content. As a source of total digestible nutrients or calories, corn and soybean meal are equivalent, pound for pound.

On the same page, page 25, Mr. POAGE makes the categorical statement that there must be a profitable market for the oil which is crushed out of soybeans in order to get the soybean meal to chickens and cattle economically. This is not true. Soybeans can be fed directly to livestock freshly ground or mixed with other grains in a balanced ration. Prof. J. B. Fitch, head of the department of dairy husbandry at the University of Minnesota, says: "Ground soybeans are practically equal to linseed meal as a source of protein for dairy cows. Because of their high fat content they may cause a slight increase in the butterfat in milk. Soybeans are very palatable."

While it is true that the dairy industry pays more to the soybean grower for the soybeans and soybean meal which it buys and uses as feed than the soybean grower realizes from oil used in oleomargarine, it is not true that soybean meal is the only form for which the dairy industry can or must make use of the valuable protein supply found in the soybean. Department of Agriculture statistics show that oleomargarine is a minor use for soybean oil. Oleomargarine never used more than 18.8 percent of the soybean-oil supply in any year, and in the first 9 months of 1947 used only 15.8 percent of the total quantities of soybean oil disposed of in that period.

I maintain that the United States is a whole-milk country.

The following is a telephoned list of the amounts of skim milk used in various States through the school-lunch program:

States for which dried skim milk was purchased under school-lunch program

	Number of pounds purchased
Alabama	280,017
Arizona	54,000
Arkansas	324,000
California	583,200
Colorado	54,000
Florida	54,000
Georgia	216,000
Idaho	54,000
Illinois	54,000
Iowa	54,000
Kansas	108,000
Kentucky	140,103
Louisiana	378,000
Maryland	54,000
Massachusetts	108,000
Michigan	162,000
Minnesota	216,000
Mississippi	162,000
Montana	14,935
Nevada	10,800
New Hampshire	27,000
New Mexico	21,600
North Carolina	175,500
Ohio	756,000
Oklahoma	356,400
Oregon	76,815
Rhode Island	27,000
Tennessee	119,880
Texas	648,000
Utah	54,000
Virginia	121,500
Washington	162,000
West Virginia	162,000
Wyoming	16,200
Hawaii	156,900
Puerto Rico	207,100

Dried skim milk purchased only for milk deficit areas, used mostly for cooking purposes in Northern States, reconstituted and used for fluid milk in Southern and Southeastern States:

Total amount purchase, 7,358,000 pounds.

Price, f. o. b. manufacturing plant, 16 cents per pound.

Source: United States Department of Agriculture.

The question always is, How is one to make oleo without milk? Another question is, How is one to obtain milk and skim milk for the school-lunch program when and if oleo was to displace butter?

If the dairy cow is the foster mother of the human race and is the most efficient farm animal in the production of human food should we not be able to furnish natural milk in our Federal school-lunch program?

Will we soon see the vegetable-oil interests advocating oil from trees to displace the other vegetable oils? The following article is from the Washington Sunday Star:

BIG FLORIDA REFINERY TO EXTRACT VEGETABLE FATS FROM WOOD

NEW YORK, January 31.—Construction is under way on a $1,700,000 refining plant at Panama City, Fla., for production of industrial vegetable fats from wood, John H. Hinman, president of International Paper Co., disclosed today.

The plant is being constructed by Arizona Chemical Corp., owned jointly by International Paper and American Cyanamid Co.

In addressing a dinner celebrating his company's fiftieth anniversary, Mr. Hinman said:

"It is also quite possible that in the future such edible fats as are used in cooking and frying can be produced from United States forests for use in United States homes as a result of the progress we are making in developing the separation process for 'tall oil.'

"While the production of such foodstuffs is now technically feasible, it is not yet known whether it would be economically efficient."

"Tall oil" is the term applied to the product which is derived from the liquor that remains after wood is cooked. The new plant will separate the "tall oil" into its component parts, vegetable fats and rosins.

Mr. Hinman said the plant is scheduled to go into production in about 1 year. It will have an annual maximum capacity to process around 22,000 tons of crude "tall oil."

When combined with reagents, the company said, "tall oil" performs the same functions as many other oils such as linseed in the manufacture of paints and varnishes. It is also widely used in making disinfectants; many types of soaps and emulsifiers; in metal processing; in cutting and lubricating oils, core oils, textile-processing oils, and other industrial products.

The following article is from the New York Times of Sunday, December 7:

FOOD EXPORTS SHOW 46 PERCENT SEPTEMBER RISE

WASHINGTON, December 6.—United States exported 46 percent more foodstuffs in September than in the same month last year, the Commerce Department reported today.

The total was $175,224,000, an increase of $54,911,000 over the figure a year ago. September exports also exceeded August's by $1,258,000 but were $7,463,000 below July.

Government officials said that much of the increase resulted from higher prices.

The department reported that the United States imported more foodstuffs during the first 9 months of this year. It said imports totaled $1,200,842,000, a 26 percent increase over the same period a year ago.

During September, it said, there were substantial increases in the purchases of canned beef, sardines and tomatoes, preserved pineapples, cane sugar, coffee, whisky, black pepper, and some varieties of molasses.

Major increases in exports for September were in beef and veal, lard, dairy products, canned salmon and sardines, grains, wheat flour, feeds, white potatoes, canned fruits and vegetables and sirups.

THE DAIRY SITUATION AND OLEOMARGARINE

Mr. Speaker, there are at least four different angles to this oleo question that should be discussed. First, we should discuss it from the basis of the quarter-of-a-cent tax and the 10-cent tax on colored oleomargarine. Second, we should discuss it in relation to the cost of living. Third, we should discuss it in relationship to the soil fertility of this Nation. Fourth, we should discuss it in regard to the future effect on American industry and the general health and general welfare of the people of the United States.

I might say to start with that this old argument as to whether vegetable oil is equal to animal fat has been going on for a long, long time. I have reached the time in life when I know that I do not have all the answers and I do not try to give anyone the impression that I have all the answers. As an indication of what has happened in relation to the vegetable oils, as far as oleo is concerned, I might say that the old fight used to be on cottonseed oil. Recently they have enlisted the services of the soybean people. Of course, the soybean acreage has increased very materially during the war, and the price has increased from less than a dollar a bushel to something over $4 a bushel, and I presume they are justified in hoping it will be $4 a bushel from here on out.

I hold in my hand an article from the Sunday Star that shows that this is not the only source of vegetable oil. This article goes on to tell about a plant that is going to be built in Panama City, Fla., that will cost something over $1,700,000. It is being put up by a paper company, and they expect to take the "tall oil" and take the resin out of it and then make vegetable oil out of the rest of the product. I presume then they will have a substitute for oleomargarine, because it will be the same thing as any other vegetable oil. I have included this article in my prepared remarks.

It was demonstrated years and years ago that even from coal you could make the same thing you have in oleomargarine. Whether or not this is good procedure to follow brings up another question. I might digress enough to say I realize that with the war profits the oleo people can stimulate a great advertising program. I realize all those things, but I feel that the scientific facts, that the nutritional facts, that the economic facts

justify my belief that I have righteous cause in presenting the other side of the oleo picture. The time is going to come when we will have to choose which road we want to follow.

The first point is that not one of the many Members who have been throwing oleomargarine bills into the hopper will seriously contend that people would even eat it at all if it did not have dairy products in it. The amount is 15.6 percent of the cheapest form of dairy product. Is it at all surprising that even if you put 15.6 percent—and incidentally, as I said, the cheapest dairy products—into oleomargarine it still tastes and smells like oleomargarine? I do not see anything very surprising about that, but I would just like to have them served once some oleo that did not have some dairy product in it. The point is they must have a dairy product to make oleo.

Here I hold in my hand a replica and reproduction of the foster-mother of the human race. This cow's name happens to be Rebecca. She is not as well advertised as Elsie, but she stands for the same thing. This happens to be a plaster-of-paris cow and she is surely a good cow. She has the outlines. Whoever made this cow sure knew something about the dairy business, as you can see. Notice the milk veins, the dairy form, the shape of her udder. She is a regular dairy cow and she has just the right number of faucets. The faucets are correctly placed.

I want to put in the RECORD the fact that the cow is an animal that is the most efficient producer of human food that ever has been found in this whole world. No one can dispute that statement. This dairy cow will produce four times as much human food as some farm animals, and will produce twice as much human food as any farm animal.

As a thesis, right or wrong, as a thesis I believe this is a full-milk country. I do not believe in cream for the few and skim milk for the many. We do not want one group to have skim milk and want a few of the fat cats to have the cream off the top of the bottle. I will not take time to name the States—but I include the list in my prepared remarks—we find that in our own school-lunch program we use skim milk instead of natural whole milk.

The United States of America is a full-milk country, and children participating in the school-lunch program should have whole milk. These children are entitled to the nutritiousness of whole milk produced by the most efficient producer of any animal on the farm.

As a matter of fact, this dairy cow comes the nearest to perpetual motion this world has ever seen. Here is this cow weighing around a thousand pounds. She will give 10 times her weight in milk every year. This milk will produce a thousand pounds of cheese and that cheese has twice the human food value as does the carcass of the animal itself. And yet we have those amongst us who would destroy the dairy cow. I repeat once more, I realize the forces that are in this oleo-promotion business. I realize that they try to make these soybean people believe that they are going to have a future home for the soybean oil; but according to Mr. Charles Holman, of the Milk Producers' Association—as you will find in my prepared address—only 15 to 18 percent of the soybean oil produced in the United States finds its way into oleo.

As I have shown in the body of the chart I am giving you today, last spring when the price of dairy products went down, what happened to the production of oleomargarine? It dropped below the 1946 price. That was temporary.

Now, it is said that the price of milk and the price of butter are too high. I would like to ask anybody who is up here propounding that thesis if he wants to destroy the dairy industry of this country. I will ask anybody on either side of the aisle to name me one dairy product where he can buy a pound of butterfat as cheaply as he can a pound of butter. I know he cannot answer the question.

Mr. BUCK. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield to the gentleman from New York.

Mr. BUCK. The gentleman spoke about 18 percent of the soybean crop going into oleo. What percentage of the milk crop goes into butter?

Mr. MURRAY of Wisconsin. I will be glad to discuss that with my distinguished friend. May I correct the RECORD and say that the gentleman from Wisconsin said that Mr. Charles Holman stated from 15 to 18 percent of the soybean oil went into oleomargarine.

Before the war 42 pounds out of 100 pounds of milk went into butter. That was the end product. I would not accuse anyone during the war of having any oleo interest in mind, but I do know we had to send Russia a hundred million pounds of butter while we had to stimulate the use of oleomargarine in this country, and I know that the going has been tough so far as butter is concerned.

May I say right here that the State I represent is not one of the large butter-producing areas of the country. About one-third of the butter of the United States is made in Iowa and Minnesota. A large part of the milk in my State goes into these other manufactured dairy products. But this oleomargarine business is just a beginning. It is getting the camel's head under the tent, because if it is a good thing to substitute vegetable oil for an animal fat in butter it is also going to be a good thing to have filled milk, and it is going to be O. K. to have filled cheese as well.

During the war the uses of milk switched around. Part of it made sense. Surely we had an increase in the diversion of milk, not much of an increase in milk production. I do not know how the dairy farmers kept up the dairy production the way they did. We did not have very much of an increase in milk production. Of course, Mr. Anderson, Secretary of Agriculture, says we are producing a third more than we did before the war. He must mean a long time before the war, because we only increased the production of milk in the years 1940 to 1947 from 110,000,000,000 pounds up to 120,000,000,000 pounds, which is less than 10 percent. Now there has been a realinement, and you can figure it out for yourself. Our creamery production last year was 1,300,000,000 pounds. Farm butter is estimated around 300,000,000 pounds. That is a total of 1,600,000,000 pounds. If it takes 20 pounds of milk to make a pound of butter, that means 32,000,000,000 pounds of milk this year found its way into butter. In other words, instead of having 42 percent going into butter as before the war, evidently we only have between 25 and 30 percent at the present time, of the milk going into butter. In other words, it has been funneled off into these other dairy products. What is going to happen to this end product? Cheese production has nearly doubled. There have been times that the evaporated milk business gave indications of having a 50-percent increase. What is going to happen when they quit exporting evaporated milk products and that settles back and is absorbed by the domestic market? So long as meat is high, cheese will be in demand, surely. Why? Because a pound of cheese is supposed to be the poor man's meat. Cheese has a content of 23-percent protein and your best meat will not have over 18-percent protein content. The answer to the gentleman from New York then is that butter accounted for 42 pounds out of every 100 pounds of milk and now accounts for 25 to 30; and if the oleo crowd has its way it will be zero.

There are two things involved in the price situation. Here is No. 1. Of course, butter is like any other commodity that has swept up from August on. But, who swept it up? Who swept the agricultural price up from August until now? Who did that? Was that done by the National Manufacturers Association? The OPA was dead and buried. Over in Geneva last summer—and if this is not correct, Under Secretary of Agriculture Dodd can correct the RECORD or he can have me correct it, but Mr. Dodd tried to show what would happen if they tried to furnish all the grain that those European countries wanted. Now, I personally heard him make a speech to that effect. He told them what they would have to do in order not to disturb our own economy was to use these agricultural products that we did have in surplus, and which we could furnish to the hungry people of those countries, and in the long run we could do a much better job for them than we could if there was too much emphasis put on this grain. What happened here at home? Why, the price of this grain was just pushed up. Practically $1 was added to a bushel of wheat. You can feed 50 percent more hungry people with $2 wheat than you can with $3 wheat. What was the result? The result was that this is the only time in the history of this country that 100 pounds of milk will not buy 100 pounds of feed. Then you say that dairy products are too high. I cannot go along with that, because it is a man-made institution, and I know if we had followed the program laid down by Mr. Dodd, we would not have had the present prices. The consumer, the farmer, and the taxpayer would have benefited. The same proposal was endorsed by Sir John Orr, the head of FAO. That seemed to be the attitude he took.

There was no reason in the world for the price to go up, because last spring the fever was pretty well out of many food products. In August, even, cottonseed oil was only 18–19 cents a pound and soybean oil was around 15 or 16 cents a pound. Who added about 50 percent? Yet, we added less than 10 percent to the price of butter during the same time. Then, we have to start hearing the sob story about having to have this oleo. Now, if that thesis is right, and if any of these oleomargarine people are right, and if vegetable oil is equivalent to the animal fat in a pound of butter, by the same token you must come out and say that you believe in this product known as filled milk. Now, the reason I say that is because the formula would be the same. It is a vegetable oil and a dairy product; it has more dairy product in it than has the oleo. Of course, it probably makes it that much better, but remember this can of the product that cannot be shipped interstate. It is against the law to ship from one State to another, and yet if the oleomargarine crowd is able to carry through what they are operating on at the present time—you do not need to worry; they will be in here rapping on your doors and telling the same stories, and they will be preaching to the housewives—that she should be buying filled milk. Mr. Oleo Lover, do you advocate filled milk? If not, why not? Skimmed milk with some vegetable oil squirted into it, selling it to the people in place of evaporated natural milk. So, do not think that the evaporated milk people, or the man whose milk goes to the evaporated milk factories, does not have an interest in what this oleomargarine crowd is up to, because it means that they are going to be faced with this same kind of competition. We are going to take off the cream and feed it to the fat cats and let the rest of the people eat the doctored-up products. Maybe vegetable oils are good foods and maybe soybean oil is good, but if they use it sufficiently they may get slant eyes like the orientals who have been using it for so many generations.

Here is a letter that I wrote to Dr. Parran of the Public Health Service in 1945 in which I asked him about oleo, if they fed it to the fliers during the war. I received his answer saying, No, they did not feed any oleo to those boys who were flying our planes. They wanted them to get butter, and they gave it to them, too. I placed these letters in my prepared address. Remember, I repeat, if a vegetable oil is just as good in a pound of butter—as butterfat and I do not say that it is, but if it is just as good, is filled milk with a vegetable oil displacing butterfat equal to the evaporated natural milk?

I do not pay much attention to all the propaganda from the crowd. I have listened to that all my life. I did not just pick up the gems during this session. The point always is, if vegetable oils are so good, why do they have to use dairy products to make them desirable to eat? Now one more: If the vegetable oils are desirable to replace butterfat in butter and in filled milk, why is it not desirable to make filled cheese? That will be the next step. You know that natural cheese is one of the greatest products that man ever did make.

Mr. BUCK. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield to the gentleman from New York.

Mr. BUCK. The gentleman mentioned the fact that oleomargarine was not used in the armed forces. Of course, the appropriation bills carry a prohibition against such use.

Mr. MURRAY of Wisconsin. I am sorry I have to correct my distinguished friend so often. I said in the Air Forces.

Mr. BUCK. That is an armed force.

Mr. MURRAY of Wisconsin. But there was some oleo used in some camps in the Army. There was not evidently anything in the law that prohibited the War Department from using oleo in some camps. I think we used a relatively small amount, however, in the camps, according to the War Department. In the Air Forces they have to have vitamin A. You just try getting along a while without using vitamin A and see whether or not you can read the CONGRESSIONAL RECORD without a pair of glasses. The relationship of vitamin A to people's eyesight has been demonstrated so many times that I will not repeat it here. Maybe it is just as good if you go out and catch a shark or some other fish and take that liver and squirt that in. I do not know. I would not want to get into that argument at this particular time.

Mr. AUGUST H. ANDRESEN. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield to the gentleman from Minnesota.

Mr. AUGUST H. ANDRESEN. I commend the gentleman on the very scientific approach he is taking to this issue. The gentleman may already have said it, but he knows full well that since 1941 certain policy makers in the administration have done everything they could to put butter production out of business. In fact, I thought many times that many of them were stockholders in the 22 companies that make oleomargarine.

The gentleman has commented on the use of vegetable oil in filled milk. It seems to me a member of the Cabinet the other day, the Secretary of Commerce, said that as far as oleo was concerned it was just as good or better than butter, and he and his family were eating it. I do not suppose he can afford anything more, so he has to go to oleo, which is about half the price of butter.

If they can use vegetable oil—and I am not depreciating the food value of vegetable oil—in perfecting these synthetic foods to make them look and taste like dairy products, they might just as well feed the people vegetable oil directly and get away from the deception that is being practiced by using them in oleomargarine and in filled milk and in these other commodities. I should like to hear the gentleman's comment on that.

Mr. MURRAY of Wisconsin. That has been the history of the whole oleo business. It has been sired by deceit and mothered by deception. They started out that way and that is what got them into the legislation troubles they have today. Do you know what happened within the last 4 or 5 years? They came before the Committee on Agriculture and said they had to change the oleo law. Butter was 46 cents a pound, but they had to have oleo. Do you know that Ole committed so many sins when he was young that they are trying to change his name? They want you to call him "Margie" now. They even want to change his sex.

They want you to call it margarine now, and they think that you will forget all the sins that Ole committed when he was younger. Then 3 or 4 years ago when they had the bill up they claimed that it had 9,000 international units of vitamin A, and that that was more than butter had. Then you know they had some fellow over here in the research laboratory at Beltsville go into the thing. I will say that there never has been the amount of profit in the dairy industry to carry on a lot of propaganda like the oleo crowd carries on. They decided that maybe they had better look the thing up and find out how much vitamin A was in butter. What do you think they found? They found that butter had from 15,000 to 25,000 to 27,000 international units of vitamin A. Then what did the oleo crowd do? They came around and squirted 15,000 more units in it and now they say they have just as much vitamin A as they have in butter. Most of the butter is made in the summer months at a time when you have the highest natural vitamin count in your butter. So if someone else discovers something else in butter then they will have to come along and inject something else in that oleo and try to fool the people. That has been the trouble all the way through. They want to fool the American people and they are willing to line up with anybody to do it. That has been their performance ever since they started out in the business because the profits that go along with that business sure justify their doing it. Twenty-nine cents worth of oil, add 20 percent skim milk, salt, and so forth, and sell it for 40 to 50 cents a pound is a pretty good business, especially so if they can get to sell it as butter.

Mr. AUGUST H. ANDRESEN. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield.

Mr. AUGUST H. ANDRESEN. I wish the gentleman would correct me if I am in error, but as I understand it, oleomargarine can be colored any color under the sun except yellow which is the color of butter without paying that 10-cent tax. Is that correct?

Mr. MURRAY of Wisconsin. That is right.

Mr. AUGUST H. ANDRESEN. Then why is it that they insist on taking the historic color of butter?

Mr. MURRAY of Wisconsin. The reason is that that is part of their deceit and deception. They want to make it look like butter to deceive the people. They want to make it smell like butter and taste like butter.

Mr. BUCK. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield.

Mr. BUCK. How many months of the year is coloring matter put in butter?

Mr. MURRAY of Wisconsin. That depends on the manufacture of the butter. Some butter is not colored at all. Personally I do not care about having any color in it.

Mr. BUCK. Then when it goes in it is deceit and deception?

Mr. MURRAY of Wisconsin. No not necessarily. Some markets want it that way.

Mr. BUCK. Why is it deceit and deception in margarine and not in butter?

Mr. MURRAY of Wisconsin. That is a good question. When you put it in butter, you are still selling butter, but when you put it in oleo, you are putting it there so that you can sell oleomargarine as butter. There is the difference between the two situations. In one case you are putting it into butter and in the other you are putting it into something that you want to sell as if it were butter.

Mr. BUCK. The gentleman did not answer my question. How many months out of the year does coloring matter go into butter?

Mr. MURRAY of Wisconsin. In some butter it is not used at all during any months of the year.

Mr. BUCK. How many months of the year does it go into some butter? The gentleman is an expert.

Mr. MURRAY of Wisconsin. I did not say I am an expert. I am just an expert in what the oleo people are up to and I am not an expert on these other matters.

Mr. BUCK. The gentleman is an admitted expert on dairy products, and that is the reason I am asking him.

Mr. MURRAY of Wisconsin. What is the specific question that the gentleman is asking now?

Mr. BUCK. What is the maximum number of months in which coloring matter goes into butter in some areas of the country?

Mr. MURRAY of Wisconsin. I have not been in the creameries all over the country, but I yield to the gentleman from Minnesota, which used to be the leading butter State, and then also will yield to my distinguished colleague from Illinois, who formerly was the president of the Illinois Dairy Industries Association, if you please.

Mr. AUGUST H. ANDRESEN. That depends on the part of the country where they get the green grass to put the color in. It seems to me that they also put salt in butter.

Mr. MURRAY of Wisconsin. Yes, and they put it in oleo, too.

Mr. AUGUST H. ANDRESEN. They also put it in oleo. I suppose we probably should take the salt out. If the oleo industry would stop being synthetic about their oleo, I am sure that there would not be any difficulty with the dairy industry. The trouble is they are trying to make a synthetic product look and appear and taste like butter in order to deceive the people.

Mr. MURRAY of Wisconsin. They want to get a lot of fellows to be their mouthpieces and be the sponsors for the oleo crowd. If they want to do it, it is all right with me.

Mr. JOHNSON of Illinois. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield.

Mr. JOHNSON of Illinois. I would like to elaborate on the question asked by the gentleman from New York on how many months they color butter.

Mr. MURRAY of Wisconsin. You have made millions of pounds of butter in your day.

Mr. JOHNSON of Illinois. Yes, I have made lots of it, many millions of pounds.

During certain periods of the month, the farmer does not put any in. That is with reference to home-made butter. But we are referring to creameries now and butter that goes into the commercial trade. In some of them in particular areas where they get a certain brand of butter where the cows are fed silage they get the natural color through the silage and they do not need any the year around. There are others who standardize with certain brands. In the winter, for perhaps 3 months, they will add a little coloring. It is never overcolored, but just enough to standardize it the year round. There are only a few who do it. But it does not add anything.

Now, I wish to add, I wonder how many know that right after World War I, when the German hordes overran Belgium, there was an epidemic of eye trouble with all the children, and after certain research they found they had not been getting the butter they had formerly got, and milk, which contained certain vitamins. We exported into Belgium, and rationed among the children, a certain amount of butter, and in a short time their eye-trouble epidemic passed away and they came back to normal condition.

Mr. MURRAY of Wisconsin. I thank the gentleman. The gentleman was formerly president of the Illinois Dairymen's Association, and he is one of the best-informed men in the manufactured dairy products business.

Mr. HESELTON. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield.

Mr. HESELTON. I have waited for 30 minutes to pay a tribute to you. I am not a farmer. You have convinced me of many things and you may convince me that you are right on this, although at the present time it will take some convincing. I have told you that before. On the other hand, on many things you have said I find it very useful to explain that you are one of the greatest authorities on agriculture in this country. My farmers believe what you say. I hope you will not give up with just your plea to take care of this situation, but will address yourself to some other matters in the near future. In fact, my own farmers insist that you come to my State and address them on agricultural and food questions.

Mr. MURRAY of Wisconsin. Then, I will address myself to some of them right now. I will tell them how you can take 10 cents a pound off the price of butter tomorrow, if this administration wants to take it off. Last spring they put a support price under skimmed milk. The most important part of the farming industry, milk, does not have an announced support price. Think that one over. The United States Department of Agriculture came in with a 9- and 10-cent support price for skimmed milk; 9 cents for the roller and 10 cents for the spray. Do you know what that would yield to the average farmer in Minnesota? That would give him around 20 or 25 cents per hundred for his milk. With hogs at the price they are, it is surely worth more to be feeding milk to his pigs. But that is the kind of support we get from the present Department of Agriculture so far as dairying is concerned. I do not want anyone blaming me because they have to pay too much for what they eat. When they put that floor under skimmed milk, they were putting it away below its food value. The result of it has been that possibly you could have saved the housewives millions and millions of dollars on their butter bill. You can do it tomorrow, if you want to, because all you have got to do is to put a support floor under skimmed milk somewhere near in keeping with the purposes of the Steagall amendment. Skimmed milk that was bought for the school-lunch program was bought at 16 cents a pound. Just imagine. Sixteen cents a pound. Four cents per quart. That is all that this administration seems to think it is worth. There is nothing in the world to stop them tomorrow from putting a 20- or 25-cent floor under dried skim any time they want to. Every time you put 1 cent on the floor on skimmed milk you take 2 cents off the price of butter. So if tomorrow they will announce 5 cents more on skimmed milk, it will take 10 cents off the price of butter the next day. Of course, this way the oleo manufacturer putting 15.6 percent skimmed milk in oleo will have to pay a little more for his skim milk.

Mr. H. CARL ANDERSEN. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield.

Mr. H. CARL ANDERSEN. The gentleman will recall that shortly after the war commenced they placed a ceiling on butterfat of 54 cents, at least in the greater part of my district in Minnesota. In addition, there was the subsidy of 17 cents a pound going to the butter producer, making a total of 71 cents a pound in my area. The OPA did not take into consideration what it cost the farmers of that area to produce butterfat, and as a consequence within a few years' time between 30 and 40 percent of the dairy herds of that particular area disappeared; they were slaughtered.

So there we see how the shortsightedness of the administration is putting out of business a great number of dairymen. Had the administration used a little common sense at that time, as I pleaded with them in September of 1943, they would have permitted that price to go up to the point which would have guaranteed at least that these herds stayed in production. They listened to OPA, however, rather than to the dairymen of the Nation and slowly but surely crushed out the big bulk of the dairy herds through that great midwestern region, and today we are suffering because of their mistakes.

If these oleo people achieve their ends I predict a still greater calamity and can foresee the time in the not too distant future when we will not have any milk

whatsoever for the children of this country.

Mr. MURRAY of Wisconsin. What the gentleman has said, I think, is correct for this reason: Where are we today? In December of 1947 we produced less milk than we did in December of 1940. Do you realize we are down a million milch cows in number already? We killed off 9,000,000 head of cattle and 20,000,000 sheep. We have cut our sheep by 35 percent. The whole livestock industry is in jeopardy. We have about 40 percent less hogs in the United States on January 1, 1948, than we had January 1, 1943. I wish I were able to have that statement placed in the RECORD in big black headlines and repeated several times. Then I would like somebody to come to me a year from now, 6 months from now, or any time and tell me that statement is not correct. The fact is the more you holler about oleo the less milk will be provided for the babies of America.

Mr. H. CARL ANDERSEN. Mr. Speaker, will the gentleman yield further?

Mr. MURRAY of Wisconsin. I yield.

Mr. H. CARL ANDERSEN. It is a fact that all of this talk about meat rationing is beginning to have its effect upon production. That is the news that is coming to me in the mail from my congressional district. I just wish these bureaucrats and others who talk about proposed meat rationing would keep their mouths shut. Then they would really be doing something to assure a future supply of meat for the Nation.

Mr. MURRAY of Wisconsin. A chap told me this yesterday, he said: "I had a chance to get $280 apiece for 10 cows. With all this talk about oleo and what they may be doing I did not know what it might do to the dairy business and I thought it would be better to take $2,800 now." These cows, of course, went to the fluid-milk area where they have specialized production, but it shows the fear and uncertainty that is creeping into the dairy business.

Mr. PHILLIPS of California. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield.

Mr. PHILLIPS of California. The gentleman made a rather startling statement when he spoke about the reduction of the dairy herds. Is that general throughout the Nation or is it confined to certain areas?

Mr. MURRAY of Wisconsin. No; that is for the United States as a whole. The milk cow population is on the way down. I do not know what it is going to be now after we had Mr. Luckman's reign. The trouble is a lot of these fellows making the rules and regulations do not know anything about the business at all. Taking my own State as an example, apparently they do not realize that in many parts of my State only half the land of the farm could ever be put into grain anyway. What are you going to do with the other half of the farm?

Mr. JENSEN. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield to the gentleman from Iowa, the greatest butter-producing State in this Nation at the present time, a State that has many outstanding attributes, a State that so far as area is concerned is the most productive area in the world.

Mr. JENSEN. Before I ask the gentleman a question I wish to say that I am sorry that all the people of the United States, both the city folks and all the farmers in every section do not have the privilege of listening to the gentleman from Wisconsin explain and point out the things which he always points out which are very valuable, facts and figures proving his point, that is, that the dairy industry is one of the most necessary and most important industries in America.

I appreciate the fact that the gentleman spends many hours, many days, even years, making a study of this question. May I say also in response to what the gentleman from Minnesota has just said that I have been getting letters from farmers and even from the secretary of agriculture of the State of Iowa asking, "Can you not do something to stop this noise and this talk about the return of meat rationing?" He states, "It has the farmers out here in a quandary. They do not know what to do. They are going to reduce their herds. It is having a terribly bad effect."

On top of that a lot of folks are filling their deep-freezers, they are starting to hoard meat, and, of course, they are bringing on a shortage of meat due to the fact that somebody is making a noise about something they do not know anything about.

I only wish the gentleman from Wisconsin [Mr. MURRAY] were running this whole food program along with such men as the gentleman from Minnesota [Mr. AUGUST H. ANDRESEN], and also the gentleman from Minnesota [Mr. H. CARL ANDERSEN], the gentleman from Illinois [Mr. JOHNSON], including the gentleman from Kansas [Mr. HOPE] and a few more I could name. We would not have all of this tommyrot and monkey business that is going on and we would get production. We would not have a lot of folks jumping on to the finest product in the world—good, pure butter.

May I ask the gentleman a question: Is it not a fact that where you find a good dairy section in this United States and any place in the world for that matter you find good healthy people and good productive land?

Mr. MURRAY of Wisconsin. Of course, the answer to that is obvious. The gentleman has said a lot of good things about the gentleman from Wisconsin. I put an article from the Farm Journal in my prepared speech showing that last year Wisconsin produced more corn per acre than did Illinois or Iowa. I dislike to have that in there now after all those good things the gentleman said about me. But it is in there. The article went on to say that the reason why is because in Wisconsin they do not raise much corn in comparison with the amount of alfalfa and clover that is raised. In Illinois and Iowa they raise many times as many acres of corn for every acre of alfalfa.

However, I do not want to be like some Presidential candidates, so we will straighten that out now. I will accept and will be glad to. We will not keep anyone in suspense on that. And I am sure if you get the others interested we might do a good job. At least we would be from a part of the country that produces food. That would be some advantage.

Mr. JENSEN. We are learning fast out in Iowa and we will come through, I can assure the gentleman.

Mr. MURRAY of Wisconsin. I thank the gentleman. I could discuss this oleo business, as I said, from a lot of different angles. There are also a lot of angles in connection with the dairy industry. You know, we get into trouble with the housewife, and I do not want to be in bad with the housewife. I do not want to be in trouble with the housewife. I do not get mixed up in any arguments with the ladies. But I just want to fix up a new approach for the housewife consumers of this country.

They have been told how much they are going to save on oleo. On 15 pounds consumption it would be between $1.50 to $1.75 per capita. They are paying twenty-some cents a quart for milk up there, and they pay twice as much for a pound of butterfat in the milk as they do in a pound of butter, and yet they are trying to get their Congressmen to do something about the butter. I want to say something to the good housekeepers up there in New York and I will address myself briefly to them. Here is a glass of milk. This is not any substitute. This is the milk itself. This happens to be made by one of the outstanding milk cooperatives that you have heard about out in Wisconsin. It is known as the Badger Consolidated. All they do is to take the water out of the milk so that they do not have to pay the freight on it, and then the consumer reconstitutes it. You can get all the milk up there you want for about 15 cents a quart. The people of New York will not be misled by that suggested saving of $1 or $2 on their oleo. They can save $25 to $30 yearly per quart on their milk bill every year. If you are really interested in doing something to save her money, here is your opportunity. It was not generally used before the war; they kept it for Red Cross work and so on. Twenty-five or thirty million pounds a year was all that was produced. Now, there is not an agricultural product scattered all over the world as much as dried whole milk is. We in the United States are producing now about 200,000,000 pounds a year. So, to the housewives may I say while the oleo promoters are trying to save you $1.50 to $1.75 a year on a substitute product, I will save you $25 to $30 a year on every quart of milk you buy. To save money just forget the ersatz butter. I want you to have the real butter. I do not advocate a substitute for milk. This is the milk itself.

Mr. BUCK. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield to the gentleman from New York.

Mr. BUCK. I want to say "amen" to everything that has been said about meat rationing, and when I say that I think I am speaking in the interest of the consumer. I hope the gentleman in his very able dissertation will show how the tax on oleomargarine affects the dairy industry. It is only the tax on oleomar-

garine that we are seeking to have removed.

Mr. MURRAY of Wisconsin. All right. I am glad the gentleman brought that one up, because that is a good one. Are there any members of the Committee on Ways and Means here? You remember there is the 3-cent transportation tax; in other words, when you take your milk to the creamery—and over 90 percent in my State goes to the factory as milk—just get this and figure out the 3 cents. Pretty near 90 percent of it is water. One hundred pounds of 3½% fat milk will yield a little over 4 pounds of butter; in other words, that is nearly three-fourths of a cent a pound tax that Uncle Sam takes off of this butter before the milk ever gets to the creamery. Well, now the oleo people are worrying about a little one-fourth of a cent tax that they pay on their product. Before the milk ever gets to the creamery the butter farmer pays between one-half and three-fourths of a cent per pound transportation tax.

Now No. 2, and this is a good one. They are not satisfied, you know. This administration is pretty hungry for money. The fur business they call a luxury, and they have a big tax on it amounting to 20 percent. Some people wanted to lower the tariff and they did and brought in foreign wool. Then turn around and what do you suppose they do? If you live up there where it is 10, 20, and 30 below zero, a fur coat is not a luxury, and if you are wearing it, a Mouton coat, which is nothing but sheepskin with a little wool pulled off, sheared off, then you have to pay 20-percent tax in order to get the privilege of wearing a sheepskin coat. When you get into that tax business there it will take more than the time allotted me today to discuss the relationship of the tax on oleomargarine and the tax on milk, tax on butterfat, and tax on sheepskin coats.

Mr. BUCK. But that is the question on which the bill is submitted, the 10-cent tax.

Mr. MURRAY of Wisconsin. The tax on oleomargarine may deceive a lot of people in America.

Mr. BUCK. But my question is, How does that tax on oleomargarine affect the welfare of the dairy industry?

Mr. MURRAY of Wisconsin. How does it affect it? Well, they have not taken it off yet. I cannot answer it before I hear the question.

Mr. PHILLIPS of California. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield to the gentleman from California.

Mr. PHILLIPS of California. The dairy industry is not for keeping the tax on oleomargarine because it will be a direct benefit to butter, but the tax was put on originally to provide for an inspection service to prevent inferior products going into oleomargarine, a condition which could still exist. As the gentleman has so ably pointed out, the tax is a minimum tax; it amounts to nothing and does not compare with many other taxes.

Mr. MURRAY of Wisconsin. I want this to appear in the RECORD.

First. Oleo farming means less fertility in the soil. I guess they will not argue about that, because oleo products are soil-depleting crops.

Second. Oleo farming means a smaller meat supply. That is another one they have forgotten. Forty percent of the beef and veal of this country comes from the dairy industry, do not forget that.

Third. Oleo farming will provide fewer hides for our leather industries. That is another thing they do not stop to think about, but they will when they get all these cows killed off.

Fourth. Oleo farming will provide less pharmaceutical supplies for the Nation.

Butter farming means—

First. An increase in soil fertility. No one can argue that.

Second. Butter farming means adequate supplies of milk and milk products and the products that are so necessary for human foods and industry. The average person has no concept how these by-products of butter making are used in ice cream, candy, and other commercial uses. As a matter of fact, you can make cloth out of it if you want to.

Third. Butter farming means a rounded-out agricultural program.

Fourth. Butter farming means the United States can continue to be the greatest agricultural food-producing Nation in the world.

Fifth. Butter farming means bigger and better babies. Do not forget that. Be sure to have that thought along with you if you are interested in the future generations.

Mr. KEATING. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield to the gentleman from New York.

Mr. KEATING. One thing that has always troubled me about the argument of those who take the same position as the gentleman has been how anyone could be deceived by colored oleomargarine if the package said "oleomargarine" on it. They would have to sell it under that name, would they not? They could not sell it under the name of "butter," could they?

Mr. MURRAY of Wisconsin. I will yield to my distinguished colleague from Minnesota to answer that.

Mr. AUGUST H. ANDRESEN. May I inform the gentleman that there are innumerable cases where the people who have sold this oleomargarine colored to look like butter have sold it as country butter. They put it into jars, and do not follow the law. They deceive the people.

Mr. KEATING. Do we not have a Federal Trade Commission to prevent that very thing?

Mr. AUGUST H. ANDRESEN. We not only have a Federal Trade Commission but we have a Department of Justice as well to handle these things. They are picking up a few cases. They found some down in New Orleans a little while ago where the people were selling colored oleo as country butter. Of course, one thing this tax does is stop that deception, although it is difficult to stop it.

Mr. KEATING. The gentleman would not contend that was a common practice or a general practice? The mere fact that we have a few chiselers or crooks does not mean that that is a common practice.

Mr. AUGUST H. ANDRESEN. There will be plenty of them if they permit oleo to be colored to look like butter. You will find that a good many of them, not only in restaurants but in retail stores, will go into the practice of selling colored oleo as butter.

Mr. JOHNSON of Illinois. And mixing it with butter.

Mr. MURRAY of Wisconsin. I want to give this to one of my colleagues to see what he thinks of this reconstituted milk.

Mr. KEATING. To whom is the gentleman giving the milk?

Mr. MURRAY of Wisconsin. I am giving it to the former president of the Illinois Dairyman's Association. This is milk that has the same content of butterfat as it had before they ever took the water out of it. No scientist or nutritionist can say one word against this product. So if you are interested in the consumer, there is a chance to get in with the housewives and save the housewife $25 or $30 a year and live happily ever afterward.

Mr. JOHNSON of Illinois. I will say it is mighty good, delicious, and of high quality.

Mr. AUGUST H. ANDRESEN. Does that have 3½-percent butterfat, the same as it had before the water was taken out of it?

Mr. MURRAY of Wisconsin. Yes; or more.

On the board here is an official chart from the Department of Commerce. Here is a thing that people do not realize. They have heard us talk about feeding the world. Then they wonder about the high cost of living. Here we are on volume, not on dollars. All during this period from a little after 1925 on we were not agriculturally self-sufficient. Then all at once we blossom out and tell the world that we are going to feed them. People do not realize that all during these years—here is about the time when Henry was killing the pigs—we imported the most we had ever imported. By the time we got into the war the whole domestic agricultural program had bogged down. In August 1939 we had 54-cent-plus wheat, we had 8-cent-plus cotton, we had 5-cent-plus hogs. The whole New Deal program had blown up, until we got into the war. Here we were importing the most agricultural products we ever had in the history of the country, and our exports had gone down so that they were only a small percentage of our total imports.

Now the war came along and we have been trying to see-saw in between. Still, up to this time the exports were more than the imports so far as agricultural products are concerned. But here we are again with more agricultural products imported than exported. Now I am not saying that you should take my statement for that. I am only showing you a chart made up by the Department of Commerce and other material from the Department of Agriculture itself.

Mr. AUGUST H. ANDRESEN. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield.

Mr. AUGUST H. ANDRESEN. Does that include the exports of 600,000,000

pounds of grain that were exported last year?

Mr. MURRAY of Wisconsin. Yes, that will show up on this chart.

Now this other chart is confined to food products alone. During the war years it was hard to keep too good a record because the United States bought millions of pounds of food in other lands which do not show because they never came into this country so they do not show up as imports. But here are the exports. Here we are as shown in the article that I have here from the New York Times that as of September of this year over a year ago our exports jumped up in cash value 46 percent. Then you wonder who caused the high cost of living. Then they want to talk about the National Manufacturers Association and about the OPA, and they want to talk about rationing meat and talk about trying to do something about this oleo business. Here are the same groups. They are all hot and bothered and want to do this and yet they are the same ones who complain about the price of food being high.

Once more I say that this is from the Department of Commerce, and these figures are not mine. This chart tells the story so far as beef and pork is concerned. Here is something that is a little bit startling, I think. During the prewar period of 1937 and 1941 the red lines show the imports. We were on an import basis for beef and pork for 4 years out of the 5 before the war. Then all at once, from 1942 to 1947, you see what happens. The black lines are the exports. The red ones are the imports. Then you wonder why that happened. Then you wonder what we did and what is going to happen. Remember that except for a small period during World War I we were not self-sufficient so far as beef was concerned. Then all at once we do this. How did it happen? We did it by killing off 9,000,000 head of cattle. We did it by reducing our sheep numbers 35 percent. We did it by reason of the fact that on January 1, 1948, we had practically 40 percent less hogs in this country than we did 5 years previously in 1943. That is what is happening to the livestock industry in this country. Yet they talk about meat rationing and they talk about the oleo business. There is the answer to that story.

Mr. KEATING. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield.

Mr. KEATING. Is the purpose of this tax, in the gentleman's opinion, in order to protect the dairy industry?

Mr. MURRAY of Wisconsin. That is the general idea, I would think.

Mr. KEATING. Is there any other tax which is imposed by the Federal Government to protect a competing industry?

Mr. MURRAY of Wisconsin. Not being a lawyer, I would refer that to the distinguished gentleman from New York. The laws says that eggs have a support price of 58 cents per dozen and they are selling in the Midwest for 35 cents to 38 cents per dozen.

Mr. KEATING. The gentleman is an expert on taxes and cows and dairy industry and babies and many other subjects. I admire the ability of the gentleman tremendously. He is one of the ablest men of the House. But I would like to know if the gentleman can tell me whether there is any precedent for this type of legislation by the Federal Government.

Mr. MURRAY of Wisconsin. I am like Leon Henderson, who came before our committee once. He had 15 men with him to help answer the questions. So I yield to the gentleman from California [Mr. PHILLIPS].

Mr. PHILLIPS of California. The gentleman shows the confusion which is in the minds of the oleo supporters, because he said, "Is there any tax put on to protect any competing industry?" It was not put on to protect a competing industry but to protect the consumer.

Mr. KEATING. I do not understand. I am simply asking for information. I am not an oleo guy, or a butter guy, or a baby buy, or anything else. What I want is facts. I do not understand how this protects the public in any way, because you have got to show what you are selling or you are breaking the law.

Mr. MURRAY of Wisconsin. If you are eating in a restaurant, I suppose they will bring you the carton and say, "Now, this is oleo. Here is the carton."

Mr. JOHNSON of Illinois. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield.

Mr. JOHNSON of Illinois. The tax was put on largely as a means of revenue for enforcing the pure-food laws. In the early days of oleo, it was largely made from fat instead of from soybeans, which we did not know anything about. Then came coconut oil, which preceded it. But we are going back to the coconut oil again. It was put on to protect the animal fats, which came out of packing houses, which were none too good, so we had some inspection so that they would get fats from healthy animals, and so on. We know that a large part of the coconut oil went into oleomargarine until recently. Now we are getting soybeans, but speaking about any other comparable tax, will the gentleman name one other food product that is so definitely an imitation as oleo is of butter?

The SPEAKER pro tempore. The time of the gentleman from Wisconsin [Mr. MURRAY] has expired.

Mr. MURRAY of Wisconsin. Mr. Speaker, I ask unanimous consent to proceed for 10 additional minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. CELLER. Mr. Speaker, I object. We have been waiting patiently for a long time.

The SPEAKER pro tempore. Under a special order previously granted, the gentleman from Minnesota [Mr. H. CARL ANDERSEN], is recognized for 30 minutes.

TAX REDUCTION

Mr. H. CARL ANDERSEN. Mr. Speaker, the justifications for this proposed legislation are all based upon assumptions, which I hope will prove to be correct, but let us not repeat the error of a year ago.

Actual surplus for the fiscal year 1947 was $754,000,000. Estimated revenue loss from H. R. 1, which passed the House on March 27, 1947, and against which I voted, would have been $3,840,000,000 had it been enacted into law. This is in accordance with Mr. KNUTSON'S statement on that bill. This bill was retroactive to January 1, 1947. Had it passed, there would have been a $750,000,000 deficit for the fiscal year 1947 instead of there actually being $754,000,000 in the black, as the facts show today.

The money was not in the bank for that proposed cut in taxes a year ago. I want to be certain this year that the arguments for the present tax reductions are assumptions which will be verified by facts. Last year those assumptions were incorrect.

Our income for 1948 is assumed; our expenditures for fiscal 1948 are a guess; nobody can foretell the action of Congress on the Marshall plan; and we will not know until May or June what the appropriations situation will actually be. Why not wait until then for a reduction in taxes?

It is assumed that the national income for the 12-month period between July 1, 1948 and June 30, 1949 will be 200 billions. If a moderate recession sets in, that figure could easily be reduced by $10,000,000,000 or $15,000,000,000.

It is assumed that Congress will cut the President's estimate of $39,700,000,000 expenditures down by $3,000,000,000. If the opposition of the Democrats to any savings in Government continues as it has in the past, this figure is also just pure assumption. The Senate has already announced they will not take any action on the tax bill until they know more about the size of the cuts in the pending appropriation bills.

As Mr. TABER has said "A $3,000,000,000 cut in appropriations is entirely possible if the Congress does stand up and make the cuts it should." Our first appropriation bill of this session, however, does not show encouraging reductions.

I hope that it will be possible for me to support the compromise bill when it reaches us later in the session after action by the Senate. Today I cannot justify in my own mind a vote for this $6,500,000,000 cut. Conditions, however, proven by facts, may 3 months from now be such that we can be sure our national debt can be reduced by at least three billion and still leave room for a substantial tax reduction this year. I sincerely hope so.

At this time I yield to the gentleman from Wisconsin [Mr. MURRAY] for any questions he may have to propound or any answers he may have to give on the subject previously under discussion.

Mr. MURRAY of Wisconsin. I thank the gentleman. I am sure the people in New York should profit by this.

I want to show one more thing of what we are doing in regard to consumer prices and who is to blame for it. Of course, we want the Marshall plan. We want a billion dollars in it for tobacco. I do not know whether they want that in there so they can smoke the Communists out or so they can make insecticide to kill the Communist bug. But we are talking about food all the time and here is a table that shows the exports of tobacco for 1946. Of course,

incidentally, they could not give away as much as they exported during the Republican administration and received cash for it. They could not give it away that fast. But since 1940 we have jumped up from 9 pounds per capita production in the United States to 15 pounds. To show you how ridiculous is the approach to this food program, do you know that on the statute books a law, put on there by this administration, says you cannot even ship tobacco seed over there? You would think they would let them grow their own tobacco so that we would not have to send them a billion dollars' worth of tobacco under the Marshall plan, or any other plan. I do not like to mention this, but I cannot help from showing how ridiculous our food program is. Here we have a law on our books saying that you cannot ship a handful of tobacco seed. This was the most vicious trade barrier ever put on a statute book in this country. This was put in effect when Mr. Cordell Hull was Secretary of State, from the great tobacco State of Tennessee, and when Mr. Wallace was Secretary of Agriculture.

That was a part of the good-neighbor policy, part of the more abundant life, I guess. Think of it, they would not allow people of other countries even to have tobacco seed. I claim that was the worst trade barrier ever erected in the history of this country. It is coming home now to roost when we are now asked to give them a billion dollars' worth of tobacco instead of letting them have a little seed to raise their own tobacco and letting our farmers raise something here for the people to eat. We should be raising food for our people to eat and not be using fertilizer, manpower, and acres to produce a crop we have to give away. Dried skim has 35.6 percent of the best animal protein to be found and it has been purchased at 16 cents per pound or 4 cents per quart. Compare this with 42-cents-per-pound tobacco that will not feed the hungry in any country.

In conclusion, I might call your attention to what is happening to sheep. All the ewes have gone to the blue heaven or to the ewe heaven, I do not know which, because the sheep population has been reduced 35 percent. If we keep on with this policy you will have to take your grandchildren down to the zoo, because that is the only place where you will find a sheep, there will not be any found on the farms of the United States.

So I repeat, keep on pleading for meat rationing and see the meat supply dwindle. Keep on promoting the oleo propaganda and see the babies of America receive less milk. Keep on pulling the economic rug out from under the livestock industry and pour billions into a soil depleting program and you and your children and your children's children will pay the consequences.

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from New York [Mr. CELLER] is recognized for 60 minutes.

PALESTINE

Mr. CELLER. Mr. Speaker, we have come to a miserable impasse in Palestine. Because of Great Britain's curious "neutrality," by which Arabs who attack Jews in a fight against the United Nations' decision, and Jews who defend their lives are both treated alike; because of our own shameful silence at a time when our voice should be raised in protest, blood is being shed that need not be shed, and violence is gaining acceptance among millions as the only solution for international problems.

I do not blame Great Britain alone. I do not excuse our Government. Our sins are sins of omission as well as sins of commission, and one can be as reprehensible as the other. We blew hot in the UN a few weeks ago; we blow cold now. Men and women everywhere are confused. What goes on here? Why is the situation in Palestine allowed to go from bad to worse until it has reached its present abysmal point—a point at which a man is not safe on the streets of the Holy City of Jerusalem?

Why are governments of small Levantine member nations of the United Nations, why are gangster-politicians of such unsavory repute as the ex-Grand Mufti of Jerusalem, Hitler's aide during the war, allowed to threaten, bribe, and kill as though this were not the twentieth century but the Middle Ages, and rule by brigand and not by civilized tribunal were the order of government? As though the United Nations itself did not exist?

I say that once again we see what happens when a great power like the United States allows herself to be hamstrung by internal intrigue. I say that the State Department is again thwarting the will not only of the Executive but of the people. I accuse such men as Loy Henderson, enthusiastic but misguided chief of the Middle East office of the State Department, of intriguing behind the scenes to void decisions made on higher levels. Only the other day I was told that the State Department has now virtually locked itself in an ivory tower of its own, and that letters and telegrams sent by men and women, and other indications of the popular will, never reach Secretary Marshall. I do not say he must read these himself, but certainly he should be kept cognizant of what the people feel and how they are reacting to administration policies abroad. If this story is true, something is rotten, and it is not in Denmark.

Why do we allow the Hendersons to talk us into a course of action which has resulted in our losing the respect of both Arabs and Jews? There are people here in Washington who for months have been trying to prevent our Government from backing the United Nations plan. Months ago they warned us that if we supported partition the Arabs would turn to the Soviets.

We supported partition.

Have the Arabs turned to the Soviets?

When that proved unfounded we were warned that the Arabs would cancel their oil concessions, and our stake in the Middle East oil reserves would be endangered if we continued our support of partition.

The United States not only supported partition thereafter; it led the entire United Nations in urging other countries to support it. Partition was voted, 33 to 3. Only 3 non-Moslem nations voted against partition—Cuba, Greece, and India.

Have the Arabs canceled their oil concessions? Quite the opposite. King Ibn Saud, of Saudi Arabia, is now on record as denouncing all such talk as "hot wind." And no one who knows the Middle East is likely to think the Arabs would kill the goose which lays the golden egg. The Arabs know well enough that if war comes the western powers are too distant from the oil fields to hold them.

Far better, say the Arabs, to sell their oil now and get money for it than to find themselves forced to yield it to the Soviet in the future for nothing.

Now new bogies are raised by the British abetted by those in the State Department who wish to see themselves as the real rulers of this country despite the wishes of the vast majority of Americans, as repeatedly manifested on the Palestine issue. Now the cry is that Palestine will fall into the arms of Russia. Remember zionism has always been a crime in Russia. Actually in Jewish Palestine we have a growing economy; we have none of the despair and shabby economic helplessness upon which Russia can feed. The DP's seeking to go to Palestine are fleeing from Communist-dominated lands. They want no part of communism. This Red bogey is just a cruel fake to alienate sentiment for the Jewish state.

These State Department experts have now dropped the suggestion that we shall be embroiled in a war if we carry out what we are covenanted to carry out—the UN decision on Palestine.

War? What war? Who will declare war upon us because of Palestine? Egypt? Saudi Arabia? Lebanon? Great Britain?

Absurdities multiplied by absurdities!

What is needed now is a clear, cold wind to ventilate this problem not the "hot wind" so aptly described by Ibn Saud.

It is time to ask ourselves, what is going on here? Do we have to deal with a group of officials moved only by public interest, or do private interests like oil companies and personal likes and dislikes, however sincerely held, enter into the picture?

I think it is high time for the President and his Cabinet to investigate this matter most thoroughly lest, for the best of motives but misled as to the facts of the situation, they sacrifice the integrity of the American Government.

Mr. KEOGH. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from New York.

Mr. KEOGH. Mr. Speaker, I ask unanimous consent that my colleague the gentleman from New York [Mr. MULTER] may be permitted to extend his remarks in the RECORD and include an editorial that appeared in the Herald Tribune of Sunday, February 1, 1948.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KEOGH. Mr. Speaker, permit me to commend my distinguished colleague

from New York for the position that he has so consistently taken on this great problem of the day. He has been a great leader in this movement and I certainly know that those of us who are acquainted with the activity that he has evidenced on behalf of the new State of Palestine will join with him in attempting to reach a satisfactory solution of the pressing problem. Just as our colleague is such a leader he knows that I have been implemented by the counsel and the advice of distinguished and outstanding members of our community in Brooklyn, among whom I might mention several with whom I know our colleague is fully familiar: The Honorable Nathan W. Math, former assistant district attorney of Kings County and presently a distinguished member of the State committee in our great State; County Clerk Francis J. Sinnott, of Kings County, which is Brooklyn, and the Honorable John R. Starkey, a distinguished resident of my colleague's and my neighborhood. These men join, I am sure, in hoping that our colleague will receive the aid and encouragement which he should have in attempting, as I say, to reach a satisfactory solution of this problem.

I see that the United Nations Palestine Commission unanimously decided last Friday to help arrange for the formation of a Jewish militia in Palestine. This, in my opinion, brings up once more the need for Jewish defense forces in Palestine to be given immediate access to American arms and equipment in order that they may defend and perpetuate a decision taken by the General Assembly of the United Nations to partition Palestine into separate Jewish and Arab states. Our stand on Palestine should be guided by the United Nations, not by the British, who in this case are engaged, as has been pointed out, in a sordid war and a grudge fight against the Jews. Although it is to our country's credit that it acted positively and decisively in the meeting halls of the United Nations during the period when the partition plan for Palestine was still a matter of debate, the history of our country's activities since November 29—the date that the partition plan was approved—has not been consistent at all with its earlier spirit.

I feel that our Government has evaded its responsibilities. As soon as civil strife broke out in the Holy Land, our Government's attitude became one of seeming indifference. The fact that Palestine had become the target of separate invasions from Syria and Lebanon—two countries which are members of the United Nations—did not apparently cause grave concern to our policy makers.

Our Government chose rather to look the other way. Did we not look the other way when Japan marched into China, when Italy marched into Ethiopia, when Germany marched into Czechoslovakia? It was not wise policy. It only encouraged potential aggressors to bigger and better aggressions.

But again our Government looks the other way. It does not deem it necessary, for example, to raise the question in the Security Council that these separate forays against a neighboring country might constitute an act of aggression. Nor does it choose to consider that these attacks from the outside—and the thousands of individual cases of Arab violence within the country—were directed not only against the Jews of Palestine, but were being launched against the United Nations itself.

It must be remembered that the decision to partition the Holy Land was not a Jewish settlement to the thorny problem of Palestine. It was the judgment of the world's highest tribunal. And in defending themselves against attack, the heroic Jews in Palestine are acting as the only force in the world which is attempting to implement the decision of the United Nations.

I believe that when the United States refused to initiate any action when the first act of aggression against Palestine was committed, our Government not only faltered in its duty as a member of the United Nations, but was running counter to the established traditions of liberty and justice which are the keystones of our country. Our answer to Arab aggression should have been immediate and decisive. Our reply should have been in the form of an immediate announcement that America's arms and materials would be made available to the Jewish militia in Palestine so that sanctity of the UN decision could be upheld. This decisive action would have been in the true American tradition. This policy would have been within the spirit of the decision of the United Nations. It would be moving along the road to solving this difficult problem.

Mr. CELLER. I thank the gentleman. He has been of great aid in this endeavor to carry out the aims and aspirations of the Jews in Palestine. He has mentioned some very eminent Brooklynites, and it is very encouraging indeed to have their support as well as the support of the eminent gentleman from New York [Mr. KEOGH].

Mr. BLATNIK. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Minnesota.

Mr. BLATNIK. Mr. Speaker, I rise to speak on the serious situation that exists in Palestine today, and to urge the Government of the United States to take immediate and effective action to cope with this emergency. The problem of Palestine, and the relationships between the Jewish population and the Government of Great Britain, has long been a "festering sore" on the international body politic, and one which demands solution in the interests of world peace.

I have long been concerned with this problem, and have been in sympathy with the Hebrew nation's struggle for freedom and self-government which has awakened the conscience of the civilized world. On July 25, 1947, I felt compelled to address the House, and protest against the mistreatment of the 4,500 Hebrew repatriates aboard the steamship, *Exodus*, and the practices of the British military government in Palestine. I believed then, as I do today, that the United States has a moral obligation to help guarantee the safety of these people.

I was happy when the General Assembly of the United Nations voted on November 29, 1947, to create a separate Jewish state in Palestine. This action was hailed by all men of good faith as a step which was long overdue. It seemed that at long-last the dream of the Hebrew nation for political recogniton was about to be realized—the Jewish DP's in Europe were filled with new hope by the promise of a new home in Palestine.

But the hope and enthusiasm resulting from the UN decision was short-lived. Since that time we have witnessed a series of events which threaten the goal of a free Palestine. Open warfare and aggression has taken place with armed bands of Arabs openly terrorizing, killing, and committing atrocities against the unarmed Jewish population. Furthermore, this Arab revolt with its reign of terror is taking place with the encouragement of the British military government.

The most significant example of British defiance of the United Nations' decision was her failure to observe the February 1 deadline. On Sunday, February 1, according to the decision of the United Nations, ships were supposed to disembark Hebrew displaced persons in the free port of Tel Aviv. At that time the British were also supposed to evacuate this port.

February 1 was the date set by the UN to start the return to Palestine of men, women, and children who have been waiting in concentration camps—some for 10 years—for the chance to return to the promised land. All of these DP's have been behind barbed wire in Europe and Cyprus since "liberation."

Today is February 3, and the British are still in Tel Aviv, and the DP's are still behind barbed wire. The British have given as their excuse the fighting that now rages in Palestine. They point to the fact that over 1,000 persons have been killed and that almost 5,000 have been wounded in recent weeks.

It comes with ill grace from the British to justify the flouting of the United Nations' decision on one hand, when they are busily provoking the bloodshed on the other. Not only have the 100,000 British troops in Palestine stood idly by during the violence, but they have been disarming the Jews while openly assisting the Arab aggressors. To refuse repatriation at this time is to grant a bonus to violence. In other words, the "spontaneous Arab uprising" is paying off. That is what the Mufti wanted—the complete stoppage of repatriation.

The lesson is simple. The British hope that by continuing the violence in Palestine, repatriation will never resume. Continue the violence and the United Nations decisions will be washed away in blood. This is operation chaos, conceived by the British Foreign Office, designed to defeat the United Nations plan to create the Hebrew state.

We cannot let this go unnoticed and unchallenged. As a member of the United Nations, the United States cannot remain passive. We have a legal and a moral obligation to take the lead in backing up this major decision of the United Nations. In my opinion, the United States should take the following three steps:

First. Lift the arms embargo which was imposed by our State Department on December 5, which leaves the Hebrew people defenseless against the armed Arab aggressors. In this emergency we should permit the people of Palestine to buy arms for self-defense.

Second. Our Government should insist that repatriation of Jewish DP's to Palestine be accelerated, and we should provide the transportation facilities for this purpose.

And third, the United States delegation to the Security Council of the United Nations insists that steps be taken to halt the aggression against Palestine, and to implement its decision.

Mr. Speaker, let us act now, before it is too late. Unless immediate and decisive action is taken on the part of the United States, all hopes for a free Palestine may be lost. We cannot afford to become an accomplice to such a betrayal.

THE EMBARGO MUST BE LIFTED

Mr. KLEIN. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from New York.

Mr. KLEIN. Mr. Speaker, I might say to my colleague from New York that I am happy to join with him and those of our colleagues who are here in raising our voices in support of this great problem which is facing the world, and I want to commend those of our colleagues who remained here to this late hour.

I think the gentleman will agree with me that this is not a Jewish problem alone by any means. This problem is not limited or confined to any religious group or to any specific geographic location. For that reason I am particularly happy that those colleagues of ours who have spoken on this issue and who will follow me feel as I do that the time has come when we must raise our voices, not only in this body and in the other body, but throughout the world so that the people can appreciate and realize that this is not our problem alone; it is the problem of the entire Nation and of the entire world.

Mr. Speaker, the United States Government has great responsibilities in a world which includes death, suffering, hunger, and despair.

We cannot, we must not, we dare not close our eyes to international problems when the lives and welfare of human beings are at stake.

This Government earned and received the acclaim of the civilized world by taking the lead in the United Nations Assembly to bring about a favorable vote last November on partition of Palestine.

Since that time, however, the British foreign office and the Middle East division of our own State Department have climbed back in the saddle, and by our actions, if not by our words, that bold beginning is being disavowed.

On Palestine, the American Government is suffering from a severe form of split personality.

PROMISES MUST BE FULFILLED

On one side are the warm-hearted, humanitarian and adult impulses of the President and of most Americans, determined that the promises made to world Jewry during and after World War I shall be fulfilled and that a Jewish state in the Jewish homeland shall be created.

On the other side are the cold-blooded diplomats and international oil barons, equally determined that the sacred obligations of international treaties shall not be permitted to interfere with profits.

They are plotting and planning, using Arab feudalism and Pan-Arabian nationalism, Russophobia, and the bitter Moslem religious fanaticism as convenient pawns in their games of war, intrigue, and money.

We must reject utterly that cold-blooded and cruel attitude toward the real and human problems of Palestine.

Take away the international greed for the oil of Araby and the Jews and the Arabs will quickly settle their few differences and live side by side in peace and prosperity.

If the British will not live up to their own treaty obligations and to their obligations to uphold majority decisions of the United Nations, then we must not only permit but help the Jews of Palestine to gain the necessary weapons for their own self-preservation.

The British Government has flatly refused to allow the Jewish militia to arm itself.

BRITISH PREDICT CALAMITIES

The British have refused to give to the Jewish militia the status of a legal and recognized police force, although the British armed forces in Palestine have demonstrated that they are unwilling to preserve order and to protect the lives and property of Jews and Arabs against violence and destruction and murder.

The British have refused to get out of Palestine until next May 15; they have refused to allow the United Nations Palestine Commission to enter Palestine until May 1; and they have flatly warned the members of the commission that they are in danger of attack or even death from the Arabs. They have warned the UN commission that violence will increase with the end of the mandate and that the United Nations will mean nothing to the Arabs.

Of course, Mr. Speaker, if the British thus incite the Arabs to greater violence, express their approval in advance, and refuse to allow the Jews to prepare for national defense when the new Palestinian Government must assume its responsibilities, the Arabs will do what the British predict. That is like saying, in advance, that they wish these calamities to occur.

In support of this outworn policy of British imperialism, the United States Government has arbitrarily imposed a rigid embargo on the shipment of arms and military and police supplies to Palestine.

THE WARNING IS CLEAR

I do not doubt for a moment the legal right of Loy Henderson and his Middle Eastern Division of the State Department to deprive the Jews in Palestine of all possibility of arming themselves against the thugs and brigands who compose the mercenary Arab forces of the Mufti.

I do doubt the moral and ethical right of Mr. Henderson to reverse the enlightened and noble policies of the President and of the Secretary of State, to hinder and sabotage and frustrate the execution of those policies, and to connive with the worst elements in the British Government and the international oil cartels to stultify the United Nations Commission on Palestine.

The warning is clear.

We must either carry out the obligations we have assumed like a mature Nation, with the dignity and consistency demanded by our unlimited strength and power, or we must be prepared to retreat from every part of the world in ignominious defeat and shame.

The embargo must be lifted; the British must be forced to accept in full the decision of the United Nations, and to actively cooperate in bringing that decision to full force and effect; and the Jewish militia forces must be legalized and armed to enable the Jewish state to stand alone, when the time comes, against all the forces of evil.

Mr. BUCHANAN. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield.

Mr. BUCHANAN. I want to join with my colleague the gentleman from New York [Mr. CELLER], in expressing despair and a feeling of shock at the state of affairs in Palestine. On behalf of the Pittsburgh Zionist Emergency Council held in January of this year a communication was addressed to me by Dr. Alex Lowenthal, chairman of the Pittsburgh Zionist Emergency Council.

Since November 29, 1947, the situation in Palestine has deteriorated continuously. This deterioration has been due mainly to the noncooperation and obstruction of the British Government to the UN decision. Also the policy of the United States has been encouraging to both the Arabs in Palestine and the Arab states surrounding Palestine to violate and disobey the UN decision. These actions have been: First, an embargo on the shipment of arms to Palestine; second, the failure to warn Arab states about the consequences of their interference in Palestine; third, statements by high officials of our Government questioning the soundness of American policy in advocating participation; fourth, failure to take any action within the UN toward the establishment of an international police force; and, fifth, permitting a general atmosphere of alarm which may have disastrous effects on American public opinion, which, in turn, may undermine the entire structure and effectiveness of the UN.

The Jews of America are shocked by this reversal of attitude. And so is every right-thinking American who wants to see the decision of the UN carried out in its true light.

Mr. CELLER. Mr. Speaker, I wish to thank the gentleman from Pennsylvania.

In conclusion, I want to point out two very marked derelictions of the British Government in connection with instructions laid down by the United Nations decision on Palestine.

In part 1, subdivision (a) we find this significant language:

The mandatory power shall use its best endeavors to insure that an area situated in the territory of the Jewish state including

a seaport and hinterland adequate to provide facilities for a substantial immigration, shall be evacuated at the earliest possible date and in any event not later than the 1st of February 1948.

The 1st of February has come and gone. The purpose of that language was instructions to the mandatory power to allow the Jews to use a seaport, either Tel Aviv or Haifa, for purposes of immigration and for the entry of supplies necessary to sustain life and for military material. February 1 has come and gone and the British refuse to set aside or set up that seaport for the use of the Jews as indicated.

Secondly, I draw your attention to this significant language in part 8 of the decisions of the United Nations on partition:

The Provisional Council of Government of each state shall, within the shortest time possible, recruit an armed militia from the residents of that state sufficient in number to maintain internal order and to prevent frontier clashes. This armed militia in each state shall for operational purposes be under the command of Jewish or Arab officers resident in that state, but general political and military control, including the choice of the militia's high command shall be exercised by the commission.

That language specifically provides for the setting up by the Arabs in their state of their own militia and by the Jews in their state of their militia, but Great Britain refuses point blank to allow the Jews to set up their militia. They have what is known as the Haganah, which means "defense," which is a militia in a way, but these members of the Haganah, if they seek to patrol the roads or defend the lives of their own people or to defend the decision of the United Nations against raiding marauders, are disarmed by the British and jailed as malefactors, despite this very significant language I have just read to you.

Over and beyond that, how can you have a militia if arms are denied you?

Mr. KEATING. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I am happy to yield to the gentleman from New York.

Mr. KEATING. Were the British a party to the instrument from which you have quoted?

Mr. CELLER. The British are members of the United Nations and are sworn, with the other members to uphold the decisions of the United Nations.

Mr. KEATING. What excuse or reason do they give for being unwilling to open a port or to allow the arming of the militia?

Mr. CELLER. They say that as long as they are in Palestine as the mandatory power it is incumbent upon them to maintain law and order and they do not want the authority to be divided. But they do not maintain law and order. Their position is insincere and perfidious. I would say if they did maintain law and order, pending the transition period, there might not be need for a militia, but insofar as they have refused to maintain that law and order, they assume a dog-in-the-manger attitude: "We will not risk the lives of our British soldiers and we will not let you either maintain law and order." The Jews can take care of their own. There are about 70,000 of that Haganah. They can very well take care of themselves. If there were no outside assistance given to the Arabs, as, for example, from Syria, Lebanon, and the neighboring states, and if they were plenifully supplied with arms. We placed an embargo on arms. Of what avail is that embargo on arms if Britain places no embargo on arms? Great Britain has just completed a military pact with Iraq, under which tanks, planes, and military vehicles have been sent to Iraq. Only a child would say that that military matériel does not find its way or is not routed into Palestine.

Mr. KLEIN. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield.

Mr. KLEIN. The gentleman stated that Britain has placed no embargo on arms. What the gentleman meant was that Great Britain has placed no embargo on the shipment of arms to the Arabs. You do not imply that Great Britain is helping arm the Haganah?

Mr. CELLER. No; indeed not. But I am saying there can be no efficacious embargoing of arms just by the United States if the supporting nations like Iraq, Iran, Trans-Jordan, Syria, Lebanon, and Egypt, who opposed partition, can get a plentiful supply of arms, and they, in turn, can route their arms into Palestine. So our embargo on arms is a nullity as far as trying to keep arms from the Arabs is concerned. It weighs the scale deliberately in favor of the Arabs and against the Jews.

Mr. KEATING. So that the effect of our embargoing arms is to help the arming of the Arabs but prevents the arming of the Jews. Is that a correct statement?

Mr. CELLER. The gentleman states it perfectly and very eloquently.

Mr. KEATING. Are arms available to the Jews from other countries?

Mr. CELLER. No; because the Jews are not a sovereign state. The Jewish agency is not a sovereign nation and is in no position to purchase arms. Whatever arms they have they have made themselves or have secured surreptitiously.

The Arab nations, however, are sovereign nations and they can purchase. For example, the embargo that we placed on arms does not cover some of the Moslem nations that voted against partition. It originally did not cover Yemen until I drew attention to the fact and the gentleman from California [Mr. HOLIFIELD] drew attention to the fact. Then they suddenly included Yemen. We know, though, that whatever arms were sent to Yemen will find their way eventually into Palestine.

The embargo presently does not include Pakistan. It does not include Turkey, and we know again that arms sent to those Moslem countries will eventually find their way into Palestine.

If we try to be neutral, if we say we are neutral and therefore place an embargo on arms we are doing the very opposite of neutrality.

And then, may I ask this? Who said we were neutral? We were not neutral when we voted for partition. We were not neutral when we led the fight for partition. That was not neutrality. We took a definite stand. We must, therefore, be logical and do everything in our power to uphold the position we took at the United Nations.

Mr. BUCHANAN. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield.

Mr. BUCHANAN. Mr. Speaker, on behalf of my colleague the gentleman from Pennsylvania [Mr. EBERHARTER] I ask unanimous consent that he may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. EBERHARTER. Mr. Speaker, I have listened with interest and concern to the speeches made here on the unhappy subject of Palestine. My concern springs from several reasons. In the first place, I do not like to see organized violence or aggression anywhere in the world. History should have taught us that aggression, unless checked immediately, has a habit of spreading.

I am further concerned with the particular subject of Palestine because it is a subject on which the Congress of the United States, the two great political parties, and American public opinion are very clearly on record as favoring a Jewish state and large-scale Jewish immigration.

Finally, I am clearly concerned over the fact that the executive branch of our Government, after having exercised its influence in accordance with the wishes of the American people, and after having contributed to the wise solution of the Palestine question by the United Nations, is now wavering.

I do not like, generally speaking, for Congress to give advice to the Executive in a sphere which is normally an Executive responsibility. Palestine is a matter of foreign policy, and under our system, an Executive responsibility. But it is incumbent on us to remember that in the conduct of American foreign policy we must always be inspired by certain principles and rules.

We must always be certain that the integrity of our Government can never be questioned. We must always be certain that we are keeping faith with the United Nations, not only in the letter but also in the spirit. And we must always be certain that, as befits our democratic and popular form of government, American foreign policy is responsive to the wishes of the American people and of its representatives in Congress.

Are we certain that in the matter of Palestine we are following each and every one of these fundamental principles? As Members of Congress we must be most careful and vigilant.

I see there is a lot of speculation in the newspapers as to who is responsible for the questions now the subject of so much discussion—whether it is the President, a Secretary of one of our major governmental departments, or this or that official. I do not know the answer, and perhaps it doesn't matter very much. Under our Constitution the President heads the executive branch of our Government. If any subordinate official pursues a policy contrary to the President's instructions, it is up to the Presi-

dent to compel a sharp about-face. If the President permits the continuance of a variation in policy, it becomes his policy. The Congress of the United States is not concerned with individual officials. It is concerned with general policy. As to that, I join those who spoke before me in expressing the hope of an immediate and enlightened correction of those activities, or lack of activites, which are causing so much concern.

Mr. CELLER. Mr. Speaker, I yield back the balance of my time.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. McMAHON (at the request of Mr. LATHAM), indefinitely, on account of official business;

To Mr. JENKINS of Pennsylvania, for February 4, 5, and 6, on account of official business.

SENATE BILLS AND JOINT RESOLUTION REFERRED

Bills and a joint resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 612. An act to amend section 35 of chapter III of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," as amended, and to repeal section 36 of said chapter III of said act, as amended, so as to permit certain additional investments; to the Committee on the District of Columbia.

S. 1195. An act to repeal the laws relating to the length of tours of duty of officers and enlisted men of the Army at certain foreign stations; to the Committee on Armed Services.

S. 1478. An act to authorize the transfer of lands in the Fort Wingate Military Reserve, N. Mex., from the Department of the Army to the Interior Department; to the Committee on the Armed Services.

S. 1493. An act to amend section 19 of the Veterans' Preference Act of June 27, 1944 (48 Stat. 387), and for other purposes; to the Committee on Post Office and Civil Service.

S. 1520. An act to amend section 3 of the act of August 24, 1912 (37 Stat. 554), as amended, so as to provide reimbursement to the Post Office Department by the Navy Department for shortages in postal accounts occurring while commissioned officers of the Navy and Marine Corps are designated custodians of postal effects; to the Committee on Armed Services.

S. 1528. An act to authorize the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, or the Secretary of the Treasury to accept and use gifts, devises, and bequests for schools, hospitals, libraries, cemeteries, and other institutions under the jurisdiction of the Department of the Army, the Department of the Navy, the Department of the Air Force, or the Department of the Treasury, respectively, and for other purposes; to the Committee on Armed Services.

S. 1605. An act to provide for the payment of a sum not to exceed $12,000,000 to the Swiss Government as partial compensation for damage inflicted on Swiss territory during World War II by United States armed forces in violation of neutral rights, and authorizing appropriations therefor; to the Committee on Foreign Affairs.

S. J. Res. 172. Joint Resolution to authorize vessels of Canadian registry to transport iron ore between United States ports on the Great Lakes during 1948; to the Committee on Merchant Marine and Fisheries.

ENROLLED BILL SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 1826. An act making it a petty offense to enter any national-forest land while it is closed to the public.

ADJOURNMENT

Mr. JENSEN. Mr. Speaker, if there are no further requests for time, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 37 minutes p. m.) the House adjourned until tomorrow, Wednesday, February 4, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1279. A letter from the Archivist of the United States, transmitting a report on records for disposal by various Government agencies; to the Committee on House Administration.

1280. A letter from the Acting Secretary of the Navy, transmitting a report of proposed transfer to the city of Blaine, Wash., a motor barge or a craft of similar type; to the Committee on Armed Services.

1281. A letter from the Secretary of Commerce, transmitting the Second Quarterly Report, required under the Second Decontrol Act of 1947; to the Committee on the Judiciary.

1282. A communication from the President of the United States, transmitting a supplemental estimate of appropriation for the fiscal year 1948 in the amount of $2,212,000 for the legislative branch, Government Printing Office (H. Doc. No. 519); to the Committee on Appropriations and ordered to be printed.

1283. A communication from the President of the United States, transmitting a supplemental estimate of appropriation for the fiscal year 1948 in the amount of $700,000 for the Treasury Department (H. Doc. No. 520); to the Committee on Appropriations and ordered to be printed.

1284. A communication from the President of the United States, transmitting supplemental estimates of appropriation for the fiscal year 1948 in the amount of $5,545,500 for the Department of State (H. Doc. No. 521); to the Committee on Appropriations and ordered to be printed.

1285. A communication from the President of the United States, transmitting supplemental estimates of appropriation for the fiscal year 1949 in the amount of $86,627,228 for the Department of State (H. Doc. No. 522); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WELCH: Committee on Public Lands. S. 522. An act to authorize the sale of certain lands of the L'Anse Band of Chippewa Indians, Michigan; with an amendment (Rept. No. 1291). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. S. 1133. An act providing for the per capita payment of certain moneys appropriated in settlement of certain claims of the Indians of the Fort Berthold Indian Reservation in North Dakota; with an amendment (Rept. No. 1292). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. S. 1485. An act to authorize the Secretary of the Interior to dispose of certain lands heretofore acquired for the Albuquerque Indian School, N. Mex.; without amendment (Rept. No. 1293). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. S. 1507. An act authorizing the sale of undisposed of lots in Michel addition to the town of Polson, Mont.; without amendment (Rept. No. 1294). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 2159. A bill to authorize the Secretary of the Interior to prepare plans and estimates for a sewage-disposal system to serve the Yorktown area of the Colonial National Historical Park, Va., and for other purposes; without amendment (Rept. No. 1295). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 3603. A bill granting the consent of Congress to the States of Idaho and Wyoming to negotiate and enter into a compact for the division of the waters of the Snake River and its tributaries originating in either of the two States and flowing into the other; with an amendment (Rept. No. 1296). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 3628. A bill to revise the method of issuing patents for public lands; without amendment (Rept. No. 1297). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 3685. A bill authorizing the Wyandotte Tribe of Oklahoma, through its business committee, to sell and convey, subject to the approval of the Secretary of the Interior, the Wyandotte Indian public burial ground in Kansas City, Kans.; with an amendment (Rept. No. 1298). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 3936. A bill to authorize the United States Park Police to make arrests within Federal reservations in the environs of the District of Columbia, and for other purposes; with an amendment (Rept. No. 1299). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4023. A bill to authorize the establishment of the De Soto National Memorial, in the State of Florida, and for other purposes; without amendment (Rept. No. 1300). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4027. A bill to transfer certain transmission lines, substations, appurtenances, and equipment in connection with the sale and disposition of electric energy generated at the Fort Peck project, Montana, and for other purposes; without amendment (Rept. No. 1301). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4461. A bill approving the performance in the field of certain functions relating to the public lands; without amendment (Rept. No. 1302). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4462. A bill authorizing the conveyance of certain lands in Park County, Wyo., to the State of Wyoming; with amendments (Rept. No. 1303). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4515. A bill to provide for selection of superintendents of national cemeteries from meritorious and trustworthy male members of the armed forces who have been disabled in line of duty for active field service; with an amendment (Rept. No. 1304). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4823. A bill to provide adequate school facilities within Yellowstone National Park, and for other purposes; with an amendment (Rept. No. 1305). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4980. A bill relating to the acquisition by the United States of State-owned lands within Glacier National Park, in the State of Montana, and for other purposes; without amendment (Rept. No. 1306). Referred to the Committee of the Whole House on the State of the Union.

Mr. WELCH: Committee on Public Lands. H. R. 4513. A bill to eliminate the requirement of oaths in certain land matters, and for other purposes; without amendment (Rept. No. 1307). Referred to the House Calendar.

Mr. WELCH: Committee on Public Lands. House Joint Resolution 61. Joint resolution to provide for the designation of the Park River dam and reservoir project in Walsh County, N. Dak., as the Homme Reservoir and Dam; without amendment (Rept. No. 1308). Referred to the House Calendar.

Mr. WELCH: Committee on Public Lands. House Joint Resolution 150. Joint resolution to provide for the restoration and preservation of the Francis Scott Key Mansion, to establish the Francis Scott Key National Monument, and for other purposes; with amendments (Rept. No. 1309). Referred to the Committee of the Whole House on the State of the Union.

Mr. GEARHART: Committee on Ways and Means. House Joint Resolution 296. Joint resolution to maintain the status quo in respect of certain employment taxes and social-security benefits pending action by Congress on extended social-security coverage; with amendments (Rept. No. 1319). Referred to the Committee of the Whole House on the State of the Union.

Mr. GEARHART: Committee on Ways and Means. H. R. 5052. A bill to exclude certain vendors of newspapers or magazines from certain provisions of the Social Security Act and Internal Revenue Code; without amendment (Rept. No. 1320). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WELCH: Committee on Public Lands. S. 310. An act authorizing the issuance of a patent in fee to Jonah Williams; without amendment (Rept. No. 1310). Referred to the Committee of the Whole House.

Mr. WELCH: Committee on Public Lands. S. 311. An act authorizing the issuance of a patent in fee to Charles Ghost Bear, Sr.; without amendment (Rept. No. 1311). Referred to the Committee of the Whole House.

Mr. WELCH: Committee on Public Lands. S. 312. An act authorizing the issuance of a patent in fee to Charles Kills the Enemy; without amendment (Rept. No. 1312). Referred to the Committee of the Whole House.

Mr. WELCH: Committee on Public Lands. S. 313. An act authorizing the issuance of a patent in fee to Calvin W. Clincher; without amendment (Rept. No. 1313). Referred to the Committee of the Whole House.

Mr. WELCH: Committee on Public Lands. S. 402. An act to authorize and direct the Secretary of the Interior to issue to James Black Dog a patent in fee to certain land; with an amendment (Rept. No. 1314). Referred to the Committee of the Whole House.

Mr. WELCH: Committee on Public Lands. S. 499. An act authorizing the issuance of a patent in fee to Mrs. Bessie Two Elk-Poor Bear; without amendment (Rept. No. 1315). Referred to the Committee of the Whole House.

Mr. WELCH: Committee on Public Lands. S. 500. An act authorizing the issuance of a patent in fee to Tom Eagleman; with an amendment (Rept. No. 1316). Referred to the Committee of the Whole House.

Mr. WELCH: Committee on Public Lands. S. 542. An act authorizing the issuance of a patent in fee to Mrs. Ella White Bull; without amendment (Rept. No. 1317). Referred to the Committee of the Whole House.

Mr. WELCH: Committee on Public Lands. H. R. 4118. A bill to authorize and direct the Secretary of the Interior to issue a patent for certain lands in Rankin County, Miss.; with amendments (Rept. No. 1318). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. GARY:

H. R. 5259. A bill to amend the Armed Forces Leave Act of 1946 so as to permit certain payments to be made to the estates of former members of the armed forces; to the Committee on Armed Services.

By Mr. HAVENNER:

H. R. 5260. A bill to ratify the administrative promotions of employees on military furlough from the field postal service, in certain cases, and for related purposes; to the Committee on Post Office and Civil Service.

By Mr. POWELL:

H. R. 5261. A bill making unlawful the requirement for the payment of a poll tax as a prerequisite to voting in a primary or other election for national officers; to the Committee on House Administration.

By Mr. CASE of South Dakota:

H. R. 5262. A bill to authorize the sale of Indian lands acquired under the act of June 18, 1934 and under the act of June 26, 1926; to the Committee on Public Lands.

By Mr. LANDIS:

H. R. 5263. A bill to permit the Secretary of Agriculture to execute and deliver to present owners of certain real property quitclaim deeds to the minerals in or under such property; to the Committee on Agriculture.

By Mr. MILLER of Nebraska:

H. R. 5264. A bill to provide for the commitment, detention, and treatment of criminal sexual psychopaths, and for other purposes; to the Committee on the District of Columbia.

By Mr. BYRNE of New York:

H. R. 5265. A bill to provide that any future payments by the Republic of Finland on the principal or interest of its debt of the First World War to the United States shall be used to provide educational and technical instruction and training in the United States for citizens of Finland; to the Committee on Foreign Affairs.

By Mr. HAND:

H. R. 5266. A bill to amend section 3 of the Oil Pollution Act, 1924, and for other purposes; to the Committee on Public Works.

By Mr. KELLEY:

H. R. 5267. A bill to provide for the amendment of the Fair Labor Standards Act of 1938, and for other purposes; to the Committee on Education and Labor.

By Mr. HOLIFIELD:

H. R. 5268. A bill to provide for the amendment of the Fair Labor Standards Act of 1938, and for other purposes; to the Committee on Education and Labor.

By Mr. HESELTON:

H. J. Res. 317. Joint resolution to place temporary restrictions on the exportation of certain petroleum products; to the Committee on Interstate and Foreign Commerce.

By Mr. THOMPSON:

H. Res. 452. Resolution to request the Secretary of Agriculture to take action to prevent damage to valuable crops as a result of the use of the weed killer known as 2,4–D; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BARDEN:

H. R. 5269. A bill for the relief of Fred S. Hondros; to the Committee on the Judiciary.

By Mr. MANSFIELD:

H. R. 5270. A bill for the relief of Mrs. Hope Irene Buley; to the Committee on the Judiciary.

By Mr. McMILLAN of South Carolina:

H. R. 5271. A bill for the relief of Dolan Calcutt; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1295. By Mr. BRADLEY: Petition of 22 residents of the Eighteenth Congressional District of California, urging the passage of Senate Bill 265, a bill to prohibit the transportation of alcoholic-beverage advertising in interstate commerce and the broadcasting of alcoholic-beverage advertising over the radio; to the Committee on Interstate and Foreign Commerce.

1296. By Mr. Dondero: Petition of citizens of the Seventeenth Congressional District of Michigan, urging favorable consideration of legislation establishing a system of universal military training; to the Committee on Armed Services.

1297. By Mr. HALLECK: Petition of citizens of Logansport, Ind., in support of H. R. 2716; to the Committee on Veterans' Affairs.

1298. By Mr. LEWIS: Petition of 30 residents of East Liverpool, Ohio, and vicinity, protesting the enactment into law of House Joint Resolution 239 and Senate Joint Resolution 150; to the Committee on the Judiciary.

1299. Also, petition of 21 residents of Barnesville and Quaker City, Ohio, in support of legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1300. By Mr. MILLER of Maryland: Petition of 23 residents of Greensboro, two of Ridgely, and one resident of Denton, Md., in support of S. 265, a bill to prohibit the transportation of alcoholic-beverage advertising in interstate commerce and the broadcasting of alcoholic-beverage advertising over the radio; to the Committee on Interstate and Foreign Commerce.

1301. By Mr. SADLAK: Petition of citizens of the towns of Guilford and Madison, Conn., for favorable action on the European recovery program, popularly known as the Marshall plan; to the Committee on Foreign Affairs.

1302. Also, petition of members of the American Legion Auxiliary, and others, of Moodus and Meriden, Conn., in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

SENATE

WEDNESDAY, FEBRUARY 4, 1948

(Legislative day of Monday, February 2, 1948)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

Rev. James D. Bryden, assistant minister, New York Avenue Presbyterian Church, Washington, D. C., offered the following prayer:

O God, we invoke Thy blessing upon the Senate of the United States and pray for the Senators who are met and will meet here this day. As they seek solutions to the complex and perplexing problems of our time, give them breadth of vision to see the good of all the people, and grant unto each one personal resources sufficient for the day.

We confess that we do often forget Thee, but we know that Thou dost not forget us. Thou hast girded us with strength when we have thought the strength to be our own. Continue this mercy toward us, and foster within us humble and thankful hearts. For Thy name's sake. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMFORE

The Chief Clerk read the following letter:

UNITED STATES SENATE,
PRESIDENT PRO TEMPORE,
Washington, D. C., February 4, 1948.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. HARRY P. CAIN, a Senator from the State of Washington, to perform the duties of the Chair during my absence.

A. H. VANDENBERG,
President pro tempore.

Mr. CAIN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, February 3, 1948, was dispensed with, and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed without amendment the following bills of the Senate:

S. 664. An act for the relief of Mr. and Mrs. Edward H. Isenhart;

S. 1005. An act to amend the act of June 28, 1935, entitled "An act to authorize participation by the United States in the Interparliamentary Union";

S. 1394. An act to provide increased subsistence allowance to veterans pursuing certain courses under the Servicemen's Readjustment Act of 1944, as amended, and for other purposes; and

S. 1411. An act for the relief of Willie Ruth Chapman.

The message also further announced that the House had passed the bill (S. 1796) to provide for the preservation of the frigate *Constellation* and to authorize the disposition of certain replaced parts of such vessel as souvenirs, and for other purposes, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the bill (S. 1393) to increase the permitted rate of allowance and compensation for training on the job under Veterans Regulation No. 1 (a), as amended, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 332. An act for the relief of Jacob A. Johnson;

H. R. 350. An act for the relief of Caffey Robertson-Smith, Inc.;

H. R. 380. An act for the relief of Edward L. Barreras;

H. R. 697. An act for the relief of Mrs. Essie N. Fannin, Miss Helen Hicks, Miss Marie Hicks, Miss Frances Fannin, William O. Thompson, and Mrs. W. D. Thompson;

H. R. 1022. An act for the relief of Peter Bednar, Francisca Bednar, Peter Walter Bednar, and William Joseph Bednar;

H. R. 1733. An act for the relief of G. C. Hedrick;

H. R. 1780. An act for the relief of the Cannon Valley Milling Co.;

H. R. 1878. An act to amend the immigration laws to deny admission to the United States of persons who may be coming here for the purpose of engaging in activities which will endanger the public safety of the United States;

H. R. 1915. An act for the relief of Ezra Butler Eddy, Jr., and wife, Marie Claire Lord Eddy;

H. R. 1929. An act for the relief of Edwin Osgood Cogan, his wife Helen Olga Cogan, and his daughter Isabel Joan Cogan;

H. R. 2000. An act for the relief of Jeffersonville Flood Control District, Jeffersonville, Ind., a municipal corporation;

H. R. 2214. An act for the relief of Dave Hougardy;

H. R. 2268. An act for the relief of Charles E. Crook and B. L. Fielder;

H. R. 2427. An act for the relief of Jose Cabral Lorenzo;

H. R. 2433. An act for the relief of the legal guardian of Joseph DeSouza, Jr.;

H. R. 2697. An act for the relief of E. W. Eaton Coal Co.;

H. R. 2914. An act for the relief of Hassler-Ponder Toy Manufacturing Co., Inc.;

H. R. 3089. An act for the relief of Mississippi Central Railroad Co.;

H. R. 3366. An act to amend section 4934 of the Revised Statutes (U. S. C., title 35, sec. 78), as amended, to permit public libraries of the United States to acquire back copies of United States letters patent, and for other purposes;

H. R. 3425. An act for the relief of the Lebanon Woolen Mills, Inc.;

H. R. 3427. An act for the relief of Mrs. Mary H. Overall and Thomas I. Baker;

H. R. 3506. An act to provide for the acquisition of a site for a new Federal building in Huntington, W. Va., adjoining existing Federal buildings there, as an economy measure, before land values have increased as a result of improvements;

H. R. 3968. An act for the relief of Olive Irene Milloglav;

H. R. 4400. An act for the relief of Ben Grunstein;

H. R. 4426. An act to provide basic authority for certain functions and activities of the Weather Bureau, and for other purposes;

H. R. 4427. An act to provide basic authority for the performance of certain functions and activities of the Department of Commerce, and for other purposes;

H. R. 4443. An act for the relief of Jacob Cohen;

H. R. 4836. An act to authorize the purchase of a new post-office site at Omaha, Nebr.;

H. R. 4838. An act to extend the period of validity of the act to facilitate the admission into the United States of the alien fiancées or fiancés of members of the armed forces of the United States;

H. R. 4856. An act to delay the liquidation of mineral interests reserved to the United States as required by the Farmers' Home Administration Act of 1946, and for other purposes; and

H. R. 4967. An act to provide for the acquisition of a site and preparation of plans and specifications for a new postal building and for remodeling of the existing main post-office building in Portland, Oreg., and for other purposes.

NOTICE OF HEARING ON NOMINATION OF HAROLD M. STEPHENS TO BE CHIEF JUSTICE OF THE UNITED STATES COURT OF APPEALS FOR THE DISTRICT OF COLUMBIA

Mr. WILEY. Mr. President, on behalf of the Committee on the Judiciary, and in accordance with the rules of the committee, I desire to give notice that a public hearing has been scheduled for Wednesday, February 18, 1948, at 10:15 a. m., in the Senate Judiciary Committee room, room 424, Senate Office Building, upon the nomination of Harold M. Stephens, of Utah, to be Chief Justice of the United States Court of Appeals for the District of Columbia, vice Hon. D. Lawrence Groner, retired. At the indicated time and place all persons interested in the nomination may make such representations as may be pertinent. The subcommittee consists of the Senator from Kentucky [Mr. COOPER], chairman; the Senator from Oklahoma [Mr. MOORE]; and the Senator from Arkansas [Mr. FULBRIGHT].

NOTICE OF HEARING ON NOMINATION OF JAMES M. PROCTOR TO BE AN ASSOCIATE JUSTICE OF THE UNITED STATES COURT OF APPEALS FOR THE DISTRICT OF COLUMBIA

Mr. WILEY. Mr. President, on behalf of the Committee on the Judiciary, and in accordance with the rules of the committee, I desire to give notice that a public hearing has been scheduled for Wednesday, February 18, 1948, at 10 a. m., in the Senate Judiciary Committee room, room 424, Senate Office Building, upon the nomination of James M. Proctor, of the District of Columbia, to be an associate justice of the United States Court of Appeals for the District of Columbia, vice Hon. Harold M. Stephens, elevated. At the indicated time and place all persons interested in the nomination may make such representations as may be pertinent. The subcommittee consists of the Senator from Kentucky [Mr. COOPER], chairman; the Senator from Oklahoma [Mr. MOORE]; and the Senator from Arkansas [Mr. FULBRIGHT].

NOTICE OF HEARING ON NOMINATION OF EDWARD ALLEN TAMM TO BE AN ASSOCIATE JUSTICE OF THE DISTRICT COURT OF THE UNITED STATES FOR THE DISTRICT OF COLUMBIA

Mr. WILEY. Mr. President, on behalf of the Committee on the Judiciary, and in

accordance with the rules of the committee, I desire to give notice that a public hearing has been scheduled for Wednesday, February 18, 1948, at 10:30 a. m., in the Senate Judiciary Committee room, room 424, Senate Office Building, upon the nomination of Edward Allen Tamm, of the District of Columbia, to be an associate justice of the District Court of the United States for the District of Columbia, vice Hon. James M. Proctor, elevated. At the indicated time and place all persons interested in the nomination may make such representations as may be pertinent. The subcommittee consists of the Senator from Missouri [Mr. DONNELL], chairman; the Senator from Kentucky [Mr. COOPER]; and the Senator from West Virginia [Mr. KILGORE].

MEETING OF COMMITTEE DURING SESSION OF THE SENATE

Mr. LANGER asked and obtained consent that members of the subcommittee of the Committee on Post Office and Civil Service, dealing with REA, be excused from attendance on the Senate for the remainder of the afternoon.

LEAVE OF ABSENCE

Mr. MOORE asked and obtained consent to be excused from attendance on the Senate for the remainder of this afternoon.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT OF ATTORNEY GENERAL

A letter from the Attorney General, transmitting, pursuant to law, the seventeenth and last report of the Attorney General, covering the period from October 1, 1947, through January 25, 1948 (with an accompanying report); to the Committee on Banking and Currency.

BUREAU OF MINES ANTHRACITE RESEARCH LABORATORY, SCHUYLKILL HAVEN, PA.

A letter from the Secretary of the Interior, reporting, pursuant to law, on the activities of, expenditures by, and donations to the Bureau of Mines Anthracite Research Laboratory to be constructed at Schuylkill Haven, Pa.; to the Committee on Interior and Insular Affairs.

REPORT OF BOARD OF DIRECTORS, FEDERAL PRISON INDUSTRIES, INC.

A letter from the secretary, Federal Prison Industries, Inc., Department of Justice, transmitting, pursuant to law, the annual report of the Board of Directors of the Federal Prison Industries, Inc., for the fiscal year 1947 (with an accompanying report); to the Committee on the Judiciary.

PETITION

The ACTING PRESIDENT pro tempore laid before the Senate a telegram in the nature of a petition from Mathilda D. Miller, national chairman, Commission on Law and Social Action, Women's Division, American Jewish Congress, and Anna Center Schneiderman, national chairman, Committee on Education, Women's Division, American Jewish Congress, relating to the furnishing of arms to the Jewish people in Palestine, which was referred to the Committee on Foreign Relations.

THE ST. LAWRENCE SEAWAY

Mr. CAPPER. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a resolution with reference to the St. Lawrence seaway which was adopted on October 15, 1947, by the National Rural Electric Cooperative Association. I am strong for the St. Lawrence seaway, as are the farmers in my part of the country, and I am pleased to cooperate every way I can with the program.

There being no objection, the resolution was received, ordered to lie on the table and to be printed in the RECORD, as follows:

ST. LAWRENCE SEAWAY

Be it resolved, That we consider the St. Lawrence seaway project to be one of the resources which should be immediately developed; that authorization for immediate construction of this project is desirable, and we hereby reaffirm our resolution (asking for its immediate development) adopted at the last annual meeting of this association, at Buffalo, N. Y., March 6, 1946.

"Whereas there is a serious and growing power shortage throughout the United States; and

"Whereas all possible new generating capacity is needed whether provided by the commercial power companies or by the Federal Government, State agencies, municipalities, or cooperatives; and

"Whereas the rural electrification program throughout the United States is being slowed down and even threatened by lack of adequate wholesale power; and

"Whereas it is in the public interest to harness the Nation's potential hydropower and make that power available through transmission lines directly to distribution agencies including electric cooperatives: Now, therefore, be it

"*Resolved*, That the Congress of the United States be urged to expand, as rapidly as possible, the program for the production of power generally, and particularly projects in our region on the St. Lawrence River, the Roanoke River, Savannah River, and other multiple-purpose projects recommended by the Corps of Engineers."

CERTIFICATION

I, Avery C. Moore, secretary-treasurer of the National Rural Electric Cooperative Association, hereby certify that the above resolutions were adopted unanimously, the first by the rural electric systems of the United States in session at Spokane, Wash., April 24, 1947, and the second by the rural electric systems of region I (the Atlantic seaboard States—Maine to North Carolina, inclusive) in session at Albany, N. Y., October 15, 1947.

[SEAL] AVERY C. MOORE,
Secretary-Treasurer, National Rural Electric Cooperative Association.
JANUARY 21, 1948.

DEATH OF MOHANDAS K. GANDHI

Mr. CAPPER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by Ambassador Warren R. Austin, United States representative at the seat of the United Nations, before the Security Council, upon the death of Mohandas K. Gandhi.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Mr. President, the assassination of Mohandas K. Gandhi, who for more than a generation has valiantly blazed a trail toward the goal of a nonviolent world, comes as a deep blow to me, and, I am sure, to the people of the United States and peoples everywhere.

It is fitting that we should sit here charged with the grave responsibility of maintaining peace among nations and pay tribute to this great Indian leader, who, over the years, has done so much to bring home to his fellow countrymen the moral and spiritual lessons which are essential for the achievement of world peace and brotherhood. It is indeed tragic that his death has come at a time of tension and crisis when these qualities of restraint and moderation which so characterized the man are desperately needed.

Gandhi fell a martyr to the great cause of cooperation among all nations and communities, and although we shall, together with all peace-loving peoples, mourn his loss, we earnestly hope that his martyrdom will inspire the peoples of the United Nations to press forward with even greater determination to achieve those ideals for which he stood.

I express to the distinguished representative of India and his Government and his people the profound sympathy of the mission of the United States to the United Nations.

SCHOOLS AND THE RACIAL QUESTION

Mr. FULBRIGHT. Mr. President, I have seen in recent weeks many highly emotional and ill-considered statements in the press about racial matters in our schools. On January 30 the Arkansas Gazette carried a statement by the chairman of the board of the University of Arkansas, Mr. Herbert L. Thomas, dealing with this subject, which I believe is one of the most sensible pronouncements I have seen. I ask unanimous consent that it may be printed at this point in my remarks in the RECORD, for the benefit of all those who are interested in the subject.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MR. THOMAS' STATEMENT

Personally, I feel that an attempt to force admittance into the University of Arkansas by a Negro in undergraduate work is an error of judgment. The race is making economic and educational progress in Arkansas, and there is a large portion of our citizens who are strongly backing an educational program that is fast leading to accredited schools.

Economic and educational opportunities should be a logical goal of any member of any race. Segregation is a more involved and complex problem, and neither North, South, East, nor West can truthfully say that nonsegregation by all races is practiced by them. The immigration quota which is so strongly supported by the East and the West is nothing more than one form of national segregation and prejudice. I do not believe the solution of problems comes from sectional name-calling, but I call attention to the immigration question as one of many discriminations merely that we not be isolated in the judgments of peoples as the only section with unsolved prejudices. Many many more could be cited.

I even believe if a court demands correction of social, economic, and racial discrimination, it could and should give a reasonable time to make adjustments. The precedent for this lies in the ruling on the discriminatory freight rate case which gave time for a gradual adjustment. The recent ruling on fire insurance rate making is another example of extension of time for making reasonable adjustment.

This problem that is an accumulated problem of many years needs the enlightened help of the best thinkers of our time. And if this is sympathetically given, sound objectives can be reached reasonably soon.

It is barely possible that with the Negro race reaching a satisfactory economic and

education standard that they themselves would want segregation. It is possible that if they reach these high standards that the white race would not insist upon segregation but when rapid progress is being made on the question of Negro education, it seems a mistake to inject the question of segregation at this time.

It is the responsibility of the people of the State to decide whether they wish to furnish adequate educational facilities with or without segregation. It seems to be the responsibility of the court to allow adequate or not to allow adequate time to accomplish this purpose.

With the Negro college in Pine Bluff furnishing courses in business education, and with the facilities for undergraduate work at the university to capacity, I feel that any Negro student applying for undergraduate work will be rejected and any qualified Negro applying for graduate work will be accepted. This question of course will be discussed at our coming board meeting and from official policy adopted and announced publicly.

Mr. FULBRIGHT. Mr. President, I also ask unanimous consent that following the statement I have just inserted in the RECORD there may be printed an editorial from the Arkansas Gazette of Saturday, January 31, 1948, entitled "The University's Wise Decision."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE UNIVERSITY'S WISE DECISION

The involved issue of admitting Negroes to Arkansas' institutions of higher education has now been raised, and faced squarely by officials of the University of Arkansas. Without impairment of the State's existing social pattern, the university is moving to provide Arkansas Negroes with adequate instruction in fields of graduate study not available to them in other State institutions. At the same time it is insisting that the undergraduate schools remain segregated.

It was an issue that could no longer be avoided. Like the other Southern States, Arkansas has not provided its Negro students with the separate but equal educational facilities required by decisions of the United States Supreme Court. Experience in Missouri, Texas, and now Oklahoma has left no doubt as to the Court's decision if a test case involving the university were brought. The choice was between providing a Negro graduate school at prohibitive cost or giving qualified Negro graduate students access to existing facilities at Fayetteville.

In taking this inevitable step before a court decision forced precipitate action, Arkansas has gained time to make the difficult adjustments it involves. More than that, the university and State officials who supported this action have given concrete evidence of Arkansas' willingness to provide an adequate education for every Negro citizen who can qualify for it, recognizing, as Board Chairman Herbert Thomas said, that "economic and educational opportunities should be the logical goal of any member of any race." The practical result already may be seen in the decision of Wiley A. Branton, the Negro who had applied for admission to the undergraduate school at the university, to withdraw his application and accept admission to the Negro college at Pine Bluff if adequate courses are provided there.

Mr. Thomas, President Lewis Webster Jones, and the other officials concerned have taken the bold and forthright stand demanded by the logic of a situation that was not of their choosing. Their action reflects great credit upon Arkansas. They deserve, and we are confident they will have, the support of all our citizens.

THE PACIFIC FISHERIES CONFERENCE

Mr. MAGNUSON. Mr. President, for a long time the fisheries industries on both the Pacific and the Atlantic coasts have been concerned with the mechanics of handling fisheries matters in the State Department, and have urged a raising of the policy level for the benefit of those interested in fisheries. That culminated in several conferences at which the Senator from Oregon [Mr. MORSE], the Senator from Massachusetts [Mr. SALTONSTALL], and I conferred with the State Department. I ask unanimous consent to have printed in the RECORD a very fine analysis in regard to those conferences with State Department officials.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

THE PACIFIC FISHERIES CONFERENCE

The Pacific Fisheries Conference is an organization composed of representatives of management and labor drawn from the entire industry, and speaking for all segments of the fishing operation from the initial activity of the taking of the fish, through to the final processes of marketing and distribution. The operations of the various units of this group are centered along the Pacific coast of the United States including Alaska. In this matter they are speaking in behalf, not only of their own interests, but in the interest of other extensive fisheries of this Nation which operate off the Atlantic coast, the Gulf of Mexico, and the Great Lakes, and in a spirit of deep concern for the general welfare of our Nation.

FISH—A VALUABLE COMMODITY; FISHERY—AN ESSENTIAL RIGHT

Since time dating back beyond the written history of mankind, the peoples of the world who have had access to the food supplies of the sea have relied upon fish as a major and in many cases a principal factor in their subsistence. A nutritious and well-balanced food supply is a determining factor in human existence. Protein foods are a necessity in any scheme of diet and the fish of the sea offer these protein elements in a combination well adapted for human sustenance. The seas offer an opportunity for the harvesting of a vast food crop which does not need to be replanted, fertilized, or cultivated, a food crop which not only contains the essential proteins but equally important vitamins, minerals, oils, and acids.

The seas are bounteous. Dr. R. A. Gortner, Jr., an expert on protein foods for the National Research Council, states that man-hours spent in fishing produce from 4 to 10 times as many pounds of food as those spent by a farmer in raising hogs which are considered the most efficient of all farm animals in the making of meat. Dr. Kahn, Chief Statistician of the United States Fish and Wildlife Service, reports that the average farmer produces annually 34,500 pounds of food while the efforts of each fisherman yields 47,000 pounds. It should be noted in this connection that the fisherman's production is principally the essential type of protein food containing oils of the high caloric value while much of the farmer's production includes the starchy type of foods which are more available and susceptible to production in all areas.

Today there exists in the world a definite and growing shortage of protein foods. Fishery products constitute the most readily available supply to remedy this shortage. The production of other protein foods such as meat, eggs, dairy products, depend also upon a plentiful supply of other foods. Cattle, sheep, hogs, and poultry must be fed so this supply of protein foods will fluctuate with the available supply of the grains and starches. Fish food, on the other hand, develops through the absorption of the inexhaustible supply of organisms which abound the oceans, and man does not need to take from one element of his subsistence to create another.

With the pressure of increasing populations demanding an ever greater increase in food production, it is certain the race to participate in this harvest from the oceans of the world will increase its tempo and the competition to control these supplies will become more keen.

It is at this point that consideration of the fishery must change from the aspect of commodity to that of a right, for fish are not a commodity until they have been taken.

Certain areas of the seas of the world have been discovered to be more productive than others. These areas from the time of discovery have often been focal points of bitterness and strife in the past, and indeed, well up into modern times. The Japanese-Russian incidents in Kamchatka which involved sinkings and bloodshed, the Japanese invasion of Bristol Bay in 1938 which might have been the match to set off World War II had the issue not been handled firmly and with dispatch, the many minor incidents relative to the North Atlantic fishery, and a constantly increasing series of difficulties encountered in the operation of American fishing boats off the coasts of Mexico, the Central American nations, and the west coast of South America, all indicate that the problem of the "right of fisheries" cannot only become acute and a threat to world peace, but that there is a growing tension because of the lack of any set and established principles of international law regarding the control and administration of such rights as may be claimed on the high seas.

This tension is certain to become heightened as nations recovering from the effect of war begin to expand their fishing activities. The advances in knowledge gained through war operations will hurry this expansion. In other times fishing operations, except those of a few specialized types, were more or less confined to within reasonable distances of the home ports of fishing fleets. Today fishing craft have equipment and fuel capacity to travel thousands of miles and to refrigerate their catch for preservation during long trips This ability to reach out to vast distances will be further increased as the principle of operation with mother ships, large freezer or cannery units, which can accompany the fishing boats, carrying necessary supplies and fuel, and offering an opportunity for disposal of their catches without long round trips between port and the fishing grounds.

Japan, prior to the war, was the greatest fishery nation of the world through early development of this type of operation. Russia today owns a large fleet of refrigerator and cannery mother ships obtained from this country during the war, a fishing asset, by the way, that we do not possess ourselves. Our own fishing interests are seeking to remedy this condition. The initial units of a fleet which can range the entire Pacific are now being readied for service. Norway and other maritime nations are planning similar ventures, and Japan is driving hard to obtain permission to resume her former methods of fishery.

Under these circumstances it is evident that "rights of fishery" can no longer be safeguarded by the limitations of distance. The fisherman of any nation can reach and operate on any fishery that is sufficiently productive to make the venture economically sound.

The international character of the ocean fisheries and the international complications that may well arise from their exploitation is well indicated in the proclamation of September 28, 1945, by the Honorable Harry S. Truman, President of United States. This proclamation, which asserts the rights of the United States to the natural resources of the continental shelf contiguous to the coasts of this Nation and its territories, sets forth certain principles for the conservation and regulation of the fisheries in these areas. They may be expressed in brief as follows:

1. Fisheries, which have been developed by nationals of the United States alone, or which may hereafter be so developed and maintained shall be fully regulated and controlled by the United States.

2. In areas where the nationals of other countries have developed or shall develop such fisheries, zones and regulations may be established by joint agreement between the United States and other states.

3. The United States will recognize the rights of other countries to establish conservation zones off their own coasts where the interests of nationals of the United States are recognized in the same manner in which we recognize the rights of other nationals.

Here is a statement of policy which recognizes the international character of these fishery rights and which clearly anticipates that international complications will arise in the exploitation of these rights.

Unfortunately this proclamation has never been implemented. Other nations of the Western Hemisphere have seized upon the principles embodied in this proclamation and not only implemented but extended them.

The result has been that the operation of American fishing vessels has often been obstructed, and the operators themselves subjected to delays, bans, and difficulties, which could well be cleared up by aggressive action on the part of our Government toward implementing its own fishery policies, and, toward definite correlation of these policies through treaties and agreements with such other nations. Until such action is taken we cannot expect the proper development of the fishery of this Nation nor the certainty that this Nation will retain its rightful share of the high-seas food resources.

OUR FISHING INDUSTRY

This problem should not be considered from the standpoint of the fishing industry and the fortunes of those engaged in it, alone.

We have previously discussed at some length the value of the fishery resources as an adjunct to the national diet. The importance of the possession of the right to take an equitable share of this world food supply, and the facilities, in trained manpower and material, to so capture it, were never more emphasized than during the recent war. Then the Nation's fishing industry was called upon, despite a shortage of manpower and the requisitioning of much of its operating material to expand its production. While other combatants suffered from food shortages and an inadequate diet the people of this Nation never suffered from a lack of a balanced and energy-building food supply. The contributions of our fishing industry did much to maintain this condition during the entire war period.

In addition to this contribution the industry gave thousands of trained seafarers and boat operators to our naval forces, and the fishing fleet itself contributed units of extreme value in the operations of picketing convoy, and supply of advanced stations of the Army and Navy.

It is no secret that high Navy officials are of the opinion, today, that if the extensive fishing operations in the vicinity of the Hawaiian Islands had been carried on by our own nationals instead of the Japanese, the disaster of Pearl Harbor might have been avoided. The fishing fleets of the postwar era include large, fast units with extended cruising ranges and in many instances are equipped with radar and other devices that would render their use as eyes of great importance to those charged with conduct of military operations.

If we are to maintain and expand this industry which provides the Nation with a vital food supply and which can become an effective military arm in case of war it is evidently necessary that our Government must take such steps as may assure and safeguard the rights of our nationals engaged in its operation so that they may survive in competition with the fishery industries of other nations.

CONCLUSIONS

On the basis of the preceding statements the fishing industry urges that this Government take immediate steps toward the activation of the Presidential proclamation of 1945, herein cited, and toward the consummation of treaties, agreements, and/or pacts with other nations claiming rights of fisheries, to the end that the rights of United States citizens engaged in the fishing industry will be clearly safeguarded and defined, and, in order that fishing areas developed and discovered by our nationals be protected and regulated, and the food resource involved conserved, we urge that a strong stand be taken to assure our citizens engaged in this industry equal rights with those of any other nation in fishing operations on high seas.

The industry feels that such steps can be taken, only through the assignment of the duties and responsibilities involved in the handling of these problems to an Assistant Secretary of State who shall be primarily responsible for fishery matters, and whose functions in regard to these responsibilities shall represent the principal part of his duties within the Department. Such an official should be supported by an adequate staff including men with a personal knowledge of the fishery problems. Pressure is developing from many sources at the present time for the promulgation of treaties and agreements which involve fishery problems. The treaty with Japan is a current and very serious problem and fishery factors are vitally involved. The Russian situation in the Pacific is as yet unclarified, and may, at any time, become acute for the great salmon resources of the two countries lie side by side. Problems are arising daily as fishing operations are extended in the North and South Pacific, the Gulf of Mexico, and in the North Atlantic. The industry sincerely believes that action, such as suggested above, must be taken now if the interests of this country are to be safeguarded.

In conclusion, we respectfully ask that such an assignment of fishery matters be made within the Department to the end that the Department official charged with this grave responsibility can meet on an equal level with the high-ranking officials, many of ministerial rank, who have been given such assignments by other governments, who have already realized the importance of this problem.

REPORT OF A COMMITTEE

The following report of a committee was submitted:

By Mr. SALTONSTALL, from the Committee on Armed Services:

S. 1801. A bill to authorize attendance of civilians at schools conducted by the Departments of the Army, Navy, and Air Force, and Joint-Service schools, and for other purposes; with amendments (Rept. No. 883).

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. THOMAS of Utah (for himself and Mr. WAGNER):

S. 2126. A bill to provide a coordinated anti-inflation program; to the Committee on Banking and Currency.

By Mr. LANGER:

S. 2127. A bill relating to the compensation of certain railway postal clerks; to the Committee on Post Office and Civil Service.

By Mr. JOHNSON of Colorado (for himself and Mr. MILLIKIN):

S. 2128. A bill for the relief of Vaso B. Benderach; to the Committee on the Judiciary.

By Mr. BROOKS:

S. 2129. A bill for the relief of Dr. Margaret Hie Ding Lin; to the Committee on the Judiciary.

By Mr. BUTLER:

S. 2130. A bill to authorize the Secretary of Agriculture to pay a bounty for the destruction of crows, and for other purposes; to the Committee on Agriculture and Forestry.

EXTENSION OF RENT CONTROL—AMENDMENT

Mr. JOHNSON of Colorado (for himself and Mr. HOLLAND) submitted an amendment intended to be proposed by them, jointly, to a Senate bill to be reported by the Committee on Banking and Currency providing for the extension of rent control, which was referred to the Committee on Banking and Currency and ordered to be printed.

THE PLACE OF THE UNITED STATES IN WORLD AFFAIRS—ADDRESS BY H. R. CULLEN

[Mr. O'DANIEL asked and obtained leave to have printed in the RECORD an address entitled "The Place of the United States in World Affairs," by H. R. Cullen, in Houston, Tex., January 22, 1948, which appears in the Appendix.]

EMBARGO ON SHIPMENT OF ARMS TO PALESTINE

[Mr. MAGNUSON asked and obtained leave to have printed in the RECORD a letter addressed by him to Secretary Marshall on January 16, 1948, and a reply to him from the State Department, dated January 26, 1948, dealing with the subject of the embargo of arms to Palestine, which appear in the Appendix.]

AMERICA'S OBLIGATIONS IN THE PARTITION OF PALESTINE—ARTICLE BY SENATOR THOMAS OF UTAH

[Mr. THOMAS of Utah asked and obtained leave to have printed in the RECORD an article on the subject, America's Obligations to the United Nations as a Result of the Action Taken in Regard to the Partition of Palestine, prepared by him, and printed in the New York Post on January 31, 1948, which appears in the Appendix.]

SPIRITUAL SURGERY—ADDRESS BY DR. PETER MARSHALL, CHAPLAIN OF THE SENATE

[Mr. ROBERTSON of Virginia asked and obtained leave to have printed in the RECORD an article entitled "Altered Ideas Needed, Says Dr. Marshall," published in the Richmond News Leader of February 3, 1948, being an outline of an address by Dr. Peter Marshall, Chaplain of the Senate, at Richmond, Va., which appears in the Appendix.]

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles, and referred, as indicated:

H. R. 332. An act for the relief of Jacob A. Johnson;

H. R. 350. An act for the relief of Caffey Robertson-Smith, Inc.;

H. R. 380. An act for the relief of Edward L. Barreras;

H. R. 697. An act for the relief of Mrs. Essie N. Fannin, Miss Helen Hicks, Miss Marie Hicks, Miss Frances Fannin, William O. Thompson, and Mrs. W. D. Thompson;

H. R. 1022. An act for the relief of Peter Bednar, Francisca Bednar, Peter Walter Bednar, and William Joseph Bednar;

H. R. 1733. An act for the relief of G. C. Hedrick;

H. R. 1780. An act for the relief of the Cannon Valley Milling Co.;

H. R. 1878. An act to amend the immigration laws to deny admission to the United States of persons who may be coming here for the purpose of engaging in activities which will endanger the public safety of the United States;

H. R. 1915. An act for the relief of Ezra Butler Eddy, Jr., and wife, Marie Claire Lord Eddy;

H. R. 1929. An act for the relief of Edwin Osgood Cogan, his wife, Helen Olga Cogan, and his daughter, Isabel Joan Cogan;

H. R. 2000. An act for the relief of Jeffersonville Flood Control District, Jeffersonville, Ind., a municipal corporation;

H. R. 2214. An act for the relief of Dave Hougardy;

H. R. 2268. An act for the relief of Charles E. Crook and B. L. Fielder;

H. R. 2427. An act for the relief of Jose Cabral Lorenzo;

H. R. 2433. An act for the relief of the legal guardian of Joseph DeSouza, Jr.;

H. R. 2697. An act for the relief of E. W. Eaton Coal Co.;

H. R. 2914. An act for the relief of Hasslet-Ponder Toy Manufacturing Co., Inc.;

H. R. 3089. An act for the relief of Mississippi Central Railroad Co.;

H. R. 3366. An act to amend section 4934 of the Revised Statutes (U. S. C., title 35, sec. 78), as amended, to permit public libraries of the United States to acquire back copies of United States letters patent, and for other purposes;

H. R. 3425. An act for the relief of the Lebanon Woolen Mills, Inc.;

H. R. 3427. An act for the relief of Mrs. Mary H. Overall and Thomas I. Baker;

H. R. 3968. An act for the relief of Olive Irene Milloglav;

H. R. 4400. An act for the relief of Ben Grunstein;

H. R. 4443. An act for the relief of Jacob Cohen; and

H. R. 4838. An act to extend the period of validity of the act to facilitate the admission into the United States of the alien fiancées or fiancés of members of the armed forces of the United States; to the Committee on the Judiciary.

H. R. 3506. An act to provide for the acquisition of a site for a new Federal building in Huntington, W. Va., adjoining existing Federal buildings there, as an economy measure, before land values have increased as a result of improvements;

H. R. 4836. An act to authorize the purchase of a new post-office site at Omaha, Nebr.; and

H. R. 4967. An act to provide for the acquisition of a site and preparation of plans and specifications for a new postal building and for remodeling of the existing main post-office building in Portland, Oreg., and for other purposes; to the Committee on Public Works.

H. R. 4426. An act to provide basic authority for certain functions and activities of the Weather Bureau, and for other purposes; and

H. R. 4427. An act to provide basic authority for the performance of certain functions and activities of the Department of Commerce, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H. R. 4856. An act to delay the liquidation of mineral interests reserved to the United States as required by the Farmers' Home Administration Act of 1946, and for other purposes; to the Committee on Agriculture and Forestry.

PRESERVATION OF THE FRIGATE "CONSTELLATION"

The ACTING PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 1796) to provide for the preservation of the frigate *Constellation* and to authorize the disposition of certain replaced parts of such vessel as souvenirs, and for other purposes, which was to strike out all after the enacting clause and insert:

That the Secretary of the Navy is hereby authorized to repair, equip, and restore the frigate *Constellation*, as far as may be practicable, to her original condition, but not for active service, and to accept and use any donations or contributions which may be offered for the aforesaid purpose.

SEC. 2. The Secretary of the Navy is hereby further authorized to give or to sell, under such regulations as he may prescribe, such parts or pieces, including rigging of the frigate *Constellation*, as are suitable for use as relics, souvenirs, or mementos, and which cannot profitably or advantageously be used in restoring this vessel to original condition, to clubs, associations, or individuals making donations or contributions for the restoration of the frigate *Constellation*. The cost of converting the aforesaid material into relics, souvenirs, or mementos shall be charged against, and the proceeds of such sales shall be added to, the fund created by authority of this act.

Mr. GURNEY. Mr. President, I move that the Senate disagree to the amendment of the House, ask a conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the Acting President pro tempore appointed Mr. SALTONSTALL, Mr. BALDWIN, and Mr. BYRD conferees on the part of the Senate.

COMPENSATION TO VETERANS TRAINING ON THE JOB

The ACTING PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 1393) to increase the permitted rate of allowance and compensation for training on the job under Veterans Regulation No. 1 (a), as amended, which were to strike out all after the enacting clause and insert:

That paragraph 6 of part VIII of Veterans Regulation No. 1 (a) as amended, is hereby amended to read as follows:

"6. While enrolled in and pursuing a course under this part, such person, upon application to the Administrator, shall be paid a subsistence allowance of $65 per month, if without a dependent or dependents, or $90 per month, if he has a dependent or dependents, including regular holidays and leave not exceeding 30 days in a calendar year. Such person attending a course on a part-time basis, and such person receiving compensation for productive labor whether performed as part of their apprentice or other training on the job at institutions, business, or other establishments, or otherwise, shall be entitled to receive such lesser sums, if any, as subsistence or dependence allowances, as may be determined by the Administrator: *Provided*, That in no event shall the rate of such allowance plus the compensation received exceed $250 per month for a veteran without a dependent, or $325 per month for a veteran with one dependent, or $350 for a veteran with two or more dependents: *Provided further*, That only so much of the compensation as is derived from productive labor based on the standard workweek for the particular trade or industry, exclusive of overtime, shall be considered in computing the rate of allowances payable under this paragraph."

SEC. 2. Subsection (b) 2 e of paragraph 11 of part VIII of Veterans Regulation No. 1 (a) is hereby amended, to read as follows:

"e. The job customarily requires a period of training of not less than 3 months and not more than 4 years of full-time training."

And to amend the title so as to read: "An act to raise the ceilings on wages and allowances payable to veterans undergoing training on the job, and for other purposes."

Mr. TAFT. Mr. President, I move that the Senate disagree to the amendments of the House, ask a conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the Acting President pro tempore appointed Mr. TAFT, Mr. BALL, Mr. MORSE, Mr. THOMAS of Utah, and Mr. HILL conferees on the part of the Senate.

THE POLITICAL SITUATION

The ACTING PRESIDENT pro tempore. Under the order entered by the Senate last evening, the Chair recognizes the Senator from Illinois [Mr. LUCAS].

Mr. LUCAS. Mr. President, on Thursday, January 29, the Washington Post carried an Associated Press article under the date line of Durham, N. H. The caption of the item is "Stassen needles Dewey on debate." The article reads:

Harold E. Stassen today announced he is ready to debate with Gov. Thomas E. Dewey on foreign and domestic issues in their campaign for the Republican Presidential nomination anywhere, anytime in the United States.

Stassen's assertion came at a press conference during his tour of New Hampshire campaigning for delegates in the State's first-in-the-Nation primary on March 9.

Asked whether his comment could be considered a challenge to Dewey, Stassen replied:

"I would accept an impartial invitation."

Earlier Stassen had called on Dewey to come out in the open on issues and told a luncheon of Exeter, N. H., businessmen:

"If he remains silent on the issues, that in itself is an issue."

Mr. President, this headline is nothing unusual for Mr. Stassen. He seems to be challenging practically everyone these days, including my distinguished friend,

the senior Senator from Ohio [Mr. TAFT]. But had Mr. Stassen taken a look at the record he would have known that Mr. Dewey has stated his position on a good many issues. In fact, as the Republican candidate for President in 1944, Mr. Dewey made speeches in every section of the country, and placed the issues of that campaign before the people for decision.

When I saw the statement I have just read, I vividly recalled what Governor Dewey said in his acceptance speech in Chicago in 1944, not only on what was one of the most important issues of the campaign, but also as to what might happen in the postwar rehabilitation era.

In view of the fact that Candidate Stassen says that Dewey's silence itself may be an issue in the coming campaign, I think I should inform the former Governor of Minnesota, now one of the Republican candidates for President, what Mr. Dewey said in his acceptance speech about the unemployment problem following the war. This can be found in the book entitled "Republican National Convention of 1944," on page 239. Among many statements Mr. Dewey made in his memorable acceptance speech was the following:

> The present administration has never solved the fundamental problem of jobs and opportunity. It never can solve this problem. It has never even understood what makes a job. It has never been for full production. It has lived in chattering fear of abundance. It has specialized in curtailment and restriction. It has been consistently hostile to and abusive of American business and American industry, although it is in business and industry that most of us make our living. [Applause.]
>
> In all the record of the past 11 years is there anything that suggests the present administration can bring about high-level employment after this war? [Applause and cries of "No," "Certainly not."] Is there any reason to believe that those who have so signally failed in the past can succeed in the future? [Applause and cries of "No," "No."] The problem of jobs will not be easily solved; but it will never be solved at all unless we get a new, progressive administration in Washington—and that means a Republican administration. [Applause and cries of "You bet it does."]

Well, we all know that this prophecy of the Governor of New York, then candidate for President, has utterly failed of fulfillment. Employment is at an all-time high, and profits for business are also at an all-time high.

Mr. IVES. Mr. President——

The ACTING PRESIDENT pro tempore. Does the Senator from Illinois yield to the Senator from New York?

Mr. LUCAS. I am glad to yield.

Mr. IVES. The Senator is now commenting on something in which I am intensely interested, and I wish to point out a few facts to him.

In the first place, I do not think the Governor of the State of New York, in making the statement just quoted, was alone in entertaining the ideas he expressed. Estimates and figures coming out of Washington at that time, in fact, statements from Washington for several years prior to that time, and even afterward, anticipated that in all probability there would be six or seven million unemployed after the war. As a result of that, serious mistakes were made here in the present administration. Had those mistakes not been made we probably would be in a great deal better position today.

Mr. LUCAS. Mr. President, I am not yielding to the Senator for a speech.

Mr. IVES. No; I merely wish to ask a question. Does the Senator maintain that the question of unemployment, which had not been solved when the United States entered World War II, is now solved? The Senator will recall that there were still over 10,000,000 unemployed at that time. The problem had not been solved when we started our war effort in connection with World War II.

Mr. LUCAS. I would reply to my able friend by reiterating what the great governor of New York said. In 1944 we were at war. At that particular time every man in this country who wanted to work was employed. The governor at that time was talking about what was going to happen after the war. His judgment was not good.

Mr. IVES. Mr. President, will the Senator yield?

Mr. LUCAS. Just one moment. The Senator interrogated me on this; allow me to answer. The governor made the prophecy in his speech that following the war the administration would not be able to solve the problem of unemployment. All I am doing is calling the attention of candidate Stassen to that erroneous prophecy in this particular speech made by Governor Dewey back in 1944. Stassen says that Dewey is silent on issues. I maintain that he is not, and I am going to quote, just a little later, from something else the governor recently said about the farm program, which is tremendously interesting to me, and, I think, to the country. All I am doing is defending Dewey here against the charge of Stassen, who says that Dewey is silent on issues. I contend that he is not. I doubt that the junior Senator from New York wants to take a different position; I know he is a good friend of the governor.

Mr. IVES. Mr. President, will the Senator yield?

The ACTING PRESIDENT pro tempore. Does the Senator from Illinois yield to the Senator from New York?

Mr. LUCAS. I yield.

Mr. IVES. Does the Senator deny that that attitude with respect to possible or likely unemployment following World War II was not shared by everyone?

Mr. LUCAS. Oh, no.

Mr. IVES. I know very few people in this country who had any other idea than that, prior to the close of the war.

Mr. LUCAS. I agree with the Senator in that. As a member of the Finance Committee I sat in on the hearings when we had the unemployment-compensation bill before us. Not only the New Dealers, as they are called, but everyone else who came before the committee, including Republicans and experts who represented the big interests of the country, made predictions of that kind.

But that is not the point at all. In other words, the governor said in this speech that only the Republican administration could find jobs for people; that they were the only ones who understood what a job meant. All I am doing is calling attention to the fact that today at this moment, notwithstanding the prophecy made by the distinguished governor from New York, more people are employed than were employed at any other time in history. Those businesses and industries which the so-called New Deal crucified all these years today are making the largest profits received in the history of peacetime operations; in fact, their profits are larger than they were during the war.

Mr. IVES. Mr. President, will the Senator yield?

Mr. LUCAS. I am glad to yield.

Mr. IVES. I merely want to ask if the Senator construes this situation to be the result of the present administration's or the New Dealers' policy?

Mr. LUCAS. I am not going to be drawn into a discussion of another subject.

Mr. IVES. I am just trying to pin this thing down, if I may.

Mr. LUCAS. I am pinning it down on what Mr. Dewey said in 1944, and all I am doing is calling the attention of Mr. Stassen to the speech the Governor of New York made on the question of unemployment. That is all the Senator from Illinois is trying to do. Apparently candidate Stassen does not know what Dewey has said in the past. I want him to become informed about this.

Mr. IVES. The Senator does not claim, does he, that the present administration is responsible for current employment?

Mr. LUCAS. Well, who is responsible if this administration is not?

Mr. IVES. Is the Senator asking me?

Mr. LUCAS. If 10,000,000 people were now unemployed, would not the Senator from New York be quoting Dewey's speech today on the floor of the United States Senate, instead of the Senator from Illinois quoting it, and would the Senator from New York be saying, "Who was responsible for the lack of jobs? What did Dewey tell you in 1944 in his acceptance speech?" On the other hand, if the Republicans were now in power, having been successful in 1944, and their candidate Dewey were in the White House, and all these people were employed, as they are today, does the Senator not think the Republican Party would be taking credit for it, as a result of what Dewey said in this speech, or does he?

Mr. IVES. Is the Senator asking me?

Mr. LUCAS. Yes; I am asking the Senator from New York.

Mr. IVES. Mr. President, if the Senator from Illinois wants me to make the speech and yields to me, that will be all

right; I shall be pleased to discuss the subject.

Mr. LUCAS. The Senator can answer that question "Yes" or "No."

Mr. IVES. The Senator from New York desires to point out, in the first place, that he absolutely denies the present administration is responsible for present economic conditions, insofar as employment is concerned. In all probability, any administration under present conditions could not be held to be responsible in that way. I think that answers the question the Senator has raised.

Mr. LUCAS. I am very glad the Senator takes issue with his mentor, Mr. Dewey.

Mr. IVES. Mr. President, will the Senator yield?

Mr. LUCAS. Just a moment; I am not yielding. When the Senator says that no administration would be responsible for jobs he takes issue with the statement that was made by Dewey in his 1944 speech, because at that time Mr. Dewey, in that acceptance speech, said, in substance, that only the Republican Party, only the Republicans in power, have the courage and the foresight and the vision to find jobs for 60,000,000 people in this country. Now, the Senator from New York says that no administration could accept any praise or glory for full employment. I am very glad that he is so frank in challenging the Governor of New York, who was then the candidate for President.

Mr. IVES. Mr. President, will the Senator yield?

The ACTING PRESIDENT pro tempore. Does the Senator from Illinois yield to the Senator from New York?

Mr. LUCAS. Yes; I yield.

Mr. IVES. I merely want to point out that I am in no way taking issue with the Governor of New York on this question. I merely want to point out, Mr. President, that this job situation, as I have already stated, is due to current conditions, conditions following the war, over which no one has had any control or could have had any control; that the condition in which we find ourselves at the present time, the pitiful state in which we find ourselves, is due largely to the present administration's policy. The situation as to high prices, costs, everything generally, is due to that kind of policy. And I want to point out further——

Mr. LUCAS. Mr. President, I am not yielding for a speech.

Mr. IVES. I am not making a speech.

Mr. LUCAS. Well, not much.

Mr. IVES. Well, just a little one. [Laughter.] I wish to point out further that if this situation continues, much worse conditions than were facing the Governor of the State of New York in 1944 will be on us in this country. Furthermore, and finally, if the Senator wishes to close this discussion, I want to point out that if we are going to avoid such an eventuality, we shall have to have a change in administration and put the Republicans in, no matter who the Republican President may be.

Mr. LUCAS. I thank the Senator for those kind remarks. The able junior Senator from New York today makes the same speech which Dewey made in 1944; namely, that there must be a change of administration in order to have the kind of administration that is needed in Washington. In other words, they say everything is all right, but the Republicans could do it better. Mr. President, I do not know how many more men can be put to work. It is impossible now to find men for all the jobs that are beckoning. But there is one thing certain, the Senator from New York will not deny that Mr. Dewey made this speech from which I quoted, to be found in this book I hold in my hand.

A few days ago I picked up the Washington Star, and under the date line of Albany, N. Y., found another Associated Press article, dealing with Governor Dewey and his philosophy on farm legislation.

The caption is "Dewey tells the farmers to stop expansion as recession protection."

Mr. President, it is apparent to me that Candidate Stassen did not read what Candidate Dewey was telling the farmers in New York on January 22. Candidate Dewey made a very interesting and thought-provoking statement on the farm issue, and I want to talk about it just a little, and call the attention of the Senate, especially the members of the Committee on Agriculture and Forestry of the United States Senate, to how Governor Dewey feels about agriculture.

Mr. O'DANIEL. Mr. President, the Senator gave the date of the speech as January 22. Is that January 22 of the present year?

Mr. LUCAS. Yes; January 22 of this year. The Governor was speaking to an agricultural group in New York, as he proposed some very startling plans for agriculture in his State. I thought it worth while to bring the speech to the attention of the Senate and the country.

According to the news accounts, Governor Dewey began his speech by advising the farmer that his best protection against a possible recession is to pay his debts. That is wonderfully sound advice. That advice is good not only for the farmer but it is good for everyone. I am delighted that the Governor has taken such a strong position against being in debt; that he so boldly affirms his conviction that being in debt is a bad thing. I am glad to be able to agree with him wholeheartedly on this burning issue.

As I understand from the records, the farmers have paid off more mortgages and more of their debts in the last 8 years, under Democratic administrations, than at any other time in all their history. They are better off today as a result of the policies followed by the Democratic administration than at any time in their agricultural career. They have today more cash in the banks, greater credit, more of everything, as a result of an agricultural program proposed, enacted, and administered by a Democratic administration.

Mr. EASTLAND. Mr. President, will the Senator yield?

Mr. LUCAS. I yield.

Mr. EASTLAND. I agree with what the Senator from Illinois has said. As I understand from Governor Dewey's remarks, as quoted by the Senator from Illinois, the farmer is headed for a depression.

Mr. LUCAS. I do not think he said that.

Mr. EASTLAND. That is the meaning of his remarks, is it not—that the farmer is heading for a depression and had better prepare for that depression? Is it not evident that Governor Dewey thought that a Republican might be elected President of the United States, and therefore the farmer had better prepare for a depression?

Mr. LUCAS. The Senator from Mississippi has a point there. In the article Governor Dewey is quoted as having said that, if economic conditions should dictate large Government subsidies, "it seems to be much more logical to subsidize a continued high consumption of full agricultural production rather than pay for crop curtailments."

The Governor is completely right. In that statement he agrees with the Secretary of Agriculture, the President of the United States, and the Democratic Party.

Governor Dewey would have us stimulate consumption of farm products. Somehow that strikes a familiar note, too. I seem to recollect that the Secretary of Agriculture has told committees of Congress again and again that we need a floor under the consumption of farm products. I seem to recollect that we have a school-lunch program and that the Senate, particularly the Democratic Members of the Senate, had to work very hard last year to keep appropriations for the school-lunch program from being cut. I seem to recollect that away back in the thirties we had a food stamp plan and direct distribution of surplus farm products to low-income groups. The Republican House of Representatives apparently does not share Governor Dewey's concern over high consumption of agricultural commodities. We all know that they cut the President's budget request of $75,000,000, for the school-lunch program last year to $45,000,000, and it took the Senate of the United States to restore the amount.

Governor Dewey went on to say that "people need to eat, even if they are in a depression."

Now here is a statement which I do not think anybody has the courage to challenge, not even the distinguished Senator from New York [Mr. IVES]. It has never been proved that people get less hungry as their income shrinks. Everyone knows from the statistics of the Bureau of Labor that the people of the United States under this administration are eating better today per capita than at any time in all the history of the country, and that we now have the highest per capita consumption of food of any nation in all the history of time.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. LUCAS. And yet the able Senator from New York [Mr. IVES] said——

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. LUCAS. That in order to have them eat more you are going to have to change administrations.

The ACTING PRESIDENT pro tempore. Does the Senator from Illinois yield to the Senator from Nebraska?

Mr. LUCAS. I am delighted to yield. Does the Senator desire to interrogate me?

Mr. WHERRY. I should like to ask the Senator a question.

Mr. LUCAS. I shall be glad to yield to my good friend the Senator from Nebraska for that purpose.

Mr. WHERRY. Does the Senator then feel that there is any need for price controls in this country?

Mr. LUCAS. I am not going to go into the question of price controls, but I will say to the Senator——

Mr. WHERRY. Very well.

Mr. LUCAS. Just a moment. The Senator asked me a question, did he not?

Mr. WHERRY. Yes.

Mr. LUCAS. I am absolutely for the 10-point program of the President.

Mr. WHERRY. That includes the price-control program.

Mr. LUCAS. Did I answer the Senator?

Mr. WHERRY. Yes. I appreciate it. Upon the one hand we have the highest living standards that have ever been known in the United States of America, its people are eating more food, are eating more meat, are eating more of all food products. Yet now the Senator is in favor of price controls.

Mr. LUCAS. Only an inflationary whirlwind could make the Senator from Nebraska look in the direction of controls. I know his position.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. LUCAS. Just a moment.

Mr. WHERRY. The question is what the Senator from Illinois thinks about it, not what I think about it.

Mr. LUCAS. I am surprised that my good friend does not observe the rules of the Senate. He is the acting majority leader, yet he keeps interrupting me without securing permission. He is setting an extremely bad example for his colleagues on the other side of the aisle. There are many new Senators on that side of the aisle, many who are not as old in service as the Senator from Nebraska. The Senator should not do such a thing.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. LUCAS. Not now.

Mr. WHERRY. Not now?

The ACTING PRESIDENT pro tempore. Does the Senator from Illinois yield to the Senator from Nebraska?

Mr. LUCAS. Not at this time.

Now I come to the most astonishing statement of all, which I think deserves the most careful attention. This is contained in the AP news dispatch. Candidate Dewey said that "the New Deal policy to meet a collapse is to collapse the farmer." In other words, Dewey wants to leave the impression with the American people that if the Democrats are continued in power the program which has been adopted by a Democratic administration starting back in 1933 will collapse the American farmer. This is completely inconsistent with his other statements.

No, Mr. President, it was not the Democrats who collapsed the American farmer. I need not go far into past history to bring to the attention of everyone in America who it was that collapsed the American farmer back in 1931 and 1932. The American farmer knows who saved him back in 1933 when Franklin D. Roosevelt came into power. The individual who collapsed the American farmer is the same individual who is attempting to collapse the Marshall plan—Herbert Hoover. If it was the New Deal that collapsed the farmer, I submit that it was the most inspired and humanitarian collapse that ever happened to any group of people in this country. Frankly, I do not know how the farmers of New York have made out under the New Deal farm policy, but I have some familiarity with the "collapsed" condition of the Illinois farmer. In spite of his collapsed condition he seems to be doing pretty well for himself and his family. Governor Dewey finds himself in the administration camp completely when he says that production controls should be used by the Government only as a last resort. He is dead right about that. He agrees with the policy of the Democratic Party. Production controls should be adopted only when there is no market anywhere, only when there is no alternative. The Roosevelt recovery program brought bigger markets. Then the war demanded bigger production. That is why there have been no agricultural production controls for the past 6 years on any commodity except tobacco.

The Governor of New York also came out completely for the preservation of the family farm. Somehow it has been my impression that all our agricultural programs since 1933 have been developed with that goal in mind. Again we must give the Governor good marks upon that question.

All this advice to the farmer makes me wonder where the Governor has been for the past several years in his thinking on the farm program. After all, Albany is not so far from Washington. But perhaps we should give up speculating about this subject and welcome the Governor into the fold of those who support the Democratic farm program. He is for it 100 percent on every phase of it he has discussed, and we are glad to have his help in the fight to keep that program going.

Mr. IVES. Mr. President, will the Senator yield?

Mr. LUCAS. I yield.

Mr. IVES. I ask the Senator from Illinois if he is aware that Governor Dewey is himself a farmer. He has a very large farm in Dutchess County, in the State of New York, with approximately 100 head of cattle.

Mr. LUCAS. I have heard about that horny-handed son of the soil.

Mr. IVES. He is doing all right at it, too. He knows what he is talking about when he speaks about farming.

Mr. LUCAS. I am very glad to know that; and the Senator has made a very valuable contribution to the debate. It is apparent that if the Governor is a successful farmer in New York, he has been taking advantage of the New Deal farm program, and I can understand that, as a result of the planks which he has laid down in the memorable speech which he made before the farmers of New York a few days ago.

I suggest that Governor Dewey join us in our battle against our friends on the other side of the Capitol to keep the farm programs intact. They suffered a staggering blow last year at the hands of the House Committee on Appropriations, which tried to cut the school-lunch program, sell the soil-conservation program down the river, abolish the AAA, and cripple the rural-electrification program. It was only the valiant efforts of Democratic Members and some Republican Members in the Senate who were sympathetic toward this farm program that saved it from a terrific defeat last year. The battle is about to begin again, and I am very glad to know that Governor Dewey is with us on the farm program. I hope Harold Stassen finds out about it too.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. LUCAS. I yield for a question.

Mr. WHERRY. Is the Senator for Governor Dewey or Governor Stassen?

Mr. LUCAS. I am for Senator WHERRY. [Laughter.]

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

Mr. LODGE. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the Quebec Chronicle-Telegraph which describes a meeting of Great Lakes shipping operators of both Canada and the United States which concluded in opposition to the St. Lawrence seaway plan.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GREAT LAKES SHIPPING OPERATORS BELIEVE SEAWAY PLAN IS UNSOUND

SEIGNIORY CLUB, QUEBEC, January 23.—Great Lakes shipping operators of both Canada and the United States yesterday denounced the $700,000,000 proposed St. Lawrence seaway plan as "distinctly unsound" economically and for marine navigation.

The operators of the two countries, with their shipmasters, met here in the plush and rustic surroundings of the log chateau of the Seigniory Club. For 2 hours they held open panel discussion on the projected seaway; and at its close, George R. Donovan, of Toronto, chairman of the meeting, declared "the whole thing is unsound."

The occasion was the annual joint meeting of the United States Lake Carriers Association and the Dominion Marine Association of Canada. Ship masters said during the discussion they would have great difficulty operating their flat-bottomed lake vessels in the cross-currents of the St. Lawrence River. They said also that oceangoing freighters would have equal difficulties navigating their vessels on the Great Lakes.

ONE BILLION

The seaway project, with costs officially estimated at $700,000,000 but which might run as high as $1,000,000,000 in the view of delegates, is to be given further congressional study in Washington shortly.

L. C. Sabin, of Cleveland, an official of the United States association, estimated the cost of carrying the operating expenses and the initial investment over a 100-year period at 5.5 percent. Donovan, secretary of the Canadian association, said he hesitated to agree to such a financial burden without a clear indication of what future traffic over the route might be.

Sabin estimated maximum traffic at 25,000,000 tons, and Donovan said peak traffic during the war years was 9,000,000 tons. To meet the great cost of the project, present lake freight rates of approximately $1.25 per ton would have to be considerably increased, resulting in increases in rail and truck rates, Donovan said.

"The whole thing is unsound," he said. "We should have a new survey to find out what our ultimate cost will be, and to determine what future traffic might be.

Mr. McCARTHY. Mr. President, first I should like to compliment the chairman of the Committee on the Judiciary, the senior Senator from Wisconsin [Mr. WILEY], for doing what I think is an outstanding job of documenting and bringing before the Senate an intelligible and detailed picture of the pending measure.

Mr. President, there are a great many excellent reasons both in favor of and against the St. Lawrence seaway. We have heard practically all of them up to this time. However, there is one overpowering reason for building the seaway. It alone should far outweigh all the objections put together. That reason is national security.

Though the factors are complex they boil down to one thing; we live or die as a nation depending on our ability to produce—for peace or for war.

To produce for peace or war we must have raw materials, and we must be able to move them efficiently and cheaply and surely to the spots where they can be utilized. The greatest and most indispensable of the raw materials is iron ore. We cannot prosper in peace or succeed in war without vast quantities of steel. We cannot build houses without nails or autos without steel sheets—two of our biggest headaches in these days of peace. Of course, we cannot fight a war without steel—great quantities of it, as we know from recent experience. Our national security, economic and military, is tied to our supply of iron ore.

It may be said that we have hundreds of millions, perhaps billions, of tons of iron ore in the ranges of the Lake Superior region. Have we? Let us see. Anyone who thinks so is in for a rude shock, because of the real significance of the situation as it is fast developing.

We now take around 85,000,000 net tons of ore out of Lake Superior yearly, about 85 percent of all the iron ore used in our furnaces. It is too well known to repeat here that the quantity of pig iron and of steel ingots now being produced is inadequate to meet the demands of home industry for steel, not to mention the insistent demands of export trade.

At the present rate of ore consumption, the reported reserves of high-grade ores in the open pit and deep mines of Minnesota, Michigan, and Wisconsin, will last only from 10 to 20 years. The best estimates available are not reassuring. One company, United States Steel, owns or controls more than 50 percent of the reserves in the Mesabi Range. Other steel producers who depend on Lake Superior ore may begin to feel the pinch in a very few years; some apparently are feeling it now.

A shortage of iron ore at this time—or at any time—is an unthinkable condition in this country. Even if our reserves of high-grade ore should be good for 20 or 30 years, two or three times some of the present conservative estimates, we would still be in a very bad way.

It is a serious understatement to say that our national security is threatened by the iron ore supply situation; it is gravely threatened, and it is vitally necessary for us in Congress to look beyond the ends of our noses and take such steps as will assure the safety of our country. We simply cannot afford to look at this matter from any point of view other than that of the needs of the country as a whole. Neither can we delay in taking whatever action may be necessary to protect the country. What can we do? Mr. President, we have the best answer right here in Senate Joint Resolution 111. If this resolution is adopted it would mean that the world reserves of high-grade iron ores would be available for our steel mills at their present locations. The ores from Labrador, for example, said to be as rich as or richer than our own best ores, could be transported on the St. Lawrence waterway to the same lake ports that now depend on Mesabi ore, a rapidly vanishing source of supply.

If we do not do this we may have to move our steel mills to the Atlantic seaboard to utilize foreign ores, or face a very sizable increase in the cost of steel.

Of course, there are other alternatives. There are said to be vast reserves of low-grade iron ore in the Lake Superior region. This is unquestionably true. They can be concentrated to an iron content that the furnaces can use and that existing lake transport can carry. But that solution is not as simple as it sounds. In the first place, the bulk of the low-grade Superior ores are of an exceedingly hard rock called taconite. That ore cannot be mined by the low-cost power-shovel method used to extract the high-grade ores; it must be blasted out. Since less than one-third of the rock is iron, the whole mass must be concentrated through elaborate and costly processing, which is called by the experts beneficiation, until the product shipped to the furnaces contains almost two-thirds pure iron. It takes nearly three tons of taconite to make a ton of shipping ore. It must be obvious that the ore is going to cost more than the direct-shipping ores now scooped out of the pits by power shovels, loaded directly into cars, and then dumped into boats.

But that is not all. Vast plants and corresponding expenditures will be necessary for the beneficiation of the taconite, and none have yet been built, except on a laboratory scale, so no one is yet sure that the processes are commercially practicable. The first large plant is one now being built by Oglebay Norton & Co., which is to have an initial capacity of 2,500,000 tons yearly. It may be ready 5 years from now. The estimated cost of the plant is $42,500,000, $15 per ton of yearly output.

If we have to replace by taconite all of the Lake Superior direct shipping and easily treated ores, as it seems we must do some day, the investment in treating plants will be staggering. We consumed nearly 97,000,000 net tons of Lake Superior ore in 1943, the peak of war production, and in 1947 more than 86,000,000 net tons were shipped down the Lakes. According to reports, we may run short of ore before the Great Lakes open this spring.

It looks as though we may need a yearly output of at least 90,000,000 tons of taconite concentrates some day if we continue to depend on Great Lakes ore. The plants to beneficiate 90,000,000 tons would cost around $1,400,000,000 and, of course, the operating costs would be high, so our steel costs will go up, adding that much to the cost of living.

The present investment in iron and steel producing facilities is probably around $4,700,000,000. To utilize taconite ore reserves it appears that the industry would have to add 30 percent to its investment without adding a ton to plant capacity, which now appears to be inadequate to meet the demand for steel and iron.

It is no wonder that those well informed on the situation, be they hardheaded practical men of affairs such as C. M. White, president of Republic Steel Corp., and Cyrus S. Eaton, a director of Cleveland-Cliffs Iron Co., and chairman of the board of Portsmouth Steel Corp. and Steel Rock Iron Mines, Ltd., or economists such as Marvin Barloon, professor of business and economics at Western Reserve in Cleveland, in the heart of the valley of steel, are alarmed at the iron-ore situation.

Mr. President, instead of quoting from them I ask unanimous consent that the quotations from both Mr. White and Mr. Eaton be made a part of the RECORD at this point in my remarks.

There being no objection, the matters were ordered to be printed in the RECORD, as follows:

Mr. White said in an address delivered before the American Institute of Mining and Metallurgical Engineers, March 17, 1947, that—

"FUTURE OF OUR STEEL PLANTS

"The prosperity of the United States is based upon a plentiful supply of high-grade, cheap furnace feed, convenient to ample reserves of coking coal and both near markets for the finished product—steel.

"When any one of these three factors gets out of balance, our economy will suffer. It is because of this fact that the iron-ore situation in the Lake Superior region is of paramount importance not only to the great industrial centers in the lower Lakes region, but to the Nation and to the world as a whole.

"Should the ore production of the Lake Superior region be seriously decreased, and if abundant ores from elsewhere were not made available in the lower Lakes area, it would mean that much of our steel industry eventually would be forced to migrate to the eastern seaboard—and perhaps to the Gulf to utilize sea-borne imported ores. There would be nothing to attract any appreciable percentages of the steel industry westward from the Lakes. Such a migration to the seaboard would effect vast changes, of far-reaching consequences, not only in what we now regard as the 'industrial heart of America' but in the entire Nation and its economy. There is, of course, the possibility that the recent discoveries in the Labrador Peninsula ultimately may reveal very large reserves which might provide ore for the Lakes furnaces as well as to the eastern seaboard. But regardless of that possibility, within relatively few years, the Lake-based steel industry must begin to equip itself with plants capable of concentrating low-grade ores—either in the Lake Superior or the eastern district, or in both districts—into material usable in its furnaces. Otherwise it must resign itself to a declining steel production when the Lake ore supply begins to be insufficient and elect to watch its present plants gradually become of secondary importance as they yield to expansion of plants elsewhere in this country.

"Whether the decline in production from commercial reserves becomes material in 5 or 10 years, or not until later, the period is too short to permit a passive course."

Cyrus S. Eaton is quoted in the Iron Age, January 1, 1947, as saying:

"Most steel-company management is reluctant to admit it, but steel capacity must be increased. The crying need is not for more finishing facilities, but for additional blast furnaces, to produce pig iron both for open-hearth and foundry use. When the necessity for more pig iron is, as it will have to be, finally conceded, a sharp and not presently contemplated shortage of iron ore will promptly rear its ugly head.

"I say 'ugly' because it takes time to bring now open-pit iron-ore mines into production; it takes still more time for underground mines, and nobody knows how long (not to mention how much money) it will take to arrive at satisfactory methods of beneficiating taconites and jaspers.

"Moreover, you cannot open mines if you do not have ore. Two or three steel companies are well-heeled with fairly high-grade reserves, but the other blast-furnace operators of the United States and Canada, in steel companies and outside, are shockingly short of good and readily accessible iron ore. In fact, some companies whose annual consumption is high do not have more than a hatful of iron ore. There is no use counting on ore geographically so remote as not to be available this generation. Beneficiation of taconites and jaspers, with whatever speed it comes, is also a long way off.

"Blast-furnace operators had therefore better begin taking their future supplies of iron ore with the utmost seriousness. Just because they have always been able to buy all the ore they wanted they cannot afford to assume that this will continue to be the case forever. If they do they are destined for a rude awakening."

Mr. McCARTHY. Mr. President, Marvin Barloon, in Harpers, August 1947, was even more pessimistic. His article is well worth reading and pondering. He feels that steel from taconite will add nearly $5 per family per year to the cost of our steel, and that sooner or later our steel industry must pick up, bag and baggage, and move to the Atlantic and Gulf coasts in what he calls The Great Retreat and thenceforward use foreign ores.

Do all of us fully realize what this means? Over 70 percent of the capacity of the blast furnaces and steel mills of the Nation is located in the area between Pittsburgh and Chicago. These plants are almost wholly dependent on Lake Superior ore. The plants that finish and use the steel and iron are also preponderantly located in that area.

Certainly we cannot believe that a shift in the location of 70 percent of the producing capacity of the steel industry can be made without almost cataclysmic effects on our economy. Yet Mr. Barloon and the other economists are not alone in their fear. Mr. White and Mr. Eaton, the hard-headed, practical businessmen, warn us of this eventuality in serious and measured tones.

The steel producers and even some of the railroad men—and I emphasize particularly that this is the position of some of the railroad men—will admit that unless we enact the St. Lawrence seaway legislation and place the seaway in operation there will be ghost steel towns throughout the Middle West.

Mr. OVERTON. Mr. President, will the Senator yield to me?

Mr. McCARTHY. Mr. President, if the Senator will permit, I prefer to finish my statement; and then I shall be glad to yield for any and all questions which Senators may wish to ask me.

Mr. President, is there any way out except by the costly and uncertain development of taconite beneficiation or the extremely costly moving of the industry to the seaboard where it could use foreign ores?

Yes; there is obviously one really good solution of the problem. It lies in the approval of Senate Joint Resolution 111, which now is before us, and the completion of the St. Lawrence seaway.

Labrador, we are told, has all the iron ore we shall need for many, many generations. Apparently there is no question about that. It can be utilized either by moving some $3,000,000,000 worth of iron-making and steel-making capacity to the seaboard, thus upsetting the economy of Pennsylvania, Ohio, West Virginia, Indiana, Illinois, Wisconsin, and heaven only knows how many other States that are geared to steel supply from the Pittsburgh-Great Lakes area, or by moving the iron ore to the present producing centers. There is just one way to move that Labrador ore at costs comparable with those now prevailing from the Lake Superior area. It is through the development of the St. Lawrence seaway. So we have two possible choices: Either move our present $3,000,000,000 steel-making industry from the Middle West to the east coast or else complete the St. Lawrence seaway. I think the question provides its own answer.

Labrador is, of course, not the sole possible source of supply of foreign ores. Brazil, the Orinoco Basin of Venezuela, and other parts of the world are potential sources of supply of high-grade iron ores. Labrador, however, now appears to be the best bet from all points of view—richness, quantity, cost, and security of shipment in times of war.

Undoubtedly, Mr. President, the experiments and developments now under way to process taconite should go forward. That is the last ace in the hole from the standpoint of security; but we cannot depend on that alone, for the taconite does not appear to provide the answer to our need for an adequate supply of low-cost iron ore for competitive operations or for the normal functioning of our peacetime economy.

What I have said constitutes the vital and, I believe, unassailable reason for proceeding at once with the authorization for and the development of the St. Lawrence waterway.

Other factors also are almost, if not quite, on a par with the basic reason for the development. The principal one is national security.

Let us take cost, for example: The St. Lawrence waterway is estimated to cost around $700,000,000, but this project will be self-liquidating. Replacement of present iron ores by taconite may cost twice that amount, and conservative estimates seem to indicate that cost to be $1,225,000,000, or nearly twice the cost of the St. Lawrence seaway. That would be the initial capital outlay, and it would lay a fixed charge, for interest and depreciation alone, of millions of dollars yearly on the buyers of iron and steel, not to mention the operating costs for processing the ore. The operating costs alone probably would be greater than the differential between moving Labrador ore to Buffalo, Cleveland, Detroit, and Chicago, and present costs for moving ore from the head of the Lakes to those steel-making cities.

Let us suppose—a horrible supposition—that the steel plants were to move to the Atlantic seaboard, leaving behind the ghost towns of Pittsburgh, Cleveland, and the like. What would it cost to move the necessary coal and coke to the seaboard? How many thousands of coal cars, double-track lines, and so forth, would have to be constructed? Our present difficulties in obtaining cars would sound like a paradise in transportation, in comparison.

Another factor in favor of the St. Lawrence development is the large amount

of electrical energy which would be developed from the inexhaustible source of falling water, thus prolonging the life of our reserve supplies of fuel. I refer particularly to oil. Certainly we need more electric power capacity now, not 5, 10, or 15 years from now; and the St. Lawrence seaway constitutes the best and most desirable means of obtaining additional power.

Mr. President, why should anyone oppose the development of the St. Lawrence seaway? I am frank to say that equally intelligent and equally honest men take different sides on this question. The principal argument seems to be that it would affect the prosperity of Atlantic ports, through the diversion of grain shipments. However, if we check on the available statistics, I believe we find that practically no port ever made much through transfers of bulk cargoes, such as wheat, corn, cotton, and so forth.

Mr. YOUNG. Mr. President, will the Senator yield to me?

Mr. McCARTHY. I ask the Senator to permit me to continue for 1 minute longer, and then I shall yield for any questions Senators may wish to ask.

Mr. President, I have just said that it is my opinion that practically no port has ever made very much money through the transfers of bulk cargoes, such as wheat, corn, cotton, and so forth. In my opinion that is what we find when we check up on what has happened over the past 30 years in ports which have been outstanding in such movements, but which did not have other great and better sources of income.

Some persons say, perhaps under their breath, that completion of the St. Lawrence seaway would adversely affect the railroads. What railroads would thus be affected, Mr. President? And would completion of the St. Lawrence seaway really hurt them? Certainly it would not, if the lessons to be gained from history offer any criteria. The prosperity of the Northeastern States would be greatly increased by the waterway, and the rail lines would be one of the principal beneficiaries of this great development, which would add so much to the prosperity of the entire Northwest and Middle West.

Other persons say, again under their breath, that completion of the St. Lawrence seaway will hurt the electric-utility companies. However, Mr. President, they can scarcely take the business now offered to them, or adequately serve those on their lines, without making important capital additions. An important present national bottleneck is our power supply. The 1947 peak load was handled, according to the industry's own statements, through the goodness of industries in curtailing their demands at peak-load hours during December. That does not sound like much excess capacity to sell to new or growing industries.

Mr. President, the valid arguments against the St. Lawrence seaway are few, if any; and in any case they are local, and are far outweighed by the benefits it would bring to the country as a whole. It would add immeasurably to our national security, and certainly that is the best reason of all for the prompt enactment of Senate Joint Resolution 111, and for speed in carrying out the project.

Mr. President, I am glad to yield now to the distinguished senior Senator from Louisiana [Mr. OVERTON].

Mr. OVERTON. Mr. President, I make the point that the record thus far indisputably shows that the depth of harbors in the Great Lakes is very shallow in comparison with harbors on the Atlantic seaboard and other coastal areas. There is only one harbor on the Great Lakes that has a depth equal to 27 feet, and it is a private harbor at Gary, Ind. For instance, in the Senator's own State, the city of Milwaukee has a harbor with a depth of 21 feet, Ashland, a harbor with a depth of 25 feet. They have an average depth of about 23 feet. The argument is made that the 27-foot channel which is to be constructed down the St. Lawrence will permit the movement of vessels with a draft of 24 feet. A vessel with a draft of 24 feet requires a depth of 27 feet. The question I wanted to ask the able Senator was, How are the ports on the Great Lakes, with their shallow harbors, to have the advantage of entry of the ships of deeper draft which are supposed to pass up the St. Lawrence River?

Mr. McCARTHY. I shall be glad to answer the question. I will say for the benefit of the Senator from Louisiana that I think that point was covered very thoroughly by the senior Senator from Wisconsin in his extended debate. He pointed out at that time that the Army engineers had estimated that those harbors could be repaired and made accessible to boats using the 27-foot channel, by a total expenditure of $14,000,000. Just so that we may have this clear in the RECORD, that would take care of the harbors in Duluth, Superior, Milwaukee, Chicago, Muskegon, Bay City, Detroit, Toledo, Cleveland, Buffalo, and Oswego. I should like to point out to the Senator, in connection with that—and I wonder if he has given this a great deal of thought—that practically all our steel industry in the Middle West, or at least about 85 percent of it, is located between Chicago and Pittsburgh, and is supplied by the lake ore. Those ores are being rapidly exhausted, and unless some way can be found of getting richer ores to the steel mills, there will be nothing but ghost towns throughout the Middle West.

I frankly cannot conceive how that will help the railroads or anyone else. I think that the large rail lines which are spending so much time and energy fighting the St. Lawrence seaway are not looking at this matter from the long-range standpoint. They simply are not looking beyond their noses. If they were, they would realize that if the Middle West is robbed of this industry, which is bound to happen unless the rich ore is made available, ultimately it will mean the bankruptcy of the railroads; it will not be to their benefit.

Mr. OVERTON. Assuming that the cost of deepening the harbors, as shown by the list I inserted in the RECORD the other day, would not exceed $15,000,000, who is to contribute the $15,000,000?

Mr. McCARTHY. Let me point out to the Senator that without any deepening of the harbors, and as they are today, there was shipped a total gross tonnage of 314,000,000 tons. If Labrador ore is made available by the opening up of the St. Lawrence seaway, and without one penny being spent on the harbors, certainly the tonnage can be increased above 314,000,000 tons.

Mr. OVERTON. What need is there of deepening the St. Lawrence channel, unless it be to increase the commerce on the Great Lakes?

Mr. McCARTHY. Let me be certain that the Senator understands me. As I pointed out, in the last year those harbors accommodated 314,000,000 tons of ore. Someday that ore may not be available. Someday that 314,000,000 tons of ore must be obtained from another source. That may be within 10, 15, or 20 years. If those harbors are able to accommodate 314,000,000 tons of lake traffic today, they certainly can accommodate 314,000,000 tons of traffic coming through the St. Lawrence waterway. Am I right about that?

Mr. OVERTON. On the other hand, the American merchant marine takes the position that they cannot use the 27-foot channel, so the American merchant marine is not sending any vessels into the Great Lakes, according to the uncontradicted statements of owners of ships operating under the American flag, which statements are to be found in the record. Is that not correct?

Mr. McCARTHY. Let me at this point correct a statement I made. I said that 314,000,000 tons of ore was shipped into the Great Lakes ports. It is 314,000,000 tons of total shipping. The ore, I believe, runs somewhat over 100,000,000 tons.

Mr. OVERTON. How about American ships using the 27-foot channel? There have been published in the RECORD letters from 31 of the owners of ships under the American flag, in which they state they will not use the 27-foot channel. What vessels would use it?

Mr. McCARTHY. I frankly do not have any idea at this time which companies feel they will not use the channel, and which ones feel that they will use it. All we know is, the channel will be available, and it is only logical and sensible to assume that if the channel is available, the ore is needed, and therefore the channel will be used. Certainly it is impossible to foresee what any particular company will do.

Mr. OVERTON. It cannot be used by any of them, because all have vessels of deeper draft than 24 feet; therefore it cannot be used. As the situation now stands, advantage cannot be taken of the 27-foot channel in the Great Lakes, on account of the shallowness of the harbors. That will have to be corrected in some way. American bottoms cannot be used on the channel, because it will not be deep enough. It presents a very difficult problem. It looks to me what is to

be spent would be a useless expenditure of public funds.

Mr. McCARTHY. If I may answer the Senator's first question, I believe the Senator does not have in mind clearly all the facts, including the latest figures. I have before me figures compiled by the Research Division of the United States Maritime Commission, dated January 29, 1948. These figures are to the effect that of a total of 4,500 freighters, 47.9 percent have a 25-foot draft or less; of combination passenger and freight vessels, 63.6 percent have a draft of 25 feet or less; tankers, 22 percent, and so forth. So there are great numbers of freighters and tankers having a draft of less than 27 feet.

Mr. OVERTON. I thank the Senator for yielding.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. AIKEN. I think this is an appropriate time to point out for the RECORD that the cost of deepening all the major harbors on the Great Lakes would be only a fraction of the cost of providing a deep-sea channel to the port of New Orleans, which the Senator from Louisiana has so earnestly advocated. If I remember correctly, the cost would be $14,000,000, for all the harbors on the Great Lakes, against something like $150,000,000 for deepening the channel to the one port in which the Senator from Louisiana is so very much interested.

Mr. McCARTHY. I thank the Senator from Vermont. I think he makes an excellent point.

Mr. YOUNG. Mr. President, will the Senator from Wisconsin yield?

Mr. McCARTHY. I yield.

Mr. YOUNG. I am sure the able Senator from Wisconsin will agree with me that one of the major issues before the Congress now is that of rising costs of living. I wish at this time to commend the Senator from Wisconsin for his work on this problem during the recess, at which time he held Nation-wide hearings in connection with the greatly increased costs of building construction. I find in connection with foods that oftentimes, especially now, poultry is selling for about double the price in Washington that the farmer receives in my State. That is true of eggs, poultry, and of other farm commodities.

The cost of shipping wheat at the present time ranges from 30 cents to 40 cents per bushel. That is a tremendous cost when we realize that sometimes wheat has sold for less than 30 cents a bushel on the farm. It should be of major concern to the consumers of the Nation to lower the spread in price between the producers and the consumers.

My understanding, from the figures I have obtained from the Department of Commerce and the Maritime Commission, is that the St. Lawrence seaway would reduce the cost of shipping wheat from my State, which incidentally is the second largest wheat-producing State, to the east coast for export or use in the Eastern States by about 6 cents a bushel. If my State exported 25,000,000 bushels of our crop this year of 169,000,000 bushels, that would be a saving to the consumers and farmers of North Dakota of approximately one and one-half million dollars. I believe that one of the problems of the United States, the lowering of the cost of living, can only be solved by lowering the cost of distribution between the producers and the consumers. This is one way in which it can be done.

Mr. McCARTHY. Mr. President, I certainly wholeheartedly agree with the Senator from North Dakota. I think if we would only give this matter a little more thought we would realize that the proposed seaway would not merely be of tremendous benefit to the Middle West, but that if we can create a greater degree of prosperity in the Middle West that will be of untold benefit to the country as a whole.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. WILEY. I desire to compliment my colleague from Wisconsin on the very fine and convincing statement he has made. I desire to comment simply on two matters. I want to add to what the distinguished Senator from North Dakota has said. There is in the RECORD a statement that Canada, herself, will consume not over 100,000,000 bushels of wheat, and that in one season she exported out of Montreal 184,000,000 bushels. The greatest grain expert in the world, Mr. Barnes, of Duluth, whose energy and foresight are acknowledged in the Middle West and in New York, has stated that with the condition the world is in it would not be out of the question for Canada to raise one-half billion bushels of wheat, and to export 400,000,000 bushels. We are planning on exporting one-half billion bushels of wheat this year.

If Canada were to export 400,000,000 bushels, and save on transportation 6 cents a bushel, it can be seen what a saving there would be to the Canadian farmer. But more than that. We can see a further reason for building the canal. Right now the wheat that comes down the Lakes, when it arrives at the entry into the St. Lawrence goes into the little 9-foot or 14-foot canal. It must be unloaded into canal boats. That is extremely expensive. Then when it gets to Montreal it must be unloaded again. I ask how much better would it not be if the St. Lawrence seaway were in existence, so that there could be a saving of 6 cents a bushel on 400,000,000 bushels exported by Canada? That would make a great deal of difference to Canada and to the Canadian farmer.

But more than that, Mr. President, there is the question of tolls. A considerable amount of money would come in by way of tolls. As was brought out by my distinguished colleague, all the ports on our lakes can handle a total of 314,000,000 tons. Think of that, Mr. President! It is three-quarters of the tonnage handled on the Pacific coast, the Atlantic coast, and the Gulf coast put together. Think of the potentialities of the picture.

I wish to comment on one other matter which my distinguished colleague has brought out. Repeated charges have been made on the floor to the effect that an insufficient percentage of the shipping of the United States and of the world could utilize the St. Lawrence seaway, if it were built. The figure 9 percent has been used as the total amount of United States shipping that could use the seaway. Any lawyer knows he must get the facts before he can arrive at his conclusions. I am going to give facts which will astonish Members of the Senate, and will totally contradict the statement respecting the 9-percent figure. Such a figure is, of course, absurd and is not confirmed in any way, shape, or form by the United States Maritime Commission.

I might ask the opponents of the seaway just how it could be that if only such a small percentage of United States shipping could use the seaway, the project as a whole would be endorsed by the greatest authorities in the United States, including every past American President since the birth of the project, including the Corps of Engineers, the Maritime Commission itself, the Department of Commerce, and so forth.

I might also point out once again this amazing contradiction: On the one hand, opponents of the seaway base their argument on the fact that the seaway could not possibly be used by any large amount of shipping; on the other hand, they base their argument on the fact that so much shipping will go through the seaway, that traffic will be diverted from existing ports. This contradiction speaks for itself.

However, there is an even more direct answer to the charges which I have cited.

My colleague the distinguished senior Senator from Vermont [Mr. AIKEN] has introduced into the RECORD, as have I, testimony from the Maritime Commission as presented in 1946, confirming that a large amount of shipping could use the seaway.

However, in order that we might have the most up-to-date statistics on this subject, I asked the Maritime Commission to prepare totally new data. Its Research Division compiled, as of January 29, 1948, a report on the number of United States flag and world merchant ships that could use the seaway project. This report shows, for example, that 73 percent of the United States flag fleet total are vessels of 27-foot draft or less and could, therefore, use the seaway. One hundred percent of United States flag Libertys and 100 percent of United States flag Victorys are included in this category. Sixty-two percent of our combination passenger and freight ships and 65 percent of United States freighters, excluding Libertys and Victorys, could use the seaway.

Mr. LODGE. Mr. President, will the Senator yield?

Mr. WILEY. I shall be glad to yield to the Senator from Massachusetts in a moment.

Mr. President, I ask unanimous consent that there be printed in the RECORD at this point a table submitted to me on

January 29 by Chairman W. W. Smith, of the United States Maritime Commission, citing these shipping figures.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

United States flag and world seagoing merchant fleet as of June 30, 1947, vessels of 1,000 gross tons each and over with maximum loaded draft of 27 feet or less including United States flag Liberty and Victory vessels with drafts of 27 feet 9½ inches and 28 feet 6¾ inches, respectively

Vessel type	Grand total, all vessels		Vessels of 27-foot draft or less, and United States flag Libertys and Victorys			
			Vessels		Gross tons	
	Number	Gross tons	Number	Percent of grand total	Tons	Percent of grand total
		Millions			*Millions*	
World fleet, total	12,370	70.42	9,587	77.5	45.09	64.0
Freighters (excluding United States Libertys and Victorys)	7,314	33.22	5,921	81.0	22.56	67.9
United States flag Libertys	1,714	12.31	1,714	100.0	12.31	100.0
United States flag Victorys	358	2.73	358	100.0	2.73	100.0
Combination passenger and freight	1,015	7.13	786	77.4	3.57	50.1
Tankers	1,969	15.03	808	41.0	3.92	26.1
United States-flag fleet, total [1]	4,202	30.90	3,072	73.1	20.50	66.3
Freighters (excluding United States Libertys and Victorys)	1,221	7.60	799	65.4	4.34	57.1
United States flag Libertys	1,714	12.31	1,714	100.0	12.31	100.1
United States flag Victorys	358	2.73	358	100.0	2.73	100.1
Combination passenger and freight	108	1.11	67	62.0	.54	48.6
Tankers	801	7.15	134	16.7	.58	8.1

[1] Includes 272 USMC-owned vessels aggregating 1,809,000 gross tons transferred to foreign flags under lend-lease or other agreements and remaining under foreign registries as of June 30, 1947, by subsequent arrangement.

Source: U. S. Maritime Commission, Research Division.

Mr. WILEY. Mr. President, in answer to the interpolation by the distinguished Senator from Massachusetts, I am going to tell him that I have three exhibits which are of tremendous significance. They were referred to by my distinguished colleague from Wisconsin.

Mr. LODGE. Mr. President, will the Senator yield?

Mr. WILEY. Let me finish the sentence, and then I shall be happy to yield.

Mr. McCARTHY. Mr. President, at this time I shall yield the floor. I have an appointment, and I am obliged to leave the floor.

Mr. WILEY. Mr. President, I ask that another table dealing with the United States flag and world seagoing merchant fleets as of June 30, 1947, be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

United States flag and world seagoing merchant fleet as of June 30, 1947, vessels of 1,000 gross tons each and over with maximum loaded draft of 25 feet or less

Vessel type	Grand total, all vessels		Vessels of 25-foot draft or less			
			Vessels		Gross tons	
	Number	Gross tons	Number	Percent of grand total	Tons	Percent of grand total
		Millions			*Millions*	
World fleet, total	12,370	70.42	5,579	45.1	16.97	24.1
Freighters	9,386	48.26	4,500	47.9	13.33	27.6
Combination passenger and freight	1,015	7.13	646	63.6	2.34	32.8
Tankers	1,969	15.03	433	22.0	1.30	8.6
United States flag fleet, total [1]	4,202	30.90	637	15.2	2.95	9.5
Freighters	3,293	22.64	518	15.7	2.47	10.9
Combination passenger and freight	108	1.11	42	38.9	.28	25.2
Tankers	801	7.15	77	9.6	.20	2.8

Source: U. S. Maritime Commission, Research Division.

Mr. LODGE. Mr. President, I understand the Senator from New York [Mr. IVES] has the floor. Will he yield to me so I may ask the Senator from Wisconsin whether the figures he cites are cited on the basis that the ships would be fully loaded?

Mr. WILEY. No; they are not.

Mr. LODGE. There you are. That completely knocks the bottom out of all those figures.

Mr. WILEY. Of course the distinguished Senator has the faculty of not waiting until someone answers his question. If he will listen with his fine mind, which I am sure is not always perverted, I am sure that he will see that he is totally wrong. Now get this. The United States flag and world seagoing merchant shipping as of June 30, 1947, vessels of 1,000 gross tons each and over with a maximum loaded draft of 25 feet or less—I am reading from the second table I placed in the RECORD—amounts to a grand total of 12,370 vessels. There are 9,386 freighters. There are 1,015 combination passenger and freight vessels. There are 1,968 tankers. There is a United States flag fleet total of 4,209. The total of the world fleet is 12,370.

The percentages of the grand total of the world fleet are as follows: Freighters, 47.9 percent. Combination passenger and freight vessels, 63.6 percent. Tankers, 22 percent. The United States flag fleet represents 15.2 percent of the total world fleet.

In respect to the particular exhibits to which the Senator refers, and which I have put into the RECORD, and which contain the Liberty and Victory ships, the figures are amazing, and I am sure that if the Senator will study the figures he will have to take back his suggestion that only 9 percent of the total world fleet could be utilized in this canal if it were built.

Mr. LODGE. I understand the Senator from New York [Mr. IVES] has the floor, and I will not take any more of his time.

The PRESIDING OFFICER (Mr. GURNEY in the chair). The present occupant of the chair understands the Senator from Wisconsin [Mr. WILEY] has the floor.

Mr. LODGE. It was my understanding that the Senator from New York had the floor.

Mr. WILEY. I understand that there was a "gentlemen's agreement" to the effect that the Senator from New York was to follow the junior Senator from Wisconsin, and I am speaking now simply to get into the RECORD a few items which I think will clarify and make more plain the position which both the Senators from Wisconsin have taken on the matter. I am not going to speak further except at this time to ask also that there be printed in the RECORD a further table which shows the total amount of tonnage the cities on the Great Lakes have handled in the so-called inadequate harbors which have been so powerfully stressed.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

1946 calendar-year tonnage

Harbor:	
Duluth-Superior	54,285,000
Milwaukee	7,900,000
Chicago	18,925,000
Muskegon	2,360,000
Bay City	2,515,000
Detroit	15,754,000
Toledo	30,051,000
Cleveland	16,539,000
Buffalo	16,150,000
Oswego	1,914,000
Total	166,393,000
Total gross tonnage for Great Lakes	314,510,000
Percentage of cited harbor tonnage to gross total	53

Mr. IVES obtained the floor.

Mr. LODGE. Mr. President, will the Senator from New York yield to me for a moment?

The PRESIDING OFFICER (Mr. GURNEY in the chair). Does the Senator

from New York yield to the Senator from Massachusetts?

Mr. IVES. I yield.

Mr. LODGE. Of course it is true that the number of ships that could use the proposed seaway, not fully loaded, is very large. But it seems to me that when we are contemplating a project which is to extend for generations, we ought to build it right to begin with.

I think it is also admitted that the harbors in the Great Lakes are not deep enough. I have not heard that statement contradicted by anyone. They will have to be deepened. That, of course, will be done, in part at least, at the expense of the Federal Government, because that is what has happened in the case of all other harbors. To be frank, that cost ought to be considered when we are figuring the operating cost which must be liquidated by tolls.

Mr. WILEY. Mr. President, will the Senator from New York yield?

Mr. IVES. I yield.

Mr. WILEY. I am surprised at the position taken by the distinguished senior Senator from Massachusetts. His distinguished harbor of Boston, famous in history and song, never paid the Government a cent for all the millions which have been spent on that harbor. New York and Baltimore have never paid the Government a cent for the money which has been spent on those harbors. That shows how utterly unfair the whole picture is.

Mr. LODGE. Mr. President, will the Senator from New York yield?

Mr. IVES. I yield.

Mr. LODGE. I do not in the least begrudge the harbors in the Middle West the receipt of Federal funds. In fact, I believe that if this seaway should be built and the ships should begin to use it, the harbors will have to be deepened, and I think it is only fair to treat the middle western Great Lakes harbors exactly as we have treated the others. I am not begrudging the expenditure of a nickel. What I said was that the cost of deepening those harbors ought, in all honesty and frankness, to be calculated as one of the costs of the project which will have to be liquidated by tolls. I do not begrudge the expenditure of Federal funds on those harbors.

Mr. WILEY. Mr. President, will the Senator from New York further yield?

Mr. IVES. I will yield so that this question may be cleared up.

Mr. WILEY. I invite attention to the fact that up to date in the great harbor of New York the Federal Government has spent $142,000,000 plus. In Boston it has spent $18,000,000 plus. The figures show that the other harbors can be deepened to make them effective for shipping at a total cost of $14,000,000. We are not asking the Federal Government to pay for it. We have evidence from the distinguished former mayor of Milwaukee that those cities will be willing to make improvements in those harbors if they can only get their birthright.

I thank the Senator from New York.

Mr. IVES. Mr. President, if the atmosphere is sufficiently clear, the junior Senator from New York would like to proceed.

Mr. LODGE. Mr. President, will the Senator from New York yield to me for the purpose of suggesting the absence of a quorum?

Mr. IVES. The Senator from New York is perfectly content with the present audience.

Mr. WILEY. The Senator appreciates the quality of it?

Mr. IVES. That is definitely understood.

At the outset of these remarks I request that I be allowed to complete the statement which I have prepared before questions are asked. The statement is closely knit, and any interruption would be rather harmful to the presentation. Therefore, I shall decline to yield until I shall have finished, at which time I shall be perfectly willing to yield and answer whatever questions I am able to answer.

My remarks on the question of the St. Lawrence seaway and power project will be as brief as I can make them. Both proponents and opponents in this debate have covered the subject matter so thoroughly that there is little that I may say which can contribute to this discussion.

There are, however, a number of phases of this question which I should like to bring to the attention of the Senate. It is to these matters that I shall largely confine my remarks.

As is generally known, I am opposed to this seaway proposal. I have always been opposed to it. As is also generally known, my warm personal friend and close associate in government over the years, the distinguished Governor of the State of New York, Thomas E. Dewey, strongly favors it. He has always favored it.

This is one of the very few matters on which Governor Dewey and I are not in agreement. From time to time in past years he and I have discussed and debated this question. Neither of us has changed his attitude or position.

Naturally, I regret extremely that this difference of opinion exists between us. I have tried my utmost to persuade myself that this proposal for a so-called seaway is sound and that it would prove beneficial to the country as a whole. But the more I have looked into this matter and the more I have studied it, the more I have become convinced that I should continue to oppose it. Were I to follow any other course, I should not be honest with myself.

The proponents of this scheme have been most ingenious in the presentation of their case. To most of the objections raised against it they have offered some kind of seemingly plausible answer.

When the weaknesses in these answers are pointed out, other answers are forthcoming, and offtimes these other answers are taken from the realm of utter speculation and imagination.

For example, when it is pointed out that, because of the necessarily low tolls to be charged and the limited amount of additional tonnage—based on previous estimates—which is likely to use this so-called seaway, it can never be anywhere nearly self-supporting, we are told that the earlier estimates of 25,000,000 tons were wrong and that new estimates of 52,000,000 tons or more are the ones we should now consider. Never mind that these additional 27,000,000 tons are pulled like rabbits out of a hat.

When it is pointed out that anywhere from 10,000,000 tons to 36,000,000 tons of this traffic, depending upon which estimate one uses, would result largely from the diversion of tonnage now being carried by other means of transportation, we are told that this would not be the case at all because most of the tonnage to be carried on the so-called seaway would be entirely new tonnage.

When we inquire as to the nature of this new tonnage, we are informed that it would consist in large part of iron ore from the now undeveloped sources in Labrador and that this new ore will be required as a substitute for that now being taken from the Mesabi Range, which is alleged to be near the point of exhaustion.

When it is pointed out that the Mesabi Range may not be anywhere nearly so near the point of exhaustion as some would have us believe, that there is also an abundance of taconite in the Great Lakes region, as has been pointed out today, that most of the major steel companies do not favor the use of the Labrador ore, preferring, if need should ever arise, to use taconite instead, and that from a defense standpoint for the steel industry in the United States to become dependent upon foreign sources for ore would be highly imprudent, we are nevertheless told that, regardless of these circumstances, Labrador ore is the ore which must be used. In passing I note that this is a typical instance in which the proponents of the so-called seaway appear to claim to know more about what is good for the steel industry and for other groups in this country than those groups know themselves.

When it is pointed out that most of the tonnage to pass over the so-called seaway, on which tolls would be paid, would actually constitute a diversion of tonnage from our great seaports on the Atlantic and Gulf coasts, we are accused of sectionalism in our attitude.

When it is pointed that the greater portion of this additional tonnage on the so-called seaway would be diverted from some of the great railroad systems of this country and that the closing of this so-called seaway during 4 or 5 months of the year because of its ice-bound condition would place an impossible burden upon these railroad systems at a time of year when they would be least able to carry it, we are informed that the railroad systems in the United States are antiquated and that in any case the so-called seaway would help the railroads rather than injure them. Right here I am constrained to remark upon the extravagant position thus taken by the proponents of the so-called seaway, for if proof were needed to show that the railroads are still the chief and, by all means, the most dependable medium for transportation in the United States, the record of our American railroads during the war and their great contribution to the war effort offer irrefutable testimony.

Surely our American railroads have demonstrated beyond question that they possess a value to our economy, incom-

parably greater than that which can ever be attached to any ice-bound seaway or to any combination of ice-bound seaways.

When it is pointed out that this proposed so-called seaway would be too shallow to accommodate more than a very small fraction of present-day oceangoing vessels, we are told that oceangoing vessels with a shallower draft are now in the process of construction and that these would be able to navigate the so-called seaway and that, in any event, present oceangoing vessels could easily transship at Montreal.

When it is pointed out that, upon being questioned with respect to the value to themselves of this so-called seaway, 30 out of 32 leading steamship lines in this country indicated they would not use it if it were available, we are told that ships of other shipping interests might find it advantageous. It would appear, therefore that the chief shipping beneficiaries of this project would be the small tramp ships of foreign nations manned by foreign crews.

When it is pointed out that this so-called agreement is, in effect, a treaty and that its terms and purpose and the conditions surrounding it are those traditionally peculiar to treaties and that by construing it to be an agreement the Senate is abdicating from the performance of one of its chief constitutional obligations and responsibilities, we are informed that the resolution before us has been so drafted as to remove this question of dubious constitutionality and that, in any case, the need for the so-called seaway project is sufficiently great to justify the Senate in bypassing one of its basic constitutional functions.

When it is pointed out that a period of high costs and shortages in materials and labor is no time for undertaking a project of so vast a nature, it is suggested to us that there is apt to be some delay before the project can be gotten under way and that by that time conditions may be decidedly changed. In the next breath we are informed that "speed is of the essence" in getting this project under way, and that delay is unpardonable.

When it is pointed out that, from the standpoint of national defense, this proposed so-called seaway cannot be defended and offers more in the way of a liability than can ever be realized from any asset value it may contain, then we are told that the Secretary of War has stated that, while it might be helpful, it is not vital to national defense.

When these and other objections to this proposal have been raised, always we are told that our facts are wrong or our figures are wrong or our reasoning is wrong and always we receive some kind of seemingly plausible explanation aimed to offset the objections. I have to admit that it is a bit difficult to keep up with the proponents of this proposition in the matter of figures, for with each new obstacle confronting them, there seems to be at hand a new set of figures or estimates calculated to meet and overcome it.

Finally, however, we are given to understand that one of the most valuable features of this proposed undertaking would be the development of hydroelectric power which its construction would entail.

On this point I cannot disagree with the proponents. That is where we get together. I feel strongly, in fact, that development of the power resources of the St. Lawrence River would be a most worth-while undertaking.

I feel equally strong, however, that construction of this St. Lawrence so-called seaway project for the sole purpose of the development of the St. Lawrence power resources would be an inexcusable waste of money. I see no point whatever in spending a billion dollars or more on a very questionable waterway project when all that we would be sure of getting out of it would be a half-billion-dollar power development—especially when it is possible to develop the power separately.

For years I have been led to believe that without the so-called seaway itself no power project can be undertaken. I am convinced now that it is not only possible to undertake the hydroelectric development separately, but that such a course is the only one practicable insofar as the St. Lawrence River is concerned. In fact, it would seem to me that a treaty between the United States of America and the Dominion of Canada, which would authorize the State of New York and the Province of Ontario to develop the St. Lawrence power by joint agreement and as a joint project, should be wholly feasible. I understand that the Province of Ontario has just about reached the end of possible power development within its own borders. Surely New York State can use all the power which it could obtain as its share from such a project.

In this connection it is worthy of note that New York's half of the primary power which would be developed by the project, which the pending resolution would authorize, would constitute approximately 10 percent of present power requirements in that State alone. Furthermore, this power would be just about enough to supply the additional load which will develop in New York State in the next 2 years if the present rate of load growth is continued.

Some may doubt the willingness or capacity of New York State alone to engage in so large an undertaking. An analysis of the proposal contained in the resolution which is now before us, however, will show that insofar as New York State's taxpayers are concerned, the burden on them is likely to be as heavy one way as the other. It should be remembered that New York's share of the cost of the project now before us is $161,000,000. Increased costs since the $161,000,000 estimate was made, moreover, would very likely bring New York's cost to well over $175,000,000. Add to this item the approximate 22 percent of the Federal tax load which New York State taxpayers carry and one can easily perceive the very large proportion of the cost of this St. Lawrence so-called seaway project, which would be borne by New York State taxpayers under the terms of the pending resolution. I doubt very much that the cost to New York's taxpayers would be more—indeed, it might be less—if the power development were undertaken jointly by the Province of Ontario and that State.

While I am on this subject of power development I would bring to the attention of the Senate that, with an expenditure of about $55,000,000 for plant and only slight additions to existing transmission and distribution systems, there can now be made available on the American side at Niagara Falls 450,000 horsepower which can be produced even more cheaply than can the power which would be obtained through the development on the St. Lawrence River. By like process, about the same amount of power can be developed on the Canadian side of the Falls. This possibility can be realized by making permanent through treaty amendment a temporary wartime agreement for the diversion of water on each side of the international boundary at Niagara Falls.

Some Senators may remember that a number of years ago the Senate agreed to this arrangement, effected by an exchange of notes permitting this diversion for the duration of the emergency which still continues officially. It occurs to me that this treaty amendment should be made and ratified as soon as possible, in order that this extremely cheap power, right at our back door, can be used and made permanently available.

As to the St. Lawrence so-called seaway project itself, however, it seems to me that any promise of good or of benefit which it may hold is far more than offset by the equally implied promise of loss and damage which its establishment would bring to our American economy as a whole. In condemning this project, I have tried to take from the proposal before us the one desirable feature which it contains, and I have endeavored to show how that feature can be utilized to greatest advantage.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. IVES. I yield.

Mr. AIKEN. The Senator from New York is somewhat concerned over what he calls the mystical figures in regard to shipping. I am also a little concerned over the statement that the American part of the St. Lawrence power development would amount to approximately 10 percent of the total power used in New York. Can the Senator give us the figures as to the total amount of power which is used in New York State, and also as to the amount that would be developed by half the power facilities of the St. Lawrence River?

Mr. IVES. It is my recollection—and I will have the figures in a moment, I will say to the Senator from Vermont—that there is approximately 7,750,000 horsepower used daily in New York State.

Mr. AIKEN. How much?

Mr. IVES. Seven million and seven hundred fifty thousand horsepower daily.

Mr. AIKEN. I am asking about the kilowatt-hours, annually.

Mr. IVES. Is the Senator talking about kilowatts or kilowatt-hours?

Mr. AIKEN. Kilowatt-hours. The Senator referred to the amount of power which could be developed and the amount

of power used annually within the State of New York.

Mr. IVES. The Senator understood my statement, did he not, that the primary power itself to be developed by one-half the power facilities of the St. Lawrence River, which constitutes 764,000 horsepower, is the 10-percent item to which I am referring? I wish to make sure we are agreed on that.

Mr. AIKEN. I am asking for the amount of power used within the State of New York.

Mr. IVES. Approximately 7,750 000 horsepower daily.

Mr. AIKEN. But that is not the amount used in a year.

Mr. IVES. It is only necessary to multiply that figure by 365, the number of days in the year.

Mr. AIKEN. I have the official figures here.

Mr. IVES. What does the Senator from Vermont have?

Mr. AIKEN. They are from the Federal Power Commission. They show that New York State used, in 1946, 17,986,000,000 kilowatt-hours of electricity.

Mr. IVES. That would be approximately correct, I should think.

Mr. AIKEN. The output of one-half of the St. Lawrence seaway development is estimated, I think, at 6,600,000,000 kilowatt-hours of electricity.

Mr. IVES. That is not the firm power, the primary power. That includes the use of secondary power.

Mr. AIKEN. I am speaking of the total used.

Mr. IVES. But that includes both primary and secondary power.

Mr. AIKEN. That is correct. But the secondary power is also used.

Mr. IVES. That is correct.

Mr. AIKEN. And the Senator understands that the power from the St. Lawrence seaway development would be 70 percent firm power. That is the firmest power in the world, for the St. Lawrence River has the most constant flow of any river in the world.

Mr. IVES. It has; that is correct. It has one of the most constant flows.

Mr. AIKEN. It is the most valuable.

Mr. IVES. Yet I point out to the Senator that there is a variation of approximately 10 feet or more from the high level to the low level during the year, and that variation in itself causes this variation between the estimated 1,098,000 horsepower—I wish to point this out particularly—which would be the American share, the New York State share——

Mr. AIKEN. That is correct.

Mr. IVES. And the 764,000 horsepower, which is the primary load. The rest of it has to be picked up by steam.

Mr. AIKEN. That is correct, and, of course, that steam-power equipment would be idle part of the year, whereas the water power which would be developed at the St. Lawrence would be constant power.

Mr. IVES. Does the Senator from Vermont understand in that connection that the measure now before us carries with it a provision for the establishment of steam plants, too?

Mr. AIKEN. Yes. It is inevitable that if the St Lawrence project power were developed and sold at the price at which it should be sold, we would require an even greater capacity of stand-by steam power than we have today.

Mr. IVES. I am glad to have the Senator from Vermont point that out, because that has been my understanding, too.

Mr. AIKEN. That is true.

Mr. IVES. But the fact remains that there is nothing in the joint resolution now before us, insofar as the contemplated financing is concerned, which covers the item of stand-by steam power or even transmission.

Mr. AIKEN. That is correct. That would necessarily follow, and would come under the jurisdiction of the power authority of the State of New York or the private-power interests, who would feel called upon to develop more stand-by power.

Mr. IVES. That would depend upon the procedure followed in the State of New York as to the disposition of the power at the source.

Mr. AIKEN. And the cost of it.

Mr. IVES. Yes. If New York State itself were to have to set up transmission lines and establish steam plants, the cost of those projects probably would run into half a billion dollars of additional outlay, or something in that vicinity.

Mr. AIKEN. Yes; I think it would.

Mr. IVES. Undoubtedly it would. But that is not contemplated in the cost figures presented to us now. Undoubtedly there are some steam plants where this power would be used.

Mr. AIKEN. And it is almost impossible to establish steam plants fast enough, these days, to keep up with the demand.

Mr. IVES. That is correct.

Therefore, we harp back to this 764,000-horsepower figure, which is the primary load.

Mr. AIKEN. That is correct.

Of course, the greatest aggregation of steam plants in the world is located in New York City today.

Mr. IVES. Yes; I suppose that is so. In fact, I understand there is one plant there which alone develops more power than can be developed from the American share of the St. Lawrence seaway project.

Mr. AIKEN. I think it would develop about the same amount.

Mr. IVES. I understand that the New York City plant develops slightly more.

Mr. AIKEN. It is 700,000 or 800,000 horsepower.

Mr. IVES. Again I am talking about the firm load, the primary load.

Mr. AIKEN. I simply wish to point out, lest there be any mistake, that the production capacity on the American side would be about 6,500,000,000 kilowatt-hours annually; and the total amount used in New York is approximately 18,000,000,000 kilowatt-hours annually.

Mr. IVES. I would remind the Senator from Vermont that on the basis of primary power, half the St. Lawrence power would come to approximately 10 percent of the total amount now used in New York State.

Mr. AIKEN. Also the Senator states that probably by the time they get through with all the fixings, it no doubt would cost New York $175,000,000 for her half of the plant. Can the Senator estimate what the cost would be if that amount of power were not developed in connection with the navigation features?

Mr. IVES. Yes. Taken by itself, it obviously would be substantially more than it would be in connection with the seaway.

Mr. AIKEN. That is correct.

Mr. IVES. It might run to as much as $100,000,000 or more.

Mr. AIKEN. I think we agree as to that.

Mr. IVES. As a matter of fact, Mr. President, I do not think the Senator from Vermont and I are in disagreement as to this aspect of the matter.

However, I would point out in that connection the following: Suppose that were the case. The State of New York has to pay $161,000,000, according to the figure given here, which, in view of the increased costs which have since occurred, would be a little more than $175,000,000. So, if we consider the burden on the taxpayers, we would be paying anywhere from $100,000,000 to $150,000,000 more, taking the over-all seaway project now under consideration as being the project to which New York State taxpayers would contribute on the basis of 22 cents out of every tax dollar. So when we get all through, I do not think it makes much difference insofar as New York taxpayers are concerned.

Mr. AIKEN. Yes; New York taxpayers would be paying more, if we regard New York State as solely concerned in this connection. But if we regard all the 48 States and if we credit this project with the value which those 13,000,000 or 14,000,000 people would thus receive from the strengthening of the national security and economy, considerable credit would be coming back to them in that way.

Mr. IVES. I am perfectly willing to take any credit the Senator from Vermont desires to give to New York State, but that credit applies either way, whether New York does it alone or by means of this other process.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. IVES. I yield.

Mr. WILEY. I wonder whether the Senator would object to my reading at this time a brief statement by the distinguished Governor of his State on this subject.

Mr. IVES. No; I think that would be quite appropriate.

Mr. WILEY. I wish to compliment the Senator from New York on his very able speech and very able presentation, and also on its political effect.

I read now from a statement by Governor Dewey:

> For years I have advocated the completion of the St. Lawrence seaway and power project. During the past decade the means have been found and billions in Federal funds have been appropriated, to develop great rivers in other sections of the country, for power, navigation, flood control, irrigation, and like purposes. The incomparable resources of the St. Lawrence River should no longer be wasted. If the Federal administration is unable or unwilling to proceed, then the State of New York itself should

undertake to complete the project on a self-liquidating basis in cooperation with the Dominion of Canada and the Province of Ontario.

* * * * *

For the last 5 years I have advocated every constructive movement to make possible this great St. Lawrence development. * * * I am confident you will agree that the accord should not be omitted from any bill to be introduced, and earnestly trust that I may count upon your support in this matter of such vital interest to the people of New York State.

That was a telegram sent to President Truman.

Mr. IVES. Mr. President, I would point out one thing in the Governor's statement, that is, that he is advocating construction of the project on a self-liquidating basis. I think that should be emphasized.

Mr. WILEY. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from New York yield further to the Senator from Wisconsin?

Mr. IVES. I yield.

Mr. WILEY. I wish to call attention to the testimony of General Robins, of the Corps of Engineers, as follows:

Mr. BEITER. Have you ever figured the seaway project without the power project?

General ROBINS. No, sir; I have never looked at it as anything but a multiple-purpose project, because I think it would be a crime to look at it in any other way.

Mr. BEITER. What do you mean, "to look at it in any other way"?

General ROBINS. You have two resources there to be developed—navigation and power—and it would be a crime to build the project for either one or the other, because you would be wasting money.

Mr. BEITER. Well, don't you think it would be advisable to construct just the power plant in that area?

General ROBINS. No, sir; because power would cost more to build alone than if it were built in combination with navigation, the same as would obtain if you built for navigation alone. Those two purposes help each other.

I understand the distinguished junior Senator from New York does not agree with that conclusion.

Mr. IVES. I do not agree with the premise. I do not agree on the seaway.

Mr. WILEY. The Senator does not agree with the senior Senator from New York on that, either, does he?

Mr. IVES. I have not talked with the senior Senator from New York about it. I do not know anything about how the senior Senator from New York stands on the subject. It has been reported that he is in favor of it, but I do not personally know that.

Mr. WILEY. I wonder if the Senator has anything to say in relation to whether or not Canada would agree, assuming it were an agreement or a treaty.

Mr. IVES. I am not talking about treaties. I am not in favor of this agreement now before this body.

Mr. WILEY. Would the Senator favor a separate power treaty?

Mr. IVES. On everything as fundamental as this, never mind how technical we want to be from the legalistic aspect and how legally right it may be to do it by agreement, fundamentally and basically, a thing of this kind should be done by treaty. I am proposing a treaty here.

Mr. WILEY. I understand the Senator is very clear on that, and of course I must say to him that I cannot agree with that conclusion, and I expect to have something to say about that later in the debate. Of course, I should be too timid, perhaps, than to attempt to reply to some of the distinguished Senators on that subject, but I do not care to go into that now. My question was whether or not the Senator thought that Canada would agree to a separate power project. Has the Senator any information on that subject?

Mr. IVES. I do not know anything about it at all, I would reply, but I would point out in that connection that the Canadians were very glad to agree to it, so far as the utilization of the facilities of Niagara Falls was concerned. I think that might afford some idea as to the attitude that may be expected from the Dominion of Canada.

Mr. WILEY. The Senator stated, I believe, that he understood that under a dual construction plan, as outlined here, costs have been apportioned, some to navigation, some to power. I believe the Senator has stated that if he could have his way he would provide that all the cost would have to be apportioned to the power project, if the power project were put through without the navigation project.

Mr. IVES. The Senator from New York would point out that it would not be on the same basis, because there would be no requirement for the locks, the same need for construction which the seaway entails. What would be required would be a dam and the docks, and the removal of the several communities in the vicinity, in order to permit the damming process. I did not say the "damned" process. I have reference to damming.

Mr. WILEY. Is the Senator acquainted with the following statement from a great New Yorker? I quote:

I am from the greatest port in the whole world. I have confidence in my port. I am not afraid of it at all. At one time New York City, or the Port of New York, was the port of the Atlantic. Since that time other ports have developed, and properly so. At one time all the cotton came to New York. Now it goes to Gulf ports. If it can be done more economically, every advantage must be taken.

We have facilities in New York City that other ports do not enjoy. I will say this to my friends in the shipping business in New York City: It is not the St. Lawrence seaway that I fear; it is the Interstate Commerce Commission that I fear.

Further quoting:

I can assure you gentlemen that we will have no trouble with Canada at all. They will cooperate 100 percent. I have been the chairman of the American section of the Dominion Joint Board of Defense with Canada since 1940. We worked harmoniously. They are most cooperative.

Then, commenting on a position like that of the Senator's, this gentleman said:

They cannot be right in both approaches. I say it is going to be a practicable waterway and compete, or it is a no-good waterway and will not compete. I am willing to take either side of that. If it is a better waterway and if exports from the United States can be shipped more cheaply to other ports in the world we are living in, it deserves getting approval.

That was said, as the Senator undoubtedly will recall, by the late Mayor LaGuardia. Does the Senator recall the testimony?

Mr. IVES. I not only recall the testimony, I read it previously. I want to say that I do not feel at liberty to speak regarding the late mayor as I would speak if he were still living, and I think we will let it go at that. However, I would point out that there have been over the years a number of things on which the late mayor of the city of New York and I did not agree. This happens to be one of them. At the same time I would point out that the present mayor of the city of New York is very much and strongly opposed to this seaway project. The reason I have not presented his position in any way, shape, or manner is because I have been trying to keep this thing on a national level; never minding what New York's local interests are in this matter. Presumably and for the sake of the debate let us accept the idea that New York stands to gain as much as it would lose as a State, and I think it is fair to leave it on that basis. I have been trying to look at the seaway proposition from a national aspect and keep out of any provincialism, any localism, or any sectionalism, or anything else of the kind.

Mr. WILEY. The Senator will admit, will he not, that in 1931 the Legislature of New York went on record as favoring the development of both navigation and power in the St. Lawrence River, and that some provincials in New York ever since have tried to get that legislative resolution repealed?

Mr. IVES. May I point out that the Legislature of the State of New York in 1931 undoubtedly did not go on record in favor of this seaway?

Mr. WILEY. The Senator emphasizes "this," does he, or does he mean the seaway?

Mr. IVES. This proposed seaway, here.

Mr. WILEY. Is the Senator quibbling?

Mr. IVES. I happened to be a member of the Legislature of the State of New York at that time. I have always been opposed to this matter, as I said in my earlier remarks. I do not think the Senator will find any record wherein the State of New York's Legislature has been placed on record, in the 1930's, as favoring the seaway.

Mr. WILEY. I have in front of me a note——

Mr. IVES. The Senator may. He will find something about power development there, surely.

Mr. WILEY. I have in front of me a note, and I shall be glad to check on it.

Mr. IVES. That is all right. I just want to make that clear. I know now what I am talking about, definitely, in connection with the Legislature of the State of New York, and the Senator will find something there on power development, surely; not only that, but the legislature in the last number of years has

taken action, positive, definite, affirmative action, to enable the State to enter into the power-development proposition.

Mr. WILEY. My question was whether or not the State Legislature of New York in 1931 went on record in favor of the development of both navigation and power in the St. Lawrence River. The Senator's answer was "No," was it not?

Mr. IVES. My answer is that to the best of my recollection the Legislature of the State of New York in 1931 did not go on record in favor of any seaway. The Senator knows, as well as I, the wording in memorials and resolutions adopted by some of the State legislatures. I do not know how that resolution read, unless he happens to have a copy of it there. I do not think there is any way of deciding that question definitely between us. It is very technical, but I am sure that the legislature did not favor any seaway.

Mr. WILEY. Is the Senator acquainted with the fact that the Amalgamated Clothing Workers and the Textile Workers, with a total of over 1,000,000 members in the city of New York, have registered approval of the seaway and the power project?

Mr. IVES. Now, once again, the Senator is bringing in the local angle, and if I were to do that, I could point out that the New York State Federation of Labor, I understand, and all of its subordinate units, is on record as opposed to the seaway, as are also the railroad brotherhoods, all of them, in the State of New York. I am trying to keep these things out. They have no place in the debate.

Mr. WILEY. In other words, the Senator contends that the opinion of the common citizens of America has no weight, that the right of petition or the right of expression has been eradicated by the United States Senate?

Mr. IVES. I made no such statement as that at all.

Mr. WILEY. I did not think the Senator did.

Mr. IVES. I am very sorry that the Senator has so construed my remarks. What I am referring to in my statement is the position of a State or any small group of States, in connection with a project affecting the whole United States.

The Senator spoke about the Amalgamated Clothing Workers of New York. I spoke about the State Federation of Labor of New York. Let me point out that those are State of New York organizations. To be sure, the Amalgamated Clothing Workers extends beyond the limits of New York, but most of the members of the organization are in New York. I am trying to keep local interests out of the discussion. That is what I was referring to, and not that the rank and file of citizens should not be permitted the right of petition. Of course, they should under all circumstances.

Mr. WILEY. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Wisconsin?

Mr. IVES. The Senator from New York will state to the Chair that there has been a constant implied yielding back and forth during the colloquy, and if the Chair will accept the apology of the Senator from New York, I would suggest that we be allowed to pursue the course we have been presently pursuing.

Mr. WILEY. On that subject I wish to say that the other day I heard a ruling made in the Senate to the effect that every time a conversation was going on between the Senator who had the floor and other Senators back and forth that a Senator who wished to interrupt the Senator who had the floor should address the Chair. I agree that that is the rule. But the rule is observed more in the breach than in the observance, as I have observed during the 9 years it has been my privilege to be a Member of the Senate. During that time I have found it to be the common practice when two Senators are seeking to obtain light on a subject, that they proceed in the manner that the Senator from New York and the Senator from Wisconsin have just done.

Mr. IVES. I take it, Mr. President, the Senator from Wisconsin feels that the discussion might be short-circuited by the Chair.

The PRESIDING OFFICER. The present occupant of the chair is not looking out for his authority, but is wholly concerned with seeing that decorum shall be preserved, and that there shall be no interruption of a Senator while he is concluding his remarks. If debate were carried on in that manner, it would be objectionable.

Mr. IVES. Mr. President, I feel very strongly that the Chair's ruling is absolutely sound, and I would stand by that ruling at any time. I would suggest now that from this point on the Senator from Wisconsin and the junior Senator from New York address the Chair properly.

Mr. WILEY. Mr. President——

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. WILEY. I agree. There is harmony once more on the floor. The distinguished Senator from New York has laid down the rule which both of us have been guilty of violating. We will now try to keep from doing so in the future.

Mr. IVES. Mr. President, the Senator from New York is not trying to lay down a rule. He has simply pointed out a rule which already exists.

Mr. WILEY. Mr. President, did not the Senator from New York just violate it?

Mr. IVES. No, Mr. President.

The PRESIDING OFFICER. The Senator from New York addressed the Chair. Does the Senator from Wisconsin now ask the Senator from New York to yield?

Mr. WILEY. Mr. President, will the Senator from New York yield?

Mr. IVES. Mr. President, the Senator from New York is pleased to yield.

The PRESIDING OFFICER. The Senator from New York yields to the Senator from Wisconsin.

Mr. WILEY. I want to ask the distinguished Senator whether the State Power Authority of New York supports the St. Lawrence seaway project and the power construction?

Mr. IVES. Mr. President, if the Senator has completed his question, I will say that so far as I am aware the State power authority is in favor of the seaway and the power construction.

Mr. WILEY. Mr. President, I ask at this time——

Mr. IVES. I do not happen to agree with the State power authority on this question.

Mr. WILEY. Mr. President, I ask at this time that there may be printed in the RECORD——

The PRESIDING OFFICER. Does the Senator from New York yield for that purpose?

Mr. IVES. Mr. President, the Senator from New York is pleased to yield to the Senator from Wisconsin for the purpose of allowing the Senator from Wisconsin properly to insert something into the RECORD.

Mr. WILEY. Mr. President, I am distinctly happy to insert in the RECORD an excerpt from the New York Times of date January 21, 1948. I want to say, Mr. President, that I am extremely grateful to the Senator from New York for permitting me to make the request.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STATE POWER UNIT SUPPORTS SEAWAY—REPORT OF AUTHORITY STRESSES SHORTAGES, RISING FUEL COSTS, NEED FOR MORE PRODUCTION

ALBANY, January 21.—Electrical power shortages, the rising costs of fuel and transportation, and the need for more industrial and farm production were cited today by the State power authority as reasons why the St. Lawrence seaway project should be undertaken immediately. The authority's annual report to Governor Dewey and the legislature was a signal for a fresh outbreak of controversy over the proposal.

Assemblyman Wilson C. Van Duzer, Republican, of Orange County, immediately sponsored a bill to abolish the authority. Assemblyman Gerald F. Sullivan, Republican, of Erie, proposed a legislative inquiry into the authority's expenditure of its $150,000 annual appropriation.

As in other years the authority urged in its report, a 216-page document complete with maps, photographs, and charts, that the necessary construction of the seaway be undertaken at once and pressed to early completion.

A measure to accomplish this end is scheduled to be taken up in the United States Senate next week. It has been announced here that Senator IRVING M. IVES, of New York, will lead the fight against it although Governor Dewey is on record in favor of it.

Arguing that the seaway was urgently needed, the power authority's report said:

"At the beginning of 1948 the immense value to New York State and the Nation of the resources of the Great Lakes-St. Lawrence system has been brought into bold relief by:

"Power shortages in the project area itself, including parts of New York State and the Province of Ontario.

"Rising costs for fuel and transportation.

"Expanding demands for more production to help meet domestic and overseas requirements for food and manufactures.

"Renewed emphasis on the importance of the Great Lakes-St. Lawrence resources to the security of the Western Hemisphere."

Under the terms of pending Federal legislation, the project would open all of the St. Lawrence and Great Lakes to deep-draft shipping and provide for production of 2,200,000 horsepower (12,600,000,000 kilowatt-hours) of hydroelectric energy in the International Rapids Section of the St. Lawrence River.

The cost has been estimated at $513,884,000, of which New York would pay $100,000,000 and get in return half of the electrical energy developed.

In support of its statement that more power is needed, the authority stressed the electric brown-out last fall in the up-State area.

The report was signed by Francis B. Wilby, chairman of the authority and George S. Reed, Fred J. Freestone, Gerald V. Cruise, and Samuel J. Joseph, trustees. Mr. Joseph resigned near the end of the year to accept an interim appointment as Bronx County judge. Jacob Grumet, formerly an assistant district attorney under Governor Dewey, succeeded him.

Mr. WILEY. Mr. President, will the Senator from New York further yield?

Mr. IVES. I yield.

Mr. WILEY. Is the Senator from New York acquainted with the fact that every President of the United States from President Harding down to the present time, including President Truman, has heartily endorsed the seaway and the power project?

Mr. IVES. The Senator is so aware.

Mr. WILEY. Is the Senator also aware that every distinguished Secretary of State under those Presidents, including the great statesman, Mr. Stimson, of New York, Secretary Hughes, and Secretary Hull, have endorsed the seaway and the power project?

Mr. IVES. The Senator from New York was not so aware, but is glad to be so informed.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. IVES. The Senator from New York yields.

Mr. WILEY. I am very happy to say at this time that the International Garment Workers of New York, with a membership of over 200,000, have endorsed the project.

The record shows, as already indicated, Mr. President, that in the United States, according to polls which have been taken, some 57 percent of the people have indicated their endorsement of the project.

I will not pursue this course of questions further, but I assure the Senate that the fine argument which has been made by the distinguished Senator from New York will not go unanswered. I thank the Senator.

The PRESIDING OFFICER. The Senator from New York has the floor.

Mr. IVES. Mr. President, the Senator from New York now yields the floor, with appreciation, to the Senator from Wisconsin.

Mr. ELLENDER. Mr. President, I ask the indulgence of my colleagues to listen to me while I speak in opposition to the pending joint resolution. I want to say at the outset that I do not have any brand-new arguments to offer, but I simply propose to comment on or add emphasis to some of the arguments previously made.

As has been stated on several occasions, this proposal has been before the Congress for many years. It would seem to me that the proponents of the measure are gluttons for punishment, because they have been defeated every time they have brought the matter before Congress. I predict that failure again awaits them. Only a few years ago when the proposal was presented, one of the new arguments advanced was that it would relieve unemployment. The old arguments that it would be of great benefit to this country and to Canada, and so on, were of course stressed in no uncertain terms. Upon those issues the Senate promptly voted down the joint resolution.

Since 1941, when the proposal was last defeated by the Senate, the proponents of the St. Lawrence seaway have added two additional arguments, first, the one pertaining to national defense, and the other that the project will be self-liquidating by the imposition of tolls. To my way of thinking those two arguments may be placed in the category of superbaloney. I believe that my distinguished colleague from Massachusetts [Mr. LODGE] has adequately taken care of the argument that the project should be built because it will assist materially in national defense. A reading of the record will demonstrate that virtually every witness who testified for the proposal stated that the building of the project will be helpful, but certainly that it was not vital to our defense in case of war.

I believe that the arguments so far adduced will show that it will be of little or no service in case of another war. I am sure that all will agree that very few if any war plants would be built along a highway if it were open for only 60 percent of the time, or 7 out of 12 months in the year.

The argument of self-liquidation, to my way of thinking, has no basis. We have had experience with the Panama Canal, and I propose to demonstrate to the Senate in only a few minutes how we have fared with that project by way of self-liquidation.

The argument of self-liquidation has, I believe, had the effect of gaining a few votes. The proponents of this measure, in their zeal to carry it through, have been adding a little more honey every time the subject comes before the Senate, with a view of attracting more bees; but I believe that in this instance the answer to these two arguments has been such as to make it appear that the only thing they have added to the hive is honeycomb.

The matter of self-liquidation by the imposition of tolls is not provided for in the pending measure. It is something that we must look for in the future. There is nothing definite except that Canada has agreed in principle to the imposition of tolls. The tolls are to be placed, not on cargo that will go through the entire system, but only on cargo that is transported on that part of the St. Lawrence River from the point where it begins in Ontario Lake to the ocean. So far as all other freight is concerned, that is, that transported in the five Great Lakes and their connections, it shall be toll-free.

I am wondering what the shippers of Montreal will have to say when a proposal comes before the Canadian Parliament to place tolls on all of their shipments which are now toll-free. As Senators know, there is today a channel beginning at the port of Montreal which is deep enough to carry all the freight that is now available for Montreal to the ocean. Will the shippers in that section stand idly by and permit themselves to be taxed to pay for a canal from Montreal to the west? I contend that the proponents of this measure, if they are in earnest about the self-liquidating feature of the proposal, should insist that the terms and conditions under which tolls are to be imposed should be incorporated in the resolution. They should make certain that the people of this country have a vested right in that respect, and not a mere promise that tolls will be imposed for the purpose of self-liquidation. Instead they are depending on agreements to be made in the future, which, as has been shown, can be changed almost at the whim of the Congress.

What about the division of the tolls? Has that been decided upon? The report shows that we are to pay almost two-thirds, and perhaps more, of the cost of this project. How will the tolls be divided? Will they be divided half and half? Will Canada get more than we will? I believe that it is essential that the resolution contain the terms and conditions under which the so-called self-liquidating feature can be accomplished.

Mr. President, what would be the use of even doing that? Why try to fool the people by attempting to make them believe that the project is self-liquidating? We built the Panama Canal in 1903, as I recall. In 1912 the Congress imposed tolls for the passage of freight through the Canal, on the assumption that the tolls charged would liquidate the debt incurred in the building of the Canal. It was argued that the tolls sought to be imposed would give us back every dollar that we invested. But what does the record show? Let me read from it.

Mr. THYE. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. THYE. I have the record of the hearings before me. Secretary of State Marshall declared on May 28, 1947, during his testimony before the subcommittee, that there were four advantages to the St. Lawrence project, from the point of view of national defense.

First, provision for the construction and repair of ocean-going vessels in the relatively secure area of the Great Lakes.

Second, the establishment of a vital new line of communication in the heart of the continent. He named several other items, including the importance of electrical development, which the project itself would provide. In view of that feature alone, from the standpoint of national defense and what we need in electrical current, I say that the project would be warranted by that fact alone.

Mr. ELLENDER. In making my statement a moment ago I did not mean to entirely disregard the fact that some benefit would follow in case of war. But it is not vital. I would rather spend that sum to greater advantage in our own country. Why could we not make the Gulf of Mexico our own lake for such purposes as proposed by General Marshall?

Let us consider the two or three arguments advanced by General Marshall. First, he stated that the project would afford a safe place to repair vessels. But let us not forget that this channel would be ice-bound 4 or 5 months during the year. Probably at a time when repairs were most urgent.

Mr. THYE. Mr. President, will the Senator yield for a further very brief statement?

Mr. ELLENDER. I yield.

Mr. THYE. In spite of the ice-bound condition to which the Senator refers, we transported the vast majority of all the iron ore that went into the steel production of this great Nation during the war years, and we transported it down that chain of lakes.

Mr. ELLENDER. Iron ore can be stock-piled. It can be piled mountain-high when necessary; but that is not true of ordinary freight. It is not true in respect to ship repairs. Does the Senator suggest stock-piling finished products on the banks of the St. Lawrence in great warehouses, and letting the freight stay there for 4 or 5 months until the ice thaws? Has the Senator any idea of the costs that such a plan would necessitate? Has he any idea of losses by way of deterioration?

Mr. THYE. Mr. President, will the Senator be kind enough to permit another interruption?

Mr. ELLENDER. Surely.

Mr. THYE. The harvest of the great Northwest takes place in July and August. When that harvest is under way the grain movement is out across the continent. We have not had railroad facilities which permitted sufficiently rapid movement of the grain from the Northwest. If we could cut the transportation cost to the head of the Lakes, the great grain terminals there could receive the grain, and from August through December that grain would find its way to the ocean. In that way the seaway would not only supplement and assist the railroad facilities, but would move the grain at a minimum of expense as compared with railroad transportation.

Mr. ELLENDER. What the Senator is now discussing was due more or less to the stress of war. It is true that our railroads were overtaxed and grain movement was rather slow. However, do not forget that it will still require railroad cars to move the grains to water transportation. On the other hand, the Senator well knows that our annual wheat production in years prior to the war was between 700,000,000 and 800,000,000 bushels. We consume about 750,000,000 bushels. But during the war we increased production to as much as 1,200,000,000 bushels. The condition to which the Senator now refers, may apply to the present; but if Canada continues its large wheat production, and Russia and other countries get back into production, I do not believe that this country will be producing 1,200,000,000 bushels of wheat, as it did during the war. Therefore, I doubt that the situation to which the Senator now refers will prevail very much longer.

Mr. THYE. Mr. President, will the Senator further yield?

Mr. ELLENDER. I yield.

Mr. THYE. There is no other Senator of whom I think any more than I think of the Senator from Louisiana.

Mr. ELLENDER. The Senator is very kind; and I can return the compliment.

Mr. THYE. I do not wish to enter into an argument other than on a specific question related to the St. Lawrence seaway. If we are not transporting wheat, we shall be transporting some other food supplies just as vital to our economy as is wheat. I shall continue to live in the Northwest. I like Minnesota as well as the Senator likes Louisiana, and I shall never move out of the Northwest. If my neighbors are not producing wheat, they will be producing something else needed in the economy of this great Nation, and we shall need transportation facilities. The St. Lawrence seaway will furnish such facilities, whether it be for wheat or other products. However, I believe that we shall be producing wheat just as long as Russia and the other countries of the world produce it. For that reason I think the St. Lawrence seaway is an essential project from the standpoint of moving food commodities. But I think the project in itself is far beyond even the one question of transportation or of the frozen condition during 4½ months of the year, thereby affecting the facilities of shipping by way of the chain of lakes. We need the project in the growth of this great Nation. We cannot in the future enjoy the growth which this Nation has had in the past 10 years without developing the industrial East and the industrial Midwest. That requires electric current. There is a potential generating possibility on the St. Lawrence River which is greater than on any other body of water in all the world, and we can generate that current more cheaply than in any other hydroelectric plant that is today known or contemplated. If we have that generating capacity, we might as well add to it the shipping facilities that the seaway would afford, and thereby we shall strengthen the whole Nation. From it Louisiana will benefit, as will also Montana, North Dakota, South Dakota, Nebraska, or any other State in the Midwest.

Mr. ELLENDER. I recall the figure about which the distinguished Senator has been speaking, but I believe that we can handle the problem within our own country and with facilities that are our own. If we spend within our own country the amount of money which we are now being asked to spend in Canada it will add to the security of the investment and, I am sure, will take care of the additional production about which the distinguished Senator has been speaking.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. ELLENDER. I should like to continue for a few moments on the matter of tolls to which I was addressing myself before I was interrupted. I want to say to my distinguished colleagues that I invite questions at any time, but I should like further to develop the toll vote-getting proposal.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. ELLENDER. I will yield for a question; yes.

Mr. AIKEN. I have listened to the Senator's remarks regarding the proposed investment. Of course, the Senator understands that most of the investment will be within the borders of the United States, does he not?

Mr. ELLENDER. It will not be spent within the borders of the United States, it will be mostly spent at the border.

Mr. AIKEN. Most of this investment is to be within our borders. All of the main dam and all of the locks and canals which are proposed will be within the United States.

Mr. ELLENDER. Now, Senator, I know you are in error. Look at the map on the wall. Only Lake Michigan is wholly in the United States. Most of the project will be built on the boundary between us and Canada, or, may I say, so close to Canadian territory that we might as well call it so.

We cannot charge tolls to repay the expenditure as to all freight transported in the five Great Lakes. The toll charges are to be relegated to such freight as shall pass through the St. Lawrence River itself, from where it leaves Lake Ontario and continues on to the ocean.

Mr. AIKEN. But what I wished to call the Senator's attention to was the fact that because we did not have power available in this country it was necessary for us to invest $100,000,000 in the expansion and construction of an aluminum plant, which was entirely within Canada, and in the event of war we would still be depending upon Canadian power and Canadian aluminum to carry on such a war. Furthermore, we have invested hundreds of millions of dollars in the Alcan Highway and the Canol project in Canada.

Mr. ELLENDER. I will say to the distinguished Senator from Vermont that I would not at all oppose the establishment of a power plant. I would help to the extent of my ability to make such a plan come into being. But I say that the expenditure of this vast amount of money to develop the St. Lawrence seaway is not necessary to procure the power to which the Senator refers at this time. Power development is the only part of this entire project which may be self-liquidating. As I pointed out a moment ago, I heard the distinguished junior Senator from Michigan state that one of the features of this proposal that has won him over was the fact that it was self-liquidating. Yet there is not a single sentence in the pending resolution which states what the tolls shall be and how they shall be divided or whether under the limitation as to charges to be imposed, a sufficient sum will be realized to make the project self-liquidating. They had to gaze into the crystal ball, so to speak, to find the additional tonnage that will be necessary to pass through this seaway and make available a sufficient sum of money to pay for the operation and the retirement of the money expended. The record shows that the St. Lawrence River, at present, takes care of approximately 9,000,000 tons of freight. The estimate of new tonnage first presented to the Senate indicated a total of 16,000,000, which added to the present tonnage made a total of 25,000,000 tons. The crystal gazers raised the ante to 52,000,000 tons for no other purpose than to try to justify the proposition that it was possible to build this project on a self-liquidating basis.

Let us see what has happened to the Panama Canal's self-liquidating proposal. I have before me the Annual Report of the Governor of the Panama Canal for the year 1946, and on page 114

there appears a table, No. 21, which shows the revenues, expenses, and computed surplus from the year 1914 to the year 1946, together with the net appropriation expenses, net revenues, capital interest at 3 percent, and computed surplus for the same years. What does that table show? It shows that in that period of time there is a deficit of $124,282,234.32. Does that spell self-liquidation?

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. ELLENDER. That is what this written report shows.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. ELLENDER. In just a minute. As I recall, the Panama Canal cost our Government in excess of $700,000,000. That is about equal to the estimate of the cost of the St. Lawrence seaway. The Panama Canal is open not only 7 months in the year; it is open the entire year. It is a canal which connects two great oceans. Yet, it is not self-liquidating. I ask how, in the name of common sense, can it be argued here that a project which is now estimated to cost $700,000,000 and which, in my estimation, will cost in excess of a billion dollars before completion, can be self-liquidating? How some of the proponents can be drawn into supporting this measure on that basis is simply beyond my comprehension. I fear they are being hoodwinked.

Mr. President, I ask unanimous consent that at this point in my remarks the table to which I have referred, on page 114 of the report mentioned, as well as the statement appearing on page 115 of the Annual Report of the Governor of the Panama Canal, be incorporated in the RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

TABLE 21.—*Revenues, expenses, and computed surplus*

Fiscal year	Tolls	Civil revenues	Business profits	Total revenues	Net appropriation expenses [1]	Net revenues	Capital interest 3 percent [2]	Computed surplus [3]
1914–20	$33, 303, 581. 67	$1, 206, 579. 86	$536, 068. 34	$35, 046, 259. 87	$36, 657, 766. 89	($1, 611, 507. 02)		($1, 611, 507. 02)
1921	11, 261, 919. 31	213, 986. 19	564, 211. 20	12, 040, 116. 70	9, 578, 300. 14	2, 461, 816. 56	$14, 674, 964. 74	(12, 213, 148. 18)
1922	11, 193, 383. 47	192, 208. 85	323, 259. 16	11, 708, 851. 48	8, 469, 017. 63	3, 239, 833. 85	15, 253, 780. 02	(12, 013, 946. 17)
1923	17, 507, 630. 52	184, 213. 54	1, 140, 642. 50	18, 832, 486. 56	8, 240, 777. 56	10, 591, 709. 00	15, 202, 430. 18	(4, 610, 721. 18)
1924	24, 289, 603. 16	392, 250. 73	901, 624. 12	25, 583, 478. 01	8, 923, 905. 39	16, 659, 572. 62	15, 150, 900. 33	1, 508, 672. 29
1925	21, 374, 664. 12	207, 954. 04	765, 916. 85	22, 348, 535. 01	8, 666, 693. 44	13, 681, 841. 57	15, 099, 730. 49	(1, 417, 888. 92)
1926	22, 927, 456. 03	217, 680. 50	841, 310. 29	23, 986, 446. 82	8, 543, 468. 47	15, 442, 978. 35	15, 085, 580. 64	357, 397. 71
1927	24, 217, 185. 32	391, 623. 50	876, 536. 80	25, 485, 345. 62	9, 547, 715. 02	15, 937, 630. 60	15, 068, 580. 79	869, 049. 81
1928	26, 943, 513. 11	232, 532. 57	736, 719. 43	27, 912, 765. 11	9, 501, 200. 82	18, 411, 564. 29	15, 035, 029. 29	3, 376, 535. 00
1929	27, 123, 534. 33	243, 391. 39	737, 850. 26	28, 104, 775. 98	10, 187, 150. 71	17, 917, 625. 27	15, 013, 374. 55	2, 904, 250. 72
1930	27, 077, 117. 36	349, 255. 35	760, 971. 66	28, 187, 344. 37	9, 893, 920. 93	18, 293, 423. 44	14, 987, 527. 89	3, 305, 895. 55
1931	24, 644, 550. 39	346, 030. 35	562, 764. 17	25, 553, 344. 91	10, 693, 353. 53	14, 859, 991. 38	14, 986, 578. 04	(126, 586. 66)
1932	20, 706, 568. 49	327, 444. 23	557, 095. 44	21, 591, 108. 16	10, 239, 211. 84	11, 351, 896. 32	14, 943, 807. 66	(3, 591, 911. 34)
1933	19, 621, 158. 61	310, 014. 16	1, 135, 708. 62	21, 066, 881. 39	9, 555, 672. 02	11, 511, 209. 37	14, 907, 732. 16	(3, 396, 522. 79)
1934	24, 065, 065. 16	96, 666. 67	1, 366, 755. 12	25, 528, 486. 95	7, 931, 383. 77	17, 597, 103. 18	15, 039, 203. 81	2, 557, 899. 37
1935	23, 338, 977. 90	81, 957. 68	1, 021, 216. 61	24, 442, 152. 19	9, 481, 429. 57	14, 960, 722. 62	15, 124, 193. 39	(163, 470. 77)

Total	537, 161, 480. 30	6, 824, 163. 43	23, 671, 833. 81	567, 657, 477. 54	297, 881, 854. 88	269, 775, 622. 66	394, 057, 856. 98	(124, 282, 234. 32)

[1] Includes adjustment of $15,027.41 in postal surplus.
[2] Includes adjustment of $44,099.80 in postal surplus.
[3] After deduction of Canal earnings repaid to appropriations.
[4] Interest prior to July 12, 1920, is included in capital investment account.
[5] Parentheses denote deficits.
[6] Actual business profits of $876,835.29 have been adjusted by $669,226.38 for write-off of reimbursable capital expenditures, public works, Republic of Panama.

The above table summarizes by classes the revenues received by the Panama Canal by fiscal years from 1921 and shows the net results from operations after deducting therefrom the net current expenses chargeable to appropriations and the current interest charge on the capital investment. The interest rate of 3 percent has been used in making computations a great many years. The use of this rate received the approval of two organizations which investigated Panama Canal matters and was formally adopted when the present accountng system was established in 1932. It has been considered a fair and reasonable rate, as the Government at various times has paid much higher rates for the use of money.

Interest chargeable to operations is not included on the balance sheet and no interest charge against the Canal is actually made by the United States Treasury.

Total revenues on the foregoing statement represent receipts which must be covered into the United States Treasury and relinquished from control of the Panama Canal. Earnings repayable to Canal appropriations, and reexpendable by the Canal, are deducted from gross operating expenditures, in order to present a comparison of funds covered into the Treasury with funds chargeable to operating account, exclusive of capital additions.

The absence of tax charges is compensated for by the inclusion in Canal-operating accounts of the direct costs of civil government, health, and welfare activities. Neither capital nor operating expenses of the Panama Canal include the cost of the military and naval establishments on the Isthmus; however, all important exchanges of services with those interests are covered by cash settlements, or reciprocal allowances.

By including in the accounts all revenues properly applicable to Canal activities and by charging against the total revenue the net appropriation expenses, including charges for depreciation and interest at 3 percent on the capital invested but excluding any charge to amortize the investment, there has accumulated as of June 30, 1946, as shown by the above table, a deficit of $124,282,234.32.

Mr. ELLENDER. Mr. President, I now yield to the Senator from Vermont.

Mr. AIKEN. I thank the Senator, but I shall not press my question.

Mr. ELLENDER. Mr. President, I do not like to say this, but I do believe that the proponents of this resolution have simply lost their sense of better judgment in their zeal to put this burden on the taxpayers of our country. To my way of thinking, it is "smelly" in at least one respect.

Mr. THYE. Mr. President, will the Senator yield?

Mr. ELLENDER. In a moment. Mr. President, as I shall demonstrate by the majority report, the proponents have gone so far that they are willing to sell the rights of American people down the St. Lawrence River to make the project possible. What do I mean when I say that?

Mr. THYE. Mr. President, will the Senator yield?

Mr. ELLENDER. I will yield for a question.

Mr. THYE. When the Senator states that the entire project will be so costly and so beclouded that it is even "smelly," how does he answer Lieutenant General Wheeler and how does he justify his statement in that regard?

Mr. ELLENDER. Mr. President, when I said this proposal was "smelly" in at least one respect, I did not have any reference to the cost of the project. What I have in mind is the manner in which the proponents of the measure have been willing to trample on the Constitution itself in order to place this proposed resolution on the statute books and thereby make the St. Lawrence waterway a reality.

Mr. THYE. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. THYE. How does the Senator answer General Wheeler?

Mr. ELLENDER. Regarding the cost?

Mr. THYE. Yes.

Mr. ELLENDER. I am not now discussing the cost. In that connection, however, let me say to the Senator that I have studied the estimates made. Almost every project of any consequence built by the United States, including the

Panama Canal, has cost much more than the estimates. The engineers in charge, have, from time to time, been compelled to raise their sights as to costs. The Senator is well aware of that. I desire to say that when I used the word "smelly" a moment ago, I had reference to the scheme resorted to by the proponents of this measure in order to bypass the Constitution. I should like to discuss that point for a moment.

Mr. President, every Member of the Senate knows, or at least should know, that it is absolutely inexcusable for us not to guarantee perpetual rights of navigation to every citizen of the United States and to hope that the same rights may be accorded to every Canadian. Such a provision is essential. Perpetual navigation rights should not be left in the realm of probability, but they should be indelibly written into the measure now before us. They should be made perpetual. They should be vested in every citizen of the countries involved.

Mr. THYE. Mr. President, will the Senator yield to me? If he will, I wish to say——

Mr. ELLENDER. I ask the Senator from Minnesota to wait a moment, please.

Mr. President, I have seen from the air the large farm owned by the distinguished Senator from Minnesota, which is located in his native State. Suppose he desired to drain his farm into a river 2 or 3 miles away, and suppose that in order to reach that river he had to dig a canal through several adjoining farms belonging to his neighbors. Would the distinguished Senator undertake to cut that canal to the river before he obtained a right-of-way and established the terms and conditions under which he could use the canal? I am sure he would not be so foolish. I give him credit for having some sense.

Mr. THYE. Mr. President, will the Senator yield at this point for a moment?

Mr. ELLENDER. I yield.

Mr. THYE. In the first place, in the case of the proposed St. Lawrence seaway the trench is all dug, with the exception of several small, narrow necks of land through which we have yet to build canals. But if the Senator desires to give an illustration, then I should like to say that when we were confronted with the danger of having our coastal cities bombed during the war, we found it expedient and wise to build our armament and other defense plants in the interior parts of our country; and in doing that, the best land, wherever land was needed, was used. Such land was taken for that purpose in various of the interior portions of the United States, in order to have those armament plants removed from the danger of bombing.

Mr. ELLENDER. With all due respect, I believe that my good friend has missed my point. But in answer to what he has just stated, of course, the Government has a right to do all of that in time of war. In time of war the Government can take a man's home; his farm; it can force men to go to war and leave their loved ones; and so on.

But all that is far removed from the argument which I have made in this instance, and as to which I propose to show from the report itself that one of the most vital provisions which should be included in this agreement is left dangling for future agreement between the United States and Canada. I refer to a provision for perpetual navigation rights to all of the people of the United States and to those of Canada.

Mr. WILEY. Mr. President, will the Senator yield, to permit me to place a notice in the RECORD?

Mr. ELLENDER. Mr. President, the argument I am advancing will lose its significance if I continue to yield and thereby make its presentation piecemeal. What is it that the distinguished Senator wishes to insert in the RECORD?

Mr. THYE. Mr. President, if the Senator will yield to me——

The PRESIDING OFFICER. To whom does the Senator from Louisiana yield?

Mr. ELLENDER. To no one. I prefer to continue.

Mr. President, as I have just stated, the most vital provision of any measure for the building of a project, such as the one in contemplation, is a section guaranteeing to the people of the United States and to the people of Canada perpetual rights of navigation.

Mr. THYE. Mr. President, will the Senator yield to me at this point?

Mr. ELLENDER. I refuse to yield for the moment.

Let me call to the attention of Senators that such a provision for perpetual rights of navigation was considered so vital that it has been included in every measure on this subject which previously has been presented to the Senate for consideration. It was included in the last resolution on this subject, which was before the Congress in 1941 under article VII. Article VII is summarized as follows on page 6 of the majority report on the pending measure:

> Article VII extended perpetual navigation rights to the two countries in boundary waters and connecting channels and canals where those navigation rights are now terminable with the life of existing treaties.

Now let me read article VII in full as it appeared in the Canadian-American agreement of March 19, 1941. I read:

> ARTICLE VII
>
> The High Contracting Parties agree that the rights of navigation accorded under the provisions of existing treaties between the United States of America and His Majesty shall be maintained notwithstanding the provisions for termination contained in any of such treaties, and declare that these treaties confer upon the citizens or subjects and upon the ships, vessels, and boats of each High Contracting Party, rights of navigation in the St. Lawrence River, and the Great Lakes system, including the canals now existing or which may hereafter be constructed.

That article was the one we were called upon to ratify in 1941.

Mr. President, I consider that provision to be essential. It is necessary. It gives to both countries a vested right to perpetual navigation in the proposed seaway. Yet, what do the proponents of this project do in their zeal to try to have the pending resolution enacted by the Congress? Mr. President, they eliminate it from the resolution. And why, may I ask, that article VII was eliminated? The answer, in order to bypass the requirement of the Constitution, providing for the advice and consent of two-thirds of the Senate. Listen to this, Senators. I read from the majority report, at page 6:

> Article VII and IX were eliminated to meet the view that they required the advice and consent of two-thirds of the Senate, because they were considered to be matters properly dealt with by means of treaties.

Senators, that is not my language, but it is that contained in the majority report filed in connection with the pending measure.

Smelly, I should say so. It stinks.

Mr. President, how can we obtain such perpetual rights of navigation, which are so essential, unless we conform to what the proponents of this measure say is necessary, namely, to proceed by way of treaty?

Mr. THYE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Minnesota?

Mr. ELLENDER. Mr. President, with all due respect, I think the Senator from Minnesota should know that I will not yield just now until I say I will.

The PRESIDING OFFICER. The Senator from Louisiana declines to yield.

Mr. ELLENDER. Mr. President, I believe it to be necessary and essential for this Congress to include in the pending measure a binding agreement by which it will be made certain and crystal clear that the people of Canada and the people of the United States will have perpetual rights of navigation in the so-called St. Lawrence seaway. I say that based on the views of the majority; for they themselves thought that was necessary; but in order to have the measure passed by the Congress, they now have said in effect, "We are willing to brush that aside temporarily, and let it be agreed to in the future between Canada and the United States."

With apologies I now yield to the distinguished Senator from Minnesota.

Mr. THYE. Mr. President, I do not recognize the danger because of the absence of a treaty, to which the Senator has referred. I do not recognize such a danger for the reason that the situation relative to the St. Lawrence seaway is not identical to that relative to the Panama Canal. In the case of the Panama Canal we were dealing with a country through which the Canal was to go, whereas in the present case we are dealing with a boundary river in which we have an interest and in which the other country, Canada, also has an interest. In the present case the major canal installations are to be made on our own soil. So we cannot properly foresee that the other country will forbid navigation on its one-half, when we own the other one-half. That situation is in no sense the situation in regard to the Panama Canal Zone.

So again I must differ with the Senator from Louisiana on the question of the importance of having a treaty with Canada before we proceed to develop the project or attempt to make the plans for its development, because the actual situation is that we own half of the river and we own all the land on which the major locks and dams are to be installed.

Mr. ELLENDER. Yes; but in order to reach the ocean, so as to make navigation feasible, it will be necessary for our ships to pass through Canada itself. Aside from the Great Lakes, the St. Lawrence borders our country for about 120 miles. The rest of its great length is entirely in Canada. Since the Senator has injected the Panama Canal, let me ask this question of the distinguished Senator from Minnesota: Suppose the Panama Canal had not been built, would the Senator agree to have the United States go to the extent of building that canal, installing the locks, and so forth, and then after the canal and the locks were built, deal with Panama as to the terms and conditions under which the United States could hold the necessary property and operate the canal?

Mr. THYE. That is what the Senator has been complaining of.

Mr. ELLENDER. No, Mr. President; the Senator has again missed the point. I am not complaining about anything, except as to the method of approach in the instant case. I am simply pointing out that I do not believe that the Senator would agree to build a Panama Canal, unless a solemn treaty was first entered into with the Republic of Panama.

We obtained possession of the property necessary to build the Canal from Panama by way of a treaty. We obtained a vested right in a strip of land running through Panama 10 miles wide from ocean to ocean. We got that authority before a spadeful of dirt or rock was removed from the canal site. In the case of the St. Lawrence seaway it has always come before the Senate by way of treaty except as to the resolution now before us. We first had our rights to perpetual navigation guaranteed, but now, as I pointed out, there is no such a guaranty respecting perpetual navigation. Under the pending resolution, we authorize the project, we agree to put up the money, the project may well be started, nay, it may be completed before the rights of navigation are dealt with finally. I say with all the force that is in me that the American people should have a vested right to perpetual navigation or the use of the St. Lawrence River in perpetuity, and it ought to be done before we spend a red sou on it. That right should be vested at the same time that the project is being authorized.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. AIKEN. Does the Senator not know that we have had a treaty since, I think, the year 1879, with Canada?

Mr. ELLENDER. Oh, yes; we have had many treaties with our good neighbor, Canada.

Mr. AIKEN. I refer to a treaty of navigation with Canada. And does the Senator not know that today we have to traverse Canadian waters every time an American ship puts in at Montreal?

Mr. ELLENDER. I do.

Mr. AIKEN. Does the Senator not know also that Canada can start charging us tolls on the Welland Canal, in a manner that will affect our Great Lakes shipping tomorrow?

Mr. ELLENDER. That is correct. But we likewise accord similar rights to Canada in the Great Lakes region.

Mr. AIKEN. Canada has never done that.

Mr. ELLENDER. No; but I will say to the Senator all that is under treaty. We have a vested right in that, but we do not have in this instance.

Mr. AIKEN. The development of the St. Lawrence River was authorized specifically in the treaty of 1909.

Mr. ELLENDER. Why this effort, may I ask? Why pass any sort of resolution if the authority to build exists?

Mr. AIKEN. Certain private and public interests have constructed dams, bridges, and channels, and have diverted water, and have developed tunnels, under that same treaty, but the validity of constructing these works under the 1909 treaty is questioned only when it is proposed to build a dam which will be owned by the public and operated for the public. So long as private interests wanted to operate under the provisions of that treaty, it was perfectly all right, but when you talk of developing power for the public, then the opponents raise their hands in horror and talk about dignity and sanctity and morality.

Mr. ELLENDER. Such a condition does not guide my action. I should like to see the power developed there, and I sincerely believe that it can be done without developing the transportation facilities now under discussion.

Mr. AIKEN. Is not the real reason that the Senator does not want the navigation developed because he wants to turn as much navigation as he can down the Mississippi, through the port of New Orleans?

Mr. ELLENDER. No; that is not the reason, but the Senator could likewise be accused of wanting to get power for Vermont. I am not that narrow in my views, and the Senator should know that of me by now.

Mr. AIKEN. I want to get power everywhere.

Mr. ELLENDER. I have kept clear of sectionalism.

Mr. AIKEN. Certainly we want power in Vermont.

Mr. ELLENDER. I want to say to the Senator that my concern is prompted by the fact that within the past several years we have been too liberal with our God-given natural resources and cash for the benefit of foreign nations. The Senator knows that.

Mr. AIKEN. We have been too liberal with some parts of our own country.

Mr. ELLENDER. There is a great deal of development that could be undertaken within our boundaries. We have had tremendous floods in Iowa and other of our Central States, and we have had tremendous floods in other sections of the country, but when we go to the Treasury with open hands and ask a little money to repair the damage or to protect ourselves from the ravages of recurring floods, we are told that the cost is too great and our national debt is too big, that we are spending it here and there, and do not have any money to spend for remedial measures.

Mr. AIKEN. Does the Senator from Louisiana think it was right that during the war years his own community, through the efforts of his distinguished colleague, who was chairman of the subcommittee on flood control, I believe, of the Committee on Commerce, received appropriations of $19,000,000? Let me quote from one of the Senator's colleague's election speeches, as reported in the Alexandria Daily Town Talk, Alexandria, La., Wednesday, August 9, 1944:

> OVERTON said that Congress had appropriated $19,000,000 for the fiscal year 1944, and $26,000,000 for fiscal 1945 for flood-control work on the lower Mississippi Valley, but that only a token payment of $100 has been allotted for all flood-control work outside of the Mississippi Valley.

Does the Senator think it was fair to get $45,000,000 for his own community, and cut off all the rest of the country with only a $100 token appropriation, at a time when we were at war, when boys were dying in blazing oil in the Caribbean, and when the whole country was making sacrifices?

Mr. ELLENDER. The Senator should know that the amount referred to took care of river work from Cairo, Ill., down to the mouth of the Mississippi River. I am sure the Senator is aware that all the waters of the States that border on the Mississippi, as well as all the waters from the tributaries of that great river, pass our doors, and it is necessary that Louisiana, as well as many other Southern States, be afforded some kind of protection. There is no doubt about the constant menace of flood, and I say that what has been spent is but a pittance compared with what should be spent in order to protect us from the floods coming down on us from the north.

Mr. AIKEN. I agree with the Senator.

Mr. ELLENDER. I think the money used for flood control is well spent, but every time we come to the Congress and ask for money to take care of those situations we have always been told that the national debt is too big; that we have to spend it here or have to spend it over yonder; that Europe needs it; that England needs it. We are told, in effect, "We cannot take care of you here at home." I want to try to reduce some of our foreign expenditures, if I can. I want to be more liberal with our own projects in this country.

Mr. AIKEN. That argument holds good as to New England, as well as to the Mississippi River Basin.

Mr. ELLENDER. Speaking about sectionalism, yes, I am sectional—I am for the United States. I would like to see a little more money spent here to benefit our own people, rather than sending too much of it abroad. I repeat, the Senator is well acquainted with what took place in the tremendous flood in Iowa, Illinois, and various other States in the central part of our country in recent months. Does the Senator not feel that it is high time for this Congress adequately to take care of the flood-control problem of this country?

Mr. AIKEN. The Senator mentioned the disaster in Iowa, but he understands that both Senators from Iowa are sponsors of a bill to develop the St. Lawrence, I suppose.

Mr. ELLENDER. Oh, I suppose there are in this body quite a few misguided Senators. I do not doubt that.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. ELLENDER. I desire to say that I intended to speak for only about 15 or 20 minutes. I have been on my feet for almost 2 hours.

Mr. WILEY. I will not take long.

Mr. ELLENDER. Very well. I yield.

Mr. WILEY. Mr. President, in relation to the matter of perpetual rights, it seems to me that the Senator was right in the spirit of his contention; but he failed to present the matter clearly, and I think anyone reading the RECORD would possibly get a wrong understanding. I want to say to the Senator that previously one of the great arguments that was made in this matter, that the matter should be handled by a treaty instead of a resolution approving an executive agreement was based on the fact that it involved at that time the very thing for which he now argues, a perpetual right. But if the Senator will turn to the joint resolution he is asked to pass upon, which is now before the Senate, he will see that in section 2 the President is instructed to negotiate with Canada a treaty or treaties with reference to perpetual navigation rights on the Great Lakes. There is an instruction of the House and the Senate to the President to do that very thing, and to bring back a treaty.

When the Senator says that the money provided will be spent before that has taken place, of course, that statement is subject to correction. The resolution does not appropriate a cent. What the resolution does is to start the machinery for the negotiation of a treaty for the perpetual rights, whereby the President will enter into an agreement with Canada in relation to tolls, and other matters. Money has already been spent on the project in the sense that engineering plans have been made. That money has been appropriated. But until the Senate and House appropriate the money for the project itself, the project can never really be gotten under way. So I want to make clear that while the Senator is right that the matter of perpetual right must be dealt with by treaty, the joint resolution instructs the President to undertake to negotiate such a treaty for that very purpose, and to bring it back to the Senate.

Mr. ELLENDER. I am glad the Senator admits that the right to perpetual navigation should be restored by treaty.

I am contending that the right to perpetual navigation, under the terms of the resolution, is left for the future, whereas it should be fixed now. A mere authority to make a treaty is not sufficient. We are asked to authorize the project. We may spend much money toward building the canal, and yet the right to perpetual navigation may be deferred indefinitely. Does the Senator think it is good business for us to build the canal and then let the President go to Canada to see Mr. Mackenzie King, if he is still there, and say, "Now, we are about through building the seaway we would like to have perpetual navigation rights." Why do we not do it now? Why is it not necessary that it be done now? Why is it not the sensible thing to do, to obtain perpetual navigation right at this time, before we undertake to spend another dime on the project. I should like the Senator to answer that question for me. Why does he not insist on the inclusion of article 7 of the Canadian-American agreement entered into in March 1941? That article, as I previously pointed out, provided for perpetual navigation. Oh, what is the use to argue? As I pointed out a while ago, the Senator consented to the elimination of article 7 to meet the view that it required the advice and consent of two-thirds of the Senate, because said article was considered to be a matter properly dealt with by means of treaty. What assurance has the Senator that this body is going to ratify a treaty later?

Mr. WILEY. I do not have any assurance.

Mr. ELLENDER. Of course, the Senator does not have assurance.

Mr. WILEY. No one else has that assurance.

Mr. ELLENDER. And the Senator does not have any assurance as to what Canada is going to do. Yet the Senator is willing to authorize the expenditure of millions upon millions of dollars for the purpose of navigation, and he is not willing in advance to guarantee to the American people and to the Canadian people a perpetual right of navigation.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. ELLENDER. I decline to yield further. I should like to conclude. If the Senator desires to answer my arguments, he may proceed in his own time.

Mr. President, what I have to say now has been more or less touched upon by me in answer to a few questions propounded during the course of the debate. I do not mean to practice, here on the floor of the Senate, sectionalism respecting the expenditure of public funds. I have telegrams that I propose to read in a moment from various ports located throughout the country, that are opposing the proposal, because they think it will be harmful.

For several years past, as I said a moment ago, we have often been told that funds could not be provided for the development of necessary projects within our own boundary, projects to protect our own people from floods and other disasters, because of the enormous debt that hangs over our heads. Why, there are those who are willing to put us into debt further and make it less possible for these vital projects to which I referred a while ago to be built in our own country. We have had a number of projects that were deemed necessary, the total cost of which to date is in excess of $3,500,000,000. Many of these projects have been approved years ago, but they have been subjected to continual delays, because we were told that the Treasury is empty, our national debt is enormous, and we cannot do it today. Notwithstanding that, the proponents of this measure are willing to put an extra pile on the debt we now owe, and make it less possible, as I have just indicated, for us to complete many of the projects that are essential to our own economy and which have been approved by those in authority.

Mr. JOHNSON of Colorado. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. JOHNSON of Colorado. The senior Senator from Arkansas [Mr. MCCLELLAN] said on the floor of the Senate yesterday that Congress had authorized inland construction amounting to more than $6,000,000,000; that that was the amount which the Congress had already authorized.

Mr. ELLENDER. I thank the distinguished Senator from Colorado for his contribution. I was under the impression the amount was about $3,500,000,000.

Mr. JOHNSON of Colorado. I was also, but the senior Senator from Arkansas said it was more than $6,000,000,000.

Mr. ELLENDER. I am glad to have that information placed in the RECORD at this point in my remarks.

Mr. President, I maintain that we ought to protect our own interests. It has been stated on the floor of the Senate by quite a few Senators that the majority of the vessels which are now owned by the United States will not be able to use the canal because it will not be deep enough; that it is going to be used by many small foreign vessels, tramp vessels, which carry freight here and there, which represent little investment, all of which will mean the taking away from our own people of some of the freight which should be carried by transportation means owned by our own citizens.

Just stop and think of the loss which would result to the railroads of the United States from the construction of the canal. There are many persons scattered throughout the United States who today own large amounts of railroad stocks and bonds. These investments will be impaired by the diversion of a considerable amount of the freight which would otherwise be carried over the railroads.

While the seaway is open to traffic for 7 months in the year there may be little for some railroads to carry, but while it is closed by ice, shippers are going to resort to the railroad systems to bring their goods to the ports. Think of what an impact that will be on some of our railroads.

Mr. President, that argument may be called an argument based upon sectionalism, but I do not think it is. I am arguing for the investors in our railroad systems, and for the people in our own country who have subscribed to the building of our immense water transportation systems.

Mr. President, I have a few telegrams which I propose to read into the RECORD in substantiation of what I have been speaking of as to the effect the project will have on the investments in many of the cities of our country. I read a telegram from New York under date of February 2, addressed to me, as follows:

NEW YORK, N. Y., *February 2, 1948.*
Senator A. J. ELLENDER,
Senate Office Building:

Proposed St. Lawrence seaway would divert 3,000,000 tons annually from New York harbor and seriously affect livelihood of 200,000

people dependent on port commerce and jeopardize investment of $1,000,000,000 in New York port facilities. The seaway would cripple the development of our merchant marine as United States flag vessels would not use it and would constitute important target difficult to defend in case of war instead of aid to defense of United States.

THOMAS JEFFERSON MILEY,
Secretary, Commerce and Industry Association of New York, Inc.

I now read a telegram from Boston, also dated February 2, addressed to me, as follows:

BOSTON, MASS., *February 2, 1948.*
Senator ALLEN J. ELLENDER,
Room 245, Senate Office Building, Washington, D. C.:

Port of Boston Authority strongly opposes St. Lawrence seaway proposal. Proposed seaway would inevitably divert substantial traffic from the existing Atlantic and Gulf ports on the strength of which this Nation depends. Investment in port facilities at port of Boston aggregating in excess of $100,000,000 is threatened by this costly part-time, wasteful, and diversionary proposal.

J. A. CROTHERS,
Director, Port of Boston Authority, Commonwealth Pier 5, Boston.

I read a telegram from my own State of Louisiana, from New Orleans:

NEW ORLEANS, LA., *February 3, 1948.*
Hon. ALLEN J. ELLENDER,
United States Senate:

This board desires that you register in Congress on our behalf our unqualified opposition to the passage of any legislation approving the construction of the St. Lawrence seaway. This board, as an agency of the State of Louisiana, in its operations of the port of New Orleans has issued bonds and has paid out of its own funds other than from bonds a total of $58,867,542 for the construction of wharves, sheds, buildings, machinery, canal construction, and acquisition of real estate. At the present time we consider this investment is valued at $117,735,094. It would be impossible to calculate in dollar value the harm to this port that would result from the St. Lawrence seaway, because of the loss of tonnage and diversion of traffic. Such a loss while incalculable would reach a staggering proportion when it is considered that an all-weather port like New Orleans would be so adversely affected in favor of the St. Lawrence seaway, which, at best, cannot support traffic more than 6 months out of the year. The conclusion should be inescapable to any fair-minded group that such a waterway is not in the interests of the people of the country as a whole, but in favor of a small section of the country.

E. O. JEWELL,
General Manager.

I read another telegram from Louisiana, sent from Lake Charles, as follows:

LAKE CHARLES, LA., *February 3, 1948.*
Senator ALLEN J. ELLENDER,
Washington, D. C.:

The Gulf Ports Association instructed me as its president to protest against passage of Senate Joint Resolution 111 or any other plan making use of Federal money for construction of St. Lawrence seaway. Written protests giving detailed and cogent reasons to back up the protest will be forwarded each United States Senator in tomorrow's mail. Texas Ports Association also filing like protest.

ALVA P. FRITH,
President, Gulf Ports.

To this telegram is attached a succinct statement signed by Mr. Alva P. Frith, president of the Gulf Ports Association, which gives a summary of reasons why the Senate should not adopt the pending proposal. I ask that this statement be incorporated in the RECORD at this point as a part of my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

GULF PORTS ASSOCIATION,
Lake Charles, La., February 2, 1948.

To the Members of the United States Senate and House of Representatives, Washington, D. C.

GENTLEMEN: The members of the Gulf Ports Association are disturbed about the injury to their ports, should Senate Joint Resolution 111 pass. I am instructed to place the association's views before you, and request that you do all possible to defeat Senate Joint Resolution 111, House Joint Resolution 192, House Joint Resolution 194, or any other plan for construction of St. Lawrence seaway that calls for use of Federal money.

There are many reasons why St. Lawrence seaway should not be constructed, but, wishing to be as brief as possible, I quote what the Gulf Ports Association membership consider the most important:

1. The proposed agreement is assertion of executive authority which, if permitted, will have far-reaching and injurious effect in many ways.

2. The tremendous cost and failure to produce the tonnage and service claimed by proponents will result in a reaction of public opinion that will be unfavorable to all future worth-while projects in other sections of the country.

3. When completed, the seaway would be tortuous, fog-ridden, and hazardous.

4. The seaway would be more vulnerable to air attack than any waterway in the United States.

5. Twenty-seven-foot depth is unsuitable for most United States vessels.

6. It would mostly be used by foreign-flag small vessels which would take tonnage now moving through Atlantic and Gulf ports. That would be detrimental to United States merchant marine, railroads, inland water carriers, and ports.

7. It would affect car-equipment situation by taking traffic from rail carriers during open season, but compelling them to handle during winter months.

8. Construction will hardly begin before proponents will be demanding a 35-foot channel. Numerous Great Lake ports will request improved harbor facilities.

9. The tremendous cost for a part-year seaway is unsound from every economic and transportation standpoint.

10. It would be unfair to transportation lines, without which the United States would have been defeated in World War II. Its construction would violate the principles enunciated by Congress in the national transportation policy.

11. The money spent to construct an expensive link to an icebound locality could be put to far better use in improving United States time-tested ports. Ports that proved their worth in peace and in the crucible of World War II.

Thanks for your kind consideration.
Respectfully submitted.

GULF PORTS ASSOCIATION,
By ALVA P. FRITH, *President.*

Mr. ELLENDER. I have another telegram, dated February 2, from Baltimore. It reads as follows:

BALTIMORE, MD., *February 2, 1948.*
Senator ALLEN J. ELLENDER,
Senate Office Building:

The city and port of Baltimore oppose the St. Lawrence seaway project as an unwise and improper national undertaking. Investment of some $200,000,000 in marine facilities by private and public interests here would be menaced, such facilities having been established to serve large sections of the country. Baltimore, like other major harbors, regards its port as a national service gateway and feels that the St. Lawrence proposal would impair its functions and hence be contrary to the best interests of the country as a whole.

G. H. POUDER,
Executive Vice President, Baltimore Association of Commerce.

Here is another from Buffalo, which I will read:

BUFFALO, N. Y., *February 4, 1948.*
Hon. ALLEN J. ELLENDER,
Senate Chamber:

The city of Buffalo reasserts its continued unqualified opposition to the proposed St. Lawrence seaway and power project. The port of Buffalo is the hub in the interchange of lake, canal, and rail traffic and its industry would be destroyed and employment greatly affected. This telegram is forwarded pursuant to unanimous resolution of the common council.

Dr. JOSEPH J. TRONOLONE,
City Clerk.

If that is your conception of sectionalism, I am for it.

Mr. President, I did not intend to speak as long as I did on this all-important subject. All the arguments pro and con have been covered time and time again. It is my honest belief that this proposal is unsound and impracticable and violative of our constitutional obligations. It is a waste of public funds and will do harm rather than good to our economy.

Mr. LODGE. Mr. President, I should like to make a brief announcement. Now that the junior Senator from Louisiana has concluded his speech, that marks the last speech that I know anything about on the part of Senators who are opposed to the project. All Senators who have told me that they desire to speak in opposition to the project have now done so, and so far as we are concerned we are ready to proceed to a vote. I wished to make that announcement so that Members of the Senate, ladies and gentlemen of the press, and the public would realize that so far as the opponents are concerned they are ready to proceed to a vote.

Mr. WILEY. Mr. President, I was not present yesterday afternoon when there was a slight altercation on the floor. When we started this debate, instead of pursuing the debate day after day, the Senate met on Monday, Wednesday, and Friday, and then went over until the following Monday. As a result, we are now in a jam. I am not ready to proceed to a vote, and I will tell the Senate why.

Two days ago the Senator from Massachusetts [Mr. LODGE] gave me a list of 12 or 13 Senators who would like to speak, and I gave him my list of 12 or 13 Senators. I shall ask my secretary to obtain a copy of both lists, and shall read them into the RECORD.

There was every indication that the debate would continue not only through this week, but into next week. Then I was informed that, under the general understanding in years past, during the week of February 12 there would be no voting. With that understanding in mind, I tried to obtain an agreement with the opposition to vote the following week.

I was unable to obtain such an understanding. However, we did obtain a firm understanding with the Senators from Massachusetts, who were leading the opposition, that there would be a vote on the 25th.

Mr. President, I owe an obligation to absent Senators and to Senators who will be absent in the near future. Many Senators are now absent. When they came to me they were informed of the situation. Some of them were Senators who expected to vote with the opposition.

So, putting on a "stunt" and declaring that "We are now ready to vote" does not appeal to me, when there was an agreement between us, and other Senators were informed of it.

Mr. President, I believe that all Senators understand the situation. It seems to me like stage play to say, "We are now ready to vote." I could not feel that I was keeping faith with my fellow Senators if I were to say that I was ready to vote.

Furthermore, there are distinguished Senators, including both Democrats and Republicans, yet to speak on this subject. We shall proceed with the debate. I was informed by the Senator from Nebraska [Mr. WHERRY] that at 4:30 o'clock he would present a unanimous-consent agreement, and that after that we would know just what the situation was.

In order that there may be no misunderstanding, I now state that I have before me the list of Senators who intended to speak against the pending measure. The list includes the Senator from Pennsylvania [Mr. MARTIN], the Senator from Nebraska [Mr. BUTLER], the Senator from Louisiana [Mr. OVERTON], the junior Senator from Maine [Mr. BREWSTER], the Senator from Arkansas [Mr. MCCLELLAN], the Senator from Maryland [Mr. O'CONOR], the senior Senator from Maine [Mr. WHITE], the Senator from Texas [Mr. CONNALLY], the Senator from Georgia [Mr. GEORGE], the Senator from New York [Mr. IVES], and the Senator from Maryland [Mr. TYDINGS]. I turned over to the Senator from Massachusetts my list, containing the names of the Senator from Kentucky [Mr. BARKLEY], the Senator from Michigan [Mr. FERGUSON], the Senator from Vermont [Mr. AIKEN], the junior Senator from Wisconsin [Mr. MCCARTHY], the Senator from Rhode Island [Mr. MCGRATH], the Senator from New Mexico [Mr. HATCH], the Senator from Illinois [Mr. LUCAS], the Senator from Utah [Mr. THOMAS], the Senator from Montana [Mr. MURRAY], the junior Senator from North Dakota [Mr. YOUNG], the senior Senator from North Dakota [Mr. LANGER], the Senator from Michigan [Mr. VANDENBERG], and the senior Senator from Wisconsin, who were to speak. Those are the facts.

Mr. LODGE. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. LODGE. Has not the senior Senator from Wisconsin spoken?

Mr. WILEY. I trust that the Senator knows the answer to that question. However, the Senator from Wisconsin has not exhausted his capacity. There are plenty of amendments on which to speak. I can speak twice on the joint resolution and twice on any amendment. I do not think the Senator would object to my speaking.

Mr. LODGE. I do not doubt the Senator's capacity to speak at length and with eloquence on almost any topic.

Mr. WILEY. I thank the Senator.

Mr. LODGE. Mr. President, the addresses of those on the list which the Senator has read, of Senators who were opposed to the pending measure and who desired to speak, have been completed, with the exception of that of the Senator from Pennsylvania [Mr. MARTIN], who told me that he did not care to speak. We have completed our arguments.

The list which the Senator from Wisconsin has read, of Senators who are in favor of the pending measure, is of approximately the same length as our list. Of course, the Senator from Wisconsin knows very well that if there were a real will to do so, it would not be difficult to conclude the addresses of those on that list today and tomorrow. It would not be any problem at all if there were a desire to do so.

Of course I agreed to vote on the 25th; but there is nothing inconsistent between my agreeing to vote on the 25th and my saying that I would rather vote today. The two are not inconsistent at all. There is no stage play or "stunt" about my announcement. I simply wished to announce, for the information of Senators and of the public, that the opponents of the pending measure had completed their presentation. I was not trying to indulge in any stage play. The Senator must be imagining such things because of some plan which he has. I do not know anything about that.

Mr. WILEY. Mr. President, I am glad that we have a thorough understanding that the 25th was agreed upon between us as the date upon which to vote. The only thing that remains to be carried through is the presentation to the Senate of the unanimous-consent request. With that, I yield the floor.

Mr. AIKEN obtained the floor.

Mr. WHERRY. Mr. President, will the Senator yield for a statement?

Mr. AIKEN. I was about to make a statement.

Mr. ELLENDER. Mr. President——

Mr. AIKEN. Mr. President, I have not yielded.

Mr. ELLENDER. Mr. President, may I inquire what the parliamentary situation is?

The PRESIDING OFFICER. The Senator from Vermont [Mr. AIKEN] has the floor. Does the Senator from Vermont yield to the Senator from Louisiana?

Mr. AIKEN. I yield.

Mr. ELLENDER. I should like to know what became of the agreement. Has it been presented?

Mr. WHERRY. I was about to present it.

The PRESIDING OFFICER. Does the Senator from Vermont yield; and if so, to whom?

Mr. AIKEN. Mr. President, I shall not consume as long in what I am about to say as will Senators who are asking me to yield.

No doubt it would be a very delightful arrangement to the opposition, having presented their case, to take a vote now before the proponents have an opportunity to present their case.

The Senator from Wisconsin [Mr. WILEY] has made a preliminary statement. The junior Senator from Wisconsin [Mr. MCCARTHY] has spoken; and perhaps one or two other brief speeches have been made by the proponents. But as yet I have been unable to obtain recognition even to speak once in behalf of the seaway. All I have said has been on borrowed time, usually in the form of questions of Senators who have had the floor. I wish to speak in support of this great development, and to set forth the reasons why we cannot afford to delay longer in securing approval of its construction.

I do not approve of any arrangement whereby a vote shall be taken as soon as the opposition has presented its case; and I do not approve of any move which may be made to obtain a vote on the measure after many of the proponents have left the city. As I understand, nearly 20 Senators have already left the city, after it was understood that February 25 was selected as a tentative date for taking a vote.

If such an agreement is not concurred in, but the opposition insists on taking advantage of the situation, I shall have to insist on the regular order of business for the next week, and suggest the absence of a quorum at every meeting of the Senate.

Mr. LODGE. Mr. President, I expect to be present all the time, anyway, so that it is immaterial to me whether the Senator from Vermont insists on the regular order. That does not bother me very much.

Mr. AIKEN. It does not bother me, either. I shall be here also.

Mr. LODGE. Let us be clear about the situation. I believe that more Senators who are opposed to this project are absent than are those who are in favor of it. We all know that no matter when we have a vote in the Senate there will be some Senators absent. I am simply trying to expedite the business of the Senate, and to make it clear to the country that in these days, when there are crises and so many loose bundles of dynamite all over the world, we are attending to business and not spending too many days on this proposition.

Mr. WHERRY. Mr. President, if the Senate will permit me at this time, I should like to say that it seems to me the solution of our problem is to find out whether the Senate can now enter into a unanimous-consent agreement to vote according to the agreement entered into between the proponents and opponents of the joint resolution. I think I am safe in making that statement now. We have had continuous debate upon the resolution for nearly 2 weeks. In view of the observations and representations which have been made by various Senators, I think it would be well to ascertain whether we can enter into a unanimous-consent agreement. I think the sooner we can do that the better off we shall be. If we cannot enter into such agreement, we will do something else, but

I think we should at least try. So, Mr. President, if it be in order, I should like to suggest that I am about to propose a unanimous-consent agreement; and in order to comply with the rules, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. THYE in the chair). The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Hawkes	O'Daniel
Baldwin	Hayden	O'Mahoney
Barkley	Hill	Overton
Bricker	Hoey	Reed
Bridges	Ives	Revercomb
Brooks	Jenner	Robertson, Va.
Buck	Johnson, Colo.	Robertson, Wyo.
Bushfield	Johnston, S. C.	Russell
Butler	Kem	Smith
Byrd	Kilgore	Sparkman
Cain	Knowland	Stennis
Capper	Langer	Stewart
Chavez	Lodge	Taft
Connally	Lucas	Taylor
Cooper	McCarthy	Thomas, Utah
Cordon	McClellan	Thye
Donnell	McFarland	Tobey
Downey	McKellar	Tydings
Dworshak	McMahon	Umstead
Eastland	Magnuson	Vandenberg
Ecton	Martin	Watkins
Ellender	Maybank	Wherry
Flanders	Millikin	Wiley
Fulbright	Moore	Williams
George	Morse	Wilson
Green	Murray	Young
Gurney	Myers	
Hatch	O'Conor	

Mr. WHERRY. I announce that the Senator from Michigan [Mr. FERGUSON] is absent by leave of the Senate.

The Senator from Indiana [Mr. CAPEHART], the Senator from Maine [Mr. BREWSTER], and the Senator from Massachusetts [Mr. SALTONSTALL] are necessarily absent.

The Senator from Minnesota [Mr. BALL] is absent because of illness.

The Senator from Iowa [Mr. HICKENLOOPER] is absent by leave of the Senate on official business of the Joint Committee on Atomic Energy.

The Senator from Nevada [Mr. MALONE] is absent by leave of the Senate on official business of the National Resources Economic Subcommittee of the Committee on Interior and Insular Affairs.

Mr. LUCAS. I announce that the Senators from Florida [Mr. HOLLAND and Mr. PEPPER] and the Senator from Nevada [Mr. MCCARRAN] are absent by leave of the Senate.

The Senator from Rhode Island [Mr. MCGRATH] is absent on public business.

The Senator from Oklahoma [Mr. THOMAS] and the Senator from New York [Mr. WAGNER] are necessarily absent.

The PRESIDENT pro tempore. Eighty-two Senators having answered to their names, a quorum is present.

Mr. WHERRY. Mr. President, prior to the quorum call, I announced that I felt the time had arrived when we should clarify the question as to whether it would be possible to enter into a unanimous-consent agreement. I said then that after the quorum call, which is required by the rule, we would take up the proposed unanimous-consent agreement which has been agreed to by the proponents and the opponents of the pending measure.

I now ask that the proposed agreement be read for the information of the Senate.

The PRESIDENT pro tempore. The proposed agreement will be read.

The Chief Clerk read as follows:

Ordered, by unanimous consent, That on the calendar day of Friday, February 27, 1948, at the hour of 4 o'clock p. m., the Senate proceed to vote without further debate upon (1) any amendment that may be pending; (2) upon any amendment that may be proposed, subject to the provision hereinafter named, following which the engrossment and third reading of the joint resolution shall be considered as ordered; and (3) upon the final passage of the joint resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

Ordered further, That after the adoption of this order, no amendment that is not germane or relevant to the said joint resolution shall be received; and that no amendment shall be received to said joint resolution which has not on or before February 23, 1948, been submitted as an amendment intended to be proposed thereto and ordered to lie on the table and be printed: *Provided,* That a motion to recommit the said joint resolution shall only be in order on February 23, but a vote thereon shall not be had prior to February 27, 1948.

Ordered further, That on said calendar day of February 27, the time intervening between 12 o'clock and 4 o'clock p. m. shall be equally divided between the proponents and the opponents of said joint resolution, to be controlled, respectively, by the Senator from Wisconsin [Mr. WILEY] and the Senator from Massachusetts [Mr. LODGE].

The PRESIDENT pro tempore. Is there objection to the proposed unanimous-consent agreement?

Mr. MORSE. Mr. President, reserving the right to object, I am pleased to inform the Chair that I find myself in complete agreement with the proposed unanimous-consent agreement. I say that as one who ordinarily objects to unanimous-consent agreements to limit debate in any way. However, I think it is perfectly clear that in this instance ample time for full debate has been offered the proponents and the opponents of the pending measure. The agreement itself provides for a further extension of time, so as to make available to any Senator an opportunity between now and the date stated in the agreement to make any speech he wishes to make on any side of the issue; and certainly the agreement also safeguards another matter in which the junior Senator from Oregon is always interested, namely, the question of providing ample time for the people of the country to make their views and their wishes known on any measure pending before the Senate.

Because this proposed agreement, in my opinion, provides all those safeguards, I am very happy to join in it, and not to make the objection which usually it is my policy to make in regard to proposed unanimous-consent agreements to limit debate.

Mr. MCCLELLAN. Mr. President, reserving the right to object, I should like to propound a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. MCCLELLAN. I wish to know whether, under the terms of the proposed agreement, amendments to the pending joint resolution which are not germane to it would be in order.

The PRESIDENT pro tempore. The Chair is advised by the Parliamentarian that in the event the proposed unanimous-consent agreement is entered into, no amendment not germane will be in order.

Mr. MCCLELLAN. I thank the Chair.

The PRESIDENT pro tempore. Is there objection to the proposed unanimous-consent agreement?

Mr. LODGE. Mr. President, reserving the right to object—although I shall not do so—let me state that I have agreed as to the proposed date with the Senator from Wisconsin [Mr. WILEY]. I wish the date were set much earlier; I should like to see a vote taken today or tomorrow, for I think the issues have been very thoroughly set forth. I think it is most unusual to keep a measure dragging along in the way proposed in the present case; but, of course, it is better to have a vote taken on the 27th of February than never to have any vote at all. So I am glad to give my concurrence.

The PRESIDENT pro tempore. Is there objection to the proposed unanimous-consent agreement? The Chair hears none, and the order is made.

Mr. THOMAS of Utah obtained the floor.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. THOMAS of Utah. I yield to the Senator from Nebraska.

Mr. WHERRY. Mr. President, I have been informed by the Senator from Utah that he would like to present his argument tomorrow morning. I feel that the hour has arrived, unless there is other business to come before the Senate, when the Senate should take a recess until noon tomorrow.

ANTIDISCRIMINATION LEGISLATION

Mr. MORSE. Mr. President, I ask unanimous consent to have published in the body of the RECORD at this point in my remarks a telegram which I have received from Mr. R. R. Church in connection with the Ives-Fulton antidiscrimination bill.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C., *January 15, 1948.*

Hon. WAYNE MORSE,
Senate Office Building,
Washington, D. C.:

From the standpoint of winning and holding the confidence of the colored electorate and other minority groups, including Catholic, Protestant, and Jewish organizations, it is imperative that the Ives-Fulton bill, S. 984, against racial and religious discrimination in employment, be made the No. 1 must at this session of the Congress. The antilynch and the anti-poll-tax bills are desired by colored people and should be passed; however, neither directly affects millions of colored voters, in doubtful Northern States and districts where they vote. Let me repeat, in doubtful Northern States. On the other hand, the Ives-Fulton bill means something definite for every one of them. It means fair job opportunity, promotion opportunity, wiping

out wage discrimination, wiping out discrimination in labor unions. It means better housing, food for the table, shoes for the baby; in other words, it is the practical payoff on Republican promises. Here is another important angle. The other two bills, while most desirable and should be enacted, have been promoted by groups including Communist-infiltrated organizations. The Ives-Fulton bill against discrimination has been backed by non-Communist and anti-Communist groups, and they have argued that the Ives-Fulton bill is the insurance against communism. Now, if either of the other two bills are moved by the Republican majority, and the Ives-Fulton bill is not, all minority groups are going to say that the Communist Party pays off better than non-Communist organizations and that the Republican Party pays more attention to the Communist-backed operations than to others. This is being said already. The issue of fair employment is a human one which involves economic, social, and moral justice for more than 20,000,000 members of minority groups. It has the active support of labor, religious, racial, civic, and welfare groups representing a majority of the American people, and will do more to insure the return of the colored electorate to our party than any other legislation before the Congress and should be made the test ahead of the showdown on the suggested change in the Senate rule. As a lifelong Republican and chairman of the only national colored Republican organization in America, with membership in 38 States and the District of Columbia, let me urge and implore you, as a member of the Republican policy committee of the Senate, to make the Ives-Fulton bill first on your program for minorities, not only because it was promised in our national platform but also and more particularly for the good of our great country and our party.

R. R. CHURCH.

CONDITIONS IN PALESTINE

Mr. MURRAY. Mr. President, I wish to address the Senate briefly on a situation which is alarming the American people and the whole world.

The 2 months since the partition plan for Palestine was adjudicated by the General Assembly of the United Nations have seen a tragic story unfold itself in the Holy Land. Chaos, confusion, and anarchy reign now in Palestine. This is unfortunate not only because of the nature of the disorders, but because the progress initially made toward solving the problem of Palestine's future has bogged down and is in danger of complete break-down.

In accepting the responsibility to adjudge the Palestine question, the United Nations grasped this thorny problem squarely and with determination. By its courage and decisiveness it accomplished the seemingly impossible. It resolved once and for all what 19 previous investigatory and international bodies were unable to do. It laid the ground work for the final settlement of the Palestine problem. By its approval of a compromise plan to partition the Holy Land into separate Jewish and Arab states with economic union, it took the problem of Palestine out of the arena of power politics and sent it well on the road toward a final and lasting solution.

It is sad to note, however, that what was begun in such a splendid manner is now in imminent peril. Although the Arab forays from Syria, Lebanon, and Transjordan constitute undeniable acts of aggression, the matter was never introduced in the Security Council of the United Nations. And although these acts of violence were directed against a decision of the United Nations Assembly itself, there is still no reaction from that international body. I am afraid there has been a dereliction of duty.

An equal party to this dereliction has been our own Government. Though we are a leading member of the United Nations, quick to uphold the Charter and to castigate aggression in every other case, not a squeak did we raise in the present case. And though we are deeply committed to the partition plan for Palestine—by virtue of the strong position we assumed in its behalf at the General Assembly of the United Nations—our only recent acts directed toward Palestine have been in the direction of hindering rather than implementing this United Nations-approved plan. Our Government has placed embargoes in front of the Jews of Palestine who are fighting desperately to defend their lives and uphold the decision of the United Nations. Our State Department has issued a directive to the effect that American Jewish volunteers who desire to aid their brothers in the Holy Land would be penalized by possible forfeiture of their American citizenship.

These unfriendly demonstrations by our Government are neither consistent with American traditions, nor are they in harmony with our official policies with reference to Palestine.

If American Jewish boys want to help in the fight for Jewish survival in Palestine, why should State Department bars be put in their way? What neutrality can they be accused of violating? The present struggle in the Holy Land is not a private fight. It is a conflict between those who are for the United Nations and those who are against it.

And if the United States of America is not formally involved, and if the United Nations has not yet taken proper action, there is certainly nothing but admiration which we should show for those brave American boys of Jewish parentage who throw themselves into the fight as private individuals. It has been done before. We all recall how great numbers of American private citizens, with the moral encouragement of the American people, volunteered without any threats of forfeiture of citizenship, in the defense of Finland, of England, and of France at a time when our country was neutral. I, for one, want to salute these boys. By acting as they do, they show that they have indeed absorbed the lesson of red-blooded Americanism. But as for the odd attitude of the State Department—a mixture of unbecoming timidity toward the Arabs and thinly disguised disapproval toward the Jews—I do not understand it and I do not like it. Our domestic law does not require it. International law does not call for it. The international situation, difficult as it is, does not demand it. Our dignity and integrity suffer from it.

Mr. President, we were a great and influential party to the partition of Palestine. It does not behoove us to now put any impediments in the way of its full and expeditious implementation.

Mr. CHAVEZ. Mr. President, will the Senator yield?

Mr. MURRAY. I yield.

Mr. CHAVEZ. Does not the Senator from Montana feel satisfied, in his own mind at least, that if it had not been for the position taken by the United States, possibly the decision of the UN would have been different?

Mr. MURRAY. That I think is a correct conclusion to draw from the facts. I think we were very strongly instrumental in the decision taken, and we should uphold that decision.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting a nomination and withdrawing a nomination were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had agreed to a concurrent resolution (H. Con. Res. 146) authorizing the Clerk of the House, in the enrollment of the bill (H. R. 1634) to amend section 1, and provisions (6), (7), and (8) of section 3, and provision (3) of section 4 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," and to add sections 5a, 5b, and 5c thereto, to make certain corrections.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 664. An act for the relief of Mr. and Mrs. Edward H. Isenhart;

S. 1005. An act to amend the act of June 28, 1935, entitled "An act to authorize participation by the United States in the Interparliamentary Union";

S. 1394. An act to provide increased subsistence allowance to veterans pursuing certain courses under the Servicemen's Readjustment Act of 1944, as amended, and for other purposes; and

S. 1411. An act for the relief of Willie Ruth Chapman.

EXECUTIVE SESSION

Mr. WHERRY. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting the nomination of Rear Adm. Edwin D. Foster, Supply Corps, United States Navy, to be Paymaster General and Chief of the Bureau of Supplies and Accounts in the Department of the Navy, with the rank of rear admiral, for a term of 4 years; and withdrawing the nomination of Miss Jane E. Steuart to be postmaster at Irvine, Pa., which nominating message was referred to the Committee on Armed Services.

(For nomination this day received, see the end of Senate proceedings.)

The PRESIDENT pro tempore. Are there any reports of committees? If not, the nominations on the Executive Calendar will be stated.

HAWAII

The legislative clerk read the nomination of Albert M. Cristy, of Hawaii, to be second judge, first circuit, Territory of Hawaii.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of John E. Parks, of Hawaii, to be third judge, first circuit, Territory of Hawaii.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Cable A. Wirtz, of Hawaii, to be circuit judge, second circuit, Territory of Hawaii.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

UNITED STATES ATTORNEYS

The legislative clerk read the nomination of Percy C. Fountain to be United States attorney for the southern district of Alabama.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of William W. Hart to be United States attorney for the eastern district of Illinois.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Howard L. Doyle to be United States attorney for the southern district of Illinois.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

UNITED STATES MARSHALS

The legislative clerk proceeded to read sundry nominations of United States marshals.

Mr. WHERRY. Mr. President, I ask that the nominations be confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the nominations are confirmed en bloc. That completes the Executive Calendar.

Mr. WHERRY. Mr. President, I ask that the President be immediately notified of the nominations this day confirmed.

The PRESIDENT pro tempore. Without objection, the President will be so notified.

RECESS

Mr. WHERRY. Mr. President, I move that the Senate take a recess until tomorrow at 12 o'clock noon.

The motion was agreed to; and (at 4 o'clock and 9 minutes p. m.) the Senate took a recess until tomorrow, Thursday, February 5, 1948, at 12 o'clock meridian.

NOMINATION

Executive nomination received by the Senate February 4 (legislative day of February 2), 1948:

DEPARTMENT OF THE NAVY

Rear Adm. Edwin D. Foster, Supply Corps, United States Navy, to be Paymaster General and Chief of the Bureau of Supplies and Accounts in the Department of the Navy, with the rank of rear admiral, for a term of 4 years.

CONFIRMATIONS

Executive nominations received by the Senate February 4 (legislative day of February 2), 1948:

HAWAII

CIRCUIT COURTS, TERRITORY OF HAWAII

Albert M. Cristy, to be second judge, First Circuit, Circuit Courts, Territory of Hawaii.

John E. Parks, to be third judge, First Circuit, Circuit Courts, Territory of Hawaii.

Cable A. Wirtz, to be circuit judge, Second Circuit, Circuit Courts, Territory of Hawaii.

UNITED STATES ATTORNEYS

Percy C. Fountain, to be United States attorney for the southern district of Alabama.

William W. Hart, to be United States attorney for the eastern district of Illinois.

Howard L. Doyle, to be United States attorney for the southern district of Illinois.

UNITED STATES MARSHALS

Felipe Sanchez y Baca, to be United States marshal for the district of New Mexico.

Gerald K. Nellis, to be United States marshal for the northern district of New York.

Theodore B. Werner, to be United States marshal for the district of South Dakota.

Leland Stanford Finney, to be United States marshal for the western district of Virginia.

WITHDRAWAL

Executive nomination withdrawn from the Senate February 4 (legislative day of February 2), 1948:

POSTMASTER

Miss Jane E. Steuart, to be postmaster at Irvine, in the State of Pennsylvania.

HOUSE OF REPRESENTATIVES

WEDNESDAY, FEBRUARY 4, 1948

The House met at 12 o'clock noon.

Rev. Father E. Carl Lyon, of the Shrine of the Most Blessed Sacrament, Chevy Chase, Washington, D. C., offered the following prayer:

That the will of God be done.

In the name of the Father, Son, and the Holy Ghost. Amen.

Almighty and Eternal God, grant to us Your grace, that it may be with us and work with us and remain with us to the very end. Grant that we may always desire and will that which is most acceptable and pleasing to You. Let Your will be ours. Let our will always follow Yours and agree perfectly with it. In our deliberations regarding laws that affect both men and country, may the light of Thy holy will serve as our guide, so that all the laws framed for our rule and government may tend to the preservation of peace and the promotion of national happiness. If what we do be pleasing to You, then so be it. If it be to Your honor, then be it done in Your name. If it be expedient and profitable for us and our fellow men, then grant that we may use it for Thy greater glory. May our resolution be—not our will, but Thine be done, O Lord.

In the name of the Father, Son, and the Holy Ghost. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the President pro tempore has appointed Mr. LANGER and Mr. CHAVEZ members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers in the following departments and agencies:

1. Department of Agriculture.
2. Department of the Air Force.
3. Departments of the Army and the Air Force.
4. Department of the Navy.
5. Housing and Home Finance Agency.
6. National Archives.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 1796) entitled "An act to provide for the preservation of the frigate *Constellation* and to authorize the disposition of certain replaced parts of such vessel as souvenirs, and for other purposes"; requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. SALTONSTALL, Mr. BALDWIN, and Mr. BYRD to be the conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 1393) entitled "An act to increase the permitted rate of allowance and compensation for training on the job under Veterans Regulation No. 1 (a), as amended"; requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. TAFT, Mr. BALL, Mr. MORSE, Mr. THOMAS of Utah, and Mr. HILL to be the conferees on the part of the Senate.

EXTENSION OF REMARKS

Mr. CASE of South Dakota asked and was given permission to extend his remarks in the RECORD and include an address given by the distinguished Speaker of the House to the conference of small-business organizations meeting in Washington.

Mr. POULSON asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. HOFFMAN asked and was given permission to extend his remarks in the Appendix of the RECORD.

CAMPAIGN CONTRIBUTIONS

Mr. HOFFMAN. Mr. Speaker, I ask unanimous consent to address the House

for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN. Mr. Speaker, former Gov. Harold Stassen has performed a worth-while service in calling the attention of the people and the Congress to the fact that there is the possibility that someone in the executive department with inside information may have been making a profit for himself through the use of that information. I think that was well worth while. He aroused my curiosity when he got on that question of the source of the income of certain gentlemen. I would like to ask the gentleman, Mr. Stassen, to tell the people and the Congress who is financing his campaign for the Presidency, which is costing hundreds of thousands of dollars. Just who, Mr. Stassen, is paying the freight?

This is no reflection on you or on them, but who puts up the "dough"?

EXTENSION OF REMARKS

Mr. MERROW asked and was given permission to extend his remarks in the RECORD and include an editorial.

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. WOLVERTON. Mr. Speaker, I ask unanimous consent that the Committee on Interstate and Foreign Commerce may hold hearings this afternoon during general debate on the pending legislation.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

THE OIL SITUATION

Mr. WOLVERTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection

Mr. WOLVERTON. Mr. Speaker, I am submitting today a progress report of the Committee on Interstate and Foreign Commerce on the current fuel situation. This report is in accord with the commitment the committee made to the House last week at the time a preliminary report was filed, that a prompt further report would be made on just what action had been taken by the various departments and agencies along the lines of the nine-point program adopted by the committee last December to meet the present fuel-oil situation.

The committee is gratified with the expeditious action thus far taken as reported to it by these agencies. The committee finds, however, from such reports that 11 additional specific matters should be studied promptly and appropriate action taken. Briefly, these recommendations relate to:

First. Immediate investigation of national and local increases in fuel-oil prices.

For some time the committee has been alarmed over the prospect that petroleum prices might be increased exorbitantly in the face of impending and actual shortages. Within the past few weeks complaints from many consumers show this very thing has happened. A study of the subject should reveal the facts. Steps should then be taken to protect unwarranted Nation-wide price increases by the industry and overreaching on the part of individual companies and dealers in shortage areas.

Second. Close attention to the possible use by the major oil companies of present and future oil shortages to undermine the competitive position of independent refiners and dealers.

The committee has heard that major oil companies sometimes are refusing to sell crude to independent refiners except under so-called processing contracts, which obligate the independent to sell back the more desirable products to the supplying company. Sometimes, it is also reported, dealers and consumers have been unable to obtain fuel oil from the customary independent refinery suppliers only to have it offered to them by major company outlets. The Secretary of the Interior and the Attorney General must exercise continuing care that any voluntary agreements entered into under the present emergency do not inadvertently undermine the independents.

Third. Immediate call by the Secretary of the Interior for a report by the industry of the industry's program to meet the shortages of gasoline for agricultural and other uses which the Department states will occur this spring and summer.

Fourth. Immediate consideration by appropriate governmental authorities as to whether steel should not be allocated for expanded petroleum production, refining, and distribution facilities rather than for petroleum-consuming equipment.

Fifth. An immediate survey by the Maritime Commission of the adequacy of the tanker fleet to meet the next and ensuing years' petroleum transportation requirements with particular regard to additional tanker construction necessary in case existing and proposed Middle East pipe lines cannot be operated.

Sixth. Prompt reorganization by the Department of Commerce of its entire export-control procedures over petroleum and its products.

The committee is gratified by the action thus far taken on its December program by the departments and agencies concerned, namely, substantial reduction in exports; reduction in military take; release of Navy tankers through its repair of others; additional tankers in the east-coast trade; coordination with State fuel administrators; establishment of voluntary industry allocation program calling for maximization of crude-oil runs, adjustment of refinery yields to provide maximum fuel oils at the expense of gasoline, and equitable distribution among customers of available supplies of fuel oil; Federal conservation of fuel oil; and more efficient utilization of railroad tank cars.

I wish to reiterate the committee's belief that the problem essentially is that there is a basic shortage of crude oil to meet the Nation's tremendously increasing demand. Immediate action should be taken on the resolution which I have introduced to establish a joint congressional committee to go into the entire fuel picture and formulate a national fuel policy, treating with both these emergency situations and the long-range problem.

Mr. WALTER. Mr. Speaker, will the gentleman yield?

Mr. WOLVERTON. I yield to the gentleman from Pennsylvania.

Mr. WALTER. Can the gentleman explain what effect the transfer of the B'g and Little Inch facilities to the use of gas had on this oil shortage?

Mr. WOLVERTON. In the time allotted to me it would be impossible to give a full statement with reference to that. I will assure the gentleman, however, that it is the intention of the committee to give full consideration to the whole subject of natural gas as a source of fuel, as well as to all the elements that enter into the problem, including the subject of transportation by pipe line or otherwise.

THE LATE HONORABLE B. G. LOWREY

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and that other of my colleagues who so desire may extend their remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTEN. Mr. Speaker, during the fall recess of the Congress, my State and the Nation lost one of its finest public servants, Hon. B. G. Lowrey, formerly Representative from the district which I now have the honor to represent. Mr. Lowrey died at Lewisburg, in De Soto County, on September 2. Mr. Lowrey represented the Second District of Mississippi for 8 years. During that period of service his work was outstanding in the Congress, and his contributions to the Nation and to the national welfare will be with us for a long time.

Mr. Lowrey was a splendid southern gentleman, possessed of a ready wit. His southern stories, his excellent character, and his kindness and understanding caused him to be a true representative of our section, one that reflected credit on the State from which he came and to the ideals which he held.

His work in the Congress was outstanding, but perhaps the service he held most dear was his connection through the years with one of the outstanding colleges of Mississippi, the Baptist college at Blue Mountain, Miss. This school was founded many years ago for young women and its influence and that of the Lowrey family on the young women who attended this institution have made a finer Mississippi and a finer Nation.

Mr. Lowrey was born May 25, 1862, at Kossuth, Miss., the eighth of 11 children born to Rev. Mark Perrin Lowrey and Sarah Holmes Lowrey. He was educated at Blue Mountain Male Academy, Mississippi College, and Tulane University.

He was largely instrumental in establishing Baptist Memorial Hospital, Memphis, Tenn., and served as president of Blue Mountain College and the Amarillo Military Academy, Amarillo, Tex. He

was founder and first president of the board of trustees of Mississippi Heights Academy at Blue Mountain. He was also coauthor of a book titled "Mississippi" which was adopted by the department of education for use in various schools.

Hon. Bill G. Lowrey lived to the ripe age of 85 years, having a life span that comes to few men. Be it said of him that he made the most of his life, and each and every year was spent in Christian living and application of his talents and ability for the improvement of the people of his country. He leaves for all a shining example of Christian leadership. His 13 years as president of Blue Mountain College fit well into the glorious history of that institution. The splendid work that he did there has been carried on by members of his family.

Though we are never ready to lose a man of Dr. Lowrey's capacity, we can in such loss realize that his life was a life of service, and the world is better by reason of his having lived.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Mississippi.

Mr. RANKIN. Mr. Speaker, I certainly subscribe to everything the gentleman has said about Dr. B. G. Lowrey. I served with him in this House for 8 years. He was one of the finest Christian gentlemen I have ever known.

With the milestones along the highway of life becoming monuments to departed friends, we are prone to look back over those golden years, and appreciate more fully what we gained by our association with such men as B. G. Lowrey.

I am reminded of Thomas Moore's golden lines when he said:

Let Fate do her worst; there are relics of joy,
Bright dreams of the past, which she cannot destroy,
Which come in the night-time of sorrow and care
And bring back the features that joy used to wear.

Long, long be my heart with such memories filled!
Like the vase in which roses have once been distilled,
You may break, you may shatter the vase, if you will,
But the scent of the roses will hang 'round it still.

Mr. ABERNETHY. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Mississippi.

Mr. ABERNETHY. I want to join with the gentleman in mourning the death of this distinguished Mississippian. It was not my privilege to know Dr. Lowrey so well personally, but I did know him well by reputation. He came from one of the outstanding and most cultured families of our State. The family has contributed much to the spiritual, economic, and political life not only of Mississippi but of the entire country. Dr. Lowrey rendered a valuable service in the Congress. After his retirement he rendered a valuable service as clerk of our Federal court. He lived a useful life which we would do well to emulate. I regret very much to learn of his passing.

Mr. WHITTINGTON. Mr. Speaker, former Representative B. G. Lowrey, of Mississippi, was born on May 25, 1862, and passed away after a lingering illness, while Congress was in recess on September 2, 1947.

After attending the public schools and Blue Mountain Academy, Blue Mountain, Miss., he was graduated from Mississippi College, Clinton, Miss., in 1887. He was for many years in each position, professor of English, vice president and president of Blue Mountain College, one of the leading female colleges of Mississippi. He also served as president of the Amarillo Military Academy, Amarillo, Tex., for some 5 years. He was prominent in educational and Christian activities in Mississippi and the South for two generations.

He was elected to the Sixty-seventh Congress and reelected to the Sixty-eighth, Sixty-ninth, and Seventieth Congresses, and thus served from March 4, 1921, to March 3, 1929.

Former Representative Lowrey sprang from one of the most prominent families of Mississippi. His father was a well-known educator and a leading Baptist minister. He held many positions of trust in the denomination. He was a brave soldier and a most efficient officer in the Confederate Army. At the conclusion of hostilities he was brigadier general.

The Lowrey family are best known in Mississippi as educators. Representative Lowrey's brother, W. T. Lowrey, was a great teacher as well as an eminent minister. His sister was known as Mother Berry and was a teacher in Blue Mountain College for more than a half century. No woman in all the history of the State was ever more beloved or more highly esteemed.

My relations with B. G. Lowrey and with the Lowrey family were always cordial. We were all Baptists. We were both graduates of Mississippi College at Clinton, Miss. We were associated in denominational and educational work for many years.

Representative Lowrey had been a Member of Congress 4 years when I was elected to the Sixty-ninth Congress. He was industrious and faithful in the discharge of his congressional duties. No man was held in higher esteem by his colleagues. He was preeminently a Christian statesman.

He became clerk of the United States District Court in Missisippi after he retired from Congress. For some years his health had not been good. His death was not unexpected. He was gathered unto his fathers, full of years and honors, in his eighty-sixth year.

I gladly pay tribute to the high character and to the splendid service of my friend and former colleague, the late lamented B. G. Lowrey, of Mississippi.

Mr. WINSTEAD. Mr. Speaker, although I did not have the privilege of being intimately associated with Dr. B. G. Lowrey, as were some of my colleagues, he is well known to all Mississippians by reputation. He was a former Member of this House, the son of the founder of Blue Mountain College, the third president of that great institution, and at one time president of the Southern Baptist Convention.

Dr. Lowrey was a member of one of the most prominent families in Mississippi and was himself a great leader in both educational and religious activities.

Dr. Lowrey was elected Congressman from the Second District of Mississippi in 1920 and was reelected to this office three times. He later served as clerk of the United States District Court of the Northern District of Mississippi.

Few men have ever rendered a greater service to the people of our State, nor been more beloved than was Dr. Lowrey.

EXTENSION OF REMARKS

Mr. BYRNE of New York asked and was given permission to extend his remarks in the RECORD and include a statement from the Evangelist, of Albany, N. Y., regarding universal military training.

Mr. LANE asked and was given permission to extend his remarks in the RECORD in two instances and include in one a letter from a constituent on American relief for Poland and in the other an editorial from the Lynn Item.

Mr. KLEIN asked and was given permission to extend his remarks in the RECORD.

Mr. RAINS asked and was given permission to extend his remarks in the RECORD and include a magazine article.

Mr. RICH asked and was given permission to extend his remarks in the RECORD and include an editorial from the Bristol Courier of Wednesday, January 28, entitled "Russia's Secret Pacts."

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD and include an editorial from the Oregon Journal.

Mr. YOUNGBLOOD and Mr. TEAGUE asked and were given permission to extend their remarks in the RECORD.

SPECIAL ORDER GRANTED

Mr. LANE. Mr. Speaker, I ask unanimous consent that today, following any special orders heretofore entered, I may be permitted to address the House for 15 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

THE PRESIDENT'S MESSAGE

Mr. ABERNETHY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include two telegrams.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. ABERNETHY. Mr. Speaker, with the forthcoming November elections eagerly eyed, leaders of the two major parties find themselves bartering for minority votes. By November both parties will have quite forgotten the rights and privileges of the great majority of the American people who do not, for the purpose of special privilege, affiliate themselves with so-called minorities. Party platforms will as usual be filled with glowing promises and lures for the minority vote.

The President came forth with a strong bid in his message of February 2. This message in effect offers to trade the South, which constitutes the front line of the Democratic Party, for minority support, particularly the Negro vote.

Southerners who have long been loyal to the Democratic Party will not permit themselves to become an object of barter for the support of radical minorities. We are not going to take this threat to our heritage lying down. And the policy makers in the Democratic Party, whomever they may be, might as well take note of this fact.

I have suggested in a telegram to the Governor of my State that there be a show-down on the question with leaders of the Democratic Party. My colleague, Hon. JOHN BELL WILLIAMS, endorsed the proposal in a similar message. The messages are as follows:

FEBRUARY 3, 1948.

Hon. FIELDING WRIGHT,
Governor, Jackson, Miss.:

If there is any doubt in the minds of the southern people that the present leaders of the Democratic Party are hell-bent on bartering or destroying us, our southern institutions, and traditions for the support of radical Negro minorities, then they need only examine the message which the President sent to the Congress yesterday recommending among other things immediate enactment of the FEPC, anti-poll-tax, and antilynching bills and breaking down of segregation of the races. The Republicans don't give a hoot about us, and, from the accumulation of insults over the years, summarized and restated in yesterday's message, it is apparent that our Democratic leaders care less. The situation today is more serious than ever before. My heritage means more to me than just a possession. Like you, I feel it my duty to exercise every ounce of my being in perpetuating same. I don't intend to take these insults lying down. The time has arrived for concerted action and for all true southerners to stand up and be counted. Therefore I urge that southern governors request an immediate audience and conference with party leaders in Washington for a showdown, and I for one will be most happy to accompany them and participate in the meeting. You led the way in your momentous and timely inaugural message. More power to you.

THOS. G. ABERNETHY,
Member of Congress.

FEBRUARY 3, 1948.

GOV. FIELDING L. WRIGHT,
Jackson, Miss.:

I join TOM ABERNETHY in asking you to call immediate conference of southern governors in Washington with party leaders for show-down with Democratic Party. The President's civil-rights message and recommendations for Negro and antisouthern legislation evidence his utter disregard of and contempt for principles of Jeffersonian democracy. He has placed the South on the altar of cheap politics and it is time for concerted positive southern action if our institutions are to survive. We can look to the Republicans for no help, so it is up to us alone. Your courageous leadership in advocating necessary action designates you as natural and logical leader in the fight. I had rather see the Democratic Party go down in honorable defeat standing on the principles of Jefferson than to win an empty victory by stabbing its best friends in the back. We must face the issue by putting truth and principle above partisanship and fight to the last ditch for the preservation of our heritage.

JOHN BELL WILLIAMS,
Member of Congress.

Mr. Speaker, I for one propose to see this through to a finish. We shall determine whether the Democratic leaders propose to let the tail wag the dog.

EXTENSION OF REMARKS

Mr. KILBURN asked and was given permission to extend his remarks in the RECORD and include a letter on the St. Lawrence seaway.

FUEL-OIL SHORTAGE IN NEW YORK CITY

Mr. ROSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROSS. Mr. Speaker, I want to commend the House Committee on Interstate and Foreign Commerce on the progress they have made to relieve the fuel-oil shortage here in the United States. But I wonder if they have gone far enough. I think it is time the House took drastic action to relieve the situation, which has become critical in some sections of the country.

The people of New York City, literally thousands of them, as well as thousands of other residents in the northeastern part of the United States, are suffering untold hardships because they do not have heat. I understand the police commissioner of New York City, Mr. Arthur Wallander, is in Washington today to plead with the Navy to release enough fuel oil to relieve the critical situation in New York City. I certainly hope he is successful, but frankly I do not know why it should be necessary for him to come to Washington.

About 10 days ago when it appeared there might be a shortage of oil here in Washington, the Navy immediately released oil which was received a few days later. If the Navy can provide oil to keep the bureaucrats in Washington warm, I certainly do not know why they cannot release enough oil to help the residents of New York City.

I hope the Committee on Interstate and Foreign Commerce will bring a resolution to the House within the next few days which will direct that an embargo be placed upon the shipment of fuel oil to foreign countries, and I hope when the committee does the House will take immediate action on it.

EXTENSION OF REMARKS

Mr. HILL asked and was given permission to extend his remarks in the RECORD and include an article from the Brighton Blade, of Colorado, on veterans training from the thirteenth area, including Colorado, Utah, New Mexico, and Wyoming.

THE WINTER CARNIVAL IN ST. PAUL, MINN.

Mr. DEVITT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. DEVITT. Mr. Speaker, I hope that before the Eightieth Congress adjourns we provide for home rule for the District of Columbia; but before setting these Washingtonians adrift, we should provide for them an adequate appropriation for the purchase of snow-removal equipment.

If you Members experienced the same difficulty as I did this morning in attempting to get to work through a slushy blanket of snow, you will agree with me that the District of Columbia is inadequately prepared to cope with snow. I was an hour and a half late in getting to my office on account of it.

Now, out in Minnesota we know how to take care of snow. In fact, we convert it from a deterrent to ready transportation to a source of frivolity and fun. In the city of St. Paul this week we are having our annual mammoth winter carnival. This is the outstanding winter carnival event of the Nation. Our citizens turn out by the thousands and engage in ice skating, ice fishing, skiing, and tobogganning. We all dress in snow suits and carnival uniforms and parade by the thousands with bands and hundreds of gaily colored floats through the streets of St. Paul. The event is characterized by fireworks and pageantry. All of this is accomplished in a community noted for its snow. Even the little children engage in snow modeling contests.

Now, by no stretch of the imagination am I attempting to advertise the city of St. Paul or its wonderful winter carnival; but what I am trying to say is that the District of Columbia needs adequate snow-removal equipment, and if it does not get it, traffic is going to be paralyzed in this community every winter like it is today.

If you get tired of trudging through the unswept streets of Washington, I urge that you come to St. Paul, Minn., the winter capital of the Nation "where good business combines with good living."

EXTENSION OF REMARKS

Mr. HESELTON asked and was given permission to extend his remarks in the RECORD and include certain excerpts from a magazine.

THE OIL SITUATION IN NEW ENGLAND

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, referring to the testimonial to the great State of Minnesota, in which I wish to join, I want to say that we know how to take care of the snow in New England if you would only give us a bit of fuel so that we can operate the machines to plow, and remove it. We are hoping and praying that we will not get any colder weather. I am going to appeal to the good folks from the South, to the gentleman from Texas, the former Speaker of the House who I hope will exercise his great influence with his delegation. I know that the gentleman from Texas [Mr. THOMAS] considers this matter a very serious one. I hope to be able to prevail upon the committee to accept an amendment which

is a short one and can be found on page 1015 of the RECORD. I will not bore you by asking you to read all the remarks I made yesterday, but I hope you will help us in this instance. The Governor of Massachusetts wired me this morning as to the number of barrels we need to get along until March. The people of Michigan tell you what they need for their homes and industries. I am afraid that I imposed upon the gentleman from Massachusetts [Mr. WIGGLESWORTH] in trespassing on his time. Today I want to try to get just 10 minutes in behalf of the people of New England to beg you folks to help us out in this instance.

EXTENSION OF REMARKS

Mr. ROBERTSON asked and was granted permission to extend his remarks in the RECORD and include an editorial.

Mr. GRANT of Indiana asked and was granted permission to extend his remarks in the RECORD and include an editorial.

Mr. PHILBIN asked and was granted permission to extend his remarks in the RECORD and include an article from the Daily Item.

Mr. DAVIS of Georgia asked and was granted permission to extend his remarks in the RECORD and include a newspaper article.

THE PRESIDENT'S MESSAGE

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WILLIAMS. Mr. Speaker, those who are prone to brush off the remarks of the southern Democrats yesterday as being mere idle talk are in for a rude awakening. It should be apparent to the leadership of both the Republican Party and the Democratic Party that we mean exactly what we say; that we are not going to stand idly by and watch the South be mongrelized. We are not going to stand by and see an amalgamation of the races come about in the South without a last-ditch fight. I think, Mr. Speaker, that the spring of 1948 is the best time that I know for having our first-class wholesale spring housecleaning in the Democratic Party.

TRANSFER OF SURPLUS OIL TANKERS TO FOREIGN COUNTRIES

Mr. LARCADE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. LARCADE. Mr. Speaker, I have listened with much interest to the remarks of my colleagues from the Northern States with respect to the fuel shortage. I am one of those who protested against the disposing by this Government of surplus tankers to foreign governments when the oil companies in my district and State and Texas were making every possible effort to buy those tankers in order to transport oil to New England and the Eastern States. However, we were unsuccessful. The 90 or more surplus tankers left over from the war were allocated to foreign countries. As a result of that, the east coast and the New England States and other portions of our country which are greatly in need of oil, have been deprived of oil by this action.

Mr. REED of New York. Mr. Speaker, will the gentleman yield?

Mr. LARCADE. I yield.

Mr. REED of New York. I understand that under the Marshall plan we are to give away 500 more ships to foreign countries.

Mr. LARCADE. They will never give them away with my vote.

The SPEAKER. The time of the gentleman from Louisiana has expired.

THE SITUATION IN MANCHURIA

Mr. JUDD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. JUDD. Mr. Speaker, I want to call the attention of the House to an article on the front page of Monday's Washington Daily News, which I hope all the members will read if they have not. It was written by one of the most farsighted patriots, one of the most courageous soldiers, one of the ablest air strategists America has had, Maj. Gen. Claire L. Chennault. He first demonstrated his vision and courage when he fought for air power alongside Gen. Billy Mitchell against all the inertia and the opposition of the usual unimaginative brass-hat psychology of peacetime. He crusaded more than 25 years ago to bring to the attention of our armed forces and the country the decisive role air power, or lack of it, was destined to play; and he was crucified for his vision. He did it again in the years before World War II, when he saw what was developing in the Far East and tried to warn us against the disaster impending as a result of our helping Japan destroy China. He backed up his convictions by going as a private citizen to China, and by enlisting others to go to build an air force there which wrote a veritable saga of heroism and effectiveness. He sees just as clearly what is now happening in the Far East as a result of our incredibly short-sighted policies there since VJ-day. What is more, he is again warning us to wake up before it is tragically too little and too late. He analyzes clearly the strength as well as the weaknesses of our strategic position in Asia. If our Government will act vigorously and promptly along the lines indicated, there is still a good chance we can salvage something out of the brilliant military victories won so recently at such awful cost, and can prevent war later with Russia.

The article is as follows:

UNITED STATES CAN STAMP OUT THE THREAT OF WAR

(By Maj. Gen. C. L. Chennault, retired)

(When the first of Staff Writer Clyde Farnsworth's Mukden dispatches on the Battle of Manchuria was received last week, the Scripps-Howard newspapers, by cable to Shanghai, invited Gen. Claire L. Chennault to give his size-up of that conflict and of the American diplomatic and strategic interests involved. General Chennault, now head of the Chinese Relief Administration Air Transport Service, made his great reputation in China in his spectacular leadership of the famous Flying Tigers, a group of volunteer American airmen who were fighting the Japanese over China long before Pearl Harbor.)

SHANGHAI, February 2.—The time fuse of World War III is burning now in Manchuria.

The United States owes it to China and to herself to stamp out this evil threat if possible. I believe it is possible.

If the United States does not help China and herself in this way, we shall have facilitated—nay, assured—triumph in Manchuria of Russian-inspired, Russian-armed, Russian-manipulated rebellion within and against a nation friendly to us. We shall have abandoned the initiative we now possess for keeping what remains of world peace.

Something must be done because the only conceivable strategic motivation for this cat's-paw game, which Russia is playing in Manchuria, is to insure her eastern flank for freedom of action in the west—that is, Europe.

Russia will not take the big plunge in the west until she is secure in the east. That security is what she is seeking now—at China's expense.

Much of the dreaded pattern of Japan's first move for conquest of Asia is being repeated now in Manchuria. World War II dated from, and in great measure stemmed from, Japan's unchecked aggression there beginning in 1931.

While Russia's present maneuvers are perforce not as open as were Japan's, they are nonetheless clear in their implications. The aggressive motivation is essentially the same, and if unchecked will bring the same result.

Through creation of a Soviet sphere of influence, for which the United States was the careless or unwitting sponsor at Yalta, the Soviet Union intends not only to supplant Japan in Manchuria and Korea. It also seeks to enlarge that sphere into domination of Chinese borderlands from the Yellow Sea to the innermost recesses of Asia—a sweep of more than 2,000 miles.

Manchuria, with Korea, is the eastern anchor of that vast belt of strategic territory which Russia must control in Asia before she can act with a free hand in Europe, with her eastern flank secure from retaliatory assault.

To prevent consolidation of that eastern bulwark of communism is the cheapest and easiest insurance we can have against World War III.

Russia will not dare attack in the west until she is reasonably assured that her industrial regions and vital communications east of the Urals are secure from assault by air from bases within effective range—bases within northern and northwestern borderlands of China.

That is the broad strategic frame within which the present conflict in China, especially in Manchuria, bulks so large. But this strategic position is only the primary Russian objective. Manchuria is a rich prize in natural resources. It is so rich that China cannot achieve full stature as a nation without Manchuria, which even Russia recognizes—on paper—as under Chinese sovereignty.

A communized Manchuria probably would entail eventual disappearance of China, as well as other Asiatic countries, from the community of free nations. Communism cannot stand still for long and survive. It will not stop at international frontiers unless it is opposed.

We cannot afford, therefore, to let Manchuria go under unless we are prepared to surrender the world, ourselves included, to totalitarian authority.

If Manchuria is to be saved and the present deadly train of events averted, the United States must act decisively. That means soon. We can still act within the latitude of unwarlike cooperation with our former ally, whose sovereignty is recognized not only by the United States but also, ostensibly, by Russia.

If our cooperation with China is to be construed by Russia as war provocation we may be sadly assured thereby that Russia's inclination toward war was inexorable in any event. Actually, however, there is every reason to believe that firm aid to the Chinese Government would serve as a warning that the United States is fully committed to the support of China against communism, and that communism will not be permitted to encircle China with its iron curtain.

As urgently required as it is, American intervention on China's invitation in Manchuria need not be of a combatant nature. China does not need American soldiers or airmen directly in combat against Communist rebellion. China already has resources of manpower needed for victory.

Her only shortcoming—and this is a very great one—lies in her inability to train, arm, and supply that manpower, and bring it to bear to best advantage upon the inferior numbers of armed rebels. She has failed in this in the past for a variety of causes, for which the United States is not entirely blameless.

The most important of these causes was American capitulation to Russia at the Yalta Conference. There, in the mistaken belief that Soviet intervention was necessary for the defeat of Japan, the United States virtually invited the Soviet Union to move into the Japanese sphere on the Asiatic continent. Russia was invited to invade Manchuria.

This invitation was extended on advice of our military experts who could not foresee the inevitable collapse of Japan 90 days before it actually happened. Some of these experts are still directing our China policy today, and are just as blind to the actual situation and its dangerous implications as they were to Japan's true situation in May 1945.

Russia used her invasion of Manchuria to lay the foundations of a Communist regime where no Communists had been before. During the period when the United States, still misguided, futilely sought to enforce a coalition between the Chinese Government and Chinese Communists, the Reds massed in Manchuria and were armed by Russia with weapons surrendered by the Japanese Kwantung Army.

Russia's manipulation of the Chinese Communists, and her strategic motivation, requires no further proof than this. Without loss of a single soldier she would thus attain the vital objective of securing her continental eastern flank.

By her action in Manchuria, Russia tipped the scales against China in such a way as to prevent reassertion of Chinese sovereignty there. Russia put that sovereignty to the test of bitter civil war—Chinese against Chinese.

Already disorganized and weakened by 8 years of war and 6 years of almost untested Japanese aggression prior to that, China needed and deserved American assistance from the very outset for recovery of Manchuria after Japan's defeat.

This was not forthcoming. On the contrary China was obstructed by the United States through one-sided enforcement of a 1-year truce, sadly calculated to bring about coalition between a constituted government and rebels against it.

The Communist used this heaven-sent—or was it made in America—respite to organize and train tens of thousands of new troops in Manchuria. During that period, when conceivably China might have overpowered communism there, the United States was withholding arms from China lest our "peace negotiations" be embarrassed.

Thus, it seems to me, our obligation to help China now is clear. Morally, it is something we ought to do. It is something which we, in realistic appreciation of the danger to our world, must do. There should be no difficulty in making these decisions. There remains only the question of what we can do.

Time is short and the need is great. But it is neither too late nor too great a task for American ingenuity to perform.

China's most crying need in Manchuria, the principal zone of decision, is for American military advice and such direction as she can accept without sacrifice of national sovereignty. Concurrently with this advice and direction, which must be rendered on an emergency basis, the United States must set in motion vast replenishment of Chinese arms and military supplies.

We must strike a proportion between land power and air power in China so that the latter, the only weapon missing from the Communist arsenal now, may be exploited properly and to full measure for swift victory.

No emergency measure within our power could serve China more than assignment, at China's invitation, of such a man as General Wedemeyer to a position such as he held in 1945 under Generalissimo Chiang Kai-shek. For prosecution of aerial warfare the United States should furnish, again at China's invitation, the best available American tactician.

Both of these men should be supported with increments of hand-picked specialists and technicians sufficient in number so that this partnership of advice and direction would be carried down as far as company organizations in the Chinese Army and flight organizations of the Chinese Air Force.

If this can be done quickly, I believe it will assure victory in Manchuria. Victory in Manchuria will assure victory in China, and consolidation and recovery of a great nation which could be the eastern bastion of the only kind of world we want to live in.

ANTILYNCHING BILL

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, certain individuals of racial minorities are leading their people into trouble the like of which they have never known.

I particularly refer to this fellow Walter White, who calls himself a Negro, who is secretary of the so-called National Association for the Advancement of the Colored People, and to this man Spingarn, a New York Jew, who is president of that association.

They do not represent the better element of the Negroes and they do not represent the better element of the Jews of this country. They are demanding the passage of the so-called antilynching bill. I have a right to talk about this, because they are denouncing me as a demagogue, just as Pravda, the Communist mouthpiece in Moscow, Russia, denounced me as a dangerous American dictator.

Twenty-six years ago at this time we were fighting a similar bill on this floor. When that Congress opened the Republicans had a majority of 169, but when they got through with that ridiculous performance the American people were so utterly disgusted that at the next election, to our surprise, they elected only 220 Republicans, 205 Democrats, and about 8 or 10 who did not belong to any party.

The American people are not in favor of this kind of stuff. This same gang that calls themselves the Association for the Advancement of Colored People are out fighting this Negro veterans' hospital in Virginia that the Booker Washington Negroes are pleading for, and which I helped to get through this House, and which we are working now to try to get through the Senate.

These men are doing the Negroes more harm than good; and I say to you members of other minority races who join with them in this movement that you are bringing down upon your heads condemnation that you will not live down in a century.

UNFAIR BRITISH COMPETITION WITH AMERICAN MOTION-PICTURE INDUSTRY

Mr. McDONOUGH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. McDONOUGH. Mr. Speaker, when I voted against the British loan during the last Congress, I believed at that time that Great Britain would use American dollars to fight American industry.

My belief has been confirmed. Great Britain is now using every facility to boycott American motion pictures and has launched an all-out campaign to capture the world market.

American industry has never objected to fair and open competition. Great Britain imposes a 75-percent tax on American films and at the same time they are asking full privileges for showing their films in the United States.

We passed the Voice of America bill to tell our story overseas and to include the use of films. The British have hurt us in Britain and plan to hurt us in other parts of the world. They would receive about five billions of Marshall plan money which will further aid their motion-picture industry.

Arthur Rank admitted in the London Times that British films will be strong enough, thanks to the 75-percent tax, to go out and compete with Hollywood in the world market. Yet the American Government does nothing to help its picture industry which it needs in the State Department's world-wide information program.

In the face of this British situation, we should help our industry domestically by reducing the 20-percent admission tax and abroad by aiding it to get some of its frozen money.

The following editorial by Arthur Unger, editor of the Daily Variety, of Hollywood, expresses the views of the motion-picture producers:

WAKE UP, UNCLE SAM

It's a fact. Great Britain wants no part of Hollywood or its pictures.

That so-called 75 percent tax that the British labor government has put on American films is strictly a subterfuge. The British at one time controlled the sea and the world market, and is out to do it again via its screening output. They don't care whether we comply with their tax conditions or not.

Britain wants to build a world market for its films. Its producers told the labor government they could take care of the needs of home consumption, as well as turn out a product that would reach the world entertainment market and at the same time act as a missionary factor for British commerce.

That fact is best accentuated by an article which J. Arthur Rank wrote for the last Sunday's London Times, and from which quotes are reproduced elsewhere in this paper.

We do not know whether Rank was one of the producers who told the Cripps government to forget about American films, so dollars could be kept at home and be garnered in addition from a world market. But we do believe that Rank has the same thoughts as other British producers, who stated they could make enough pictures to take care of the needs of the English cinema.

The British tax came right on the heels of Rank's visit to the United States to get the American distributors and exhibs to give him guaranteed playing time for his films in this country amounting to around $12,000,000 a year. Rank professed chagrin at the time the tax was imposed on our product in England. He said he knew nothing in advance of his country's proposed tax. Maybe he didn't and maybe he did.

But one way or another, Mr. Rank has fallen in line with the labor government. He's out to capture a world market with his product. He's going to show the British way of life, customs, etc., on the screen, so that its general commerce can regain its hold on the world market to compete with us and surpass us.

In the London Sunday Times article he is not reluctant at all in stating that "Britain shall not for some time yet be living easily. There will be a sense of purpose in our work; and this I believe will be reflected in our films" and "Not so long ago the British industry was largely controlled by American influences. Most people were agreed that this economic and cultural domination was both unhealthy and unnecessary, but very little was done about it. We could have at one time been out of business or been made into a small and very inadequate branch of Hollywood. Neither of those eventualities is likely to happen now."

Yes, we think that Mr. Rank was hep all the time he was in this country, as to what the labor government planned to do with respect to isolating American films from the English market. Rank was trying to kill two birds with one stone. He had nothing to lose in getting assurance his product would get playing time in this country. He also had everything to gain by the move of his Government toward its desire to make British films supreme in a world market. Rank is no chump. He is an out and out businessman. He has an avalanche of coin invested in films, and is determined to get it out. As the leading English producer, he has most at stake, so falls in very easily and handily to help carry out the precepts of the labor government to "Freeze American films out of the British market."

On the other hand, Rank points out that he has many interests outside of the British Isles. Partnership arrangements, such as 110 theaters in Australia; 143 in New Zealand; 52 in Ceylon, 12 in Holland. Also his product reaches 400 houses in South Africa. He has his Odeon circuit in Canada with 107 theaters as well as interests in the West Indies, parnerships in Egypt, and around a 25-percent interest in Universal Pictures. He is well fortified in connections and partnerships. They won't hurt his endeavors toward circulating his films.

He also points out that though British pictures have restricted earnings in America, "our films are becoming an increasingly valuable export, bringing in much-needed foreign currency. More than that, they can give a tremendous boost to other British exports; for a nation's goods are 'in the windows' whenever and wherever her films are shown."

Rank has tipped the whole set-up off, when he talks about helping export. That the British Government wants.

The United States Government has had the same outlets the British are seeking, via its film production. Films helped United States gain a lot of exports, and also propagandized the introduction of new American commodities. But the United States Government and its Commerce and State Departments never took cognizance of this fact. They permitted the American film industry to be battered and kicked around by everyone and anyone. It's high time that this ceases, that our Government gives respect to the film industry and starts protecting it. It should take a firm stand in negotiation of treaties with foreign countries, to protect our film business. It should fight all unfair embargoes on it.

This Government now controls the coin of the world, it's in a position to act. It can and must do so quickly. By acting now, it will protect all other American industry as well as films. Our picture chieftains must not be timid in asking for that action. They must be determined and aggressive in their efforts. American films are not made solely for home consumption. Neither is any other product. They all have a world-wide market and demand. Under no circumstances should we permit Britain to grab our world dominance from under our noses by using American taxpayers' coin to do it.

A. U.

EXTENSION OF REMARKS

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to extend the remarks I just made and to include therein the speech I made against the so-called antilynching bill in the Sixty-seventh Congress.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. PLUMLEY asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances, in one to include a sonnet by Glenn Levin Swigett, and in the other to include the testimony of L. Douglas Meredith before the Joint Committee on Housing.

INVESTIGATION BY COMMITTEE ON THE ARMED SERVICES

Mr. BROWN of Ohio, from the Committee on Rules, reported the following privileged resolution (H. Res. 447) authorizing the Committee on Armed Services to continue its investigation on matters coming within jurisdiction of the committee (Rept. No. 1322), which was referred to the House Calendar and ordered to be printed:

Resolved, That effective from December 19, 1947, the Committee on Armed Services, acting as a whole or by subcommittee, is authorized to continue the investigation begun under authority of House Resolution 141 of the Eightieth Congress, and for such purposes shall have the same power and authority as that conferred by such House Resolution 141. The committee shall report to the House of Representatives during the present Congress the results of its studies and investigations with such recommendations for legislation or otherwise as the committee deems desirable. Any report submitted when the House is not in session shall be filed with the Clerk of the House.

AUTHORIZING CONSTRUCTION AND OPERATION OF DEMONSTRATION PLANTS TO PRODUCE SYNTHETIC LIQUID FUELS

Mr. BROWN of Ohio, from the Committee on Rules, reported the following privileged resolution (H. Res. 453, Rept. No. 1323), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H. R. 2161) to amend the act entitled "An act authorizing the construction and operation of demonstration plants to produce synthetic liquid fuels from coal, oil shales, agricultural and forestry products, and other substances, in order to aid the prosecution of the war, to conserve and increase the oil resources of the Nation, and for other purposes," approved April 5, 1944 (58 Stat. 190), and all points of order against said bill are hereby waived. That after general debate, which shall be confined to the bill and continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Lands, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment, the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

AUTHORIZING PRINTING OF REPORTS OF SPECIAL TAX STUDY COMMITTEE TO THE COMMITTEE ON WAYS AND MEANS

Mr. LECOMPTE. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 359, a privileged resolution, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That the reports of the Special Tax Study Committee to the Committee on Ways and Means of the House of Representatives, dated November 4, 1947, be printed as a House document; and that 3,000 additional copies shall be printed, of which 1,000 copies shall be for the use of the House of Representatives and 2,000 copies for the use of the Committee on Ways and Means.

With the following committee amendment:

Page 1, after the word "document", insert "and that there be included therewith a supplemental statement prepared by Matthew Woll."

The committee amendment was agreed to.

The resolution was agreed to.

A motion to reconsider was laid on the table.

COMMITTEE ON THE DISTRICT OF COLUMBIA

Mr. LECOMPTE. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 421 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That the expenses of conducting the investigation and study of reorganization and home rule for the District of Columbia pursuant to House Resolution 195

of the Eightieth Congress, incurred by the Committee on the District of Columbia, acting as a whole or by subcommittee, not to exceed $15,000, in addition to the unexpended balance of the amount authorized by House Resolution 228 of the Eightieth Congress, including expenditures for the employment of investigators, attorneys, and clerical, stenographic, and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by such committee or subcommittee, signed by the chairman of such committee or subcommittee, and approved by the Committee on House Administration.

The resolution was agreed to.

A motion to reconsider was laid on the table.

COMMITTEE ON SMALL BUSINESS

Mr. LECOMPTE. Mr. Speaker, by direction of the Committee on House Administration, I call up House Resolution 405, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That the expenses of the investigation and study to be conducted by the select committee authorized by House Resolution 18 of the Eightieth Congress, not to exceed an additional $85,000, including expenditures for the employment of investigators, attorneys, and clerical, stenographic, and other assistants, shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman thereof, and approved by the Committee on House Administration.

With the following committee amendment:

Page 1, line 4, strike out "$85,000" and insert "$70,000."

Mr. SABATH. Mr. Speaker, will the gentleman yield?

Mr. LECOMPTE. I yield to the gentleman from Illinois.

Mr. SABATH. What I would like to ascertain is what committee this involves?

Mr. LECOMPTE. This is the Committee on Small Business, formerly known as the Patman committee, now known as the Ploeser committee.

Mr. RAYBURN. Mr. Speaker, will the gentleman yield?

Mr. LECOMPTE. I yield to the gentleman from Texas.

Mr. RAYBURN. Does the gentleman think any of this money or more of the money we vote for this committee is going to be used to fight cooperatives as has been narrated around here that much of the money has been used for in the past?

Mr. LECOMPTE. I may say to the gentleman from Texas that I feel that the study of cooperatives is within the province of the Ways and Means Committee. However, I am not authorized to speak for the members of the Small Business Committee. I understand that they have completed their studies along that line. I see present the chairman of that committee. He could probably answer that question.

Mr. RAYBURN. Many of us are going to look into this question between now and the next time this committee comes up for money, and if they are conducting the same kind of operation that they have in the past, which we feel is punishing the cooperatives, we are going to resist further appropriations.

Mr. PLOESER. Mr. Speaker, will the gentleman yield?

Mr. LECOMPTE. I yield to the gentleman from Missouri.

Mr. PLOESER. I think it would be well for the gentleman from Texas to refer to the records of the committee, and then he would not say that this committee devoted any of its money to fighting cooperatives. The records are very clear that we were making a study, a fair study. That study is nearing completion. By the statement of the ranking Member of the committee, those committee hearings that were held were very fair. No one was attacked except the chairman, and he, by political propagandists. Now, you can either attach your remarks to the facts in the case or you can attach your remarks to the political propaganda of the case. The facts in the record are very clear, and they are available to the gentleman from Texas.

The SPEAKER. The question is on the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

INDEPENDENT OFFICES APPROPRIATION ACT, 1949

Mr. WIGGLESWORTH. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H. R. 5214) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1949, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H. R. 5214, with Mr. LEONARD W. HALL in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Under the order of the House of Tuesday, February 3, the debate on the bill was extended not to exceed 2 hours today, the time to be equally divided between the gentleman from Massachusetts [Mr. WIGGLESWORTH] and the gentleman from Alabama [Mr. ANDREWS].

Mr. WIGGLESWORTH. Mr. Chairman, I yield 5 minutes to the chairman of the committee the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Chairman, I want to congratulate the committee upon the work that it has done on this bill. Of the items totaling about $256,000,000 upon which cuts might be made they were able to cut $56,000,000, or a little over 20 percent. This includes all of the items that relate to personnel, traveling expenses, and ordinary operations that the bill contains. It is a good start toward keeping the Federal Budget in line, and toward taking the bloat out of the budget.

There is one situation that has developed in one of the agencies that I think merits attention, and merits consideration by the Congress. Since the consideration of this bill was begun, Wayne Coy has been appointed Chairman of the Federal Communications Commission. Mr. Coy started the major part of his political career as the chairman of the Two Percent Club in Indiana, under the administration of Paul McNutt. He followed it up with operations of the WPA and the Federal Security Agency, and other activities of the Government. He succeeds three successive chairmen, Mr. James Lawrence Fly, Mr. Paul Porter, and Mr. Charles Denny, every one of whom has retired from the Federal Communications Commission to enter the practice of law in Washington, appearing largely before this Commission, with which they are supposed to have great influence. Mr. Coy starts out with a record which would make one expect him to follow the lead of those three chairmen and retire after a little to set up a lucrative practice before the Federal Communications Commission. I would hope that that example might be a warning to him and that he might approach the duties of that position by making up his mind to make a record for efficiency and competency and not for building up a great big cumbersome, bloated organization, and not aim to retire to practice before the Commission of which he is a member.

Mr. ANDREWS of Alabama. Mr. Chairman, I yield 15 minutes to the gentleman from Texas [Mr. THOMAS].

Mr. THOMAS of Texas. Mr. Chairman, we Members of the minority of your committee would like to thank and congratulate the Members of the majority for their industry, and particularly their courtesy and their fairness to the Members of the minority in writing this bill.

Frankly, I do not think there is a finer chairman in either body than our distinguished chairman, the gentleman from Massachusetts [Mr. WIGGLESWORTH]. Our distinguished colleague the gentleman from California [Mr. PHILLIPS] has certainly performed wheel-horse work in the writing of this bill. Also, I must say that our friend the gentleman from North Dakota [Mr. ROBERTSON], with his business background and experience, has contributed a lot of good common horsesense to the deliberations of the committee. Our friend from New York [Mr. COUDERT], with his fine legal mind, has kept us out of trouble, too.

May I point out that although this bill carries appropriations for some 30 agencies, known as independent agencies, that is really the small part of this bill. It carries a total of appropriations in the neighborhood of $990,000,000, yet this same bill last year carried in the neighborhood of $790,000,000, an increase of $200,000,000 for fiscal 1949 over fiscal 1948. This increase of $200,000,000 comes about largely from the increase in appropriations for only one agency, that is, the Bureau of Public Roads and the Federal Works Agency. It has an increase of $200,000,000 this year over last year and I doubt if there are very many Members of this body or the other body who would want to curtail the carrying into effect of the act of Congress by denying the Public Roads Administration these

funds. But as I said a while ago even though this bill carries funds for 30 agencies, the big money involved in the independent offices is not in this bill, namely the appropriations for the Veterans' Administration, the War Assets Administration, the Atomic Energy Commission, and the Maritime Commission. Why those agencies are not in this bill is not exactly clear to me. I do not think it amounts to a hill of beans whether the bill is split in two parts or not, but frankly this is the first time a bill has ever been handled in this way so far as I know at least as long as I have been a Member of this body. But I understand through our chairman that he intends to conduct hearings at a later date for those agencies and bring in a bill covering their appropriations. When we do that you will find that you will have another bill for the independent agencies totaling in the neighborhood of $7,000,000,000 over and above the $990,000,000 involved in this bill.

I would like to say something about the independent agencies of the Government which this bill covers. These agencies are just exactly what the term indicates, that is, most of them—independent agencies made up of bipartisan boards, Republicans and Democrats alike. It requires a majority vote of those agencies before any of their rules and regulations and orders can be binding. They do not have to have White House approval, regardless of who is in the White House, a Democrat or a Republican. They are independent agencies. Frankly, I think some of the finest men in Government service today are serving on some of these independent agencies. In the revision of my remarks I would like to comment on some of these men, but I would like to mention now Chairman Smith, of the Federal Power Commission. He is certainly an outstanding man and is performing a great service. I understand Chairman Smith is a Republican. Then there is our own Lindsay Warren, Comptroller General. Certainly he and his splendid organization are doing a fine job in taking care of the taxpayers' money and in supplying information to Congress. Incidentally, General Warren's crowd this year came in voluntarily with a reduction in their budget for 1949 as compared to 1948. That is one of the few agencies that did so. I think Mr. Coy, who has recently been confirmed by the other body as Chairman of the Federal Communications Commission, is a fine man. He made a good impression on me, and I think on most of the members of the committee.

Mr. RAYBURN. Is the gentleman referring to the present Chairman or to his immediate predecessor?

Mr. THOMAS of Texas. I am referring to Mr. Wayne Coy, Chairman of the Federal Communications Commission. Then there is Mr. Flemming, of the Civil Service Commission. While he is not Chairman, I think he is a hard worker and is doing a fine job, and the best witness I know. Incidentally, I think Mr. Flemming is a Republican.

Then there is Mr. MacDonald, General Fleming, and Mr. Bert Reynolds, of the Federal Works Agency. I do not think there are any finer men in Government service than those men. Certainly they are doing a grand job.

Much has been said about the Bureau of the Budget. Frankly, I do not know of any finer public servant than Mr. Webb, Chairman of the Budget, and Mr. Lawton, his assistant. Those men are doing a big job; and they are holding those jobs by virtue of the fact that the Congress created those jobs.

It has been said the Bureau of the Budget helps formulate congressional policy. I think that is a rather weak statement. I doubt if there is anything to back that up. After all, they are doing their work. Part of that work is to strengthen Federal agencies, to analyze appropriations, and to bring better order and business management to the departments. I think they are doing a very good job of it.

Certainly, mention should be made that in this budget of approximately $8,000,000,000 for independent offices, the Budget alone trimmed $2,200,000,000 from the estimates of the agencies. So it does not look like they are sleeping on the job. Certainly it should be pointed out that if this Congress does not like what the Budget Bureau is doing in the way of its recommendations, this Congress has the authority to overturn them. In other words, their recommendations certainly are not binding on your committee or on the House. That is fundamental.

As I said previously, the committee works well and in peace and harmony. The Republican majority were certainly nice to the minority. By and large, I think the bill is a good one. There are some points that we could not all agree on. That is human nature. Of course, the majority has the votes to do as it wishes. One of the rough spots in this bill is the President's emergency fund. The majority cut from those funds $300,000. Frankly, I think that is partisan politics, and I want my remarks to be made on that basis. Frankly, I think the office of the President of the United States is entitled to more consideration than was given by our Republican friends. I do not have the slightest doubt that, had a Republican been today where Harry Truman is, that Republican President could have asked for a million dollars and he would have gotten every dime of it. As far as I am concerned, I would have been one of the first to have given it to him. I want to point out that we are inviting some trouble, in a small way, over this item. Every man in this House must realize that when the House appropriates funds for its own housekeeping purposes, the President of the United States has to approve of those funds. Without attempting to read his mind, at some time he may disagree with what we spend for our own housekeeping purposes. In keeping with comity and peace and harmony between the various branches of government, he always approves what we do for our own housekeeping jobs. Look at the other body. Does the House ever attempt to tell the other body what funds they should appropriate for their own housekeeping jobs? Why, of course not. We approve them as a matter of course in order to keep peace and harmony like it should be done, and I hope that when this bill gets to the other side those funds will be restored.

Mr. ANDREWS of Alabama. Mr. Chairman, will the gentleman yield?

Mr. THOMAS of Texas. I yield.

Mr. ANDREWS of Alabama. The gentleman has shown much interest in the past and also this year in connection with the appropriations for the agencies contained in this bill, one in particular, the National Advisory Committee for Aviation. I wish the gentleman would say something about the provisions in this bill with reference to the National Advisory Committee for Aeronautics.

Mr. THOMAS of Texas. I will be delighted to, in response to the request of the ranking Democratic member of the committee.

The National Advisory Committee on Aeronautics certainly is the backbone of scientific investigation and improvements of the aeronautical industry of the United States. That goes for the Army, Navy, Marine Corps, and private industry. Speaking in terms of dollars and cents, if my memory serves me correctly, we gave these people about $2,500,000 increase this year over 1948, bringing the amount for personnel to about $33,000,000 all told. I think we increased their scientific funds for construction and equipment from about $2,500,000 to $10,000,000.

As time goes along I believe this agency will gradually reach the point where they will require between forty and forty-five millions a year. Of all the money carefully spent in this bill, I do not think there is a more economical dime than this money for aeronautics. We certainly can spend from five to fifty millions a year to improve all elements of air navigation, especially when we remember that we are spending some two to three billions a year on aeronautics.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. WIGGLESWORTH. Mr. Chairman, I yield 15 minutes to the gentleman from North Dakota [Mr. ROBERTSON].

Mr. ROBERTSON. Mr. Chairman, the distinguished chairman of the Subcommittee on Independent Offices has given a most comprehensive analysis of the bill that is now before the committee. One cannot serve on this important subcommittee and watch the operations of the distinguished chairman without an ever-increasing admiration for his understanding of the problem and his detailed application of general principles to the hearings. It is truly an inspiration to serve under him.

The committee is handsomely fortified by a very able staff. I feel conspicuously indebted to Mr. Bill Duvall and his assistant, Mr. Bert Skinnard. They are always available and in possession of the vital and important facts that are needed for the consideration of this legislation.

It is a pleasure to serve with the members of the minority, the gentleman from Florida [Mr. HENDRICKS], the gentleman from Alabama [Mr. ANDREWS], and the gentleman from Texas [Mr. THOMAS]. It is surprising how these intricate problems are handled day by day without the

slightest appearance of partisanship from one side or the other. I salute these gentlemen for their great contribution to this important piece of work.

The work required in the preparation of this bill extends over a long period of time. The hearings are detailed. There are many agencies, each working in its own specific direction. The chairman has told you that this year there will be two independent offices appropriation bills. Four of the major agencies are not included in this bill.

The chairman has told you of the sum total of the original budget estimates for the fiscal year of 1949, and has likewise told you of the recommendations of this committee. The committee recommends a reduction of $56,215,313 in the bill of $1,047,798,864. To this has been added rescissions of $3,092,758, reflecting a total savings of $59,308,071. In the face of these reductions, the bill is in excess of the 1948 appropriation by $196,686,974.

This increase is due almost entirely to the increase in funds required during the last year for highway construction and related work. You will recognize that the committee has little control over such an item as this. Many of the appropriations appearing in the independent offices appropriation bill are of a permanent nature. Most of them have been established by acts of Congress and it leaves little ground on which the committee can make reductions so much needed 3 years after the war.

I should also like to say, Mr. Chairman, that the committee gets little support in making reductions from the various agencies, with one or two exceptions. All more or less seem to accept the fact that there is no bottom to the barrel, and that each year they have a right to expect to go on and on to larger proportions. They are the victims of habit explained in a statement made many years ago, which goes something like this: Habit is a cable, we weave a thread of it each day; and at last it becomes so strong we cannot break it.

As we labor with these problems, trying to fulfill our responsibility to the taxpayers of the Nation, we get little help from the heads of the agencies, and we get a great deal of propaganda from the administration itself. The thought really prevails in the minds of many employees of these agencies that they have a divine right to their jobs. The right of the taxpayer is given little consideration.

Generally speaking, I believe it is the idea of the committee that we should go back as rapidly as possible toward prewar figures. This is quite impossible in many instances because the Congress itself must now accept the responsibility for the legislation on ingrade promotions, various phases of the civil-service legislation, and many other things. Should the time ever come that the taxpayers of the Nation could speak in unison the Congress would come to recognize that we have but one road to follow if we are to reduce the Nation's expenditures. That road means that we must of necessity begin to lop off many Government functions which have been thrust upon us in the last 15 years and which prior to that time never even existed in the minds of men.

Even if one agrees that the old agencies which have existed for many years must of necessity be kept in good shape and allowed to grow in the service of the country, there are many other things that have been added by executive order and otherwise that could well be abandoned in the interest of the taxpayer.

We have committed ourselves to certain things. It would be difficult indeed to reduce the amount required for the Philippine War Damage Commission. That is in fact an expense growing out of the war. The committee allowed this year substantially all of the funds requested by the Federal Trade Commission for the purpose of antimonopoly prosecution. Yet in other operations of this agency we made substantial reductions.

The Comptroller General of the United States, Lindsay C. Warren, comes before the subcommittee with his budget pared by his own hand. His is one of the few agencies that seems to fully understand the taxpayers' demands, and he is doing everything in his power within his own agency and through his important position over the other agencies to meet these demands. For this, he is entitled to great credit.

I have previously pointed out that the committee is constantly confronted by legislation that has been passed by the Congress providing for in-grade promotions. These are automatic and must be allowed in conformance with the basic act.

Speaking briefly on the agency known as the District of Columbia Redevelopment Land Agency, their budget request was $3,400,000 to initiate action in connection with the redevelopment program provided for under Public Law 592 of the Seventy-ninth Congress. On this particular question, the committee held extensive hearings and as a result of these comprehensive hearings, the committee has concluded that funds for this project should not be allowed at the present time. It is the understanding of the committee that the plans are now merely being made for redevelopment of Barry Farms and Marshall Heights areas.

Inasmuch as no plan has been completed by the National Capital Park and Planning Commission, which is the agency by law delegated to draft the comprehensive plan, the committee has felt that until it can give a complete study of the plan and be truly advised as to its desirability, no funds should now be made available. The committee has doubt as to the desirability of redevelopment in the areas under consideration at this time for the very good reasons that many modern homes are now in existence in these areas to be redeveloped and the cost of construction under present housing conditions is extremely high.

On the question of an appropriation for the Federal Communications Commission, the committee has provided $60,000 in excess of the 1948 appropriation, and $240,000 less than the budget estimates. We therefore find we have provided funds on substantially the same basis as the current fiscal year, the increase of $60,000 providing approximately two-thirds of the amount requested for within-grade promotions. No provision was made for increased activity of this agency. Generally speaking, the committee feels that with the experience gained this far in the postwar period in the processing of applications and licenses of all types, the commission should normally have within itself an increased efficiency to extend to a point where a larger number of applications can be handled.

In this bill the committee has recommended $1,000,000 less for the Public Roads Administration than the budget estimate, and $195,588,854 more than the 1948 appropriation for the continuation of construction of postwar highways and the elimination of grade crossings, $7,300,000 being provided for the latter item. The funds provided are to meet the Federal Government's share in this undertaking and are the amounts which it is estimated will be required during the fiscal year 1949 to meet contracts for road construction submitted by State highway departments and approved by the Federal Works Administration. As of December 1, 1947, programs of projects had been submitted by the State highway departments for a total estimated cost of $1,931,981,000 for which the Federal share is $976,877,000.

We must be mindful of the fact that, during the period of the war, roads in all sections of the Nation suffered for lack of repairs and general construction. Roads touch every part of every State in the Union. We are finding that many parts of the national highway system are obsolete. The 18-foot steel-and-concrete slabs that were laid some years ago have proven to be totally inadequate for the modern transportation demands made upon them, and in many instances, especially in heavily populated areas, new roads must be built or the old roads must be widened. It is for these reasons that the committee has allowed this additional amount above the 1948 appropriation.

Perhaps no more technical question confronts the committee than that contained in the presentation of the justification by the National Advisory Committee for Aeronautics. All of us recognize that it is through this agency that the program for development of aeronautics and guided missiles is accomplished. The work of this agency is directed toward the over-all objective of directing and applying the new scientific knowledge essential to assure American leadership in aeronautics. I am sure that the Members of this House are resolute in the determination that America possess leadership in aeronautics. Therefore, little reduction was made in this important agency. While they asked for 42 additional salaries to be paid to employees in the District, this was reduced by the committee to 21. Otherwise, their authorization was left intact. I urge the Members to read carefully page 13 of the report dealing with the National Advisory Committee for Aeronautics.

The committee presents this Independent Offices appropriation bill for 1949 to the Congress with the deep conviction that it has considered well every aspect presented by the different agencies represented in this bill. It is a long,

comprehensive, and tedious task. It is reasonable to assume that there will be some who challenge some phases of our work. I can assure you that we present it to you, resolute in the belief that it is a good bill and will serve the purposes of these agencies and the welfare of the Nation for the next fiscal year.

Mr. ANDREWS of Alabama. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts [Mr. HESELTON].

Mr. HESELTON. Mr. Chairman, first I want to express my appreciation for the courtesy of both the majority and minority. I imposed on the majority by using a substantial portion of the chairman's time yesterday afternoon, and now the minority has been good enough to recognize that I may have something further to contribute.

If I may have the attention of the gentleman from Texas [Mr. THOMAS], may I say that the committee staff furnished me within a few minutes the report they obtained from the Federal Works Agency this morning. It has in it about the most sickening piece of news that could be sent to the people of New England. There is listed in the tabulation on page 1016 of the RECORD of yesterday the Boston Marine Hospital. That is the next to the last item. It shows that it would require 120 days to reconvert now back to coal; that it would cost $26,500; and that they will use, in that shortage area where we need this oil, 370,000 gallons of oil in the calendar year, over 1,000 gallons each day.

The Boston Marine Hospital reconversion was completed in December of last year, right in the midst of the toughest winter we have had in years. They went right ahead in the face of all the recommendations made by the New England delegation, Democrats and Republicans alike, under the leadership of the Speaker and the gentleman from Massachusetts [Mr. MCCORMACK]. The gentleman from Massachusetts [Mr. LANE] was a member of our subcommittee.

Along in December we heard testimony from the gentleman who buys the oil for the Federal Government. I will have it here this afternoon and read it into the RECORD. He told us that there had been these reconversions and that they were going ahead with them. I said in substance, "Isn't it only fair to ask those people, if they have those grates to help us out, and set an example?" He said, in substance, "By all means." The subcommittee wired the President the next morning. That was back on December 13. Somebody must have known the Boston Marine Hospital was being reconverted but it was not stopped.

I have the items of reconversion and the dates of reconversion right here in the District. I would assume you would agree with me that in view of what has been happening in the District here, if we use the words "shortage area," as is suggested, the District of Columbia is a shortage area, as are North Carolina, Virginia, Maryland, New Jersey, the whole Northeast, Illinois, and clear into Minnesota. We are all short this year.

Prominent and informed witnesses, the Secretary of Defense, Mr. Forrestal, the Secretary of the Interior, Mr. Krug, Max Ball, and others, have told us that we are not facing this problem for just this year, but that we are going to continue to face it for 5 years at least. On that basis, and on the basis of national security every drop, every gallon, we can save we must save. This limitation I am suggesting is simply to say to the Federal Works Agency positively, "Thus far you have gone. Do not go one step further. Do not spend a single dollar out of this appropriation to convert to oil." My responsibility is oil. There are other Members here who have 200,000 people out of work. There are 15,000 out of work in the Pittsburgh area. Those gentlemen will speak to you about the question of whether you should include natural gas. But go along at least with us on the oil. I will place in the RECORD later the telegram and interpretation of the telegram from the Governor of Massachusetts which I already told you about. I was incorrect in using 52 as the multiple there. It should be 42. In the 20 to 25 days up there in that area, we have had temperatures of 27, 37, and 47 degrees below zero. That is pretty tough. Some of those people are sick. There are young children and there are old people. Some of our industries are forced to close down. Our situation does not get Nation-wide attention such as the Detroit area when 200,000 people are out of work. I know our colleagues from Pennsylvania will agree that the welfare of the whole area there is in jeopardy unless we can convince you here that you should join hands with us this afternoon and say to the responsible Federal agencies, "You have gone far enough, and we say to you stop right here."

Here is the Washington story: 301 Independence Avenue, date of conversion, September 1946; 1626 K Street, date of conversion—all of this is coal to oil—September 1946; 1624 H Street, October 1946. That was when we all had knowledge that we might be faced with this threat of the coming shortage. Our committee had hearings beginning in July, and again in December. Now we learn that even then someone was actually going ahead and permitting conversions. Briggs School, October 1946; 1757 L Street, September 1946. Here is another significant thing. I call your attention to the Arlington, Va., project at 705 Columbia Pike. The contract has been stopped. There is a 14-day escape clause in there, and the contractor is trying to find out how they can exercise it. But listen to this: "It is proposed to start work again on April 1." Seven Hundred and Eleven Twelfth Street, contract stopped, proposed to start work again after April 1.

I ask you to help us call a halt to this and let us tell them about this if they do not know yet that we are cold and in trouble in parts of this country. We have been trying to tell them that, and I beg you whose constituents are in comfort, and we are glad they are, to try to help us out this afternoon. If you do not like my amendment, I will change it any way you want. I have taken out the natural gas. I will call them shortage areas or anything else you want. I am sure our colleagues from Michigan and Pennsylvania will not agree with me as to this. But we have a different problem in New England. Will you not help us out until April 1?

Mr. BUSBEY. Mr. Chairman, will the gentleman yield?

Mr. HESELTON. I yield.

Mr. BUSBEY. In Illinois we have prohibited any gas installations since July 1, 1946, because of the shortage of pipe.

Mr. HESELTON. I thank the gentleman.

Mr. WIGGLESWORTH. Mr. Chairman, I yield 15 minutes to the gentleman from California [Mr. PHILLIPS] to close debate.

Mr. PHILLIPS of California. Mr. Chairman, I take this time in general debate for two reasons. The first is to pay my respects to the chairman of our subcommittee, and to the other members of the committee. It has been a matter of personal pleasure to me to serve on a committee about whose work I knew very little at the time I was assigned to it by the distinguished gentleman from New York [Mr. TABER]. In the interim I have come to realize that this is one of the more difficult subcommittees of the Committee on Appropriations and if it were not for the genuine ability of our chairman and the respect with which he is held generally in the House, it would be even more difficult. There is a feeling of regard, and of cooperation among all of us, on this subcommittee, which has manifested itself in the finished bill as it comes to the floor. As you already know by this time from other comments, this subcommittee has before it the budgets of 31 agencies of the Government, with varying functions; budgets of various size, and very great complications in some of the agencies. The bill before you represents the budgets of 27 of those 31 agencies.

The gentleman from Texas [Mr. THOMAS] spoke of the fact that four of the agencies had been delayed in the consideration of their budgets. That is a very easily understood situation. It meant that either the committee would have been compelled to hold the results of its immediate work—for the committee started work early in December and has now finished 27 of the agencies—it would have been compelled to hold those 27 budgets until April or May and then present them at the same time it presented the remaining four. The four remaining agencies include the Veterans' Administration, which has a tremendous problem and a new Administrator. It is only fair to him to give him time to find out something about his job and what he himself wants to do with his own budget before asking him to come before a committee of the Congress and present and defend that budget.

In the same way the Atomic Energy Commission has a problem which I do not need tell the Members of this House is one of tremendous importance. The longer time it has to prepare its budget and prepare its program, in the present domestic and international situation, the more we will know and the Commission will know what it wants.

The War Assets Administration is an agency which is rumored to be in the

process of changing form, and it is right that it should be allowed as much time as possible, so that it may know what its situation is.

Finally, the Maritime Commission, I say in kindness to the Maritime Commission, is in a state of confusion. It may have a chance to work itself out by the time the subcommittee comes in with the rest of the budget for this year.

It has not been an easy budget to handle, not only because of the complexity of the agencies but because, as the chairman said yesterday, while many of the agencies and their administrative heads have given lip service to economy there has been no evidence of any further interest in that subject in the budget requests. Of the 31 agencies only 4 presented budgets which on their face showed decreases in the budgets of the year before. The General Accounting Office offered an honest reduction in its budget. It was less than last year, maintaining not only the functions of the present fiscal year but whatever additional work might come with the passing year.

The Tax Court, which has roughly $750,000, presented exactly the same budget, dollar for dollar. Therefore, it may be credited with a reduction, because it has obviously assumed in-grade promotions in their own budget.

The Veterans' Administration, in its first budget, which is not now under consideration, presented a request which seemed to be less, but upon analysis showed that the personnel was increased, and very largely the potential elements of the budget, which produce rising costs year after year, had been increased, and only large and finishing items had been removed from the budgets, to show a reduction.

That same thing applies in a slightly different way to the Maritime Commission. My own feeling was, after the first year of service on this committee, that last year, for the fiscal year 1948, the committee had made one of the most thorough analyses possible under the limited conditions under which we were compelled to work. Last year we brought to the floor a budget cut of $1,411,000,000. It is not to be expected that we can in any way duplicate that feat this year. I recognize that the figure is subject to challenge. The distinguished gentleman from Texas, the minority leader [Mr. RAYBURN] said yesterday that the general budget had been reduced something less than a million dollars. My own feeling, as I have said previously on the floor, has always been that the taxpayer does not care very much about the technicalities, whether it was an actual reduction made by a committee in a budget figure, or whether it was a rescission of previously voted funds, or whether it was an amount taken out of the budget, so to speak, by the agency itself after the agency saw the determination of the Congress to reduce expenditures. Instances have arisen where agencies, when the auditors of the committee have looked over their accounts, have said: "Look, here you have a lot of money in this budget justification that you are not going to use or spend this year;" whereupon the agency would come to the Appropriations Committee and say: "We would like to take some money out of our budget request." It seems to me it makes very little difference to the American taxpayer what the technicalities are. The savings are reflected in the taxpayers' pocketbooks.

So last year this particular subcommittee made a recommendation of a $1,411,000,000 reduction in this budget. This year it makes a recommendation of $59,308,071; putting on the budget an additional $196,636,974, which is less than one item alone discussed at length by the able gentleman from North Dakota [Mr. ROBERTSON]. This is the item providing the matching fund for road improvements which amounts to something over $200,000,000 in itself. I feel, therefore, that the increase is a justifiable increase, but it should give rise to some thought on the part of Congress concerning these items over which the Congress has lost control. I do not believe the Congress would have wanted to reduce that particular item, but I am saying that Congress, little by little, has given out of its own hands control of certain items, even the little item which has amused you in the papers recently when the President of the United States decided to build a porch in the rear of the White House. The funds apparently are coming from previously voted money for general repairs and improvements to the White House, over which Congress lost control when it voted the money with a provision that it should be allowed to stand until spent. I, myself, think it is a subject in which the Congress might interest itself.

Mr. SMITH of Ohio. Mr. Chairman, will the gentleman yield?

Mr. PHILLIPS of California. I yield to the gentleman from Ohio.

Mr. SMITH of Ohio. The total carried in this bill calls for an increase in appropriations of roundly $197,000,000. Is not that correct?

Mr. PHILLIPS of California. The gentleman is correct. The gentleman may have heard me say that there was also in the budget $204,577,708, over which the Appropriations Committee had no control, simply the requirement that the money be appropriated.

Mr. SMITH of Ohio. The gentleman is speaking about the roads fund.

Mr. PHILLIPS of California. I am.

Mr. SMITH of Ohio. That is merely an authorization; is not that correct?

Mr. PHILLIPS of California. No; it is in the budget; that is a budget item.

Mr. SMITH of Ohio. That is statutory?

Mr. PHILLIPS of California. Mr. Chairman, there is an item in the bill, and the only item in the bill, on which there was any lack of complete agreement in the committee itself. I may say at this point that we worked in most complete cooperation from beginning to end. I refer to the item which has to do with the emergency fund of the President of the United States. I think it may be said here without revealing any confidential discussions of the committee that some of the members of the majority of the committee were fully in accord with certain of the arguments of the minority, and some of the arguments of the majority were agreed to in part by some of the minority members. In other words, it was not a complete disagreement.

This is the situation: The President last year asked for an emergency fund of $500,000—a half million dollars. The emergency fund of the President is supposed to cover two classes of items: Those items which arise when the Congress is not in session which must be met before the Congress comes back in session, and which, therefore, can be properly taken from a fund of that kind. Those are the emergencies of government, and are met in this way. The fund is also intended to cover those items which should be worked out before great publicity is given to them and which are also emergency in character.

Mr. REES. Mr. Chairman, will the gentleman yield?

Mr. PHILLIPS of California. I yield to the gentleman from Kansas [Mr. REES].

Mr. REES. May I refer to the items here?

Mr. PHILLIPS of California. I am about to read the items. I am about to do just what the distinguished gentleman from Kansas wants me to do. That is to ask you, Mr. Chairman, whether you consider these to be emergencies:

From the emergency fund last year there was spent for the President's staff and personnel in the White House a total of $103,538 from this emergency fund. That is for the ordinary operating staff of the President's office.

There was spent for the President's Amnesty Board, $40,000; for the President's Committee on Civil Rights, $50,000; for the President's Commission on Higher Education, $64,000; for an Advisory Commission on the Merchant Marine, $8,700; for the Office of the Coordinator of Emergency Program and Secretary of the Cabinet Committee on the World Food Program, $45,000.

The President also drew upon many of the other departmental budgets, in my opinion sometimes without the department head having authority to use these funds for that purpose.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. WIGGLESWORTH. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. PHILLIPS of California. Mr. Chairman, the total which the President spent last year was $425,000, including these items I have read, and which I question as being emergency items.

This year the President's budget officer asked the subcommittee for a million dollars in emergency funds. The majority side of the subcommittee thought that since the President had not spent all of last year's appropriation, and had spent the greater part of that for items which were not emergency items, the President of the United States could set an example of economy to the Congress and get along with the same amount of money which he had in last year's fund. The subcommittee finally raised the amount to $700,000.

Now I come to a point which has not been talked about before but which, to

me, as an individual, is part of the present discussion. If you will turn to pages 436 and 437 of the hearings you will see the committee's interrogation of the members of the Council of Economic Advisers. The Council of Economic Advisers represents all that was left of the political idea of a full employment act after the storm had passed and the Congress picked up the pieces. It represents the brush which is given to the hunter after the fox hunt is over.

The Council received $350,000 in the fiscal year. It came up this year and said, "We would like to have $400,000 for the coming fiscal year." So the members of the subcommittee asked certain questions. Among those questions were ones like these, asked by the gentleman from New York [Mr. COUDERT]:

Now, if you do not touch the inflationary consequences and how to deal with them, and if the Harriman committee does not touch the inflationary consequences and how to deal with them, who does?

Mr. Nourse, the chairman of the committee, said:

We did not deal with them in our report.

In other words, the Council did not deal with the inflationary consequences of present conditions in the United States, in advising the President. The answer is impossible. So I inquired, to quote freely: "What did you say about fertilizer, which is a very important subject in the rural areas? Did you say that we had three idle fertilizer plants and if we shipped fertilizer abroad we should, at least, produce all we could?"

Mr. Nourse said, also in free quotation, "No; we did not mention that to the President except to tell him that if we shipped fertilizer abroad then we would have to reduce the amount used in the United States."

Now, I suggest that a telephone call at a cost of considerably less than $400,000 to any agricultural commissioner or Secretary in the United States would not only have brought that information, but it would have brought some practical suggestions.

Mr. REES. Mr. Chairman, will the gentleman yield?

Mr. PHILLIPS of California. I yield to the gentleman from Kansas.

Mr. REES. On that subject matter of fertilizer, is the gentleman familiar with the fact that we have imported fertilizer from Germany during the past year or two?

Mr. PHILLIPS of California. I am very familiar with it, but I do not think the members of the Council of Economic Advisers is familiar with it.

Mr. REES. I am wondering whether they are or not; at least, they have not made a report on it.

Mr. PHILLIPS of California. I will not read you all of this interrogation, but I think it would interest you to read it. In the matter of steel, a question something like this was asked:

"What did you say to the President about steel, which is the basic commodity in industry in the United States? Did you say to the President that there appears to be a strong suspicion that the steel industry is not working to its fullest capacity?" And they said, "Oh, no; we did not mention that, because that would be administrative, and we do not enter the administrative field. We just said that if we used the amount of steel which is being asked for foreign exports, we would not have as much steel to use in the United States as we would otherwise have."

Now, if anybody wanted that information and could not have gotten it by one telephone call to Pittsburgh, I think certainly that somehow or other we could have gotten it for less than $400,000. So I, coming from the western part of the United States, where we are extremely anxious to have comparable food products used to provide a balanced nutritional diet, instead of buying the most expensive grains we have, and thus raising the inflationary spiral, asked:

"What did you say about the substitution of foods?"

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. WIGGLESWORTH. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. PHILLIPS of California. The Chairman of the Council said that was not mentioned, that it also was administrative.

My feeling is that this is related to the President's emergency fund. Last year we had the Office of Government Reports, a luxury which the committee felt had not justified itself before the subcommittee. If the administration proponents wish a luxury like that it should be paid for out of the President's fund, and I felt if we were to have, for $400,000, a luxury to provide information which anybody could get by subscribing to Kiplingers or to Prentice-Hall or to Dun's Review or any one of a half dozen reports, and certainly needing only a staff representative to coordinate the information, why, that should be a matter of decision with the President, and charged to his so-called emergency fund also. Therefore, if you will add together the amounts given to the President, $700,000, for his emergency fund, and the amount given to the Council of Economic Advisers, $300,000, you will see that that represents $1,000,000.

Mr. VURSELL. Mr. Chairman, will the gentleman yield?

Mr. PHILLIPS of California. I yield to the gentleman from Illinois.

Mr. VURSELL. Does the gentleman believe this Council of Economic Advisers really serves a genuine and needful purpose, after having taken this testimony?

Mr. PHILLIPS of California. I am quite sure the majority of the subcommittee felt that it had probably justified itself less well than almost any one of the 27 agencies.

Mr. VURSELL. My observation is that if we are trying to save any money in the interest of the taxpayers, the subcommittee ought to cut further or wipe out entirely agencies like that, whose principal function is to keep some luminaries on the pay roll.

Mr. PHILLIPS of California. Let me give you this little illustration: About 20 years ago H. G. Wells wrote a book called The First Men on the Moon. When these men got to the moon they discovered that everything was so well organized there, just as it is in Washington, that everybody was being trained from birth for a specific occupation in life. Those who were going to turn a crank in an industry were developed entirely in the right arm and nowhere else in the body. Those who were going to do the thinking for the great lunar system developed only the minds. The grand lunar, who was the head of all the moon population, had an enormous head, which he used with such great internal friction that it was necessary to spray his head constantly with cooling vapors and soothing oils.

After listening to the Council of Economic Advisers, I believe the subcommittee felt that perhaps its members should go back to their ivory tower and have their heads sprayed with soothing oils and cooling vapors.

Mr. SMITH of Ohio. Mr. Chairman, with the gentleman yield?

Mr. PHILLIPS of California. I yield to the gentleman from Ohio.

Mr. SMITH of Ohio. The gentleman has reference to the President's council of soothsayers?

Mr. PHILLIPS of California. If the gentleman cares to look upon them as such; I saw no evidence of a crystal ball in the committee hearings.

The Clerk read as follows:

EMERGENCY FUND FOR THE PRESIDENT

For expenses necessary to provide additional assistance to the President and to enable him, through such agents or agencies of the Government as he shall designate, to provide for emergencies affecting the national interest or security, without regard to such provisions of law regulating the expenditure of Government funds or the employment of persons in the Government service as he shall specify, $700,000, of which $100,000 may, when authorized by the President, be expended for objects of a confidential nature and in any such case the certificate of the expending agency as to the amount of the expenditure and that it is deemed inadvisable to specify the nature thereof shall be deemed a sufficient voucher for the sum therein expressed to have been expended: *Provided*, That no part of such fund shall be available for allocation to finance a function or project for which function or project a budget estimate of appropriation was transmitted pursuant to law during the Eightieth Congress or the First Session of the Eighty-first Congress and such appropriation denied after consideration thereof by the Senate or House of Representatives or by the Committee on Appropriations of either body.

Mr. REES. Mr. Chairman, I offer an amendment:

The Clerk read as follows:

Amendment offered by Mr. REES: On page 3, line 9, strike out "$700,000" and insert "$500,000."

Mr. REES. Mr. Chairman, I offer this amendment to reduce the item described as the emergency fund for the President, $200,000. This will still give the President $500,000, which is the amount that was allowed by this Congress last year. Your attention has already been called to the fact that the President asked for $1,000,000 free fund. Apparently a compromise was reached by the Committee at $700,000.

The item is described as an emergency fund. I do not believe that in the last 50 years an emergency fund was allowed to any President, with the exception of the last two. Anyway, it seems to me

$500,000 is enough. Can it be said that the emergency is greater now than it was a year ago? There is nothing in the hearings to sustain that view.

Let us examine briefly how the money was spent, and I leave it to your judgment whether the items, or at least most of them, can be described as emergency items. The gentleman from California [Mr. PHILLIPS] called attention to them. One item is for $40,000 paid to a committee to prepare a report on civil rights. Is that an emergency? Another one is an expenditure of about $50,000 for a President's Commission on Higher Education. Is that an emergency? Another one is for a similar amount, or more, for the Advisory Commission on Merchant Marine. Do you regard those as emergency items? Certainly you cannot—not even by the stretch of your imagination. I think if you will examine these items you will find that out of the $420,000 spent last year, two-thirds of it cannot be described as emergency.

I do not want to be misunderstood. I know this is a comparatively small item, but there is a principle involved. This Congress has in recent years been too free all the way along the line with lump-sum appropriations. You are doing that today. The President said himself we should be economy-minded and yet he asks for a million dollars to be used as a free fund so that he can appoint commissions and organizations of various kinds that have nothing to do with emergency.

What I am trying to say is this. If he is in need of money for these items or any other items for emergency or otherwise, they ought to be authorized by the Congress and there is nothing in the hearings to indicate that any of this money will be spent for emergency purposes. The least the administration should do is to tell us what you are going to spend the $700,000 for. You have not done it and I ask you now to tell me the purpose for which this money is to be used.

I want the President to have all the money he needs for taking care of the management of his Executive offices, but that is taken care of in another item of this bill. Again, I say if there is an emergency for which this money is to be used, why not tell us about it and why not let us know the purpose for which it is to be spent.

I ask you again whether any Member on the floor of the House thinks that the $50,000 spent for the report of the Committee on Civil Rights was an emergency or the money spent by a Commission on Higher Education, appointed by the President, is an emergency, or the thousands of dollars spent on an Advisory Commission on Merchant Marine is an emergency item.

I say again, if the expenditures of such items are needed, certainly Congress should have the right of authorizing the expenditure of such funds. I think this is the responsibility of Congress.

So there will be no misunderstanding, this item is in addition to funds in this bill to pay all expenses for the President's salary and salaries of all the people he wants to employ for the White House and Executive Offices. Here they are right in your own bill amounting to more than a million dollars. You have them in only three items. President's salary, $75,000; salaries and expenses for the White House Office, $969,612; then you have $330,700 to be used to maintain the Executive Offices and Grounds.

The so-called emergency fund is a free fund and not used for so-called housekeeping purposes. Again I am only asking that we save a part of it and put the fund where it was last year. If more is needed, Congress can look it over and authorize it. After all, it is the money of the taxpayers that is being spent in these bills. It ought to be accounted for.

There are a number of items in this bill that should be reduced. I hesitate to vote against the entire bill, because I realize there are a number of important items in it that are necessary.

Mr. RAYBURN. Mr. Chairman, before the Chairman puts the question on the amendment, I wonder if any member of the majority on the committee is going to defend the bill. I cannot pretend to know too much about it.

Mr. PHILLIPS of California. Mr. Chairman, I rise in opposition to the amendment. If it were possible to say that I am rising in opposition to the amendment without prejudice to it, I would say that now. The situation is simply this. I have expressed myself regarding the President's emergency fund. I agree with much that the gentleman from Kansas says so eloquently, that the President should have asked for less money. It was agreed in the committee that the figure should be set at $700,000. I do not mean by any compromise agreement; I mean by discussion, and a feeling in the committee that the President had a right to ask for the amount of money that he needed. There was a feeling that we did not want to inquire too closely into the requests of the Executive, as the gentleman from Alabama [Mr. ANDREWS] yesterday stated. Consequently, while I feel that economy would be served and we would save $200,000 if this amendment were carried, I also feel it is well to let the relationship stand which exists between the several agencies of Government. Speaking for myself, and without consultation with the other members of the subcommittee, I feel we should leave the bill stand as it was reported by the subcommittee, on the two items which total the amount requested from the White House. This represents, at that, a saving of $400,000. Therefore, I will vote against the amendment offered by the gentleman from Kansas, for whom I have the highest regard.

Mr. REES. Mr. Chairman, will the gentleman yield?

Mr. PHILLIPS of California. I yield.

Mr. REES. As I take it, the gentleman feels he is obligated to stand by the committee's agreement, but he is not justifying the $700,000 or $1,000,000 that is to be handed over to the President to carry on as an emergency fund. What I am trying to do is to reduce the item to $500,000. Even this has not been justified. The remarks of the gentleman himself have shown that funds heretofore allowed have not been used for emergency purposes. All we are saying is, "If you want to spend money for economic councils or advisory boards or civil rights reports, or things like that, that cost thousands of dollars, let it be justified before the House." That is all there is to it. We are not taking any money from him if it is justified. But just to turn over $700,000 for this thing is all wrong. After all, it is the taxpayers' money that is being spent. I can understand the gentleman's position as a member of the committee, but I think his speech a few minutes ago justifies my position in this matter.

Mr. PHILLIPS of California. Curiously, there is no agreement, in that sense, in the committee regarding this item; in the sense of a compromise in the committee, which either compels or suggests to me to defend this item. I am defending it because of a condition in government, which I believe the Members of this House will defend as a condition, even though they may not agree with the figure in the budget which comes out of that condition. That is, that this House asks for its funds; the other body asks for its funds; the executive agency of the Government asks for its funds. While I may be in disagreement with what the other body sometimes asks, in its own fund, I have never chosen to oppose those funds upon the floor of this House, or in committee. When the committee reported out this bill, it reported out a figure which it believed was satisfactory, in considering the entire picture.

Mr. REES. Will the gentleman yield further?

Mr. PHILLIPS of California. I yield.

Mr. REES. It seems to me we are in a rather peculiar position if the House cannot question the funds of any department of government. I do not see any justification for that. I think that is our responsibility. It is our responsibility to appropriate these funds, and every Member has a right to question not only the members of the committee but any Member of the House. That is what I am trying to do now. I do not think there is anything so sacred about it that we cannot question it. The hearings do not justify this $700,000 at all, except as one member from the Budget Bureau or someone down there said, "We ought to have a million dollars." Then, according to your hearings, the committee agreed on $700,000. There is no justification in the hearings on the report for this amount. Let someone point them out for me. They are not there.

Something has been said about need of part of these funds for so-called housekeeping purposes and increased salaries. Let's keep the record straight on that. This bill already provides amply for more than a million dollars for those things in a separate item. Here they are $75,000 salary; $969,612 salaries and expenses of White House Office; and $230,700 to maintain the Executive Mansion and grounds.

This item of $700,000 is a sort of free fund in addition to other funds and described as an emergency fund.

The CHAIRMAN. The time of the gentleman from California [Mr. PHILLIPS] has expired.

Mr. ANDREWS of Alabama. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I hope that the Committee will vote down this amendment. With few exceptions, there is no State in this Union that does not allow the Governor of that State an emergency fund. That is allowed on the assumption that the chief executive will expend it judiciously. Certainly, we recognize the need for an emergency fund. If we appropriate one dollar for that fund, we should have faith in the ability of the executive to spend that money judiciously.

There is not any evidence before this Committee and there was no evidence before our subcommittee that the emergency funds spent last year were spent recklessly. I think it is beyond our prerogative to be questioning the emergency fund of the Chief Executive of these United States. He passes on every statement of expense that is allowed to this House of Representatives and to the Senate.

Mr. REES. Mr. Chairman, will the gentleman yield?

Mr. ANDREWS of Alabama. I yield.

Mr. REES. The President's original request was that he be allowed to spend $1,000,000, not $700,000.

Mr. ANDREWS of Alabama. But the committee, after hearings, agreed to $700,000.

Mr. REES. Will the gentleman insist that the expenditure of money for the President's Committee on Civil Rights is an emergency item? Does the gentleman insist that the President's Commission on Education is an emergency item?

Mr. ANDREWS of Alabama. No; but he should be given discretion.

Mr. REES. Does the gentleman contend that the President's Committee on Merchant Marine is an emergency item? Or the Committee on Civil Rights?

Mr. ANDREWS of Alabama. Certainly not.

Mr. REES. What I am saying is that these things should be sent to us in regular order; let them be authorized by the Congress. They certainly do not fall into the classification of emergencies. Of course, under this legislation he can spend it as he pleases.

Mr. ANDREWS of Alabama. I say it is well within his rights to spend that money for emergency purposes.

The question before this House is whether or not we are going to allow the President what I think is a modest sum—less than he requested—for emergency purposes; and I say that this bill comes from our committee almost unanimously agreeing that $700,000 is a reasonable amount to allow the President for his emergency fund, $300,000 less than he requested.

Mr. REES. Mr. Chairman, will the gentleman yield further?

Mr. ANDREWS of Alabama. I yield.

Mr. REES. I call attention to the fact that $500,000 was the amount allowed last year, $424,000 was spent of which less than one-third was for emergency items. All in the world I am doing is asking this Committee to support an amendment that will allow a similar amount that was appropriated for this purpose last year. That is all there is to it. We ask for a reduction in that item to put it where it was last year, that is because it seems to me there is no greater emergency now than there was a year ago, when $420,000 was spent. All of it should be justified, but I am trying to effect a compromise. Anyway, the hearings do not justify it. The gentleman has not suggested any explanation of how the President is going to spend this $1,000,000 he wanted, or any part of it. What is it to be spent for? Can you tell me?

Mr. THOMAS of Texas. Mr. Chairman, will the gentleman yield?

Mr. ANDREWS of Alabama. I yield.

Mr. THOMAS of Texas. In order that tne record may be kept absolutely straight at this point, last year there was about $105,000,000 of emergency funds used for salaries at the White House. This year salaries, plus a publicity item, radio, and so forth, come to about $245,000. The remainder of the $1,000,000 requested would be used for the President's housekeeping under emergency times.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. HENDRICKS. Mr. Chairman, I move to strike out the last two words.

Mr. WIGGLESWORTH. Mr. Chairman, will the gentleman yield for a unanimous-consent request?

Mr. HENDRICKS. I shall be pleased to.

Mr. WIGGLESWORTH. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto close in 5 minutes.

Mr. RAYBURN. I hope the gentleman will be a little more liberal. I hope he will allow, say, 7 minutes. I would like to use a couple of minutes myself.

Mr. WIGGLESWORTH. Mr. Chairman, I modify my request and make it 10 minutes.

The CHAIRMAN. The gentleman from Massachusetts [Mr. WIGGLESWORTH] asks unanimous consent that all debate on the pending amendment and all amendments thereto close in 10 minutes. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Florida [Mr. HENDRICKS] is recognized for 5 minutes.

Mr. HENDRICKS. Mr. Chairman, I am not going to use 5 minutes. I just wanted to say to the gentleman from Kansas [Mr. REES], who said he wants to cut this fund back to what it was last year, $500,000, that the President has the same reason for asking $1,000,000 this year that he had for asking for $500,000 last year.

Let me remind the gentleman that the President has never questioned any item we have sent up for the House of Representatives or the Senate; he has always approved them. I do not say that he could not object to them or that we cannot object to what the White House sends up, but he never does.

I wish to say to the gentleman from Kansas that last year we did not cut this item. He requested $500,000 and we gave him $500,000. This year he has asked for $1,000,000 and the committee has already agreed to cut it by $300,000. I think that is sufficient. I think that is a larger cut than given to any other item in the bill. I think the average cut was about 6 percent throughout the bill.

Last year when we had this bill on the floor of the House, my side of the House offered amendments they felt were important, particularly in regard to appropriations for the Veterans' Administration. I stood on this floor and fought those amendments in support of my chairman.

Mr. Chairman, after my chairman and the members of the committee have agreed that $700,000 is the amount of money that the President should have, this committee ought to accept the word of that committee. I believe this committee knows better what we should do than the gentleman from Kansas [Mr. REES], who is not a member of the committee. I therefore request that the members of the committee here sustain the Subcommittee on Appropriations in its action just as I requested that the Democrats sustain that committee last year.

Mr. REES. Mr. Chairman, will the gentleman yield?

Mr. HENDRICKS. I yield to the gentleman from Kansas.

Mr. REES. I do not question the gentleman's great ability in handling legislation before the House as a member of the committee, but to carry his proposal to finality I am wondering whether only members of the committee that report bills are the only ones to offer amendments?

Mr. HENDRICKS. I did not take any position of that sort, but I say that in this case the committee has considered the matter very thoroughly. We decided that $700,000 is the proper amount. As I stated, I believe we have more information on the subject than the gentleman from Kansas.

Mr. REES. That is what I said.

The CHAIRMAN. The time of the gentleman from Florida has expired.

The Chair recognizes the gentleman from Texas [Mr. RAYBURN].

Mr. RAYBURN. Mr. Chairman, I have been here a long time. The 4th of March next will be 35 years. During that time I have served 12 years under Republican Presidents, and I know that my conscience is clear that I did not deal with any of those Republican Presidents in a small way. I voted to give to them enough funds to run their office, and I would feel pretty badly today if I looked back and felt that I failed to do that.

I remember that we were talking to President Roosevelt one time about some funds he wanted with which to run his office. It was a modest sum. He said, "I sign many bills which give you help to run your office up on the Hill, and I never question them."

The President has asked for a modest sum. As a matter of fact, I think the million dollars originally requested was a modest sum. Certainly $700,000 is not too much. Just because somebody with some name or of some party happens to be President of the United States at the moment that I am passing upon questions like this is not going to influence my judgment.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan [Mr. CRAWFORD].

Mr. CRAWFORD. Mr. Chairman, in looking over the disposition of the $424,000 used last year by the President, I see several items that aggregate considerable money. For example, there is one for a special committee on foreign aid, $41,850. I wonder if we are going to have to spend $41,850 this year through the Department of Commerce to make a special committee report on foreign aid in light of the Marshall plan and all the other hundreds of millions of dollars which are being included in some of the foreign-aid items called for by the President.

Mr. Chairman, insofar as I know, the Presidents previously alluded to by the distinguished gentleman from Texas did not in their days have these big special emergency funds available to them. In those days we did not have so many emergencies, I will admit. May I say in all kindness to the members of the Appropriations Committee that the cut in the budget last year did not satisfy me at all. I think we did a lot of excess talking to the country and failed to perform.

I do not know what the budget is going to be cut this year, but so far as I am concerned I shall vote for this reduction of $200,000 to put the item back where it was last year, which was about $76,000 in excess of what was actually expended under the emergencies then existing; and all in the hope that the President of the United States can under the excruciating conditions which exist today, get by with a half-million dollars. I venture to say that if that is all the two Houses of Congress will permit him to have that he will hold the expenditures down to $500,000, and I think beginning with this first appropriation bill that the Members on the Republican side of the House might just as well begin to cut if we are going to carry out the pledges that have been made by our leaders.

The CHAIRMAN. The time of the gentleman from Michigan has expired. All time has expired.

The question is on the amendment offered by the gentleman from Kansas [Mr. REES].

The question was taken; and on a division (demanded by Mr. RAYBURN) there were—ayes 39, noes, 49.

Mr. REES. Mr. Chairman, I demand tellers.

Tellers were ordered, and the chairman appointed as tellers Mr. REES and Mr. WIGGLESWORTH.

The Committee again divided; and the tellers reported that there were—ayes 59, noes 82.

So the amendment was rejected.

The Clerk read as follows:

FEDERAL TRADE COMMISSION

Salaries and expenses: For necessary expenses, including personal services in the District of Columbia; health-service program as authorized by law (5 U. S. C. 150); payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. 921); contract stenographic reporting services; newspapers not to exceed $500; and not to exceed $9,000 for deposit in the Treasury for penalty mail (39 U. S. C. 321d); $3,431,510, of which not less than $228,695 shall be available for the enforcement of the Wool Products Labeling Act: *Provided*, That no part of the funds appropriated herein for the Federal Trade Commission shall be expended upon any investigation hereafter provided by concurrent resolution of the Congress until funds are appropriated subsequently to the enactment of such resolution to finance the cost of such investigation.

Mr. WIGGLESWORTH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WIGGLESWORTH: On page 14, line 21, after the semicolon strike out "$3,431,510" and insert "$3,361,510."

Mr. WIGGLESWORTH. Mr. Chairman, this amendment is offered as a committee amendment for the purpose of clarifying the present situation.

It was the intention of the committee in making the appropriation for the Federal Trade Commission to eliminate for the time being all money for work in the insurance field, because in the event the present law should be extended beyond June 30, as it already has been extended on at least one occasion, the money would not be necessary.

The testimony of the agency was far from clear. It appears, however, that it considers under the action taken by the committee that it still has $70,000 which might be used for this work.

It seems best, therefore, to reduce the amount by $70,000 and allow the matter to be straightened out in the other body.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. WIGGLESWORTH].

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Funds available to the Public Buildings Administration for construction shall be available for temporary services as authorized by section 15 of the act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not in excess of $35 per diem (unless a higher rate, not exceeding $50, shall be approved by the Director of the Bureau of the Budget).

Mr. HESELTON. Mr. Chairman, I offer an amendment, which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. HESELTON: On page 21, following line 22, add a new paragraph as follows:

"No part of the foregoing appropriations to the Federal Works Agency shall be used for the purpose of converting any existing coal-heating units to oil in any federally owned or rented buildings in or outside the District of Columbia when there is a fuel-oil shortage."

Mr. Chairman, I ask unanimous consent to proceed for five additional minutes, this being the last time that I intend to speak today during debate.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Chairman, some of you were here yesterday and some of you were here this morning when I addressed myself to this question, but there are others who have not learned what the developments are as of this time. Yesterday afternoon, at page 1015 in the third column of the RECORD, I indicated the form of an amendment I proposed to offer, a limitation on the use of these funds appropriated for operating buildings. The gentleman from Texas [Mr. THOMAS] has indicated to me that if I would take out natural gas, he would not be disposed to oppose the amendment. I confess that I have no business on the floor here as a Representative of a New England State advocating the inclusion of natural gas because we do not get any. I will have to leave that fight to you people in the natural-gas areas. He also indicated he would prefer that I should add the words "in areas where there is a fuel-oil shortage." I have done so with some reluctance, because I realize that creates a question of interpretation. I suppose today the District of Columbia could be considered in a fuel-oil-shortage area; possibly Virginia; perhaps North Carolina, and even Tennessee. Even the State of Texas, I understand, is having trouble today in some areas. But we certainly are having our troubles in New England and the Northeast. So I am going to confine my efforts this afternoon to prevailing upon you to help us out.

You will find a table at page 1016 of the RECORD which was furnished to the President at the request of Mr. Flemming, with which I will deal in a moment. But let us get back to this fight of December 12 before the House Committee on Interstate and Foreign Commerce. A gentleman by the name of Mr. William E. Gannon, purchasing agent, Bureau of Federal Supply, was testifying, and he said in part, in answer to a question by the gentleman from Minnesota [Mr. O'HARA]:

How wide a scope of articles did these bids call for?

Mr. GANNON. It was solely fuel oil and kerosene and Diesel oil.

Mr. O'HARA. Used for heating in the buildings of the various departments of the Government that you have outlined?

Mr. GANNON. Yes, sir.

Later I inquired:

Do you have any jurisdiction over the use made of fuel oil in the Federal buildings?

Mr. GANNON. No, sir.

Mr. HESELTON. You are confined simply to the matter of purchase?

Mr. GANNON. That is right.

Then this very significant point which I would like you to listen to carefully, I said:

I understand that Mr. Lewis testified earlier this week that it is possible to reconvert to coal in the New England area, and the coal industry could supply all of the demands there if it was possible to convert. Are you familiar with the possibility of converting the Federal buildings in that area as a step toward helping the situation?

Mr. GANNON. I could not say that I am reliably informed but I have heard rumors that there have been certain conversions to oil and I do not know why.

Mr. HESELTON. Conversions to oil?

Mr. GANNON. Within the last year, and I do not know why they could not reconvert.

Mr. HESELTON. Would that not be worth while exploring? Would it provide some real aid in the near future as well as for long-range conservation? As long as you are having difficulty buying it, if you can reconvert to coal, it would save oil in considerable amount.

Mr. GANNON. I think not only the Government but all citizens should be urged, if not forced, to reconvert where they can.

Mr. HESELTON. While I agree now it is an emergency problem, I still think that the Government has the prime responsibility and should set the example.

Mr. GANNON. There is no question about it.

That was December 12. What is the record? This table shows there have been some reconversions in recent months. It does not tell you, however, in the table when these reconversions took place.

Earlier today I received from one of the staff of the Appropriations Committee, who has been kind enough to follow this, a startling statement, one that will make bad reading in the New England papers tonight if it is printed:

The Marine Hospital in Boston, Mass., was reconverted from coal to oil in December.

I do not know what date, but it was in December 1947. The table shows that that particular hospital uses 370,000 gallons of this desperately needed fuel oil right in the heart of some of the worst temperature conditions in New England. That is for foresight. That is not the type of thing you and I expect to be used by responsible experts.

Now, as to the District of Columbia: We have five locations here, and they are interesting, although not quite so vivid as that; 301 Independence Avenue was converted in September 1946; 1626 K Street was converted in September 1946; 1624 H Street was converted in October 1946; Briggs School was converted in October 1946; 1757 L Street was converted in September 1946.

You will find that tabulation on page 1016 of the RECORD. You can estimate how many gallons of fuel oil was burned during that time.

Now, this is the prime reason why I am asking you to place this limitation in. At Arlington, Va., 705 Columbia Pike, the contract has been stopped. There is a 14-day emergency clause, an escape clause, as I interpret it. The contract has been stopped, but only temporarily, for they say it is their purpose to start the work again after April 1.

Mr. Chairman, every person who has been competent to testify before any committee from Secretary Forrestal right straight down through the industry has told us that this is not a problem for this month or this winter, that it is a long-range problem, that it is a 5-year problem at least, that it is a national-security problem. Members of this House from New York, New Jersey, and New England will tell you that it is also a welfare problem with our people. We are dealing with people who are sick, with people who are elderly, we are dealing with young children, with hospitals, schools, churches, and industries.

Our colleagues from Michigan and Pennsylvania will tell you why they want natural gas included in the amendment. I hope the gentleman from Massachusetts [Mr. CLASON] will take the floor and read an emergency telegram setting forth conditions in the city of Northampton. What I am trying to tell you is that we are up against an emergency, a real one.

Here is another one: Washington, D. C., 711 Twelfth Street, NW. Contract stopped. Proposed to start work again after April 1.

Mr. WIGGLESWORTH. Mr. Chairman, will the gentleman yield?

Mr. HESELTON. I yield.

Mr. WIGGLESWORTH. I do not want to interrupt the remarks of the gentleman from Massachusetts, but as he knows, last evening I expressed myself as sympathetic with the amendment. I have had an opportunity to talk with other members of the subcommittee. I am glad to state that I am authorized to say that as far as the committee is concerned it is prepared to accept the proposed amendment.

Mr. HESELTON. I was told by my father once that it is a wise man who knows when to stop talking when the court is with him. I have always valued that good counsel.

I am through.

Mr. COFFIN. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. COFFIN to the Heselton amendment: Insert after the word "oil" the words "or natural gas."

Mr. COFFIN. Mr. Chairman, my heart bleeds with sympathy with the gentleman from Massachusetts whose constituents are freezing to death because of the lack of fuel oil. I come from an area where every other person is already a human icicle because of the lack of fuel oil. But worse than that we have 200,000 people out of work because of lack of gas. I think, therefore, if we are sensible we will include gas as well as fuel oil in this restriction against conversion; and I therefore ask you to support, for the sake of the dear people of Detroit, this restriction of conversion to gas as well as to fuel oil, which is covered by my amendment.

Mr. CLASON. Mr. Chairman, I move to strike out the last word and rise in support of the amendment.

Mr. Chairman, I wish to speak in favor of this amendment because I believe the shortage of fuel oil throughout the country is such that public officials should cooperate in every way possible in an effort to relieve the situation. This amendment and the amendment to the amendment both are offered for the purpose of giving further relief.

In order that the House may know the situation as it prevails in Massachusetts today I would state that this noon I spoke with Mayor Edwin Olander, of Northampton, Mass. The information he gave me was of such nature that I sent a telegram to the President of the Standard Oil Co. of New Jersey this afternoon. I would like to read you the telegram:

M. J. RATHBONE,
President, Esso Standard Oil Co. of New Jersey, New York, N. Y.

Mayor Olander, of Northampton, Mass., informs me that board of health has declared state of emergency in Northampton. Mayor has impounded all No. 1 and No. 2 fuel oil. Public amusement places, bowling alleys, and theaters closing down, stores cut to 60-degree heat and church services limited. Officials have handled up to 100 calls in 1 day from persons out of fuel oil. Yesterday, 200 calls from persons out of oil or to be out of it by next morning.

Can you arrange for pool of fuel oil to be available to relieve desperate fuel-oil situation Northampton immediately?

Some time ago when another serious situation was developing in regard to the shipment of emergency fuel-oil supplies to independent dealers and for customers who could not get it from the regular suppliers to whom they had gone previously, Mr. Rathbone helped considerably. His company has assisted considerably in attempting to alleviate the situation by distilling a larger percentage of fuel oil from each barrel of crude oil than had been the intention of the company. This increase amounted to about 10 percent, or over 2,400,000 gallons daily for his company alone. I am hopeful that President Rathbone will be able to step into this picture and, knowing the facts and the inability of the oil companies up there to meet the situation which has developed, will be able to do something at once.

Mrs. ROGERS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. CLASON. I yield to the gentlewoman from Massachusetts.

Mrs. ROGERS of Massachusetts. I heard a long-distance call from Maine last night, from a community where the temperature was 25 below zero. This is not a local Massachusetts matter. It is a New England matter, it is a matter involving the whole northern part of the country. I am strongly in favor of the pending amendment. I was very shocked to learn that the Navy felt it must keep its oil supply by converting a Marine hospital from coal to oil. This is an incredible situation. I feel, Mr. Chairman, that if my bill to embargo oil were enacted into law it would have a very salutary effect upon the oil producers in the matter of getting the oil out to the people who need it. I think it is the one solution to the whole matter.

Mr. CLASON. I thank the gentlewoman from Massachusetts. May I point out that in Springfield the temperature has been 26 below zero, at Hampden 30 below, and at Deerfield, in Congressman HESELTON'S district, 37 below. When the situation is like that, everybody ought to step in and help.

Mr. BATES of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. CLASON. I yield to the gentleman from Massachusetts.

Mr. BATES of Massachusetts. In common with the gentleman from Massachusetts, I have received similar telephone calls. I received one early this morning. I have also received a number of telegrams calling attention to the fact that the suppliers are running out of oil completely. One in particular, the State Fuel Co., of East Boston, is entirely out of oil this morning.

In addition to what the gentleman has already said, may I state that I am given to understand that the president of the New Jersey Standard has already been in telephone conversation with the Boston representative of his concern and it is my further understanding if there is any oil available belonging to that company in the Boston area he is going to do all he can to see that it is distributed where it is needed most. I need not say that we are deeply appreciative of this

cooperation. It is a very unfortunate situation.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. HARRIS. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, I do not rise in opposition to the amendment offered by the gentleman from Massachusetts [Mr. HESELTON]. I have the greatest sympathy for the people in areas that use fuel oil when they are striving so hard to alleviate the shortage. There has been information that certain Government buildings in certain shortage areas are being converted from coal to fuel oil. For this reason I think the pending amendment is justified. However, I should like to call the attention of the committee to the fact that I question the advisability of including natural gas. Our Committe on Interstate and Foreign Commerce has been holding extensive hearings on this matter for some time and we have not had any information that there have been any conversions or purported conversions from coal to natural gas.

The pending amendment applies to conversions in Federal buildings. May I ask the gentleman from Michigan if he has any information that the Federal Government either with respect to its own buildings or rented buildings intends to convert from coal to natural gas?

Mr. COFFIN. There have been several projects. I cannot give you the exact number, but the scarcity of fuel oil is going to tend in that direction more and more.

Mr. HARRIS. I regret, of course, the general situation regarding fuel oil. But in certain areas I want to call your attention to the fact that we have buildings that are using butane and other products developed from natural gas and petroleum. Butane is becoming an extremely short product in these areas, and if we do find some Federal buildings where they are running short of butane and cannot, of course, get any more fuel in an area where there is available plenty of natural gas, a prohibition of this kind would require the Federal Government to go into the coal areas and transport coal down into that part of the country. It would cause a tremendous liability and increase the burden, in my opinion, if a condition like that were to develop. I am greatly in sympathy with the gentleman's proposal, and if it would relieve the situation any at all in his area I would certainly be in favor of it.

Mr. HESELTON. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Massachusetts.

Mr. HESELTON. I appreciate very much the attitude that the gentleman has taken, and I also appreciate the attitude taken by the other Members in this body. But I will be frank with you that I must support the gentleman's amendment. I do it for this purpose. It is my understanding that right here in the District we are burning fuel oil in order to make up the shortages of natural gas. I said yesterday, and I say again, that this is a long-range problem. We cannot overlook the fact that 200,000 people are out of work in Michigan and 15,000 people are out of work in the Pittsburgh area, and for every cubic foot of natural gas that you send up to us we will pay premium prices for.

Mr. HARRIS. The gentleman has been very diligent in this matter, and I certainly am anxious to help out in any way I possibly can, but if the gentleman can tell this Committee or the Congress one instance of where the Federal Government proposes to convert from coal to natural gas, then certainly I would be more in sympathy with the proposal.

Mr. HESELTON. Would the gentleman be willing to say that if we can develop that before the other body he will join with us?

Mr. HARRIS. I certainly will. If it will help alleviate the unemployment situation and the critical condition in the distressed areas, I would be glad to join in any program that would help out.

Mr. SADOWSKI. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Michigan.

Mr. SADOWSKI. At this point it might be well to inform my colleagues from Michigan that the Committee on Interstate and Foreign Commerce this morning has agreed to hold hearings on the shortage of natural gas. A complete investigation will be made of that situation by the committee, and a report should be had in about 2 weeks from now.

Mr. HARRIS. I merely call this to the attention of the committee that I doubt very seriously the wisdom in having natural gas included at this time, because we might find ourselves running into more trouble. I do not believe, from information I have, that it would help any at all to include natural gas in this amendment.

Mr. WIGGLESWORTH. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto close in 20 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois [Mr. VURSELL].

Mr. VURSELL. Mr. Chairman, I am rather glad that some of the Members of Congress are hearing from their constituents at home. It seems as though the lack of fuel oil had to happen before they could become properly interested, in the broad sense of the word.

Referring to what the gentleman from Nebraska just said, I had occasion the other day to look into the breakdown of how much petroleum products is to be shipped to Europe for the first 15 months under the Marshall plan. If we do not have this oil available, we are to buy it from South America. It amounts to $651,900,000 worth of precious petroleum products, that we are short of in this country.

There are 300,000 people out of work and hundreds of thousands of people inconvenienced as a result of the shortage of heating, in addition to the hospitals, and so forth. I also notice that $328,000,000 worth of coal is to be shipped out in the first 15 months under the proposed Marshall plan.

It is a long-range problem that is confronting the people of the United States at the present time. We are using 20 percent more petroleum products than we did in 1945, and our population is increasing. Yet this Congress is about to take the responsibility of sharing our petroleum products and our coal and our steel and everything else, to shore up the economies of the entire world.

I hope that out of the investigation the Interstate and Foreign Commerce is now making we can put a complete embargo on the shipment of petroleum products, and I hope we can write this amendment into the bill and stop the Government from converting from coal to gas and petroleum. Of course, they have been converting and they will keep converting unless they are stopped by law, because that is a chance to award contracts and spend more money, and this administration is never happier than when it has everybody spending money, whether it is conversion to this or conversion to that.

Mr. Chairman, I am supporting both the amendment to the amendment to the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey [Mr. HAND].

Mr. HAND. Mr. Chairman, I am strongly in favor of, and shall support, the amendment offered by the gentleman from Massachusetts [Mr. HESELTON] and the amendment offered by the gentleman from Michigan [Mr. COFFIN]. I think both gentleman are doing their constituents, their districts, and their Nation a service in offering these amendments.

May I call your attention to the resolution which has been brought out by the Committee on Interstate and Foreign Commerce which has for its purpose a definite embargo on the export of petroleum products for a period of time which I think is 30 days.

Let me say to you once more, as I have on previous occasions, that the House Committee on Merchant Marine considered this problem last June and July and brought out at that time, when the weather was warm, a bill forbidding the export of petroleum products, unless the Secretary of Commerce O. K.'d those exports as being not against the national interest of this country. This thing has been delayed entirely too long. The House passed that bill, incidentally, and I sought to incorporate the same provisions in legislation pending before the House when we considered the $600,000,000 foreign-relief bill. My amendment lost in the Committee of the Whole by seven votes. So that it has been delayed ever since last June. It is time that we took very drastic action on this situation.

While I have this brief time, let me make this one remark. I doubt if there is anyone in the Congress, or if there is anyone in the Nation who has rendered more valuable service on this particular problem than the gentleman from Massachusetts [Mr. HESELTON], who has spent hours, days, and weeks working on this

program in his committee and on the floor of the House. I hope the Committee supports his amendment.

Mr. POTTS. Mr. Chairman, will the gentleman yield?

Mr. HAND. I yield to the gentleman from New York.

Mr. POTTS. The gentleman will recall that when the Committee on the Merchant Marine and Fisheries was studying this situation last June, there were at that time three ships loading on the Pacific coast bound for Russia, one of which was the *Tagenrod*, which had 11,000 barrels of kerosene which is the fuel used by the veterans in the Quonset huts in my district. Those veterans have been very cold this winter.

Mr. HAND. If the gentleman will permit me, the same situation happened in the port of Philadelphia within the last week.

The CHAIRMAN. The Chair recognizes the gentleman from Connecticut [Mr. SADLAK].

Mr. SADLAK. Mr. Chairman, in behalf of my constituents throughout the State of Connecticut, I wholeheartedly endorse the proposal by the distinguished gentleman from Massachusetts [Mr. HESELTON] to prevent further conversion of coal-burning to oil-using equipment in order that we might save every drop of fuel and distribute it to the fullest advantage in the critical situation that has arisen in the matter of fuel shortage.

I join with my colleagues in their respect and commendation to the proponent of this amendment, the gentleman from Massachusetts [Mr. HESELTON] for his indefatigable efforts in endeavoring to bring about an alleviation of a hardship that is particularly growing in the northeastern area because of the continuance of subzero weather and unusually heavy snowfalls that add to the unhealthy discomforts.

This proposition is the beginning of long-range planning and is a measure which is a follow-up of the requests made to the administration urging the discontinuance of converting heating units to the use of oil instead of other fuels. Of course, direct relief by the shipment of the necessary fuels to our affected areas is the surest way for dealing with the case, but at the same time, every other avenue of bringing relief must be investigated and compelled to act for the good and welfare and overcoming a problem which is causing greater concern today and must be continually dealt with in the days before us.

I hope the Committee will accept this meritorious amendment and the Members will join unanimously in its addition to the bill before us.

Mr. HUGH D. SCOTT, JR. Mr. Chairman, will the gentleman yield?

Mr. SADLAK. I yield.

Mr. HUGH D. SCOTT, JR. I want to echo what has been said with regard to the activities of the distinguished gentleman from Massachusetts [Mr. HESELTON]. I have observed his work in committee as well as on the floor on this extremely important matter. The people of my section of the country are as cold or perhaps nearly as cold as the people of Massachusetts and New England generally. I do believe if it had not been for the excellent work of the gentleman from Massachusetts [Mr. HESELTON], a great deal that has already been accomplished would not have been accomplished. We are all very much indebted to him for his fine work.

Mr. SADLAK. I am unqualifiedly in agreement with the gentleman.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. SADLAK. I yield.

Mr. KEATING. Mr. Chairman, I would like to echo the sentiments of the gentleman from Pennsylvania in expressing the gratitude of everyone in my section of the country to the gentleman from Massachusetts [Mr. HESELTON], and to say that I am very happy to support his amendment.

Certainly with all the suffering now being encountered from lack of fuel oil, particularly in the New England and Mid-Atlantic States, and with the city councils and administrative officers of all our municipalities so much exercised over this serious problem, it is unthinkable that we should not call a halt on the conversion at this time of federally controlled buildings to oil heat. It shocks our conscience to hear of such callous disregard of the people's welfare or downright mismanagement such as the gentleman from Massachusetts has referred to in the conversion just this last December of a large veterans' hospital in Massachusetts. The oil consumed in this huge installation in 1 week would no doubt heat a good many homes for the entire winter season.

The Federal Government, instead of trying to corner the fuel oil for its own buildings, should set an example for the rest of the country in conserving this vital commodity. Since those having in charge the administration of public buildings either through misdirected action or thoughtless inaction are either doing the wrong thing or nothing at all, it devolves upon us, it seems to me, to put a stop to it insofar as we can by the enactment of this amendment at this time.

Mr. PHILBIN. Mr. Chairman, will the gentleman yield?

Mr. SADLAK. I am glad to yield to the gentleman.

Mr. PHILBIN. Mr. Chairman, I am glad to know the gentleman's position on this important matter. I agree with him wholeheartedly in the compliments that he has paid to my distinguished colleague, the gentleman from Massachusetts [Mr. HESELTON]. No one could work more earnestly or more effectively in trying to find a solution to this critical problem than the gentleman from Massachusetts [Mr. HESELTON]. He deserves our sincere commendation. Our situation in New England, as the gentleman well knows, is desperate and highly critical. While we appreciate the help that has been rendered to us by Members of this body and the Government, we hope that we will be able to go ahead with this and other pending measures on the oil-shortage problem and thus get some real relief on this matter during the rest of the winter so that our people may be spared the rigors and hardships that they have suffered and are now facing in even greater degree. I urge the House to support this amendment and all other emergency measures to relieve our people.

Mr. DONOHUE. Mr. Chairman, will the gentleman yield?

Mr. SADLAK. I yield.

Mr. DONOHUE. Mr. Chairman, I rise in support of the amendment offered by my distinguished colleague the gentleman from Massachusetts [Mr. HESELTON], because I share the conviction, based on expert testimony, that our present desperate oil shortage is not a temporary one, but may well continue throughout the next several years to come. With the universal exhortations, by all authorities, to businesses and householders to reduce fuel consumption, it is most appropriate that our Government and its agencies should cooperate in the program of conservation.

When the Federal Government is requesting individuals, as well as State, county, and local governments to conserve, then it surely has the responsibility of leading the way by good example.

The Executive order, issued last month, calling for conservation of fuel oil, and the regulation of the installation of additional oil-burning equipment makes it clear that the Government is well acquainted with the existing situation, and the fact that the prospects for the next few years are not bright; they should, then, do everything possible in order to ease the effects of the present fuel-oil shortage.

I know there is no need for me to make an extended recitation of the existing hardships in so many sections of our country. We in New England are going through the worst winter within memory and experiencing almost daily subzero temperatures.

The people of my district and State fully realize the emergency confronting them; by personal and individual sacrifice, they are doing everything possible to help in this crisis by cutting down their consumption. It would seem that they, and all our taxpayers, have the right to expect Federal agencies to assist them in meeting this problem.

The purpose of this amendment is just that, and I urge its favorable adoption.

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. EDWIN ARTHUR HALL].

Mr. EDWIN ARTHUR HALL. Mr. Chairman, I had a letter from a friend originally from my home city who has settled in Alaska and has been living there for the last few months. He tells me that the average temperature in Alaska, mind you, has been 28 degrees above zero. I leave it to the Representatives from New England and from upState New York who have already spoken to testify and vouch for my statement that our average temperature during the past month has been about 10 degrees below zero. It is a serious situation for the areas of the United States whose people are exposed to that cold.

We are about to commit ourselves to a world-wide program of help. I dare say there is contemplated in the Marshall plan the shipment of a great many tons of coal, countless gallons of fuel oil, and all other methods of heating to the

various countries across the seas. Certainly, if the exigencies and emergencies are so serious that people have to reduce fuel consumption in everybody's home, it is going to be that much more critical when the Marshall plan or any other program of international assistance is put into effect. So, for one, I want to subscribe wholeheartedly to this amendment which has been offered by the gentleman from Massachusetts, because if anybody should set an example it is certainly the departments of Government and the public servants who are housed in the various buildings that are going to be heated. It dovetails exactly with a proposal which I made some weeks ago, which will bring about cooperation between industry and all agencies of Government that have to do with the saving of fuel oil, coal, and fuel in general. It is similar to the objective I have in mind to see that the users of fuel oil and coal are given priority in the home, where families and loved ones must be kept warm. I think every effort should be made to keep up the high standard of living in America so that our people can be kept warm. Behind the iron curtain, in those countries where darkness and despair are evident today, people huddle together in their below-zero dwellings. Government commissars haye priority over everybody else to get fuel of all kinds. They take a ton of coal or a load of wood and use it for themselves, but the rank and file of the people in those unfortunate countries are pushed around and they spend their time shivering and freezing in the cold.

Therefore, I think this amendment should be adopted.

The CHAIRMAN. The time of the gentleman from New York [Mr. EDWIN ARTHUR HALL] has expired.

All time has expired.

The question recurs on the amendment offered by the gentleman from Michigan to the amendment offered by the gentleman from Massachusetts.

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts, as amended.

The amendment, as amended, was agreed to.

The Clerk read as follows:

Access roads: During the fiscal year 1949, not to exceed $70,000 of funds remaining unexpended upon completion of access road projects authorized to be constructed under the provisions of the Defense Highway Act of 1941, as amended by the act of July 2, 1942 (23 U. S. C. 106), shall be available for the maintenance of roads and bridges under the jurisdiction of the Public Roads Administration on Government-owned land in Arlington County, Va.

Mr. RAYBURN. Mr. Chairman, I move to strike out the last word in order to interrogate the committee with reference to this appropriation for Federal aid to roads.

In 1944 we passed a law under which $500,000,000 a year was authorized each year for 3 years for Federal aid to roads. I was instrumental in having written into that act the earmarking of $150,000,000 of the $500,000,000 for farm-to-market roads.

I wish to inquire if there has been a break-down in this bill showing what percentage of the $452,000,000 is to be devoted to farm-to-market roads? The original act, of course, earmarked 30 percent of the $500,000,000 for farm-to-market roads and I am wondering if there has been any break-down of this item so we can know what percentage of this amount is to be used for farm-to-market roads.

In the State of Texas the federally aided highways are in mighty good shape, but our farmers are in the mud.

Mr. WIGGLESWORTH. I may say to the distinguished gentleman from Texas that I doubt if a break-down such as that he has in mind has been furnished to the committee. There is a break-down on page 716 of the hearings but I doubt if that covers the particular matter in which the gentleman is interested.

Mr. THOMAS of Texas. Mr. Chairman, will the gentleman yield?

Mr. RAYBURN. I yield.

Mr. THOMAS of Texas. It is our understanding that when the Congress passed the good roads bill, let us call it, then and there the Federal Government became liable by virtue of the act itself for the Federal part of this fund for the very specific purposes enumerated in the bill. Therefore the $150,000,000 in which the former Speaker is interested is included in the $452,000,000 for this year.

It is our further understanding that the 3-year program will not be carried out in 3 years but will be carried out in perhaps 4 or 4½ years for the simple reason that during the first year and a half labor was scarce and building materials were scarce, and at the request of the committee—and certainly the Public Roads Administration concurred—they did not operate that program through the period of scarcity; but it will be carried out to the very letter of the act, and the farm-to-market roads will be constructed to the full extent intended under that act.

Mr. WHITTINGTON. Mr. Chairman, will the gentleman yield?

Mr. RAYBURN. I yield.

Mr. WHITTINGTON. I would say with respect to authorizations that the Federal Highway Act of 1944 provided, as the gentleman from Texas [Mr. THOMAS] has stated, authorizations for 3 years, but the third year was extended an additional year by act of Congress during the first session of the Eightieth Congress.

In answer to the question of the gentleman from Texas [Mr. RAYBURN] I may say that while the committee apparently is unable to furnish the information asked by him, it strikes me as stated by the gentleman from Texas [Mr. THOMAS] that under this appropriation of $452,288,854 for carrying out the provisions of the Federal Aid Highway Act of 1944 the amount will be spent on Federal-aid highways, farm-to-market roads, urban highways in the percentage as stated by the gentleman from Texas [Mr. RAYBURN]; to wit, that 30 percent of it shall be spent for farm-to-market roads, or secondary roads. The act fixes the relative amount or percentages in the same section for the 3 classes or types of roads.

Mr. RAYBURN. If that is the understanding of the committee, that out of this $452,000,000 appropriated for 1949, 30 percent is going to be spent for farm-to-market roads, it is perfectly satisfactory to me. I just do not want the House to appropriate as big a sum as this, which is getting up pretty close to the limit of the authorization and then have some of our people who want farm-to-market roads cut to below 30 percent of that amount.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. KEFAUVER. Mr. Chairman, I wish to congratulate the members of the Appropriations Committee upon their support of the public roads program. The bill contains $459,588,000, which is almost $200,000,000 more than the 1948 appropriation. It is only $1,000,000 less than the amount authorized by the Budget Bureau. This $1,000,000 reduction is a result of deferring the construction of a testing and research laboratory at Langley, Va. Due to the cost of construction, this laboratory will be built at a later date.

The Federal-aid highway program is of tremendous importance. During the war all highways were heavily used and because of the lack of equipment many of them got in a bad state of repair. The record shows that there is a great increase in highway use in the postwar period. According to the statement of Mr. McDonald, in 1941 we had about 330,000,000,000 vehicle miles and in 1947, 375,000,000,000. This was an increase of more than 12 percent. The major increase seems to be in the use of trucks and busses, the increase from 1941 to 1947 being more than 33 percent.

The interest and cooperation of the local road officials in the secondary-road program has been gratifying. The counties are contributing about 15 percent of the funds required to match secondary-aid funds, and frequently they furnish rights-of-way. I think Congress took an enlightened step in authorizing funds for a Federal-aid system in urban areas in 1944. I am glad that the program for urban areas and also for secondary funds is being continued. The table on page 11 of the report shows the program of projects that have been submitted by the State highway departments. As of December 1, 1947, the total cost of projects submitted for Federal-aid primary funds was in excess of $900,000,000; for Federal-aid secondary funds was in excess of $600,000,000; and for Federal-aid urban was in excess of $400,000,000.

In Tennessee, a highway program of more than $35,000,000 had been submitted as of December 1, 1947. A program of more than $14,000,000 is under construction. Page 717 of the hearings show that projects costing almost $7,500,000 have already been completed. The people demand, and are entitled to, a good system of roads. This includes urban and farm-to-market roads, secondary roads, as well as primary Federal roads. All parts of the system are necessary if we are to have a real road program. I am glad that the Appropriations Committee of the House has accepted the recommendation of the Public Roads Administrator, and I hope that it

will be approved by the Congress as recommended.

The Clerk read as follows:

Penalty mail costs: For deposit in the Treasury for penalty mail of the Interstate Commerce Commission (39 U. S. C. 321d), $35,000.

Mr. GARY. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. GARY: On page 31, following line 4, insert a new paragraph as follows:

"Interstate Commission on the Potomac River Basin.

"Contribution to Interstate Commission on the Potomac River Basin: To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the fiscal year 1949 in the administration of its business in the conservancy district established pursuant to the act of July 11, 1940 (54 Stat. 748) $5,000."

Mr. GARY. Mr. Chairman, the Interstate Commission on the Potomac River Basin was created by Public Resolution 74, Seventy-fifth Congress, approved August 31, 1937. The Congress authorized the States of Maryand, Virginia, West Virginia, Pennsylvania, and the District of Columbia to enter into a compact providing for the creation of a conservancy district to consist of the entire drainage area of the Potomac River, said district to be organized and maintain for the purpose of regulating, controlling, preventing, or otherwise rendering unobjectionable and harmless the pollution of the waters of said Potomac River Basin by sewage and industrial and other wastes.

On July 11, 1940, the President approved Senate Joint Resolution 222—Public Resolution 93, Seventy-sixth Congress—granting the consent of Congress to these States to enter into a compact for the creation of a Potomac Valley Conservancy District and the establishment of the Interstate Commission on the Potomac River Basin. The compact, which is fully set forth in the joint resolution, provides that it will become effective when ratified by a majority of the five signatory bodies and approved by Congress. The compact became effective when ratified by a majority of the five signatory bodies and approved by Congress. The compact became operative May 10, 1941, when three of the five signatory bodies had approved same. Since that time all of the other signatory bodies have approved the compact and are actively participating in the affairs of the Commission.

By law the Federal Government is a member of and participates in the affairs of the Commission through the medium of its three representatives appointed by the President of the United States. One is appointed from the United States Public Health Service, one from the War Department, and the third is a scientist representing the public at large. In actions of the Commission they have the same authority as the members appointed by the several States.

The compact provides that the Interstate Commission in its administration of the business of the conservancy district shall be financed through appropriations from the United States and the signatory bodies in pro rata amounts based on area and population as shall be determined from time to time by the Commission. To date, however, the Federal Government has not paid any pro rata share of the expense of the Commission.

The present expenses of the Commission are distributed among the States as follows: Pennsylvania, $1,800; West Virginia, $2,700; Virginia, $3,600; Maryland, $4,500; and the District of Columbia, $5,400. The Commission requested a Federal contribution of $10,800 for the 1949 fiscal year. That amount was reduced by the Budget Bureau to $9,000. The item was stricken entirely from the bill by the subcommittee. I am merely asking that the item be restored and that the Federal Government contribute $5,000 to this Commission during the next year.

I have several letters from members of the Commission, one of whom is the director of the Virginia State Planning Board. He tells me that additional funds are needed by the Commission. I also have a letter from a member of the House of Delegates of Virginia, who is a member of the Commission.

I therefore hope that this body will see fit to restore the item of $5,000 to the bill.

Mr. WIGGLESWORTH. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, there is a very small amount of money involved in the proposal before the Committee, and it is very hard to oppose the eloquence of the gentleman from Virginia [Mr. GARY] on a matter of this kind.

I just want to point out that the committee was not impressed by the importance of this organization from its testimony. It seems to be devoting itself largely to educational work in the field in which it operates. Furthermore, the committee was not impressed by the proposal before it at that time that the Federal Government should put up $9,000 out of the $27,000 total, in addition to the $5,400 which the District of Columbia is contributing. Therefore the item was eliminated from the bill.

As far as I am concerned, I am content to have the House vote upon the matter as it sees fit.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia [Mr. GARY].

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 207. Except as otherwise provided by law, any appropriations or funds available to the executive departments, independent establishments, and corporations for the payment of salaries and compensation to persons employed outside the continental United States or in Alaska shall be available for the payment of such salaries and compensation only in accordance with regulations prescribed by the President at rates of pay equal to those paid for the same or similar services of persons employed by the Government in continental United States, plus not to exceed 25 percent: *Provided*, That no such salary or compensation shall exceed the maximum provided by the Classification Act of 1923, as amended.

Mr. KEFAUVER. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD at the point where the postwar highway appropriation was under consideration.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. FARRINGTON. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have sought this time for the purpose of clarifying the application of section 207, which provides the authority of the various branches of the Federal Government as to the payment of the 25 percent differential.

In the Territory of Hawaii there are between 20,000 and 30,000 civilians in the employ of the Federal Government. All of those civilians receive a 25 percent differential in pay except the employees in the postal service. For a period of almost 5 years attempts have been made by the postal employees through the Post Office Department and through the representative of the Territory in Congress to obtain for the postal employees this 25 percent differential in pay. The Post Office Department has taken the position that the money could not be paid without specific authority in the law.

On February 12, 1947, I introduced a bill to provide specific authority for the payment of this differential. The Department in a report on April 22, 1947, opposed the enactment of this bill, and then in a second report on August 27, 1947, asked that action on the bill be held in abeyance until an investigation was held.

It is manifestly unfair that the 500 to 600 persons employed in the postal service should receive 25 percent less than the employees in the other services of the Federal Government. I hope, therefore, that under the provisions of this bill the Post Office Department will have the authority to pay that differential. May I ask the chairman of the committee to inform me if this is a correct statement of the case?

Mr. WIGGLESWORTH. My understanding is that all those on foreign service are brought under this provision except where otherwise provided by law. Therefore, the personnel to whom the gentleman refers would be eligible for the increase in accordance with regulations to be prescribed by the President.

Mr. FARRINGTON. Then I am correct in understanding that if this section is enacted into law the Post Office Department will have adequate authority to pay the Federal employees in the Territory of Hawaii the 25 percent differential in pay?

Mr. WIGGLESWORTH. I do not know whether they have the funds, but they would have adequate authority and presumably would ask for funds under that authority.

Mr. WHITTINGTON. Mr. Chairman, will the gentleman yield?

Mr. FARRINGTON. I yield.

Mr. WHITTINGTON. Do I understand from the chairman of this subcommittee that there is authority to pay the postal employees in Hawaii more money and that the same thing might

apply to Alaska and Puerto Rico and other Territories?

Mr. WIGGLESWORTH. This applies to all foreign service personnel.

Mr. WHITTINGTON. I understand, but are not the personnel in the foreign service in the Territories treated just as the employees in the States are in all other legislation? Under this bill, why should the postal service be paid more? Is that not the situation in our Territories? The Territories under our control are entirely different from the situation that obtains in foreign countries which are not under the control of the United States. I think that would be discrimination if postal employees in Hawaii or Alaska and other Territories were paid more than is paid to postal employees in the States. I cannot understand it. I do not see why that discrimination should exist or what authority under the law the Post Office Department may have to pay them more money.

Mr. FARRINGTON. The postal employees of Alaska do receive this 25 percent differential. There is a long history behind the payment of that 25 percent. It arose out of the conditions that developed during the war. I do not have the time to outline that now, but it came about through the necessity of moving a great many people to those areas for the purpose of prosecuting the war and also because of the high cost of living in those areas.

Mr. WHITTINGTON. Mr. Chairman, I think this is a most unfortunate time to advance the proposition that because it was necessary to win the war, a Territory of the United States should pay its postal employees 25 percent more than employees are paid in the States.

Mr. FARRINGTON. I am not making that contention at all. I am merely asking that the postal employees be treated on exactly the same basis as are all other Federal employees in the Territory of Hawaii. The Congress of the United States decided what the other employees should be paid. We did not make that decision in Hawaii. You made that decision here, and I am only asking that these people be placed on the same basis. I want to thank the chairman of the committee and the committee for putting this provision in the bill.

The CHAIRMAN. The time of the Delegate from Hawaii has expired. The pro forma amendments are withdrawn.

The Clerk concluded the reading of the bill.

Mr. WIGGLESWORTH. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. LEONARD W. HALL, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 5214) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1949, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. WIGGLESWORTH. Mr. Speaker, I move the previous question on the bill and all amendments thereto to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them en gross.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced the ayes appeared to have it.

Mr. SMITH of Ohio. Mr. Speaker, I object to the vote on the ground that a quorum is not present.

The SPEAKER. The Chair will count. [After counting.] Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant-at-Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 339, nays 10, not voting 81, as follows:

So the bill was passed.

The Clerk announced the following pairs:

General pairs until further notice:

Mr. Halleck with Mr. Harrison.

Mr. Towe with Mr. Klein.

Mr. Bakewell with Mr. Dingell.
Mr. Bennett of Missouri with Mr. Evins.
Mr. Coudert with Mr. Chapman.
Mr. Knutson with Mr. Lynch.
Mr. Wadsworth with Mr. Keogh.
Mr. Thomas of New Jersey with Mr. Hedrick.
Mrs. Smith of Maine with Mr. Morgan.
Mr. Simpson of Pennsylvania with Mr. Rooney.
Mr. Jones of Washington with Mr. Hays.
Mr. Jenkins of Ohio with Mrs. Norton.
Mr. Cole of New York with Mr. Hart.
Mr. Chiperfield with Mr. Fallon.
Mr. Gross with Mr. Celler.
Mr. Talle with Mr. Lucas.
Mr. Scoblick with Mr. Multer.
Mr. Hartley with Mr. Sikes.
Mr. Carson with Mr. Walter.
Mr. McGarvey with Mr. Byrne of New York.
Mr. Smith of Kansas with Mr. O'Brien.
Mr. Ploeser with Mr. Pfeifer.
Mr. Owens with Mr. Morrison.
Mr. Dirksen with Mr. Buckley.
Mr. Ellsworth with Mr. Dawson of Illinois.
Mr. Gallagher with Mr. Ludlow.
Mr. Fuller with Mr. Redden.
Mr. McDowell with Mr. Smith of Virginia.
Mr. Lewis with Mr. West.
Mr. Jenkins of Pennsylvania with Mr. Johnson of Oklahoma.
Mr. Hope with Mr. Kennedy.
Mr. Herter with Mr. Bland.
Mr. Fulton with Mr. Camp.
Mr. Gillette with Mr. Davis of Tennessee.
Mr. Gwinn of New York with Mr. Heffernan.
Mr. Martin of Iowa with Mr. Clark.
Mr. Reeves with Mr. Kee.
Mr. Rizley with Mr. Wilson of Texas.
Mr. Mason with Mr. Granger.
Mr. Keefe with Mr. Bloom.

Mr. CHURCH changed his vote from "yea" to "nay."

Mr. MILLS changed his vote from "nay" to "yea."

Mr. SCHWABE of Missouri changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

The doors were opened.

A motion to reconsider was laid on the table.

REGULATING BUSINESS OF LIFE INSURANCE IN THE DISTRICT OF COLUMBIA

Mr. BATES of Massachusetts. Mr. Speaker, yesterday, in passing House Concurrent Resolution 146, a typographical error was made. I ask unanimous consent to vacate the proceedings of the House by which the concurrent resolution was passed in order to offer an amendment.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts [Mr. BATES]?

There was no objection.

Mr. BATES of Massachusetts. Mr. Speaker, I ask for the immediate consideration of House Concurrent Resolution 146, and I have an amendment which I wish to offer.

The Clerk read the resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That the Clerk of the House of Representatives, in the enrollment of the bill (H. R. 1634) to amend section 1, and provisions (6), (7), and (8) of section 3, and provision (3) of section 4 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia", and to add sections 5a, 5b, and 5c thereto, is authorized and directed to make the following corrections in the House engrossed bill:

Page 8, line 3, after "one" insert the following: "per centum."

Page 13, line 20, strike out "5" and insert in lieu thereof the following: "5b."

Page 13, line 20, strike out "in" and insert in lieu thereof the following: "In."

Mr. BATES of Massachusetts. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BATES of Massachusetts: On page 1 of the engrossed resolution, strike out lines 11 and 12.

The amendment was agreed to.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

TO RAISE THE CEILINGS AND ALLOWANCES PAYABLE TO VETERANS UNDERGOING TRAINING ON THE JOB

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 1393) to raise the ceilings on wages and allowances payable to veterans undergoing training on the job, and for other purposes, with House amendments, insist on the amendments of the House, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts? [After a pause.] The Chair hears none and appoints the following conferees:

Mrs. ROGERS of Massachusetts, Mr. KEARNEY, Mr. O'KONSKI, Mr. RANKIN, and Mr. ALLEN of Louisiana.

EXTENSION OF REMARKS

Mr. LECOMPTE asked and was granted permission to extend his remarks in the Appendix of the RECORD and include a resolution of the Iowa Farm Bureau Federation.

Mr. O'HARA asked and was granted permission to extend his remarks in the RECORD and include a newspaper item.

Mr. MARCANTONIO asked and was given permission to extend his remarks in the Appendix of the RECORD and include a statement by the Joint Maritime Committee.

Mr. PASSMAN asked and was given permission to extend his remarks in the Appendix of the RECORD and include a message he sent to Governor Davis, of Louisiana.

Mr. WILLIAMS (at the request of Mr. PASSMAN) was given permission to extend his remarks in the Appendix of the RECORD and include a resolution.

Mr. McCORMACK asked and was given permission to extend his remarks in the Appendix of the RECORD.

Mr. CHELF asked and was given permission to extend his remarks in the Appendix of the RECORD by inserting a letter from Dr. Boris Klasons, recently an inmate of a displaced-persons camp.

Mr. MADDEN asked and was given permission to extend his remarks in the Appendix of the RECORD and to include a news item from the Railway Trainman.

Mr. SADOWSKI asked and was given permission to extend his remarks in the RECORD and to include excerpts from a newspaper.

SPECIAL ORDER GRANTED

Mr. VURSELL. Mr. Speaker, I ask unanimous consent to address the House for 30 minutes on Tuesday next, following the business of the day and other special orders entered for that date.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. REEVES, for 1 week, on account of illness.

The SPEAKER. Under the previous order of the House the gentleman from Colorado [Mr. HILL] is recognized for 45 minutes.

AMERICAN AGRICULTURE AND FARM-MACHINERY EXPORT

Mr. HILL. Mr. Speaker, agriculture forms the basis of our prosperity. A prosperous, successful, and forward-looking program for our agricultural activities is a basic essential if the United States is to meet its opportunities and possibilities during the postwar period. Should we permit our agriculture to shrink, develop anemia, or any portion of it shrivel on the vine, the immediate effect on world peace and prosperity could and would be apparent. Therefore, any program or part of a program developed by the many departments of our Federal Government that hampers, hinders, or completely destroys segments of our agricultural production is definitely injurious, not only to agriculture but to our entire economic life.

Throughout the war our agricultural production increased about 30 percent and at the same time farmers could not secure sufficient farm labor nor were they able to purchase new machinery or even keep the old machinery in proper repair. This increased production was brought about by the pressure of the war and the fact that farm family after farm family had relatives, sons, and daughters in the service and the entire family was willing and anxious to produce to the limit. Long hours, hard work, was the usual procedure. Many farmers who had retired returned to the field to carry on the work of the sons who were on the battlefield. The war has been over nearly 2½ years, farm production is still high, but the pressure of the war is removed and farm people cannot be expected to continue the long and dreary hours of hard work that was necessary during the war years.

It certainly is discouraging for our farmers to learn that much farm equipment, new and modern, has been sent to foreign countries; yes, even to our former enemies. Many of them feel it is about time we carefully examine just how this export of farm equipment is affecting American agriculture.

As part of my remarks I want to read a careful analysis of farm exports made by one of the largest retail farm-equipment associations in the United States. Let me tell you something about the organization that made this analysis.

The National Retail Farm Equipment Association was organized in 1900.

There are 35 State and regional affiliated organizations that embrace the entire United States. The membership January 31, 1948, was 17,146. That is more than 85 percent of all of the retail implement dealers in the United States. They are located in some 3,000 out of the 3,069 counties. All of them are in rural areas where it is convenient for the farmer to secure his machinery, repair parts, and service.

The local implement dealers contributed greatly to the production of food supplies throughout the war by keeping the farmers' old equipment in operating condition. They did this through making repair parts when they were not available through the factory. They operated in their jobs over long hours and under most adverse conditions; such as shortages of manpower and factory-built parts. And it would not have been possible for the farmers of America to have continued to produce increased supplies of foods, fats, and fiber each year since 1940 if it had not been for the service rendered by the local implement dealers.

There has been throughout the war and continues even until today an acute shortage of power farm equipment. Tractors, combines, balers, and other principal labor-saving farm machines are needed on the farms to replace the manpower that has been lost and to make possible continued high production of food supplies. During the war the farmers were compelled to operate their equipment over much longer periods than usual. Many of their machines need replacement and many additional farmers are aware of the crop-producing quality of power equipment and they wish to complete their mechanization program. The shortages of raw materials and labor disputes in the factories during 1947 seriously affected the output, and there is not a single dealer or company that does not have long lists of farmers who are in need of modern power farm equipment.

Unquestionably there were many acres that were not cropped in 1947 following the floods in the central part of the country and Midwest due to the lack of machinery needed to prepare the soil, plant, cultivate, and harvest the crops. Agricultural leaders in many other areas have reported that an adequate supply of machinery would enable them to put a much greater acreage into production this year. That is particularly true of the feed crops; such as grains, wheat, corn, and oats.

According to the Department of Commerce statistics, 1946 exports of farm machinery to the 16 European-recovery-program nations was less than $30,000,000. A commodity report on the European-recovery program recently issued by the Department of Commerce shows that these same 16 nations are asking for more than $300,000,000 of farm machinery from the United States for this next year. The report further states that it appears that $160,000,000 of farm machinery can be supplied to them without serious impact on American agriculture. Note that this figure of $160,000,000 which the Department of Commerce indicates can be supplied is more than five times the export rate of machinery in 1946.

Let me now read the article taken from Farm Equipment Retailing, a magazine published by the executive secretary of the National Retail Farm Equipment Association, Paul M. Mulliken, St. Louis, Mo. I quote:

ANALYZING FARM-EQUIPMENT EXPORTS

There is a general impression in this country (except among farmers and implement men) that there has been little or no farm equipment exported to the 16 countries to be considered under the provisions of the Marshall plan, and yet, the export figures compiled by the United States Department of Commerce show tremendous increases in the amount of equipment sent to these countries in 1946 and the first 5 months of 1947; no doubt due to large shipments under UNRRA.

To illustrate, by far the greatest export increases went to Russia and Russian-dominated countries—Austria, Czechoslovakia, Poland, and Yugoslavia—although other countries, France included, received substantial increases.

When Poland was free—and spending her own dollars—back in 1938—she imported only $32,000 worth of farm machinery and implements from this country. But in 1946 United States manufacturers, under UNRRA, were obliged to ship $2,291,000 of farm equipment, a percentage increase of 7,060 percent over 1938. And for the first 5 months of 1947, until controls were removed from exports, Poland received $3,000,000 in farm equipment from the United States or a percentage increase over-all of 1938 of 9,275 percent.

Czechoslovakia managed to get along on $110,000 worth of United States farm machinery production in 1938 but required $1,329,000 worth in 1946, a percentage increase over 1938 of 1,108.2 percent and in the first 5 months of last year received $1,133,000 worth, a percentage increase over 1938 totals of 930 percent.

Yugoslavia did with a mere $24,000 worth of United States farm equipment in 1938 but received $2,183,000 worth in 1946, 9,000 percent more than 1938. In the first 5 months of last year Yugoslavia had received farm equipment from the United States valued at $991,000, an increase of 4,029.2 percent over 1938.

Russia, whose tractor plants were reported destroyed during the war, needed $147,000 worth of equipment in 1938 but received $1,618,000 worth in 1946, a percentage increase over 1938 of 1,000.1 percent In the first 5 months of 1947 Russia received $2,324.000 worth of equipment or an increase of 1,487.7 percent over 1938.

The United Kingdom during 1938 purchased $3,496,000 worth of farm equipment from the United States and in 1946 this was increased to only $3,972,000 or 8.5 percent more equipment. For the first 5 months of 1947, slightly more, $3,967,000 worth, was purchased which amounted to 13.5 percent more than 1938. Unlike western European countries, Great Britain seems to have been able to manufacture much of its own equipment.

France received $1,386,000 worth of farm equipment in 1938, $11,754,000 worth in 1946 for an increase of 748.05 percent. In the first 5 months of 1947 France received equipment valued at $8,522,000 or a percentage increase over 1932 of 514.8 percent. France is one of the 16 nations under the Marshall plan set to receive a large amount of aid.

North American countries during the first 5 months of last year received a 124.8-percent increase in United States farm equipment over the amount they received in 1938; South American countries received approximately the same amount as in 1938; African countries received an increase of 27.3 percent, European countries 155.1 percent more, Asia and Oceania countries an increase of 7 percent.

Figures are not available from the Bureau of Census on exports made after May 1947, when controls were lifted, but these were probably much less after the expiration of the UNRRA program.

For comparative purposes the year 1938 was chosen (1) because it was the last year when world-wide peace reigned, and (2) farm-equipment exports from this country were greater in 1938 than they had been in a score of years.

Since almost 100 percent of all farm equipment exported since 1945 to the above-mentioned countries should be presumed to be in operative condition, it is obvious that farm equipment export needs called for by the Marshall plan should take into consideration the existence in these countries of this huge amount of equipment.

There is a question in the minds of many farm-equipment men as to how and on what basis the needs of ERP were determined. For instance, there is considerable variance in United States export statistics relating to farm equipment—even in the same Government bureaus and departments.

The Bureau of Census, United States Department of Commerce, reports farm-equipment exports of $69,578,000 in 1944, while the United States Statistical Abstract, published by the same United States Department of Commerce, reports (p. 901, 1946 edition) that exports of tractors and agricultural implements in 1944 amounted to $166,608,000, a difference of $97,030,000. It may be assumed that the larger figure includes shipments under UNRRA and possibly crawler-type tractors.
